166, 281, 505 55

The requirements of the sinking fund for the past fiscal year, including a balance of \$16,305,873.47 from the preceding year, have been fully met. It is estimated that the requirement for the present fiscal year will be \$44,422,956.25, of which there has been applied during the first four months of the year, the sum of \$31,196,350.

There seems to have been confusion in some minds, of the sums paid to meet the lawful needs of the sinking fund, and those paid for the reduction of public debt by direct payment and redemption thereof. To my report of last year was appended a table (Table L) of all the moneys paid for bonds for the sinking-fund; and a table (Table I) showing the condition of that fund from the beginning of it in May, 1869, down to June 30, 1881. It was stated in my report that there was a balance then due the fund of \$16,305,873.47. It has been said The report of my predecessor, Mr. Secretary that this was erroneous. Morrill, made in 1876, was relied upon as so showing. He said that the terms of the sinking fund act required that the public debt should be reduced by the close of the fiscal year in 1876 by the sum of \$433,848,215.87; that the public debt had, however, been reduced at that time by the sum of \$656,992,226.14, or over two hundred and twenty-three millions more than those terms required. He did not say, nor did he mean to say, that the reduction he announced was achieved through the operations of the sinking-fund. What he said, and meant to say, was that, though the sinking-fund had not been filled to the amount contemplated by the act of Congress which provided for it, and so the letter of the law had not been observed, yet that, by other modes, the public debt had been reduced by more than the sum which the sinking-fund act contemplated, and so the spirit and intent of the law had been met and the faith of the Government with its creditors kept. And so, after his time, though the sinking-fund has been a creditor, the public debt has been decreased by more than a strict adherence to the sinking-fund act would have brought about. My predecessor, Mr. Secretary Sherman, reported in 1877 a deficiency in the sinking-fund, but a reduction of public debt near two hundred and twenty-one millions more than the sinking-fund act, literally carried out, would have effected.

Compared with the previous fiscal year, the receipts for 1882 have in the following items increased \$44,578,081.99: In customs revenue, \$22,251,054.23; in internal revenue, \$11,233,209.94; in sales of public lands, \$2,551,277.20; in direct tax, \$158,624.80; in tax on circulation and deposits of national banks, \$840,678.73; in proceeds of sales of Government property, \$52,785.85; in repayment of interest by Pacific Railway Companies, \$29,720.57; in consular fees, \$8,922.98; in customhouse fees, \$7,538.35; in customs emolument fees, \$155,083.98; in marine-hospital tax, \$22,155.89; in Indian trust funds, interest and premium, \$5,753,308.29; in deposits by individuals for surveying public lands, \$248,160.81; in registers' and receivers' fees, \$243,295.29; in fees on letters-patent, \$141,788.72; in profits on coinage, \$648,208.12; and in sales of ordnance material and small stores, \$232,268.24. There was a decrease of \$1,835,124.28, as follows: In revenues of the District of Columbia, \$301,022.82; in sinking-fund for Pacific Railway Companies, \$8,909.12; in customs fines, penalties, and forfeitures, \$44,789.19; in steamboat fees, \$27,664.91; in sales of Indian lands, and interest on deferred payments, \$1,078,316.30; and in miscellaneous items, \$374,421.94; making a net increase in the receipts from all sources of \$42,742,957.71.

The expenditures show a decrease over the previous year of \$20,343,982.30, as follows: In the Navy Department, \$654,625.40; in interest on the public debt, \$11,431,534.39; and in civil and miscellaneous, \$8,257,822.51. There was an increase of \$17,612,534.28, as follows: In the War Department, \$3,104,033.64; for Indians, \$3,222,586.31; and in pensions, \$11,285,914.33—making a net decrease in the expenditures of \$2,731,448.02.

FISCAL YEAR 1883.

For the present fiscal year the revenue, actual and estimated, is as follows:

Source.	For the quarter ended Septem- ber 30, 1882.	For the remaining three quarters of the year.
	Actual.	Estimated.
From customs. From internal revenue. From sales of public lands. From tax on circulation and deposits of national banks. From repayment of interest and sinking-fund, Pacific Railway Companies From customs fees, fines, penalties, &c. From fees—consular, letters-patent, and lands. From proceeds of sales of Government property. From profits on coinage, &c From deposits for surveying public lands. From revenues of the District of Columbia. Total estimated expenditures, including sinking-fund.	340, 280, 162 22
Or, an estimated surplus of	74, 719, 837 78

Excluding the sinking-fund, the estimated expenditures will be \$295,207,939.68, showing an expected surplus of \$119,792,060.32.

REDEMPTION OF U. S. BONDS.

At the date of the last annual report to Congress, the interest-bearing debt which was redeemable at the pleasure of the Government was as follows:

Act of March 3, 1863, continued at three and a half per cent	, 926, 350 , 949, 700
Five per cent. funded loan, continued at three and a half per cent	, 504, 900
Total	380, 950
Of the above bonds there have been redeemed during ended October 31, 1882, the following:	the year
Loan of July and August, 1861, continued at three and half per cent	, 622, 800
per cent. 30, Five per cent. funded loan.	$878,350 \\ 9,700$

EXCHANGE OF THREE AND A HALF PER CENT. CONTINUED BONDS INTO THREE PER CENT. BONDS.

141, 510, 850

On July 1, 1882, the interest-bearing debt which was redeemable at the pleasure of the Government, exclusive of \$11,137,050 three and a half per cent continued bonds of the loan of July and August, 1861, which had been called, and which became due on that day, was as follows:

Act of March 3, 1863, continued at three and a half per cent	.\$47.820.100
Five per cent. funded loan of 1881, at three and a half	
per cent	

Included in the above were \$15,000,000 in bonds of the act of March 3, 1863, which had been called to mature August 1, 1882, and the

^{*} Including \$12,035,500 which had been called, but which had not then matured.

amount of bonds available for exchange, as contemplated in legislation then pending, was still further reduced by the call issued July 10, 1882, for \$16,000,000, to mature September 13, 1882.

By the eleventh section of the act approved July 12, 1882, entitled "An act to enable national banking associations to extend their corporate existence, and for other purposes," the Secretary was authorized to receive at the Treasury, bonds of the United States bearing three and a half per cent. interest, and to issue in exchange therefor registered bonds of the United States bearing interest at the rate of three per cent. per annum.

These bonds were to be redeemable at the pleasure of the United States, after all bonds bearing a higher rate of interest, and which were thus redeemable, had been redeemed or called. There is also the important provision that the last of the bonds issued under the act, and the substitutes for them, should be the first called for payment, and that this order of payment should be followed until all should have been paid. Thereby the bonds first issued, and the substitutes for them made on the assignment and transfer of them, were made more desirable, as likely to have a longer time to run. This gave rise to the query, how the order of issue of the "threes" to the holders of the "three and a halfs" should be determined. A method was devised by the Department which gave the precedence to diligence in offer of surrender of the three and a halfs; and which determined by lot, giving the same chance of priority to all having part in it, who of the equally diligent should have the first privilege in issue. It is believed that justice was done The provision that the substituted bonds should have the same rank with the originals, in the order of call for payment, was at first thought to preclude the holder from a division of one bond of larger denomination into two or more bonds of smaller denomination. have maintained this, would have inconvenienced the transfer and division of securities among several alike interested in a large bond. But as it was impracticable to divide one bond into two or more and give to the latter the number of the former, and so preserve the right to be deferred in calls for payment, it has been determined to yield to a wish for a division, upon the holder waiving that right in express terms in the instrument of assignment. This puts upon the Register's Office more labor and the greater exercise of care, but, being a convenience to the holder of the bond, they will be cheerfully undertaken.

On the day following the approval of the act, the Secretary issued a circular announcing the readiness of the Department to effect the exchange thus provided for; August 1, 1882, being named as the date

upon which said exchange would begin. Under the provisions of the act the exchanges of the three and a half per cent continued bonds began on the date named and continued until September 20, upon which date they were temporarily suspended, in order to allow the preparation of the schedules and checks for the dividend due November 1 on the three and a half per cent bonds which had not been exchanged, as well as upon the new three per cent bonds which had been issued.

From the beginning of the exchanges until the suspension three and a half per cent. continued bonds were received for exchange into three per cent. bonds as follows:

Act of March 3, 1863, continued at three and a half per	
cent	\$13, 231, 650
Five per cent. funded loan of 1881, continued at three and	
a half per cent	246, 138, 850

The interest on the surrendered bonds was adjusted to August 1, 1882, and the three per cent. bonds issued in exchange therefor carried interest from that date.

The exchanges were resumed November 1, since which time there have been received \$21,024,250 in three and a half per cent. continued bonds, for which a like amount of three per cent. bonds have been issued; making a total issue to December 1, 1882, of \$280,394,750.

The reduction in the annual interest charge by reason of these exchanges is \$1,401,973.75.

The Department knows no reason why it should not continue to afford every facility for these exchanges so long as three and a half per cent. bonds remain outstanding and uncalled.

The following table shows the changes in the interest bearing debt during the year:

Loan.	Amount out- standing Nov. 1, 1881.	Redeemed dur- ing the year.	Exchanged into 3 per cent. bonds.	Outstanding Nov. 1, 1882.
July and August, 1861, continued at 3½ per ct. March 3, 1863, continued at 3½ per cent Five per cent. funded	\$113, 926, 350 47, 949, 700	\$110, 622, 800 30, 878, 350	\$13, 231, 650	\$3,303,550 3,839,700
loan continued at 3½ per cent	401, 504, 900	9,700	246, 138, 850	155, 356, 350
	563, 380, 950	141, 510, 850	259, 370, 500	162, 499, 600

Of the bonds above set down as outstanding, those embraced in the loans of July and August, 1861, and March 3, 1863, amounting to \$7,143,250, are called, and have ceased to bear interest; making a total of bonds redeemed during the year or which have ceased to bear interest of \$148,654,100.

Calls are now out for continued bonds of the five per cent. funded loan amounting to \$55,000,000, and the bonds will cease to bear interest during the months of December, 1882, and January and February, 1883.

The reduction in the annual interest charge by reason of these changes to November 1, 1882, is as follows:

On bonds redeemed or interest ceased	\$5, 202, 893 50 1, 296, 852 50
Total Deduct for interest on four per cent. bonds issued, &c	6, 499, 746 00 222 00
Net reduction	6, 499, 524 00

STANDARD SILVER DOLLARS AND SILVER CERTIFICATES.

There had been coined, on November 1, 1882, under the 28, 1878, of standard silver dollars	\$128, 329, 880
And in circulation	35, 383, 786 34, 000, 000
Increase	1,383,786

The increase in the circulation of standard silver dollars between November 1, 1881, and November 1, 1882, was less than a million and a half of dollars. The amount coined during the same time was \$27,772,075. The supply in the aggregate, and furnished yearly, is much more than the demand.

Of the above amount held by the Treasury November 1, 1882, there were in the sub-treasury at New York about \$19,000,000, and in the vaults of the assistant treasurer at San Francisco nearly \$14,000,000, and in the mint at that place nearly \$27,000,000, making nearly \$41,000,000 in San Francisco. This large accumulation at San Francisco is useless; the call for silver dollars for use as money there is little. The reason for the accumulation there is this: The mints this side the mountains could not do the needed coinage of gold, and coin also the minimum amount of silver dollars required by the law. After

the silver dollars had been coined there, there was not good policy in bringing them away, for there was no unsatisfied call for them on this coast, and the expense of carriage is great, never less than one per cent. Besides that, the vaults on this side are inconveniently taxed in the storage of what is here. Indeed, the storage capacity of the mints and other vault-room of the Government is everywhere severely taxed. There were on hand in the sub-treasury on November 1, 1882, \$26,884,337.62 of fractional silver coin. In all, there were 2,400 tons of silver coin stored in the public vaults. If the coinage of standard silver dollars is kept up, and the demand for them for circulation is as dormant as now, it will be a serious question where the Treasury Department will find, in public receptacles, storage-room therefor.

Another reason for the coinage at San Francisco is, that all the bullion for the monthly coinage required by law could not be bought on this side of the mountains at the market rate as required by the law, and that portion bought on the Pacific side was coined there because it would cost so much to bring it to this side for coinage, even if there had been mint facilities therefor.

The amount of silver certificates outstanding November 1, 1881, was about \$66,000,000, and the amount outstanding November 1, 1882, about \$65,500,000. The Treasury holds nearly all the standard silver dollars coined during the year ended November 1, 1882. The amount of silver certificates outstanding has lessened during the same time. Judging from past experience, we need not expect an increased demand for silver dollars.

Inasmuch as by recent legislation the Secretary is required to issue gold certificates, it is to be looked for that the place of the silver certificates will be to a great extent supplied by gold certificates, as the latter are furnished in convenient denominations; and it is just to suppose that a certificate payable in a coin worth but eighty-eight per cent. of its nominal value will be displaced by one worth fully its nominal value.

Is the idea vain that the continued coinage of silver dollars is not now required for circulation of them, or as a basis for the issue of such certificates, and that the policy of the Government, so far as it was meant to increase the price of silver, has not been successful?

As was stated in the report of last year, the act requiring the issue of silver certificates; making them receivable for customs and all public dues, was a part of the policy of Congress to maintain the standard of the silver dollar at or near that of the gold dollar.

The objections then urged to the issue of silver certificates, viz., that they form an inexpedient addition to the paper currency; that they

are made a legal-tender for the purposes named for more than their real value; that there is no promise on the part of the Government to pay the difference between their actual and nominal value; and the embarrassments which arise from the endeavor to maintain several standards of value, still have their force.

There is just now a seemingly greater demand for silver dollars. It is only in seeming. The process is this: Gold is deposited in New York. For that, by arrangement, silver dollars are taken from the mint at New Orleans. They are not put into circulation. They are deposited at once in the sub-treasury there, and silver certificates taken to meet immediate pressing needs for currency. As gold certificates are now going into business hands in New Orleans, the process above stated will probably cease, as it is not looked for that silver certificates will be sought rather than the gold certificates. That process keeps the silver dollars out of the Treasury but a short time, and does not put them into general circulation.

I refer for a more full discussion of this subject to my report of last year, and repeat my recommendation that the provision for the coinage of a fixed amount of standard silver dollars each month be repealed and the Department be authorized to coin only so much as will be necessary to supply the demand.

The recommendation is renewed for the repeal of the act requiring the issue of silver certificates, and for a law authorizing measures for their early retirement from circulation.

The international monetary conference met in April last, on the day to which it had adjourned, and adjourned again *sine die*. It is not understood that it effected any important practical result.

GOLD CERTIFICATES.

Under the act of the last session of Congress gold certificates have been prepared and have been issued, as is shown in this table:

Denominations.	Gold certificates ready for issue.	Gold certificates issued Novem- ber 27, 1882.
\$20's. 50's. 100's. 500's. 1000's. 5000's. 10000's.	 7, 600, 000 10, 000, 000 12, 000, 000 20, 000, 000	\$2,240,000 2,200,000 3,000,000 5,050,000 4,300,000 4,500,000 10,000,000
Total		31, 290, 000

CONVERSION OF REFUNDING CERTIFICATES.

At the date of the last report refunding certificates issued under the act of February 26, 1879, remained outstanding to the amount of \$589,050.

There have been presented during the year for conversion into four per cent. bonds, certificates amounting to \$174,300, leaving still unconverted \$423,750.

In the language of the act, these certificates are "convertible at any time, with accrued interest, into the four per cent. bonds described in the refunding act." Prior to May 1, 1882, it had been the practice of the Department to convert the principal only of the certificates into four per cent. bonds, paying the interest accrued on the certificates in lawful money.

A holder of refunding certificates having made a demand upon the Department to have the interest accrued on his certificates, as well as the principal thereof, converted into four per cent. bonds, the question was referred to the Department of Justice for examination. In the opinion of the Attorney-General which was furnished this Department, the claim thus made was held to be justified by the language of the act, and on conversions effected since May 1, four per cent. bonds have been issued in satisfaction of the interest accrued on the certificates, in lieu of the payment of lawful money, in all cases where such interest amounted to a sum sufficient to entitle the holder to a bond.

Up to November 1, 1882, \$5,500 in four per cent. bonds have been issued in this manner, making an increase to that extent of the amount of such bonds outstanding, but not increasing the total debt.

CONTINUED TRUST-FUND BONDS.

It was stated in the last report that \$451,350 in bonds of the five per cent. funded loan, held by the Secretary of the Treasury as a part of the sinking fund for the Pacific Railroads, had been continued at three and a half per cent., and that \$52,000 in bonds of the same loan, held in trust for the South Carolina school-fund, had also been continued in preference to allowing the bonds to be redeemed and investing the proceeds in other bonds.

For the same reason the three and a half per cent. bonds have now been exchanged into three per cent. bonds of the act of July 12, 1882.

COINS AND COINAGE.

The report of the Director of the Mint gives, in detail, the transactions of the mint, and assay offices during the year, together with sta-

tistics and inquiries into the financial condition of our own and foreign countries.

The imports of foreign gold coin and bullion were during the previous year ninety-seven and one-half millions. During the last fiscal year the excess of imports over exports was about one and three-quarter millions.

There were during the fiscal year ended June 30, 1882,	exports of—
Gold bullion	\$1,600,436 29,805,289 1,182,155
Total	32, 587, 880
Silver bullion Silver coin, American Silver coin, foreign	\$11,732,340
Total	16, 829, 599
Total gold and silver	\$49, 417, 479
There were imports of—	
There were imports of— Gold bullion Gold coin, American Gold coin, foreign	
Gold bullion	4, 796, 630 20, 174, 371
Gold bullion Gold coin, American Gold coin, foreign	4, 796, 630 20, 174, 371 34, 377, 054 \$2, 121, 733 940, 877
Gold bullion Gold coin, American Gold coin, foreign Total Silver bullion Silver coin, American	4, 796, 630 20, 174, 371 34, 377, 054 \$2, 121, 733 940, 877 5, 032, 726

There were deposited at the mints and assay offices \$66,756,653 of gold, which was \$74,000,000 less than the preceding year, because of the decrease in the imports.

The coinage at the mints during the fiscal year was-

Standard silver Fractional silver	dollars	 27, 772, 075 11, 313	$\begin{array}{c} 00 \\ 75 \end{array}$
Total		 117, 841, 594	00

The coinage of gold was nearly \$11,000,000 more than that of any previous year in the history of the mints. About one half of this was in eagles, one-third in half-eagles, and the rest in double-eagles.

The purchase of silver for coinage during the year was 23,627,229.37 ounces of standard silver, at a cost of \$24,136,942.20, an average of \$1.02.15 per ounce standard. The average London price for silver was $51\frac{13}{16}$ pence per ounce of British standard tineness, equivalent to \$1.02.26 per ounce United States standard, and the average New York price was \$1.02,419 per ounce standard.

During the year, about \$29,000 of punched and mutilated silver coinswere purchased and melted for recoinage.

The silver coinage consisted of \$27,772,075 in standard dollars, and \$11,313.75 in fractional coin, a total of \$27,783,388.75.

The profits on the silver coinage amount to \$3,440,887.15, of which \$3,438,829.41 were from the coinage of the dollar, and \$2,057.74 from fractional coin.

When the financial report of this Department was made last year, public queries were started whether the profits on coinage were truly given. To satisfy myself and please a proper public scrutiny, I called a fitting official person from the assistant treasurer's office at New York, and charged him with a thorough investigation of the matter. What he did appears in his report appended hereto (Appendix, page 53). I think it is complete and satisfactory, and puts at rest any doubt that the accounts have been accurately kept and truly reported.

During the year the mints distributed 15,747,463 standard silver dollars, leaving in their vaults 35,365,672, from the coinage of this and former years.

Of the minor or base-metal coins, 46,865,725 pieces were struck, in value \$644,757.75. Of this, 4,400,775 pieces, in value \$220,038.75, were five-cent nickel coins, for which the demand was large during the year. The rest of it was principally of one-cent pieces.

Besides the coinage, \$37,505,120 worth of gold and \$8,129,202 worth of silver was made into bars.

Up to October 1, under the act of May 26, 1882, \$6,588,000.06 in fine gold bars fit for export were changed for gold coin at the New York assay office, thus saving the expense of coinage.

The coin circulation of the country on July 1, 1881, is estimated, from the statistics of coinage and net imports of coin, to have been—

 United States gold coin
 \$439,776,753

 United States silver coin
 171,459,766

Total, 611, 236, 519

The increase	on	the	30th	of	June	last,	by	coinage	and	imports	of
coin, was			•								

United States gold coin United States silver coin	\$500, 882, 185 199, 573, 360
Total	700, 455, 545

There was further increase by coinage and imports during the next quarter of \$11,308,851 in gold, and \$7,036,410 in silver.

The mints and assay offices on the 1st of October also held for coinage \$51,440,420 in gold bullion, and \$3,343,565 in silver bullion, making the stock of United States coin and bullion available for coinage on October 1—

Total	773, 584, 791

THE NATIONAL BANKS.

The affairs of the national banks during the current year are treated of more fully in the report of the Comptroller of the Currency than space will permit herein. It gives an abstract of their resources and liabilities for each year since the national-bank system went into operation, together with statistical information for a series of years, drawn from official sources, of the affairs of private bankers, savingsbanks, and banking associations organized under State laws.

The number of national banks organized during the year is 171, which is the greatest number organized during any year since 1872. The number of banks in operation is 2,269; more than at any previous date. They are located in every State and organized Territory of the Union. The returns made by them show that on October 3d of the present year they had as aggregate capital \$483,104,213; as surplus, \$131,977,450; as individual deposits, \$1,122,472,682; had made loans in amount, \$1,238,286,524; and held in specie, \$102,857,778.

The number of banks whose corporate existence either has expired, or would have expired if no action had been taken by their stockholders, is eighty-six. The stockholders of fifty-four of them, which have been placed in voluntary liquidation or whose charters have expired by limitation, have organized new banks in the same localities.

The stockholders of thirty banks have extended their existence under the act passed at the last session of Congress. That act was well adapted to the purpose intended.

The corporate existence of 305 other banks will expire before February 25, 1883. Nearly all of these have given notice of an intention to seek an extended period of existence, under that act.

The report also tells the total amount of coin and currency in the country, and the distribution of them in the Treasury, in the banks, and among the people. Since the day of resumption—the 1st day of January, 1879—there has been an increase, in gold coin of \$288,795,330; in silver coin of 105,750,532; and in national-bank notes of \$38,936,073; in all, of \$443,481,935.

The aggregate circulation of the national banks had steadily increased for a series of years. The action of existing banks, in making deposit for the ultimate redemption of their circulating notes, lessened for the year the amount of those notes for which those banks are liable by the sum of \$5,478,854.

The national banks hold \$220,000,000 of United States bonds which are payable at the pleasure of the Government. This is more than one-half of the whole amount outstanding of this class of bonds. If the public debt is to be paid as rapidly as it has been of late, it is likely that all of these bonds will be paid during the next three years. Whenever they are called for payment, the banks holding them, to keep up the circulation of their notes, must either deposit lawful money in the Treasury amounting in the aggregate to at least \$200,000,000, or purchase and deposit there other United States bonds. The cheapest of those bonds are at a high premium in the market.

It is estimated that the profit from the deposit of those bonds and the taking and issuing the circulating notes furnished thereon, when the lawful rate of interest is as high as six per cent., is not more than three-fifths of one per cent. It is supposed that this is not enough to lead the banks to buy them largely, for the purpose of securing circulation.

Is there not reason for forethought whether, with this embarrassment, the bank circulation will not be so largely retired as to trouble the business community?

Ways are suggested of forestalling a troublesome contraction of the circulation—one, a reduction or abolition of the tax on circulation; another, an increase of the rate of issue to ninety per cent of the current market value of the bonds; another, that the four and four

and a half per cent. bonds be refunded into three per cents upon terms satisfactory to the holders, thus bringing into market a class of bonds purchasable at a lower rate; and another, that the Treasury Department be empowered to take, as a basis of circulation, the three-sixty-five bonds of the District of Columbia.

The Comptroller gives statistics of the taxation of the national banks, and again recommends a repeal of the tax upon capital and deposits, in which recommendation the Secretary concurs. The capital invested in national banks is \$462,341,601. The taxes assessed upon them by the United States and the States for the year 1881 were \$17,189,080, being at the rate of 3.7 per cent. The amount assessed by the United States is near one-half of the whole. A repeal of the laws providing for it would still leave those banks liable to an assessment by the States of over eight millions of dollars per annum.

The Comptroller of the Currency has completed his annual tables, showing the amounts of United States bonds held by the national banks, State banks, savings banks, and private bankers on the 1st of November, 1882. The national banks held on November 1, 1882, as security for circulation and for public deposits and other purposes, \$396,528,400 of interest-bearing bonds of the United States. This is nearly thirty millions less than the amount held on November 1,1881, and about seven millions less than for the corresponding date in 1880.

Banking associations other than national hold these bonds as follows: State banks in twenty-one States, \$8,739,172; trust companies in five States, \$16,934,812; savings banks in fifteen States, \$237,786,442—total, \$263,460,426.

There has been during the past year a decrease of about two millions in the amount held by State banks and trust companies, and an increase of nearly twenty-seven millions in the amounts held by savings banks.

The amounts held in geographical divisions by these associations in 1882 were as follows: Eastern States, \$42,667,248; Middle States, \$197,135,239; Southern States, \$268,350; Western States, \$3,369,414; Pacific States, \$20,020,175—total, \$263,460,426.

These returns have been compiled from reports made to the officers of the different States, which have been forwarded by them to the Comptroller.

The interest-bearing funded debt of the United States was on November 1, \$1,418,080,200. The total amount of bonds held by the national banks, State banks, and savings-banks at the nearest corresponding date that could be ascertained was \$659,988,826, which amount is not greatly less than one-half of the whole interest-bearing debt.

Similar facts have also been compiled from the returns made by State banks, savings-banks, and private bankers to the Treasury Department for the purpose of taxation, showing that the banks and bankers of the country, exclusive of the national banks, held an average amount of United States bonds during the six months ending May 31, 1882, as follows: Savings-banks, \$242,028,782; State banks and trust companies, \$23,211,430; private bankers, \$14,870,745—total, \$280,110,957.

The amount of bonds given in the returns to the Commissioner of Internal Revenue, which is the amount invested in United States bonds, and may include the premium as well as principal of the bonds, is \$16,650,000 more than the amount obtained from the returns to State officers. The difference is comparatively small, and the amounts obtained from the one source serve to corroborate the general accuracy of the returns obtained from the other.

At the last session of Congress legislation was had to stop the overcertification by national banks of checks, in form drawn upon them. (See chapter 290 of 1882, section 13.) That act is an amendment of section 5208 of the United States Revised Statutes, which made it penal to certify such a check unless the drawer then had on deposit with the drawee money to the amount of it. Section 13, above cited, makes it penal to resort to any device, or to receive any fictitious obligation, whereby to evade the provisions of section 5208, above cited. passage of section 13, instead of the formal certification of checks, some national banks have made a formal acceptance thereof. They claim that this does not break the law, and plant upon section 5136 of United States Revised Statutes, wherein that section allows the making of contracts and the use of powers incidental and necessary to the business of banking; and upon section 5209, United States Revised Statutes, which makes it penal for a bank officer to accept without authority, whence, it is claimed, the implication is, that with authority from the bank directors it is lawful; and upon the absence from section 13 of an express prohibition of making an acceptance. The question remains, however, is the making of the acceptance a resort to a device, or the receiving of a fictitious obligation, in order to evade the provisions of section 5208? For it is understood at this Department that these acceptances are not always made upon an amount of money actually on deposit with the acceptor equal to that of the check. Judging that Congress was earnestly trying to stop a practice which it deemed fraught with evil, I believed it well to concur with the Comptroller of the Currency in submitting the matter to the Department of Justice, for the official opinion of the Attorney-General, whether a national bank

might lawfully make such acceptances; and, as the amount of them is supposed to be large, whether, if the bank might lawfully make them, it should be held, in so doing, within the bounds of section 5200, Revised Statutes United States, to the one-tenth of its paid-up capital; and, if it might be so held, whether that limit applied to the gross amount of the acceptances or to a single acceptance? (See section 5202, United States Revised Statutes.) The Department of Justice has made reply to the communication of this Department. The opinion of the Attorney-General is that to write the word "accepted" across a check is to the same effect as to write the word "good" there; and that, though one may be called a "certification" and the other an "acceptance," they mean the same thing, and are like acts; that when the drawer has not with the drawee the funds with which the check may be at once paid, the writing of one word, just as much as the writing of the other, is for the same forbidden purpose—to produce the same forbidden result; that, inasmuch as the liability is the same whether the check be marked with the one word or the other, either mark, if incurring that liability, would seem to be sufficient to bring the case within the prohibition referred to. It remains to be seen whether the banks which have indulged in this practice will cease therefrom on knowledge of this opinion, or whether the Comptroller of the Currency, or the law officers of the Government, must enforce the pains and penalties incurred by violation of the law.

PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the offices of the United States Treasurer, nine assistant treasurers, and one hundred and thirty-five national-bank depositaries.

The gross receipts of the Government, amounting during the fiscal year, as shown by warrants, to \$524,470,974.28, were deposited as follows:

 In independent-treasury offices
 \$382,680,906
 77

 In national-bank depositaries
 141,790,067
 51

The quarterly examinations of independent-treasury offices, required by law, have been made, and those offices have, besides, been subjected to special examinations by officers of this Department. As far as known, there has been no loss to the Government from public officers engaged either in the receipt, the safe-keeping, or the disbursement of the public moneys. I have seen some instances of misdealing with them, but as yet without ultimate public loss.

CUSTOMS.

The revenue from customs for the last fiscal year was \$220,410,730.25, an increase of \$22,251,054.23 over that of the preceding year; an increase in the value of dutiable imports of \$73,887,486, and in that of free goods of \$8,087,460. There was collected at the port of New York the sum of \$152,773,962.32; at all other ports, \$68,300,698.03. The sum of \$49,198,312 was collected on sugar, melado, and molasses; \$29,253,016 on wool and its manufactures; \$24,175,547 on iron and steel, and manufactures thereof; \$22,633,137 on manufactures of silk; \$12,227,103 on those of cotton; and \$6,771,483 on wines and spirits; in all, from those articles, \$144,258,598.

The table here given shows the rate per centum of the cost of collection. It is .0294, and is less than that of any year since 1876:

Aggregate duties on i	imports and to	mnage, and	receipts and	expenses of	collection for the fiscal
• •	years 1877,	, 1878, 1879	, 1880, 1881	, and 1882.	. *

Year.	Duties.	Receipts.	Expenses.	Cost, per cent.
1877 1878 1879 1880 1881 1882	137, 250, 047 70 186, 522, 064 60	\$132, 634, 029 53 132, 024, 409 16 138, 976, 631 79 188, 508, 690 34 200, 079, 150 98 222, 559, 104 83	\$6,501,037 57 5,826,974 32 5,485,779 03 5,995,878 06 6,419,345 20 6,549,595 07	4. 90 4. 41 3. 94 3. 18 3. 20 2. 94

I also ask the attention of Congress to the classification of sugar, as I know not whether it will be treated of, or, if it is, how it will be treated of in any other document brought to the attention of Congress; and the subject is one of practical importance.

The Dutch standard of color is no longer a practical test of the saccharine strength of imported sugars, or of their value for refining. The Supreme Court, in a recent decision, has interpreted the existing law to be, that customs officers may not look beyond the apparent color, and must classify the invoices thereby, though satisfied that the color is artificial and made to get a lower rate of duty. That standard was adopted, doubtless, believing that color showed value. The intention was to put upon sugar, duties in effect ad valorem. As it has come about, however, the grades of sugar highest in value, when thus artificially colored, come in at the lowest rate of duty. The purpose of Congress in adopting the Dutch standard is measurably defeated. Provision should be made for just classification. This may be done by putting on an ad valorem duty, by a specific duty, or by authorizing some standard other than that of apparent color. Now, domestic producers do not get the

incidental protection meant to be given them. Importers, too, are subject to embarrassment in fixing the rate of duty on their goods, and otherwise.

The importance of a new tribunal for the trial of customs cases, or of the transfer of them to an existing tribunal, is again presented to Congress. The bill now pending gives jurisdiction over them to the Court of Claims. It seems to this Department that this is a method economical and speedy, and hence good for the disposal of these cases. It would relieve the Department of business which it is not fully organized to entertain and properly act upon.

The recommendation of last year is repeated, that the Secretary be authorized to refer to the Court of Claims, in his discretion, any disputed claims against the Government involving important questions of law or fact. This would give to claimants and to the Government a proper judicial trial and judgment, and ward off the requests for re-examinations which are now urged upon every change of principal officers of Departments.

It is also recommended that there be authorized the appointment of three additional general appraisers. The necessity for this addition has long been felt, the interests of the Government having suffered in some sections for the lack of a proper tribunal to determine disputes.

INTERNAL REVENUE.

From the various objects of taxation under the internal-revenue laws the receipts for the fiscal year ended June 30, 1882, were as follows:

From spirits	69, 873, 408 18
From tobacco	47, 391, 988 91
From fermented liquors	16, 153, 920 42
From banks and bankers	5, 253, 458 47
From adhesive stamps, (including bank checks,	
\$2,318,455.14; friction matches, \$2,272,258; patent	
med icines, &c., \$1,978,395.56)	7, 569, 108 70
From penalties, &c	199, 830 04
From collections not otherwise provided for	81,559 00
Total1	46, 523, 273 72

The increase of the revenue from spirits during the last fiscal year was \$2,719,433.30; the increase from tobacco in its various forms of manufacture for the same period was \$4,536,997.60; the increase from fermented liquors was \$2,453,679.21; the increase of revenue from taxes on banks and bankers was \$1,491,250.40; the total increase of internal revenue from all sources was \$11,293,361.42.

REDUCTION OF TAXATION.

The Treasury Department was created by act of Congress, chapter xii, of the year 1789. By the second section it was made the duty of the Secretary "to digest and prepare plans for the *improvement* of the revenue." The word improvement meant enlargement. The need was for more revenue, and the lack was of subjects from which it might be taken. In that sense that duty is now without care. The times have changed. What now perplexes the Secretary is not wherefrom he may get revenue and enough for the pressing needs of the Government, but whereby he shall turn back into the flow of business the more than enough for those needs that has been drawn from the people.

There are now in the Treasury unused assets to a large amount, and the daily receipts into the Treasury from customs and internal revenue taxation are about a million and a quarter.

It is plain from this, and the statement with which this report begins of the estimated expenditures for the next fiscal year, that the receipts from revenue are, and are likely to be, in excess of the needs of the Government.

From the inequality between daily large receipts and comparatively small daily disbursements there comes an evil effect upon the business of the country. The collections by Government are taken out of the money market in sums and at dates which have little or no agreement with the natural movement of money, and are returned to it with the same inadaptation to commercial or financial requirements. Occasionally the large disbursements of the Government have created a plethora of money; more frequently its large and continued withdrawals of money have caused such a scarcity of floating capital as to check the proper movement of legitimate business. It is not only that the amount in the Treasury is so much kept from the use of community; the fact becomes an incentive and an aid to men who for their own ends conspire to keep from that use other large sums. We have believed that the laws of the States against primogeniture, the entail of estates, and the accumulation of personal property, stood in the way of heaping up wealth in single hands, and gathering in single hands the power over others that great wealth gives. But so it is, that to-day there are men so rich that by conspiring together, they can at will put and hold hand on near as much money as Government can lay hand to, save by the use of its credit. The power thus had is used from time to time. It results, that violent and sudden contractions and expansions afflict the business community, and the Government is an unwilling aider and abettor therein. It has come about that the Treasury Department is looked to as a great, if not a chief cause of recurring stringencies, and the Treasury is called to for relief. Every Secretary of the Treasury for years past, has had it brought clearly to his mind, and official expedients have been used to remedy the evil. Little of lasting value has been accomplished thereby.

There is no advisable and lawful mode of disbursing an existing excess of assets but that of the payment of the public debt. That debt is substantially of two principal classes—that payable at the pleasure of the Government, that payable at a fixed date in the future. former is also of two kinds-that bearing interest at three and a half per cent., and that at three per cent. The latter may not be called in for payment while any of the former is outstanding and uncalled. is the law of its creation. Of the former there are outstanding and uncalled over seventy millions. The interpretation put by the Department upon the various laws out of which that debt has arisen, requires that a call for it for payment must fix for the maturity and for the cessation of interest a date three months off. This somewhat hampers the Department in so making calls as to keep up a timely succession. For calls at three months off there must either be the funds in hand therefor at the time when the call is made, or there must be a reliance upon the probable prospective receipts. To wait before making a call until the funds are in fact in hand would be to increase the evil of which I am speak-To call in reliance upon receipts to come needs caution, lest by changes in business currents or business prosperity they may be lessened, and thus embarrassment ensue; so that, practically, the Department cannot with prudence work in this matter up to what may turn out to be its full ability. Whether the three per cent. bonds will require the same length of call-time has not yet been determined. Nor is a call always effectual in bringing in the debt for payment. The monthly statements of the public debt show that of matured obligations on which interest has ceased there are outstanding over eleven millions and a half, some of it from the year 1837. Doubtless some of this has been lost or destroyed, and will never be brought for payment. But bonds which are in late calls come in slowly. Thus, of the calls preceding the last, all of which have been some days payable at option of holders without rebate of interest, and which were, in all, for \$55,000,000, there is outstanding \$35,000,000 and over.

Bonds of the other principal class are of several kinds, all payable at a future date, and all are now at a high premium in the market. If it

were good policy for the Department to buy these at their premium, it could by so doing easily free the Treasury from its excess of assets. Various causes put these premiums, at a height almost unexampled. It is true that capitalists may buy them now, and they will, if the present state of things continues, by the time they fall due and payable, and are paid to them at their face, have realized some interest upon the purchase price. At the present premium on most if not on all of them that will be short of three per cent. Calculations show that at these premiums a purchase will not have yielded at the end of their term three per cent. on the money paid for them. The Government by the purchase of them might in effect take an equal profit. But it can save to itself three and a half per cent. by calling bonds of that class. Hence, I do not perceive how a Secretary could justify himself to the country at large, in paying the Government debt at ruling premiums, when there is no requirement of law to be answered, and no convenience or pressing need of the Government to be met; unless there is a great emergency, and general financial disaster is threatened, which only extreme measures of Governmental interference can turn aside. It is true that this Department has heretofore, and as late as March 30, 1881, purchased bonds and paid for them the face value and a premium thereon. The purchases on that day were over five millions and a quarter of dollars, and the premium paid near fifty-five thousand dollars. But the purchase was for the sinking fund, and the law of that fund required a purchase, and there were no Government bonds redeemable at pleasure to the payment of which an excess of assets might be applied. In former years there were large and continued purchases of bonds at a premium, but they went hand in hand with sales of gold at a greater premium, and the Government made a profit by the transaction, and then, too, was for a time the requirement of the sinking-fund, and there were no bonds payment of which might be made in invitum.

The anticipation of payment of called bonds without a rebate of the interest up to the day named in the call rests upon a different basis. A prepayment of interest upon the public debt is sanctioned by express provision of law. (See resolution No. 25, of March, 1864, and U. S. Rev. Stats., 3699.) A reference to the debates in Congress when that resolution was under discussion, shows that the motive for the adoption of it was, that the Treasury Department might at any time break a tightness in the money market by putting out money idle in its vaults. The power thus given has of late been used for that purpose. Though this does give a gain to the holders of the bonds, it puts no loss upon

the Government. The Treasury uses for the prepayment, money that it needs not for use in other ways, and which yields no interest, and which it must at last use for paying just what it pays in advance, and to no more than the amount that it must at last pay. In paying a high premium, however, it pays what it is not bound ever to pay, and it is not a certain event that it will ever make itself whole again, and to the extent of some part of the premium, it extinguishes no debt.

It is doubtless good policy to extinguish the long bonds of the Government, rather than those payable at its pleasure; for the time is at hand when, with the present rate of receipts and the present rate of payment of the public debt, all the bonds subject to optional time of payment will have been called in. Then, if there be a surplus in the Treasury, there will be no outlet for it save by purchase at large premium of long bonds, or the disbursement of it through appropriations for purposes beyond the ordinary and economical needs of the Government. It is, therefore, for Congress to consider the propriety of empowering this Department to buy the long bonds at a high premium. If it shall deem it politic to make general purchases of bonds at such premium for extinguishment, it should by law give to this Department express authority so to do, and thus adopt that policy.

There have been other suggestions of modes of freeing the Treasury of an excess of assets. The national-bank act, section 35, (U. S. Revised Statutes, sec. 5133,) provides for the designation of national banks as depositaries of public moneys, security being taken in a corresponding deposit of United States bonds. All moneys received for customs must be paid into the Treasury, and no part of them can be placed in national bank depositaries. It is seen that if they, or any part of them, were deposited with national-bank depositaries, they would soon find their way back into the currents of business in loans and discounts, as do now the receipts from internal-revenue taxation.

There are in the Treasury over fifty millions of dollars, being the five per cent. fund for the redemption of national bank notes, and the fund for the redemption of notes of national banks that have failed. These funds have not been treated by the Department as "public moneys" within the intent of the sections above cited, and have been kept in the Treasury. If Congress should give an interpretation to the words "public moneys" which would take in these funds, and they be put on deposit with the public depositaries, the same results would follow as are above suggested as to customs receipts.

It is argued by those who contend for larger use of the banks as depositaries that all other civilized countries have an advantage over the United States in the relations between their treasuries and the money market; that their governments keep their accounts with the strongest banks in the country, and in this natural way of transacting business they do not deprive their trade of the natural and necessary services of floating capital; that it is only in the United States that the Government, chiefly by law and partly for want of the use of existing discretionary powers, deliberately disturbs the natural currents of money, inflicting upon trade a prolonged or spasmodic stringency by locking up its receipts, or stimulating speculation by a sudden outpouring of its hoard; that all business is taxed by this system of legal caprice, and that it is probably no exaggeration to say that our Treasury statutes cause discounts in New York City to average two per cent. higher than under the more natural system of employing the ordinary business agencies for the Government's collections and disbursements.

I do not yield to this reasoning to the full extent that it is sought to push it. It may be well to give the Department the power to make larger deposits in the public depositaries. I conceive that the receipts from customs, now to great extent pledged by law to the payment of the bonded creditor, should be held in the Treasury; for in another course there are disadvantages that might come to both Government and people, and which would, if they came, outweigh all advantages to either. is safe to say that the country is never so sure of a continued course of prosperity as that prudent forecast will not take heed of possible financial disturbance and disaster. If such should come, in such magnitude as that the national-bank depositaries should be involved in common with all, it would be of the greatest good that the Government had in its own hands the means to meet the daily calls upon it. It has chanced that, singly, national-bank depositaries have failed to meet the drafts of the Government upon them, to its embarrassment. Greatly more so would it be if all or many should so fail together, and together should have in keeping, in main, the assets of the Government. The policy of the Department has been to keep for the redemption of the United States notes a reserve of about forty per cent. of the amount of them outstanding, and, besides that, to hold money enough to meet all other obligations payable on demand. It is a part of that policy that the Treasury should itself hold that reserve. "You must be ready for the evil day, and, being ready for the evil day, the evil day almost never comes; not being ready for the evil day, it is certain to come." For these reasons I would not seek a release of the Treasury from this complication, in these modes.

The radical cure for the evil is in the reduction of taxation, so that

no more will be taken from the people than enough to carry on the Government with economy; to meet all its obligations that must be met from year to year; to pay off with reasonable celerity the part of the debt which it may pay at pleasure, and to provide through the sinking fund for the payment of that which will become payable by and by. The evil comes from the likelihood of the Government holding from time to time a large surplus to be poured out in volume at uncertain and unforeseen times, and at times often inopportune for the business of the country. There could not be that surplus, surely not so great a one, if the subjects of taxation were lessened and the rates made smaller upon those retained.

The figures are given above which show an estimated surplus of public moneys for the fiscal year ending June 30, 1883, upon the basis of existing laws and including the sinking-fund, of \$75,577,043.75.

Unless some disturbing cause comes in, not now foreseen, that surplus will increase from year to year as the interest on the public debt decreases. For without such cause the revenues from all sources will not be diminished if the laws productive thereof remain unchanged. As so great an annual surplus is the direct result of the existing revenue laws, what will be the financial condition of the country if these laws remain unchanged and taxation be not reduced?

In connection herewith, should be borne in mind the increasing expenditure for pensions, as likely to affect in some degree the increase of surplus.

The Commissioner of Pensions has furnished to this Department an estimate based upon facts on his records which gives these figures:

Number of claims filed to June 30, 1882	817, 722
Number admitted	,
Number on rejected files	
Number pending	
	817,722
· · · · · · · · · · · · · · · · · · ·	

Of the number pending, 197,623 are entitled to "arrears," and the first payment in the same, compiled from discharge or death to date, would not fall below \$200,000,000.

The remaining 72,055 were filed subsequent to June 30, 1880, and pension, when allowed, would commence from date of filing.

Last year he estimated that the average value on the 1st day of January, 1884, of each claim allowed out of the class in which are the 197,623 above, would be \$1,350, and he then reckoned that about five-sixths of that class would be found valid claims and would be allowed.

XXX REPORT OF THE SECRETARY OF THE TREASURY.

The amount of United States bonds which are now	due and payable
at the pleasure of the Government are as follows:	•

Fives continued at three and a half per cent	\$155, 356, 350 259, 370, 500
Total	414, 726, 850
Those which next become redeemable are the four arcents, which may be paid September 1, 1891	
Lastly, the four per cents, redeemable July 1, 1907 To which add the refunding certificates	738, 929, 600 423, 750
Making	739, 353, 350

The amount of the funded debt redeemable at any time before September 1, 1891, which will remain unpaid on the 30th of June, 1883, is about \$300,000,000, and upon the foregoing estimates for the fiscal year ending June 30, 1883, the whole funded debt now redeemable could be paid before June 30, 1886. This would leave as the surplus for more than five years the amount of \$600,000,000, undisposed of in the Treasury, unless, yielding to the temptation of seeming wealth, expenditures be largely increased. The amount of the loan redeemable in 1891 is only \$250,000,000, and, as has been stated, no other loan becomes redeemable until 1907, so that the surplus under the conditions supposed will rapidly increase until that date. The amount of the loan of 1907, as already appears, is less than \$740,000,000, so that, were it all redeemable, the whole public debt could be paid from a surplus as great as estimated early in the fiscal year ending June 30, 1894.

It has not often occurred in public financial history that embarrassment has arisen through superabundance of revenues. The condition of the country in that respect, while it illustrates its almost boundless resources, and establishes its credit beyond a question, presents difficulties of grave character.

The accumulation in the Treasury of a large surplus, which must occur unless immediate measures are enacted for a reduction of the revenues, is not to be placidly contemplated, and the question confronts us, in what manner may it best be prevented?

The suggestion that the Government may go into the market and purchase its bonds not yet redeemable at the market rates is noted in another place. As a temporary expedient, or for a relatively small amount, this policy might be adopted. But were it established by law as a permanent policy, the long bonds, now at a high premium, would

be so enhanced in price as to render the purchase of bonds impracticable within reasonable bounds.

A greater use of the national banks as depositaries is treated of elsewhere herein. If that should be made, it would be but a return to the channels of business of moneys taken from them without need, and with the charge upon the people of the cost of collecting.

I respectfully refer to my last report for my views upon this subject. They have not materially changed. Now, as then, it is recom mended to retain a tax on spirits, tobacco, and fermented liquors, as legitimate subjects of needful taxation. They are, in the main, the means of indulgence, and should come before necessaries as subjects of taxation. The tax from spirits for the last year was \$69,873,408.18; that from tobacco, \$47,391,988.91; that from fermented liquors, \$16,153,920.42. The increase over the year 1881 was, on spirits, \$2,719,433.30; on tobacco, \$4,536,997.60; on fermented liquors, \$2,453,679.21. The total receipts from the taxation of these articles was for the last year about one hundred and thirty-three millions of dollars. The estimated expenditures for this fiscal year are near three hundred millions. The retention of this tax will still leave a large sum to be raised from other sources, so that there is not a pressing need of a reduction here. Should it, however, be deemed expedient to reduce the rate of duties on either of these articles, to obviate the inducement to fraud, or to render such duties more equal, objection is not so strongly urged against a moderate modification as against a total repeal of all taxes thereon. Propositions have recently been made to abolish the whole system of internal revenue, but neither public sentiment nor political action indicates a desire on the part of tax-paying citizens to strike out this class of taxes. All the other subjects of internal revenue may be released from taxation, unless bank circulation be retained. It is a franchise, a privilege to furnish that, and it is of profit to the banks and of expense to the Government, and hence is a preferable subject of taxation. The amount derived from it was \$3,190,981.98 the last year, yet as the banks are liable to assessment by the States, and thus to bear a share of public burdens, it is advisable to strike off the Federal taxation on their circulation.

The whole amount of internal revenue for the year ended June 30, 1882, besides those from spirits, fermented
liquors, and tobacco, is
The tax on circulation and deposits of national banks for the same period is
Making

XXXII REPORT OF THE SECRETARY OF THE TREASURY.

Deduct this amount from our surplus revenues, and we have still a surplus of about \$98,000,000.

To complete an effectual reduction of taxation, it must be made on some principal source of revenue, and such an one is the duties on imports collected under the tariff laws, and an additional obvious method of avoiding a surplus in the Treasury is a reduction of the revenues from those.

The subject of the repeal of the tax on circulation and deposits of national banks, and those upon adhesive stamps, and those derived from banks and bankers, has been much discussed in Congress. It will be seen, however, that the repeal of all these taxes would relieve but a portion of the difficulty.

The revenues from customs for the current year are estimated at \$235,000,000, and under existing laws, and without a disturbing cause now unforeseen, we may expect that they will not diminish in future years. It seems, therefore, that a reduction should be made in the revenue from the customs.

In reading the testimony before the Tariff Commission it is to be observed that with scarcely an exception the representative of every industry, while conceding that a general reduction of the tariff is proper and necessary, has claimed that its peculiar product can submit to no reduction of the protection now afforded.

While the views of the manufacturers are to be weighed, it is manifest that they will never be able to agree upon a reduction of the tariff duties.

All agree that a revision of the tariff is necessary. The action of Congress in creating a Commission for that purpose renders discussion on that point unnecessary. The action of that commission in detail is not yet known to this Department. Whatever may be its recommendations, they will no doubt receive respectful consideration.

The Secretary of the Treasury, however, cannot feel that he is relieved of responsibility because of that Commission. He deems it proper, therefore, to make some recommendations upon the subject.

The whole amount of revenue from customs for the fiscal year ended June 30, 1882, has already been stated at something more than \$220,000,000. The classes of merchandise paying the largest amount of duties from customs are the following, in the order named: Sugar and molasses, wool and manufactures from it, iron and steel and the manufactures from them, manufactures of silk, manufactures of cotton, amounting to about one hundred and thirty-seven and a half millions. A substantial reduction upon each of the class of articles named is

recommended. And it is believed that the time has arrived when a reduction of duties on nearly all the articles in our tariff is demanded and is feasible.

In addition to this, a careful revision of the tariff should be made with a view to placing upon the free list many articles now paying a duty.

It appears that the largest amount derived from any class of products, under the customs tariff, is that from sugar.

Sugar is a necessary of life for all classes in this country. The average duty on it is equal to two and a half cents per pound, and to nearly fifty-three and a half per cent. ad valorem. The amount of cane-sugar produced in this country is estimated at eleven per cent. of the whole quantity consumed, and it is apparent that nearly the whole amount of revenue from this source is paid by the consumer, the competition by home production not being sufficient seriously to affect the price. The progress of industry in the production of sugar from sorghum and the beet is not forgotten. It is entitled to consideration. It is believed, however, that a substantial reduction of the duty upon sugar may be made without injustice to the producers of it in this country.

Upon wool and iron and steel, and their manufactures, a large reduction must be made to materially lessen the revenues derived from them, as the amount of imports will increase as the duties are lessened.

It will probably be found that in general the reduction can chiefly be made on the raw material or coarser manufactures, rather than those upon which a greater amount of labor has been bestowed. The duties on manufactures of silk, it is believed, may be reduced without injustice to manufacturers in this country.

The cotton tariff is found to be complex and inconsistent, and it is no doubt true that in most of the coarser classes of cotton fabrics our manufacturers can compete with the world without protection.

Wines and spirits, which afford the largest amount of duty next to the five classes enumerated, being articles of luxury, may well bear any rate of duty deemed necessary for the revenue.

Without going further into details, the Secretary earnestly recommends a careful revision of the tariff, with a view to substantial reductions.

The accomplishment of this is recommended to the present Congress, which has been fully aware of the approaching financial situation, as it is now presented, and has fully discussed the subject in some of its bearings.

ш

XXXIV REPORT OF THE SECRETARY OF THE TREASURY.

FOREIGN COMMERCE.

The foreign commerce of the United States during the last fiscal year, including imports and exports of merchandise and specie, was as follows:

Exports: Merchandise	\$750, 542, 25 7 49, 417, 479
- -	799, 959, 736
Imports: Merchandise	\$724, 639, 574 42, 472, 390
· ·	767, 111, 964
Imports and exports during the year ended June 30, 1882. Imports and exports during the year ended June 30,	\$1,567,071,700
1881	1, 675, 024, 318
Decrease	\$107, 952, 618

The excess of exports of merchandise over imports thereof was less for the last fiscal year than for any of the previous six years. This is shown as follows:

Year ended June 30—	Excess of exports over imports of merchandise.
1876	\$79, 643, 481
1877	151, 152, 094
1878	257, 814, 234
1879	264, 661, 666
1880 1881 1882	259,712,718

The decréase in exports of cattle, provisions, breadstuffs, and cotton during the last fiscal year, as compared with that of the preceding fiscal year, is as follows:

Commodities.	1881.	1882.	Decrease.
Cattle		\$7,800,227	\$6 503,876
Indian corn		28, 845, 830	21, 856, 839
Wheat Wheat flour		112, 929, 718 36, 375, 055	54, 768, 767 8, 672, 209
Cotton, raw		199, 812, 644	47, 883, 109
Beef, fresh		6, 768, 881	3, 091, 40
Bacon		42, 124, 602	11, 492, 379
Butter		2,864,570 14,058,975	3, 391, 454 2, 321, 273
Lard	1	28, 975, 902	6, 250, 67

There has been an increase in the principal crops of the country in 1882 over those of 1881. Over 75 per cent. of the exports of domestic merchandise is in products of agriculture. It is reasonable to expect an increase in the exports of merchandise and an increase in the balance of trade in our favor. This expectation appears also to be justified by the fact that the exports of breadstuffs for the first four months of the current fiscal year at the principal ports, exceeded such exports for the corresponding months of the preceding fiscal year by \$4,570,084. The exports of petroleum for the fiscal year just closed exceeded those for the preceding fiscal year by \$10,917,097.

IMPORTS OF MERCHANDISE.

The imports of merchandise for the last fiscal year exceeded those of the preceding year by \$81,974,946:

Articles.	1881.	1882.	Increase.
India-rubber and gutta-percha Breadstuffs Cotton manufactures Fruits Steel ingots Potatoes Silk manufactures Sugar and nolasses Wool manufactures	31, 219, 329 12, 344, 929 6, 218, 453 874, 223 32, 056, 701 93, 404, 288	\$14, 264, 903 18, 795, 269 34, 351, 292 18, 491, 843 13, 341, 052 4, 660, 120 38, 985, 567 100, 469, 022 37, 361, 520	\$3, 209, 954 8, 131, 594 3, 131, 963 6, 146, 914 7, 122, 599 3, 785, 897 6, 928, 866 7, 064, 734 6, 205, 094

During the fiscal year ended June 30, 1882, the exports of specie were \$49,417,479, and the imports \$42,472,390—a difference of \$6,945,089. In the preceding fiscal year there was an excess of imports over exports of \$91,168,650. This change came, probably, from the falling off in exports of merchandise for the year.

The report of the Bureau of Statistics shows, in detail, the state of the foreign commerce of the United States.

COMMERCE AND NAVIGATION.

The tonnage of vessels owned in the United States at the close of the fiscal year 1882, by the records of the Register of the Treasury, was 4,165,933 tons. Of this, 1,292,294 tons were in 2,185 vessels registered for the foreign trade, and 2,873,639 in 22,183 vessels enrolled and licensed for the coasting trade and fisheries. There was a decrease of 43,292 tons in vessels in the foreign trade, and an increase of 151,491 tons in those in the domestic trade. The increase in the tonnage of this class of vessels for the fiscal year ended June 30, 1881, was but 6,924 tons.

XXXVI REPORT OF THE SECRETARY OF THE TREASURY.

The vessels built and documented as vessels of the United States during the last fiscal year is shown by this table:

Sailing-vessels 666 1 Steam-vessels 502 1	
Canal-boats 68 Barges 135 — —	118, 798, 50 121, 842, 66 7, 882, 06 33, 746, 51 282, 269, 73

The number of documented vessels of all classes built during the past fiscal year exceeds that of the fiscal year ended in 1881 by 263. The undocumented vessels built during the past year, such as canalboats and barges, may fairly be presumed to have been much larger. The total tonnage of vessels entered from foreign countries was 15,630,541 tons during 1881, and 14,656,499 tons during the year ended June 30, 1882—a decrease of 974,042 tons. The American tonnage entered in the foreign trade was increased 49,141 tons, and the foreign tonnage was decreased 1,023,183 tons. This tonnage is computed from the number of entries of vessels, and not on the number of vessels, and is limited to the seaboard ports.

Of the merchandise brought in at seaboard, lake, and river ports during the fiscal year 1882, \$130,266,826 were imported in American vessels, and \$571,517,802 in foreign. Of the exports of merchandise, \$96,962,919 were shipped in American, and \$641,460,967 in foreign vessels. Of the combined imports and exports of merchandise, 16 per cent. only was conveyed in American vessels.

EXPORTS AND IMPORTS AND QUARANTINE OF NEAT-CATTLE.

Legislation on these subjects has two objects: First. The extinction and prevention in the United States of the disease known as *pleuro-pneumonia*, or lung plague. Second. The increase of our commerce in neat-cattle with other nations, especially Great Britain.

The disease did not begin in this country, the first cases having been traced to foreign origin. It is found on the Atlantic coast in several places from New York to Baltimore, but has not been felt in New England for many years. It is a contagious disease, of malignant type, likely to spread through herds, and from herd to herd. Mindful that the number of neat-cattle in the United States in 1880 was about 36,000,000, which, at \$25 per head, would be valued at \$900,000,000, and that there has probably been increase rather than decrease, it is seen that this is a matter of moment. The spread of the disease on the Atlantic coast

alone would make serious loss, though it is more readily controlled where cattle are penned or housed. The starting and spread of it in the great open cattle ranches of the West would be calamitous. Its contagious character, and the difficulty of treating it in large herds roaming at will, make it formidable. Should it get a firm hold there, it would badly hinder the raising and sale of cattle, which is a means of wealth and prosperity to many of our people.

To prevent it being brought from abroad, the Department, in July, 1879, established regulations subjecting all imported cattle to a quarantine of ninety days. As there was no appropriation therefor until the last session of Congress, importers were obliged to quarantine their cattle at their own expense; and as the Dominion of Canada, under like provisions for quarantining imported cattle, made liberal provision therefor, most of the cattle imported into the United States were brought from abroad first into Canadian ports.

Using an appropriation of the last session, this Department, through the Treasury Cattle Commission, has taken active measures for establishing for imported cattle quarantine stations and shelter at Portland, (Me.,) Boston, New York, Philadelphia, and Baltimore. The design is to furnish buildings with sufficient land, so arranged that the cattle in quarantine may be isolated, not only from cattle already in the country, but each importation from others, and be kept constantly under the inspection of Government officers. It is expected that these arrange ments will be completed at the ports named within a few weeks.

The second object in view is to promote the trade in neat-cattle with foreign nations, especially with Great Britain.

The number of live cattle exported, chiefly to Great Britain, in the year ended June 30, 1881, was 185,707, valued at \$14,304,103. For the year ended June 30, 1882, the number was 108,110, a decrease of 77,597, and in value of \$6,503,876. The decrease was, however, no greater in proportion than that generally in the exportation of articles of food.

By an order of the Privy Council of Great Britain of February, 1879, all cattle imported from the United States must be slaughtered at the port of arrival within ten days. This order, deemed necessary to prevent infection, will, no doubt, be rescinded, whenever the United States shall adopt measures rendering it reasonably certain that importations of cattle from this country will not introduce the disease from which the people of Great Britain have heretofore suffered loss.

This order causes great loss on cattle exported to Great Britain from this country, as only animals fit for beef can now be exported, and the shrinkage in them on immediate slaughter, after the waste of a sea voyage, without recuperation, is estimated at not less than ten per cent.

XXXVIII REPORT OF THE SECRETARY OF THE TREASURY.

There is a great demand in England for stock cattle, to be fed and fattened on English soil, which we could readily supply, were it not for the order referred to. Under a recent appropriation, this Department, through the Cattle Commission, is arranging with the various railroad companies for the transportation of cattle from the Western States to the seaboard so as to save them from contagion on the route. When these arrangements are perfected and found efficient, we may fairly ask of Great Britian that the order for immediate slaughter of American cattle imported into that country be rescinded.

The report of the Commission speaks in detail on this subject.

REVENUE MARINE.

There are now thirty-seven vessels in the Revenue-Marine Service, thirty-two of which are steamers, and five sail-vessels. They are manned by 199 officers and 774 men.

This was their regular work for the year ended June 30, 1882:

• ,	
Aggregate number of miles cruised	303, 562
Number of vessels boarded and examined	24,008
Number of vessels seized or reported to the proper author-	,
ities for violations of law	1,042
Number of vessels assisted when wrecked or in distress	147
Number of persons rescued from drowning	111
Estimated value of imperilled vessels and cargoes assisted.\$	2,254,716

Besides the regular duty, the service has done special work.

In May last, at the request of the Navy Department, the Corwin, of the Revenue Service, was sent to St. Lawrence Bay, Siberia, to bring away the officers and crew of the naval relief and exploring steamer, Rodgers, burned at that place. The Corwin made a second cruise to our most northern waters, to protect the seal-fisheries and other Government interests in Alaska. She ascertained the fate of Master Putnam, of the U. S. Navy, who was carried to sea upon an ice floe and perished. She cruised two hundred miles to the eastward of the signal station, at Point Barrow, finding no open violations of law. Coming back by the Aleutian Islands and Sitka, her commander, Lieutenant Healy, in November, quelled an outbreak of the Indians upon the mainland north of the latter place.

The revenue-steamer McLane, at Galveston, Tex., co-operated with the Marine-Hospital Service in confining and alleviating the yellow-fever epidemic, carrying physicians, nurses, medicines, and supplies.

The revenue-cutters have also co-operated with the Life-Saving Service and the Light-House Establishment.

The expense of maintaining the Revenue Marine for the fiscal year ended 30th of June last was \$846,423.34.

The new vessel for duty on the southern coast, authorized by Congress in 1880, has been completed and placed on duty, and named "Walter Forward." The appropriation of \$75,000, made at the last session, has, under the authority of the law, been applied to the rebuilding of the revenue-steamer "Commodore Perry."

The recommendation made last year, of a new vessel for the southern coast, to replace one worn-out and not adapted for the service, is renewed. The amount of \$75,000, necessary for this purpose, has been included in the estimates.

The recommendation of the last annual report and of those of several of my predecessors in office, that Congress provide for the establishment a retired list and the extension of the pension laws to the Revenue Marine, is renewed.

LIFE-SAVING SERVICE.

The operations of this useful service have been continued with success. There were at the close of the fiscal year 190 stations in commission. The whole number of disasters to documented vessels, reported by the district officers to have occurred within the field of station operations, is 286. The number of persons on board of these vessels was 2,268. Of this number, 2,256 were saved, and 12 only lost. There were succored at the stations 450 shipwrecked persons, 1,344 days' relief in the aggregate being afforded them. The estimated value of property involved in these disasters was \$4,757,892, of which \$3,099,537 was saved and \$1,658,355 lost. The number of vessels totally lost was 67.

There have also been fifty-six instances of disaster to smaller craft, as sail-boats, row-boats, &c., on which were 126 persons, all of whom were saved. The property involved in these disasters was \$7,850, of which \$6,450 was saved and \$1,400 lost. The aggregate is this:

Total number of disasters	342
Total value of property involved\$4,	765, 742
Total value of property saved\$3,	
Total value of property lost\$1,	659, 755
Total number of persons on board	2,394
Total number of persons saved	2,382
Total number of persons lost	12
Total number of shipwrecked persons succored at stations. Total number of days' succor afforded Total number of vessels lost	450
Total number of days' succor afforded	1,334
Total number of vessels lost	67

Besides the persons saved from vessels, there were twenty-nine rescued who had fallen from piers, wharves, &c., and who, without the aid of the life-saving crews, would probably have been drowned. The twelve persons lost during the year are shown, by the investigation held upon each case, to have been beyond human aid. The loss of life is

smaller than that of any preceding year, with one exception, although there were forty-two more disasters than in any year before since the organization of the service. When the number of disasters is considered, and it is remembered that the life-saving stations are located, by selection, at the most fatal points of our dangerous coast, the small loss of life and property is remarkable, and speaks well for the efficiency of the service. It is claimed that the loss of life from marine disaster, upon our coasts, since the general extension of the service thereon, in 1876, has been reduced nearly 75 per cent.; that while in 1876, and before that, one person out of twenty-nine on board wrecked vessels was lost, there has been a constant decrease, until the loss is but one out of every one hundred and thirteen; and this result is almost entirely attributable to the Life-Saving Service.

The service has never been in so good condition as at present. The legislation of the last session of Congress has supplied its main wants, and established the conditions for high utility, in its prime object of saving life and its secondary ones of protecting commerce and aiding the collection of the revenue. This legislation has already had a marked effect upon the status of the establishment, and particularly upon its morale. The provision for the ampler pay of the employés, and for aid to those among them who may be disabled in the line of duty, or, in case of fatality, to their widows and orphans, makes them feel that their services are appreciated, and insures cheerful zeal and fidelity in doing duty. It enables the Department to obtain, in instances, better men than before. The crews are now of good capacity and character. It is a rule, in forming the crews, that regard be had for qualification, to the exclusion of political or other considerations. Faithful adherence to this rule is a condition of the success of this service.

Owing to the late date at which the appropriations passed Congress, not much has been done in establishing the new stations authorized by the act referred to. One has been built at Peaked Hill Bar, Cape Cod; and one at Muskeget Island, on the coast of Massachusetts, is nearing completion. Three are in process of construction on the coast of North Carolina. Sites have been selected for others, and in some instances the titles secured.

THE LIGHT-HOUSE ESTABLISHMENT.

During the fiscal year the Light-House Establishment has put into operation eighteen new light-stations, eighty new river lights, five new fog-signals operated by steam or hot air, three new automatic whistlingbuoys, one new bell-buoy, and ninety-three new buoys of the ordinary

kind. It has discontinued two lights which are now no longer needed, and has changed the characteristics of ten others, that they may be more useful than heretofore.

The new light-house on Stannard's Rock, Lake Superior, was lighted on the 4th of July. This work, which was specially difficult, is fully described in the Appendix to the Annual Report of the Light-House Board.

The board refrained from making recommendation as to lighted buoys until the results of the experiments made in foreign waters were ascertained. These buoys have now proved to be such valuable and comparatively inexpensive aids to navigation that they have been adopted into several of the light-house systems of Europe. The board has recently had occasion to place a lighted buoy to mark a wreck in one of the channels leading into the port of New York, which could be successfully marked in no other manner.

The work of changing the burners of the lights in the several light-house districts, so as to substitute mineral oil for lard oil as an illuminant, is now so far completed that on the 1st of January next mineral oil will be used in all except the light-houses of the first order.

The appropriation made for erecting electric lights at Hell Gate will enable the board to transfer its experiments with the electric light from the laboratory to a light-house, where it can have a working test.

Attention is called to the board's annual report for further details with regard to the Light-House Service.

COAST AND GEODETIC SURVEY.

The operations of the Coast and Geodetic Survey, both in the field and in the office, have been steadily advanced.

Topographic and hydrographic surveys have been carried on on the Atlantic, Gulf, and Pacific coasts. Aid has been given to the State surveys in progress in nine interior States.

Data and material have been accumulated for additional volumes of the Atlantic Coast Pilot, and for new editions of the Coast Pilots of California, Oregon, Washington Territory, and of Alaska. New charts and new editions of old charts have been published. The annual publication of tide-tables has been continued.

In the estimates for the prosecution of the survey is an item for the construction of a steam-vessel specially adapted to the survey of the coasts and navigable passages of the Territory of Alaska. The growing importance of that country and the needs of its commerce and navigation recommend this proposition to the favorable action of Congress.

THE MARINE-HOSPITAL SERVICE.

During the year 36,184 patients received 333,475 days relief in hos-Transportation to their own homes was furnished to seven incurable patients. Fifteen seamen have been furnished treatment at the Government Hospital for the Insane; 306 seamen were examined physically as preliminary to shipping; 2,090 pilots were examined for color-blindness; and 3,278 seamen were vaccinated, because of the prevalence of small-pox. The receipts were \$408,215.69, and the gross expenditures \$468,120.16. These expenditures include \$54,192.20, on account of extraordinary alterations and repairs to hospital build-Less this amount, \$413,928.14 was the net expense of the service. On July 1, there was an unexpended balance of \$177,869.85, \$50,000 of which will be required for additional repairs then under contract, and \$15,000 more for contemplated alterations. The hospitals generally are in good condition. The recommendation heretofore made for the establishment of a "snug harbor" for those sailors and boatmen permanently disabled, and that for the physical examination of all seamen before shipping are renewed. Of the 2,090 pilots examined for colorblindness, sixty-three were rejected as being color-blind, while of the remaining 306, twenty four were rejected for various disabilities. is now no complaint against the examination for color-blindness, and it is believed that the Department would have no difficulty in carrying out the law for the general physical examination of all seamen. One hundred and fifty-four deaths are reported of passengers on voyages from foreign ports to this country. Report thereof is the beginning of statistics on the hygiene of merchant vessels, to meet the intention of Congress in providing for the inspection of those vessels, to show the relative mortality in classes of them. To complete them, the reports should be kept up for years.

An epidemic of small-pox broke out on the Upper Missouri river, where there was no local sanitary law, and the Department, being called upon, made use of the customs force to suppress the disease.

In my judgment, the hospital-tax should not be reduced until seamen request it, or until Congress shall make annual appropriations for the support of the service. When the tax was but 20 cents per month, the Department was obliged to deny relief to many suffering seamen; now relief is denied to few, if any, who are entitled to receive it. The entire number of applicants rejected the last year was 979. These were mostly in the larger cities, and were generally longshoremen and fishermen, in many cases persons who were not sailors. The number of persons rejected who had ever been sailors was small. The

service meets the necessities of those who are its legitimate beneficiaries, and the tax was originally increased from 20 cents to 40 cents at the request of those who are eligible to become such.

STEAMBOAT-INSPECTION SERVICE.

Steamers.

Tonnage.

Officers

licensed.

This table shows steam-vessels inspected, their tonnage, and the officers licensed in the several divisions of navigation, during the fiscal year ended June 30, 1882:

Divisions.

Pacific coast Atlantic coast Western rivers Northern lakes Gulf coast	320 2, 332 944 1, 175 356	121, 493 587, 349 197, 729 298, 709 73, 282	9. 37 9. 60 9. 64 2. 11	8, 2 4, 8 4, 1 1, 9	258 276 305 199 929

Total		 .	27	9,889	30
The expenses were—	•				
Salaries of inspectors and clerks Travelling and miscellaneous expenses.				9, 744 7, 871	
Total			22	7,615	63
Unexpended	•••••	• • • • • • •	\$ 5	52, 273	= 67
Increase in receipts from inspection of s			\$1	0, 212	09
Decrease in receipts from officers' licens	es	••••		37, 877	
Net decrease for the year			2	7, 664	91

The decrease in receipts from licensed officers is because of the amendment of 1882 (April 5) to section 4458, Revised Statutes. It reduced the license fees from \$10 and \$5, according to grade, to fifty

cents in all cases. It is likely that this amendment will bring the yearly receipts below the expenditures. There is, however, an accumulation of funds to the credit of this service of near three-quarters of a million dollars. This will for some years meet any deficiency. Before it is wholly used the service may become self-sustaining by the increase in the number of vessels to be inspected and the fees collected therefrom. The fees have increased for several years about \$6,000 yearly.

The number of accidents to steam-vessels during the year resulting in loss of life was 41; from—

Explosion	15
Fire	
Collision	
Snags, wrecks, and sinking	

The number of lives lost by accidents from various causes during the fiscal year ended June 30, 1882, was 205; from—

Explosion	 .
Fire.	
Collision	
Snags, wrecks, and sinking	
Miscellaneous casualties	
Accidental drowning	

A decrease from last year of sixty-three. Of the lives lost, fifty-six are reported as those of passengers. The rest were employés of the wessels, many losing their lives through carelessness, begot by familiarity with dangerous duties. It is estimated that there were carried during the year 354,000,000 passengers.

IMMIGRATION.

The execution of the act to regulate immigration approved August 3, 1882, has disclosed certain defects in the statute which seem to require legislative remedy.

While the act gives the Secretary of the Treasury supervision of the business of immigration to this country, it enables him to exercise this supervision only through commissioners appointed by the Governors of States in which lie the ports at which immigrants land. He is further to supervise the business only under the stipulations of contracts entered into with such commissioners. Most of the collectors of customs have informed the Department that the amount of immigration at their respective ports is not such as to warrant the appointment of commissioners. At two of the ports at which immigrants needing relief are likely to arrive, namely, Baltimore and New Orleans, no commis-

sioners have been appointed by State authority, and hence the law is there inoperative. At the ports of New York, Philadelphia, and Boston commissioners have been appointed, and the statute is in operation more or less successfully.

In collecting the tax of fifty cents levied by the act on every alien passenger, not a citizen of the United States, arriving by a sail or steam-vessel from a foreign port, it is found that many of the passengers are tourists, many intending a temporary sojourn in this country, and many are minors. Under the construction put by this Department on this provision of the statute, it has restricted the collection of this tax to alien passengers seeking a permanent residence in this country, including in that class minors contemplating a lasting home Under this rule the sum collected at most of the ports has exceeded the demands for immigrant relief. At New York it has steadily fallen behind these demands in an amount between four and five thousand dollars per month. If the relief of immigrants is to be secured, some provision is needed for a deficit of this character, inasmuch as the particular sums collected can be expended only at the ports where the immigrants arrive; and the disposition of the excess at some ports should also be provided for.

It is respectfully suggested that the law is peculiarly framed, in this: that while its execution is charged upon this Department, yet this Department must act through subordinates doing the practical work. They are to be appointed by State authority, and that authority may fail to appoint, and they may or may not be paid a proper remuneration if appointed; and the rules and regulations which this Department by direction of the statute is to establish are virtually restricted by the terms of the contracts into which it may be able to enter with the State boards or commissioners. The law is, therefore, in its essential features one of uncertain operation. The thorough execution of it needs the existence of an administrative bureau, with its proper body of officials. But there is no provision in the act for such bureau, no provision for administrative officers other than as above stated, and no provision for the direct control of the business by this Department.

Under the provisions of section 4 of the act, it is provided that all foreign convicts, except those convicted of political offences, shall, upon arrival, be sent back to the nations where they belong and whence they came. This provision may give rise to complications with foreign countries growing out of demands for the return of convicts. First: if the treaty stipulations with a foreign country require the direct return of a convict belonging to that country to its accredited agents, this law

might conflict with the treaty in requiring a return of the convict by the master of the vessel in which the convict was a passenger, instead of a delivery of the convict to the agents of his country. Secondly: the law is itself ambiguous in its directions, as the country to which the convict belongs may not be that whence he came. The Department has endeavored to remove this difficulty by adopting in its regulations promulgated on the 7th of August last the provisions for the return of convicts embodied in section 5 of the "Act supplementary to the acts in relation to immigration," approved March 3, 1875. But the recent statute should be so amended as, on its face, to be free from ambiguity.

NATIONAL BOARD OF HEALTH.

The report of the National Board of Health for the fiscal year ended June 30, 1882, shows an expenditure of \$98,523.07.

This expenditure has been made chiefly in aid of State and local boards of health and of local quarantine stations, in preventing the coming in of yellow fever and small-pox from foreign ports and the spread of them by river and railroad.

The act of June 2, 1879, under which some of the operations of the board are conducted, will expire by limitation on the 2d of June, 1883. If it be deemed advisable to continue the work on which the board is engaged, additional legislation will be necessary, and appropriations, based upon the past experiences of the board, amounting to \$150,000, will be required, and \$100,000 for use in case of epidemics.

The details of the work of the board, the results achieved, and the appropriations required for its continuance are shown in the annual report of the board, which is transmitted.

APPROPRIATION FOR PREVENTING THE SPREAD OF EPIDEMIC DISEASES.

One hundred thousand dollars were appropriated by Congress at its last session, to be used, in the discretion of the President, for preventing the spread of epidemic diseases. The expenditure was by him committed to this Department, because it had ready the services of trained members of the Marine-Hospital Service, of the Revenue-Marine Service, and the Customs Service.

The Governor of Texas applied for aid in checking the spread of yeltow fever in that State. The Surgeon-General of the Marine-Hospital Service was charged with the duty of rendering it. The trust was fulfilled with judgment and zeal, and the spread of the fever checked. The system of cordons formed by him and his official coadjutors was well conceived and useful. The result of their operations shows that the management of such matters may well be confided to them.

ALASKA.

Early attention should be given to the establishment of civil government for Alaska Territory. The importance of that land is not, I fear, fully recognized. It is rich in timber and in the supplies which the ocean gives; and with the present rapid cutting down of the forest on lands nearer market, and the ruthlessly wasteful modes of taking fish on coasts and in rivers nearer at hand, it will too soon become the resource of the country for those products of nature. Moreover, the extent and richness of useful mineral deposit and of precious metals there are not yet fully known, though the indications are that they are great. Were civil government established, immigration and permanent settlement would be encouraged and the way made ready for the profitable use of the natural advantages which that region proffers. There is no lawful authority in that Territory to dispense justice and act upon conflicting claims, unless that assumed by customs officers may be called such. There should be there, as elsewhere, the ready protection of law, administered by officers and in ways, themselves lawful; and then material and social development would go forward. The Treasury Department should not be charged with the responsibility of administering the affairs of that Territory, except in so far as they come within its legitimate functions; certainly not without some well-defined rule of action.

The Alaska Commercial Company has taken during the past year nearly the maximum number of seal-skins permitted under its lease, paid the tax due thereon, as well as the rent of the islands, and otherwise performed its duties under its lease.

DISTINCTIVE PAPER.

There have been received and duly accounted for since the last report 10,371,950 sheets of silk-threaded distinctive-fibre paper for the printing of United States notes, national-bank notes, gold and silver certificates, registered bonds, checks, and other obligations of the Government. The use of this paper continues to give satisfaction, and it is believed furnishes an important defence against attempts at counterfeiting.

During the same period there have been received 19,748,000 sheets of the distinctive paper adopted for the printing of internal-revenue and customs stamps.

XLVIII REPORT OF THE SECRETARY OF THE TREASURY.

COUNT, EXAMINATION, AND DESTRUCTION OF REDEEMED SECURITIES.

The United States legal-tender notes, national currency and miscellaneous securities, received by this office during the fiscal year ended June 30, 1882, for final count and destruction, amounted to \$169,665,573.75½, and United States legal tender notes, national currency, United States bonds, and other obligations mutilated in process of printing, and unissued notes, received for destruction, amounted to \$40,841,164, making an aggregate of securities counted, cancelled, and destroyed, of which details will be found in the tables accompanying this report, of \$210,506,737.75½.

BUREAU OF ENGRAVING AND PRINTING.

The work of this bureau steadily increases. The aggregate deliveries for the year are over twenty per cent. greater, the expenditures for it less than twelve per cent. greater, and the force of employés about ten per cent. greater than the year before. All the engraving, plate-printing, and work incidental thereto required by the Treasury Department is now done in this bureau under the direct supervision of the officers of the Government.

The matter of the use of steam-power presses for printing was on July 10, 1882, referred to a special committee, who still have it in charge. Owing to a pressure of work on the three per cent. bonds and on the new form of circulating notes for national banks which availed themselves of the act of August 12, 1882, the labors of the committee were necessarily broken in upon, and they have not yet finished the task set them to do.

PUBLIC BUILDINGS.

Congress at its last session authorized the erection of thirty-seven new buildings for public use, including four marine hospitals; the purchase of one hospital-building; the extension and remodelling of the custom-house at Buffalo, and that of the court-house and post-office at Des Moines, Iowa. This contemplated an aggregate final cost of \$6,293,000; of which \$3,258,000 were at once appropriated. Sites have been selected for nine of these buildings, and a site for the building at Jackson, Miss., for which appropriation was made at the previous session. Steps have been taken for the selection of others, where jurisdiction over the land has been ceded by respective States. Where this has not been done the Department awaits the action of Legislatures.

I call attention to a recommendation in the report of the Supervising Architect, that the authority for purchasing land at Pensacola be not limited to the extension of that now owned by the United States, and that the Government may acquire a new site, if found advisable.

Of the buildings in progress under former authorizations, five have been finished during the year, and on twenty work is in progress.

There has been expended during the year on the public buildings under control of the Department, \$2,349,249.65 for construction, \$160,618.03 for repairs, and \$137,137.06 for heating apparatus, elevators, vaults, safes, and locks.

DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1882 were \$3,330,543.87. The revenues deposited in the Treasury for the same period were \$1,715,176.41.

Since December 1, 1881, the bonded indebtedness was reduced by operation of the sinking-fund \$250,350, and the annual interest charge upon the District debt was reduced \$13,795.05. Since the office of the commissioners of the sinking-fund of the District of Columbia was abolished and their duties and powers were transferred to the Treasurer of the United States by the act of Congress of June 11, 1878, the funded debt has been reduced in the principal sum \$1,189,250, and the annual interest charge thereon has been reduced \$69,587.67.

The several reports of the heads of offices and bureaus are herewith respectfully transmitted.

The Department is pleased to report that as yet there is no deficiency in the appropriations placed by Congress at its disposal.

CHAS. J. FOLGER,

Secretary.

To the Honorable

The Speaker of the House of Representatives.

TABLE E.—STATEMENT of OUTSTANDING PRINCIPAL of the PUBLIC DEBT, &c.—Continued.

Year.	Amount.
July 1, 1869	2, 480, 672, 427 81 2, 353, 211, 332 32 2, 253, 251, 328 78 *2, 234, 482, 993 20 *2, 251, 600, 468 43 *2, 232, 284, 531 95 *2, 180, 395, 067 15 *2, 205, 301, 392 10 *2, 256, 205, 892 53 *2, 349, 567, 482 04 *2, 120, 415, 370 63

^{*}In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but, being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years.

STATEMENT of the PUBLIC DEBT, including ACCRUED INTEREST thereon, less cash in the Treasury on the 1st day of July of each year, from 1869 to 1882, compiled from the published monthly debt-statements of those dates.

Years.	Outstanding prin- cipal.	Accrued interest.	Cash in the Treasury.	Debt less cash in the Treasury.
July 1, 1869 1870 1871 1872 1873 1874 1875 1876 1877 1878 1879 1880 1881 1882	12, 353, 211, 332 32 2, 253, 251, 328 78 2, 234, 482, 993 20 2, 251, 690, 468 43 2, 232, 284, 531 95 2, 180, 395, 007 15 2, 205, 301, 392 10 2, 205, 205, 892 53	\$17, 447, 310 79 50, 607, 556 52 45, 036, 706 23 41, 705, 813 27 42, 356, 652 82 43, 939, 997 47 38, 647, 556 19 38, 514, 004 54 40, 882, 791 89 36, 404, 551 31 34, 938, 948, 647 51, 848, 657 75 13, 850, 986, 47	\$156, 167, 813 58 265, 924, 084 61 106, 217, 263 63 103, 470, 798 43 129, 020, 9°2 45 147, 541, 314 74 142, 243, 361 82 119, 469, 726 73 256, 823, 612, 08 353, 152, 577 01 201, 088, 622, 88 249, 363, 415 35 243, 289, 519 78	\$2, 489, 002, 480, 58 2, 386, 358, 509, 74 2, 292, 030, 834, 90 2, 191, 486, 343, 62 2, 147, 818, 713, 57 2, 143, 088, 241, 16 2, 128, 688, 726, 32 2, 099, 439, 344, 99 2, 060, 158, 223, 26 2, 035, 786, 831, 82 2, 027, 207, 256, 37 1, 942, 172, 295, 34 1, 440, 598, 811, 98 1, 688, 914, 460, 72

^{*}It will be noticed that there is a difference in the amounts represented by these two statements as the principal of the debt July 1, 1869, and July 1, 1870. This difference is explained thus: In the principal of the debt as shown by the monthly debt-statements of these dates, the bonds purchased for the sinking fund and paid for from money in the Treasury, were included as a part of the outstanding debt and were also treated in the cash as a cash item, or asset, for the reason that at that time there was no authority or law for deducting them from the outstanding debt. Concress, by the sixth section of the act of July 14, 1870, directed that these bonds should be canceled and destroyed and deducted from the amount of each class of the outstanding debt to which they respectively belonged, and such deductions were accordingly made on the books of the department and in the table of the debt in the annual report.

NOTE 1.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

Note 4.—In the recent monthly statements of the public debt, the interest accrued has been added to the principal, making the net debt larger in that amount than the amount herein stated for each year.

Note 3.—The figures for July 1, 1879, were made up, assuming pending funding operations to have been completed.

Note 3.—The temporary loan, per act of July 11, 1862, is included in the 4 per cents. from 1862 to 1868, inclusive, with the exception of the amount outstanding for August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., and was redeemable on ten days' notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average

LEGAL-TENDER NOTES.							
The act of February 25, 1862 (12 Statutes, 345), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer, at the Treasury of the United States, and of such denominations, not less than five dollars, as the Secretary of the Treasury might deem expedient, \$50,000,000 to be applied to the redemption of demandnotes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for six per cent. United States bonds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of	Indefinite	On demand	None	Par	\$450, 000, 000 00		\$346, 681, 016 00
\$150,000,000 of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender as before anthorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000 of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in liet of \$100,000,000 authorized by the			·	,

The act of July 14, 1870 (16 Statutes, 272), authorizes the issue of \$200,000,000 at 5 per centum, principal and interest payable in coin of the present standard value, at the pleasure of the United States Government, after ten years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20s, or to be exchanged for said 5-20s, par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with each class last dated and numbered. Interest to cease at the end of three months from notice of intention to redeem. The act of January 20, 1871 (16 Statutes, 399), increases the amount of 5 percents to \$500,000,000, provided the total amount of bonds issued shall not exceed the amount originally authorized, and authorizes the interest on any of these bonds to be paid quarterly. The act of December 17, 1873 (18 Statutes, 1), authorized the issue of an equal amount of bonds of the loan of 1855, which the holders thereof may, on or before February 1, 1874, elect to exchange for the bonds of this loan. settlement of clearing-house balances at the place, where the de- posits therefor were made, and that the United States notes for which such certificates were issued, or other United States notes of like amount, shall be held as special deposits in the Treasury, and used only for the redemption of such certificates.							
SILVER, CERTIFICATES.							
The act of February 28, 1878 (20 Statutes, 26, sec. 3), provides that any holder of the coin authorized by this act may deposit the same with the Treasurer or any assistant treasurer of the United States in sums not less than ten dollars and receive therefor certificates of not less than ten dollars each, corresponding with the denominations of the United States notes. The coin deposited for or representing the certificates shall be retained in the Treasury for the payment of the same on demand. Said certificates shall be receivable for customs, taxes, and all public dues, and, when so received, may be reissued.	Indefinite	On demand	None	Par	No limit		66, 096, 710 00
REFUNDING CERTIFICATES.	-			l			
The act of February 26, 1879 (20 Statutes, 321), authorizes the Secretary of the Treasury to issue, in exchange for lawful money of the United States, certificates of deposit, of the denomination of ten dollars, bearing interest at the rate of four per centum per annum, and convertible at any time, with accrued interest, into the four per centum bonds described in the refinding act; the money so received to be applied only to the payment of the bonds bearing interest at a rate not less than five per centum, in the mode prescribed by said act.	Indefinite	Convertible in- to 4 per cent. bonds.	4 per cent	Par	No limit	40, 012, 750 00	465, 050 00
FUNDED LOAN OF 1881, CONTINUED AT THREE AND ONE-HALF PER CENT.							
These bonds were issued in exchange for five per cent. bonds of the funded loan of 1881, by mutual agreement between the Secretary of the Treasury and the holders, and were made redeemable at the pleasure of the government.	Indefinite	At pleasure of the governm't.	3½ per cent	Par			401, 503, 900 00

TABLE N.—STATEMENT of 30-YEAR & PER CENT. BONDS (interest payable January and July) ISSUED, to the several PACIFIC RAILWAY COMPANIES under the acts of July 1, 1862 (12 Statutes, 492), and July 2, 1864 (13 Statutes, 359).

On January 1, 1876:	Railway companies.	Amount of bonds outstanding.	Amount of interest accrued and paid todate, as per pre- ceding statement.	Amount of interest due as per Regis- ter's schedule. Note 1.—The amount of State and national bank circulation is compiled from the reports of the Comptroller of the Currency at the nearest dates obtainable to the end of

NOTE 1.—The amount of State and national bank circulation is compiled from the reports of the Comptroller of the Currency at the nearest dates obtainable to the each fiscal year; the other amounts are taken from the official printed reports of the Secretary of the Treasury.

*NOTE 2.—Exclusive of \$8,375,934, amount estimated as lost or destroyed, act June 21, 1879.

NOTE 3.—The one and two year notes of 1863, and the compound-interest notes, though having a legal-tender quality for their face-values, were, in fact, interest bearing securities, payable at certain times, as stated on the notes. They entered into circulation for but a few days, if at all, and since maturity those presented have been converted into other interest-bearing bonds or paid for in cash, interest included.

NOTE 4.—The amount of fractional silver in circulation in 1860, 1861, and 1862 cannot be stated. The amounts stated for 1876 and subsequent years are the amounts coined and issued since January, 1876. To these amounts should be added the amount of silver previously coined which has come into circulation.

Digitized for FRASER

TABLE P.—STATEMENT of UNITED STATES BONDS and other OBLIGATIONS RECEIVED and ISSUED by the OFFICE of the SEC-RETARY of the TREASURY, from November 1, 1881, to October 31, 1882.

Description.	Issued.	Received for ex- change and transfer.	Received for exchange into 3 per cent. bonds.	Received for re- démption.	Total,
Loan of 1858, act of June 14, 1858. Loan of February, 1861, act of February 8, 1861 Oregon war debt. act of March 2, 1861. Loan of July and August, 1861, acts of July 17 and August 5, 1861 Five-twenty bonds of 1862, act of February 25, 1862 Pacific Railroad bonds. acts of July 1, 1862, and July 2, 1864. Loan of 1863 (1881s), act of March 3, 1863 Gold certificates, act of March 3, 1863 Gold certificates, act of March 3, 1864 Five-twenty bonds of 1864, act of June 30, 1864 Seven-thirty notes of 1864-'65, acts of June 30, 1864, and March 3, 1865. Five-twenty bonds of 1865, act of March 3, 1865 Consols of 1867, act of March 3, 1865 Consols of 1867, act of March 3, 1865 Consols of 1868, act of March 3, 1865 Consols of 1868, act of March 3, 1865 Funded loan of 1891, acts of July 14, 1870, and January 20, 1871 Funded loan of 1891, acts of July 14, 1870, and January 20, 1871 Funded loan of 1897, act of July 14, 1870, and January 20, 1871 Funded loan of 1897, act of July 14, 1870, and January 20, 1871 Funded loan of 1897, act of July 14, 1870, and January 20, 1871 Certificates of deposit, act of July 8, 1872 ½ per cent. bonds, acts of July 17 and August 5, 1861 ½ per cent. bonds, acts of July 14, 1870, and January 20, 1871 þer cent. bonds, acts of July 14, 1870, and January 20, 1871 Þer cent. bonds, acts of July 12, 1882	\$4, 210, 000 00 \$6, 094, 950 00 104, 947, 950 00 18, 920, 000 00 18, 348, 400 00 17, 243, 100 00 106, 215, 750 00	\$4,210,600 00 \$4,210,600 00 36,054,950 00 104,868,200 00 18,348,400 00	\$13, 231, 650 00 246, 138, 850 00	97, 000 00 134, 950 00 1, 926, 850 00 5, 100 00 417, 850 00 637, 380 00 236, 150 00 6, 600 00 56, 500 00 363, 150 00 117, 100 00 6, 814, 450 00 17, 555, 000 00 10, 622, 800 00 20, 878, 350 00 9, 700 00	\$1,000 00 97,000 00 134,950 00 1,026,850 00 5,100 00 8,420,000 00 417,850 00 637,380 00 2,850 00 6,600 00 56,500 00 363,150 00 117,100 00 6,814,450 00 72,189,900 00 209,816,150 00 36,475,000 00 147,319,600 00 78,596,200 00 458,550,00 00

APPENDIX.

REPORT ON THE SILVER-PROFIT FUND.

NEW YORK, April 28, 1882.

Sir: I have the honor to report that, pursuant to your instructions of the 7th instant, I have made an examination of the "silver profitfund account" of the several coinage mints, and herewith present statements of that account; also statements of the "silver bullion" and "silver-coinage" accounts for the fiscal years 1879, 1880, and 1881. The accompanying statements are numbered from 1 to 13, inclusive. As will be seen by these accounts, the total amount placed to the credit of the silver-profit fund during the period covered by this investigation was \$10,081,496.31, which has been disposed of as follows, viz:

Deposited in the Treasury of the United States \$9,776,020 24 Expenses of distribution and allowances for wastage by operative officers 305,476 07

10, 081, 496 31

The amount as given in a report lately published was \$10,181,496.31, showing a difference of \$100,000, which is accounted for as follows, vis:

On July 1, 1878, the silver-profit fund of the San Francisco Mint showed a credit balance of \$137,182.25, but the records of the Treasury Department show that \$100,000 of this balance had been deposited by order of the Secretary of the Treasury, on June 28, 1878, with the Treasurer of the United States at Washington, D. C. Notice of this transaction did not reach San Francisco until the third quarter of 1878, and in the absence of such notice, the Superintendent of the Mint had no authority to take credit for said deposit. Hence his balance of \$137,182.25 was a nominal balance, the actual amount being \$37,182.25. In order that the whole transaction may be shown in the consolidated statement of the silver-profit fund, the nominal balance has been brought forward as on hand at San Francisco July 1, 1878, and the deposit of \$100,000 made June 26, 1878, has been deducted to show the actual balance on hand, viz, \$37,182.25. The warrant by which the \$100,000 was covered into the Treasury having been taken up in the statement as a credit, a corresponding deduction has been made upon the credit side of the account. In other words, a counter entry of \$100,000 has been made, which reduces the total to \$10,081,496.25, this being the correct amount of the profit at the four coinage mints from June 30, 1878, to July 1, 1881.

The difficulty of calculating the profits on the coinage of silver in any other way than by taking the average cost of the bullion for a given

period is shown by the following facts, viz:

The act of February 28, 1878, authorizing the coinage of the standard silver dollar, directed the Secretary of the Treasury to purchase silver bullion at the market price, not less than \$2,000,000—nor more

than \$4,000,000—worth per month, and cause the same to be coined as fast as purchased into silver dollars, and that any gain or seigniorage arising from this coinage should be accounted for and paid into the Treasury as provided by the law relating to the subsidiary coinage. (Section 3528 Revised Statutes.)

Silver for this purpose is obtained by weekly purchases made by a Commission, consisting of the Assistant Secretary of the Treasury, the Treasurer of the United States, and the Director of the Mint, of lots of not less than 10,000 ounces, offers being made by telegraph every Thurs-The silver so purchased is delivered to the mint designated, the Superintendent receiving and paying for the same, charging himself with the amount received in standard ounces. In addition to this, the Superintendents of the Mints have authority from the Secretary to purchase lots of less than 10,000 ounces when offered at prices fixed from day to day or from week to week by the Director. Silver is also obtained for this purpose by the purchase, by the Superintendents, of the silver contained in deposits of gold bullion, by the return of surplus silver bullion by the operative officers, by the remelting of coins, by the payment of the Government charges on deposits of silver bullion for bars, in bullion, and, finally, from the sweepings of the floors of the deposit-melting rooms and the scrapings of the crucibles.

The law allows depositors to deposit silver bullion in the mint to be The charges imposed for the operations are collected made into bars. in bullion, thereby adding to the stock of silver which can be used in

the coinage of the silver dollars.

The sources from which silver to be used in coinage may be obtained may be summarized as follows:

Purchases by the Silver Commission.

Purchases by Superintendents (less than 10,000 ounces).

Purchases of the silver contained in deposits of gold bullion.

Payment of mint charges in silver bullion.

Surplus bullion returned by operative officers.

Silver bullion recovered from deposit-melting room.

Coins deposited by the Assistant Treasurer for recoinage.

The difference between the cost of the silver thus obtained and the face value of the coins which it will make, is the profit to the Government which the law authorizes to be credited to a fund called "Silverprofit fund." These profits can be used by law for the following purposes viz:

For expenses of distributing silver dollars, for payment of silver wasted in coinage and the preparation of ingots, and for payment of

loss on sweeps sold.

From the variety of sources and the different prices at which this bullion is obtained, it will be seen that the material of which a single dollar is composed may have been acquired at several different rates. It is impossible to follow a single deposit of bullion through the various manipulations it undergoes from the time it is received at the mint until its coinage, and accurately determine the profit on that particular deposit, as no one deposit is separately manipulated, it having been found by experience to be more economical to mix new bullion with that which has been previously melted than to treat it separately.

Section 3506 of the Revised Statutes provides that the amount remaining in the silver-profit fund, after paying the wastage and expenses of distributing the coins, shall be from time to time covered into the Treasury. The wording of the last clause is: "The balance to the credit of this fund shall be from time to time, and at least twice a year,

paid into the Treasury of the United States."

The regulations governing the mint service, approved by the Secretary of the Treasury, provide that "all profits, gains, and charges, together with the funds arising from the sale of by products and old materials, must be covered quarterly into the Treasury of the United States, and no portion thereof used for the payment of salaries or ordinary expenses." The practice has been to cover into the Treasury profits on the coinage of silver at such times and in such amounts as best suited the general business of the mints and the Department. The accounts show the amounts covered into the Treasury by transfers from the "silver profit-fund account" to the "bullion-fund account," and the coin does not leave the vaults of the mint.

When a sufficient amount of profits have accumulated at any mint, in the judgment of the Director, he addresses a letter to the Secretary of the Treasury requesting that such amount be deposited and transferred to the Superintendent's bullion fund, and the Secretary directs the Treasurer to make a deposit in the name of the Superintendent and issue at the same time a transfer order charging it to his bullion fund.

It has never been held by the Director of the Mint that the exact balance at the close of the fiscal year should be at that time covered into the Treasury. This, in the judgment of the Director, would not be practicable, for the reason that the expenses of distributing the coins are being incurred daily, and it is necessary to keep a portion of the profits on hand to pay this expense, as well as to pay the loss on the silver in sweeps sold, and the operative officers' silver wastage. The Superintendent is charged with the profits, whether in the silver-profit account or after transfer to the bullion fund.

The bullion accounts of the mints, which are very elaborate and voluminous reports, do not reach the office of the Director for some two months after the close of the quarter for which they are rendered, and it is thought desirable to examine the accounts and check the payments from the silver profit fund in order to verify the balance of silver profits on hand before ordering the full amount to be covered into the Treasury. Should an amount be covered into the Treasury by error, it

cannot be withdrawn except by an act of Congress.

Prior to the 1st of January, 1881, the profits on the coinage of silver were declared on the silver purchased, in accordance with the regulations of 1874, approved by the Secretary of the Treasury, page 13, which reads: "It is directed, therefore, that on all silver purchased or parted, a profit shall be credited at the end of each quarter, equal to the difference between the rate of purchase and issue." In accordance with these regulations the silver bullion purchased was charged to the Superintendent at its cost. He was also charged with the difference between the cost of the bullion and the face value of the standard silver dollars it would make. This regulation had for its object the keeping of the accounts at one unit of value. During the three fiscal years 1879, 1880, and 1881, there were coined at the Philadelphia mint \$21,081.75 subsidiary silver coin, and the additional profit arising from the difference in weight between two half dollars and a standard dollar was credited to the silver-profit fund as an additional profit.

No subsidiary silver was coined at any other coinage mint during the

three fiscal years under consideration.

From the facts ascertained during this examination at the Bureau of the Mint and at the mint in Philadelphia, where I witnessed the actual workings of the operative officers, I am of opinion that it is im-

possible to divert any of the funds belonging to the silver profit fund account from their proper channel, except through collusion between the Superintendent and the several officers of each mint, for the following reasons, viz: First. The Superintendent of each mint is charged with the silver bullion purchased for coinage by weight in standard ounces, as determined from the fineness reported by the assayer, and he must account for the number of ounces delivered to him. Second. This bullion he delivers by weight to the melter and refiner to be made into ingots, and receives back by weight the ingots to be made into coin, which ingots are in turn delivered to the coiner, the coiner returning coin and bullion in clippings, &c. Third. Receipts for weight in standard ounces pass for all these transactions. These receipts accompany the bullion accounts as vouchers, and there is no way that the Superintendent can obtain a credit for any of this bullion, except in the manner stated. He must account for the number of ounces of bullion delivered to him, by making it into coin, by the wastage of the operative officers in their business and the amount sold in sweeps.

On the 30th of June of each year since the organization of the office of Director of the Mint, the coin and bullion in the Superintendents' possession have been weighed by representatives of the Department for the purpose of ascertaining whether the officers had in their possession the balances called for by their books and accounts; and these accounts have been certified and allowed by the First Auditor and the First Comptroller, and the bullion and coin actually weighed by examiners

designated by the Director for that purpose.

From the facts ascertained by the examination of this account for the period under consideration, I am of the opinion that the silver-profit fund has been properly accounted for.

I was greatly assisted in making up these accounts by Mr. Thomas Rathbone, of the Second Auditor's Office. On my return, I made an examination of the books and accounts of the Philadelphia mint, and found them to agree in every particular with the accounts of that instition, as prepared by Mr. Rathbone and myself from the quarterly accounts on file in the Department.

Very respectfully,
Hon. Charles J. Folger,

Secretary of the Treasury.

WILLIAM SHERER.

NOTES APPERTAINING TO CONSOLIDATED STATEMENT OF SILVER-PROFIT FUND.

*The total amount given in the report heretofore published is	. \$10, 181, 496 31 . 10, 081, 496 31
•	
Showing a difference of	100, 000 00

Which is accounted for as follows:

On July 1, 1878, the silver profit fund account of San Francisco Mint showed a balance of \$137, 182, 25 on hand, but the records of the Treasury Department prove that \$100,000 of this balance was deposited by order of the Secretary of the Treasury, on June 26, 1878. Notice of this deposit did not reach San Francisco until the third quarter, 1878, and in the absence of such notice the Superintendent of the Mint had no authority to take credit for such deposit. Hence his balance of \$137,182.25 was a nominal balance the extra large the catter large transport being \$237,182.25. balance, the actual amount being \$37,182.25.

balance, the actual amount being \$37, 182.25.

In order that the whole transaction may appear in this "consolidated statement," the nominal balance of \$137, 182.25 has been Brought forward as on hand at San Francisco, July 1, 1878, and the deposit of \$100,000 made on June 26, 1878, has been deducted from said balance, so as to show the actual balance on hand, namely, \$37,182.25. The warrant by which the \$100,000 was covered into the Treasury having been taken up as a credit in this statement, a similar deduction has been made on the credit side of the account. In other words, a counter entry of \$100,000 has been made, which reduces the total to \$10,081,496.31, that being the correct amount of the transactions at the four coinage mints on account of the "silver profit fund," from July 1, 1878, to June 30, 1881.

† This balance has been deposited in the Treasury and covered in, as per warrants on file in the Register's office, as follows:

REPORT OF COMMISSIONER OF INTERNAL REVENUE.

67

THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, November 25, 1882.

SIR: I have the honor to submit the annual report of the Commissioner of Internal Revenue for the fiscal year ended June 30, 1882, with additional information relative to the operations of the Bureau during the months of July, August, September, and October of the present fiscal year, and accompanied by an appendix* of tabular statements as follows:

Table A, showing the receipts from each specific source of revenue, except adhesive stamps, and the amounts refunded in each collection district, State, and Territory of the United States, for the fiscal year ended June 30, 1882.

Table B, showing the number and value of internal-revenue stamps ordered monthly by the Commissioner and from the office of the Commissioner; the receipts from the sale of stamps and the commissions allowed thereon; also the number and value of stamps for special taxes, tobacco, cigars, cigarettes, snuff, distilled spirits, and fermented liquors, issued monthly to collectors during the fiscal year ended June 30, 1882.

Table C, showing the percentages of receipts from the several general sources of revenue in each State and Territory of the United States to the aggregate receipts from the same sources, by fiscal years, from July 1, 1863, to June 30, 1882.

Table D, showing the aggregate receipts from all sources in each collection district, State, and Territory of the United States, by fiscal years, from September 1, 1862, to June 30, 1882.

Table E, showing the receipts in the United States from each specific source of revenue, by fiscal years, from September 1, 1862, to June 30, 1882.

Table F, showing the ratio of receipts in the United States from specific sources of revenue to the aggregate receipts from all sources, by fiscal years, from July 1, 1863, to June 30, 1882.

Table G, showing the returns of distilled spirits, fermented liquors, manufactured tobacco, suuff, cigars, and cigarettes, under the several acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1882.

Table H, showing the receipts from special taxes in each collection district, State, and Territory for the special-tax year ended April 30, 1882.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal-revenue laws during the fiscal year ended. June 30, 1882.

Table K. Abstract of seizures of property for violation of internal-revenue laws during the fiscal year ended June 30, 1882.

REDUCTION OF TAXATION.

The receipts from internal revenue taxation have year by year increased, from \$113,000,000 in the fiscal year 1879, to \$124,000,000 in 1880, to \$135,000,000 in 1881, and to \$146,500,000 (in round figures) in the fis-

^{&#}x27;s The appendix here referred to is omitted from this volume for want of space, but it will be found in the bound volumes of the Commissioner's report,

cal year last ended. There will probably be some diminution in the receipts for the present fiscal year as compared with last year, but it is not likely that the collections of internal revenue for the current year will fall below \$145,000,000 should the taxes now imposed be retained.

It is an old and sound maxim that no more revenue should be raised than is necessary for an economical administration of the government and a gradual reduction of the public debt. Although taxation may be so wisely adjusted as not to operate as a severe burden upon the people, when the amount collected is beyond the actual needs of the government there is presented a constant temptation to extravagance in appropriations. Another consideration attending the existing overflowing condition of the public Treasury cannot have failed to attract your notice. If the present rate of paying the principal of the public debt be continued, all the bonds subject to call will be paid within three years; after which time the government will be compelled, in order to dispose of its surplus revenue, to buy in open market the 41 per cent. bonds which fall due in 1891, or the 4 per cent. bonds which fall due in 1907. Should the government thus become an active purchaser of these bonds before maturity it seems clear that they would advance in price to 25 or 30 per cent. premium, to pay which would certainly be regarded as a waste of the people's money. It seems to me judicious that the principal of the public debt should be extinguished, as was originally contemplated, only at the rate necessary to meet the requirements of the sinking fund, viz, to the extent of about \$55,000,000 per annum. fore, it becomes obvious that a reduction of from seventy to eighty millions in the annual revenues of the country could be safely entered upon, and in my judgment such a reduction is urgently called for. I respectfully offer some suggestions for your consideration in this regard.

Sound policy would seem to require that in remitting taxation the relief should fall as far as possible upon those articles which are necessaries of life, and upon those interests which are of pressing importance to the country. The great bulk of internal revenue taxation is derived from distilled spirits (about nine-tenths of which are used as a beverage), malt liquors, tobacco, and cigars. These are not articles of necessary consumption, but are articles of luxury, the taxes upon which are really paid by the consumers, and no one need consume them. strongly of the opinion that, so long as the principle of deriving part of the revenue of the government from internal taxation is retained, these articles, and the dealers therein, are proper subjects for taxation. There is no demand on the part of consumers of these products for the remission of the taxes imposed upon them; there is no public sentiment calling for their repeal; on the contrary, the general current of public opinion seems to be in favor of their retention.

The other objects of internal-revenue taxation, with the amounts

realized therefrom during the past uscal year, are as follows	s :	
Friction matches	\$3, 272, 258	00
Patent medicines, perfumery, &c	1,978,395	56
Bank checks	2, 318, 455	14
Bank deposits	4,007,701	. 98
Savings-bank deposits	88, 400	47
Bank capital		
Savings-bank capital	14,729	38

Add to these items the taxes collected by the Treasurer of the United States from national banks, as follows:

National banks (deposits)..... 5, 521, 927 47 National banks (capital)

Digitized for FRASER

As suggested in my report for 1880, these taxes should, in my opinion, be repealed. The tax on friction matches is more or less felt in every household. The tax on savings bank deposits is a tax on thrift. The tax on patent medicines, perfumeries, and cosmetics is vexatious, being levied upon innumerable articles. The taxes on bank capital, bank deposits, and bank checks are not needed for purposes of revenue, and can therefore be dispensed with, and the latter tax is largely amenable to the objection made to the tax on deposits in savings banks—that it is an impost laid upon the practice of economy, which it should be the design of all good governments to encourage.

The repeal of these taxes would greatly simplify the internal revenue system. Then, if to the eighteen and three-quarter millions of reduction thus proposed Congress should add a reduction in the charges for special taxes to dealers in articles taxed for internal revenue substantially as proposed in the bill now pending before the Senate, a still further diminution of taxation would be attained, and the supervision over dealers in taxable articles, which experience has shown to be necessary in order to fully and fairly collect the taxes from all alike, would still be

preserved.

Reducing all these special taxes 40 per cent., the remissions under this head would be as follows, on the basis of last year's collections:

Special tax payers.	Present. rates.	Proposed rates.		nnual re- luction.

Total			<u> </u>	3, 007, 90

The act of March 1, 1879, reduced the tax on tobacco from 24 cents per pound to 16 cents per pound, but did not reduce the tax on cigars and cigarettes. A corresponding reduction on cigars would be to \$4 per thousand, and on cigarettes to \$1.20 per thousand. This, I think, should be done, and would amount to a reduction of taxes of \$6,746,000.

This would make a total reduction of internal-revenue taxes (including the taxes on national banks) as follows:

 Matches, medicines, perfumery, and banks
 \$18,777,983
 77

 Special taxes
 3,007,905
 00

 Cigars and cigarettes
 6,746,000
 00

While it is undoubtedly deemed advisable by many that there should be a revision of the tariff, it is unquestionably the case that it is not possible to foresee the effect which a reduction of the rate of duties on many of the great lines of importation would have upon the receipts from customs. It is contended that a reduction of duty upon many articles would so increase the importation of them as to yield an actual increase of revenue. The demand of the hour is for legislation that will reduce the receipts of the government I venture to suggest whether it is not desirable to consider the practicability of taking the duty off About 2,200,000,000 pounds of sugar are annually consumed in the United States, 10 per cent. of which is produced in this country. Upon the 2,000,000,000 pounds imported, the government realizes a revenue of \$49,000,000. Sugar is one of the necessaries of life; it is consumed in every household. Should this duty be removed, there would be not only a certain and large reduction of revenue, but the benefit of that reduction would immediately inure to the people. best refined sugar, which now sells at 10 cents a pound retail, could be sold at seven cents if the duty were removed, and the total reduction would amount to very nearly one dollar per capita per annum of the entire population of the country.

The objection to this measure would be the abolition of the protection now afforded to the sugar interests of Louisiana and other States. difficulty might be met by giving a bounty of, say, two and one half cents per pound upon all home-produced sugar. The cultivation of sugar in this country is not a rapidly growing industry; there is no prospect that the production of cane sugar will ever bear a greater proportion to the consumption than at present. If the area of the lands suitable for the growth of sugar cane was large, and the industry was one which would develop rapidly under the encouragement of protective legislation, so that the constantly growing demand for sugar would be overtaken and supplied by a home product, the question would be very different; but such is not the case. Sugar-cane is a tropical plant, and its cultivation in the United States is confined to a small portion of Louisiana, Florida, and Texas, and where grown it is subject to the hazards of frosts and floods, so that a maximum crop is not produced oftener than every other year, as will be seen from the following figures, which show the quantities of sugar and molasses produced for the years named:

Years.		Molasses.
1859-'60 1877-'78 1878-'79 1879-'80 1880-'81	Hogsheads. 230, 982 136, 878 228, 451	

The quantity of sugar imported during the fiscal year 1861 was 511,000,000 pounds, while the quantity imported during the fiscal year 1882 was 1,900,000,000 pounds. It is thus seen that while the home product has not increased in twenty-one years, the importations have increased almost fourfold.

I apprehend if sugar were not produced in this country Congress would not hesitate to remove the duty from imported sugar as the best means of reducing taxation. The present law gives to the sugar planters of this country, indirectly, about \$4,000,000 or \$5,000,000 per annum. My proposition would be to give them this amount directly and let the whole people have the benefit of the reduction of taxation of, say, \$49,000,000, which would in this way be effected.

The principle of paying a bounty for the encouragement and development of American industry is not new; it was adopted in the case of our fisheries as early as 1813, and was continued for more than fifty years. Millions of dollars have been paid out during this period to American fishermen for fish caught and exported, and we are still giving to this industry the bonus of allowing them to withdraw salt free of duty and of requiring from them no tonnage dues. As a matter of principle, a bounty to our sugar interests would, in my opinion, be no more objectionable than similar encouragement to our fisheries.

These reductions, if made, would amount to \$77,531,888.

Detailed information is subjoined of the amount of internal revenue collected during the past year, and for the first four months of the present fiscal year; of the sources whence that revenue was derived; of the States and districts in which the collections were made during the past year, and as to the cost of collection, &c.

COMPARATIVE RECEIPTS FOR LAST TWO FISCAL YEARS.

ACCOUNTABILITY FOR THE PUBLIC FUNDS.

The entire amount thus collected was promptly covered into the Treasury without loss. During the past six fiscal years the sum of \$748,834,071.02 has been collected from internal revenue taxation and paid into the Treasury without any loss by defalcation.

COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

For salaries and expenses of collectors, including pay of deputy collectors, clerks, &c.	\$1,980,790	88
For salaries and expenses of revenue agents, surveyors of distilleries,	Ψ1,000,100	
gaugers, storekeepers, and miscellaneous expenses	* 2, 256, 318	37 .
For stamps, paper, and dies	565, 026	28
For expenses of detecting and punishing violations of internal-revenue		
laws	52, 015	95
For salaries of officers, clerks, and employés in the office of Commis-	. 050 000	^^
sioner of Internal Revenue	253, 330	00
Total	5, 107, 481	48

The total expenses (including the expenses of this office) will be found, on final adjustment, to be less than $3\frac{1}{2}$ per cent. on the amount collected. The expenses of collection for the last six years have been about \$27,087,300, or about 3.6 per cent. on the amount collected. This sum has been disbursed without loss to the government.

^{*} This item is liable to be slightly increased by the payment of a few accounts not yet adjusted.

BONDS APPROVED AND AMOUNTS RECOVERED THEREON.

The following tables will be interesting as showing the number of bonds received and approved by collectors of internal revenue during the past six years, in connection with the manufacture of spirits, malt liquors, tobacco, and cigars, the warehousing of distilled spirits, and the exportation of taxable articles. It will be seen that 139,641 bonds have been executed, aggregating the penal sum of \$701,726,043.20; the sum of \$25,955.74 has been collected from sureties, and \$97,336.09 recovered on distilled spirits on judgments not yet collected.

This exhibit reflects great credit upon the officers receiving and approving the bonds, and upon the taxpayers who executed them, the amount recovered from sureties being infinitesimal as compared with the detailed collections of taxes:

STATEMENT relative to BONDS of DISTILLERS, CIGAR MANUFACTURERS, TOBACCO, MANUFACTURERS, BREWERS, and EXPORT TOBACCO BONDS for SIX YEARS ended June 30 1882.

Penal sum of bonds withdrawn for transfer to manufacturing ware-houses	1, 171, 035 00

No judgments have been rendered upon bonds of this description.

ACCOUNTABILITY FOR STAMPS RECEIVED.

A committee was appointed on the 7th June last at my request to count the stamps on hand in the vaults of this office, and to verify the account of stamps received and issued. The committee consisted of Mr. T. L. De Land, Office of the Secretary of the Treasury; Mr. S. C. Clarke, First Comptroller's Office, and Mr. V. N. Stiles, Fifth Auditor's The committee was furnished with a statement showing the transactions in stamps from October 4, 1877 (the date of the transfer of the stock of stamps to this Bureau by the New York Bank Note Companies, and the commencement of printing of stamps by the Bureau of Engraving and Printing), to June 10, 1882 (the date of the commencement of work by the committee). The total number of stamps received during the period was 2,544,344,342; value, \$711,180,978.63; issued, 2,381,155,648; value, \$668,974,384.46; leaving the balance on hand June 10, 1882, 163,188,694 stamps; value, \$42,206,594.17. The balance of stamps was counted under the direction of the committee and found to be correct to a stamp, and the value agreed to a cent with the balance shown by the books of this office. This immense quantity of stamps has been received, counted, and issued without an error resulting in the loss of a stamp.

A detailed statement showing the number and value of the stamps received and issued during the six years, and of the balance remaining

on hand, is given at page 92 of this report.

GENERAL CONDITION OF THE SERVICE.

The condition of the service is all that can be desired. The reports of the inspecting officers show that an admirable *esprit de corps* actuates every officer in the performance of his duties.

I desire to extend my thanks to the officers of internal revenue throughout the country for their zeal and energy in bringing about this result. The thanks of this office are also due to the United States marshals for their hearty co-operation with the internal-revenue officers in enforcing the laws.

DISTILLED SPIRITS IN BOND.

Some months ago many of the leading sweet-mash distillers made an arrangement for a reduction of the producing capacity of their distilleries, and for limiting the manufacture of their line of distilled spirits to the demands of the trade. They have recently been followed by a large number of sour-mash distillers with a somewhat similar arrangement. The effect will be to cut down the production of all classes of distilled spirits to the demands of the trade.

On the 30th day of June, 1882, the spirits remaining in warehouses reached the highest point, namely, 89,962,645 gallons. Since that time there has been a gradual reduction in the amount remaining in warehouses, and on the 1st day of November, 1882, the amount was 84,628,331 gallons. This large stock mainly consists of fine grades of whisky, the tax upon which will fall due from month to month until the last withdrawal, which must be made November 6, 1885.

which must be made November 6, 1885.

If the future demand for this class of goods is to be judged of by the withdrawals of similar goods tax-paid during the past few years, the stock now on hand is equal to six years' consumption. To postpone the payment of the tax on this stock until its withdrawal is required by the

demands of trade, a movement has been set on foot for its exportation and reimportation, and storage in customs bonded warehouses. This is entirely practicable under exisiting laws, and it becomes a question whether it would not be better to afford by legislation the relief sought to be obtained by this indirect means. An extension of the bonded period for a reasonable time need not impair the security of the government for its taxes, and would in no manner tend to reduce the income of the government from this source of revenue which has up to this period resulted from the natural laws of trade and the demand for distilled spirits for consumption. By this means the expenses of transportation both ways and custom-house charges abroad would be saved.

THE ENFORCEMENT OF THE LAWS.

It affords me great pleasure to report that the supremacy of the laws of the United States for the collection of its internal revenues has been established in all parts of the country. Frauds in the manufacture and sale of whisky and tobacco in the districts where they have hitherto most prevailed have become the exception rather than the rule. There is no longer organized resistance to the authority of the government, the people render obedience to the laws, and the taxes are collected without unnecessary friction and with but little litigation. To maintain this favorable condition of things and to prevent the recurrence of frauds it will be necessary to continue the system of careful policing which has brought about this result.

I have to record with extreme regret, as signalizing the closing hours of the long struggle maintained against the enforcement of the internalrevenue laws, the murder of Deputy Collector James M. Davis, near McMinnville, Tenn., in March last. Captain Davis was one of the bravest and most efficient officers engaged in the suppression of illicit Whilst on his way from court he was waylaid on the public. highway in broad daylight by ten or more assassins, concealed behind an ambush of logs and bushes specially constructed for the purpose, and was deliberately murdered under circumstances of peculiar atrocity whilst bravely defending himself to the last. The place where this crime was committed is in the midst of a well-settled country. There is circum. stantial evidence that the assassination was plotted in a place of public resort not far from the scene of the murder. Citizens rode by whilst Davis's body was still warm and before his slayers were fairly out of sight, yet, though liberal rewards have been offered for the detection and arrest of the criminals, no evidence has yet been obtained upon. which an arrest could be based.

PENSIONS TO WIDOWS AND ORPHANS OF OFFICERS KILLED.

The successful close of the struggle to establish and maintain the internal-revenue laws of the United States is in my opinion a fitting occasion to renew the recommendation in my last report for the granting of pensions to persons disabled while engaged in enforcing said laws, and to the widows and orphans of officers killed in the discharge of their duty. The service in which these officers were engaged was particularly hazardous. No alternative being left except to meet force with force, they were armed by the government with breech loading carbines to protect themselves against the assaults of those who resisted its authority. In this struggle thirty-one officers and employés have been killed and sixty-four wounded. I respectfully submit that these wounded officers and the widows and orphans of those who have been slain have a just claim upon the bounty of the government, and I earnestly recommend early legislation upon the subject.

OPERATIONS AGAINST ILLICIT DISTELLERS.

The following statement shows the number of illicit stills seized, persons arrested, and officers and employés killed and wounded during the last fiscal year, and from June 30 to November 1, 1882:

	s	tills seiz	ed.	Pers	ons arre	sted.	kille	loyes

^{*} Informers.

Taylor Love was killed on the 2d of November, 1881, in Habersham County, second district of Georgia, for giving information to internal-revenue officers in regard to illicit spirits seized.

Lee Turner was killed in March, 1882, in Gwinnett County, second district of Georgia, for informing internal revenue officers in regard to

illicit stills.

Deputy Collector Thomas L. Brayton was killed in Pickens County, South Carolina, July 20, 1881, by John McDow, an illicit distiller, whose still he had seized and whom he was endeavoring to arrest.

Deputy Collector James M. Davis was killed by illicit distillers, near

McMinnville, Warren County, Tennessee, March 13, 1882.

ORDNANCE IN THE HANDS OF COLLECTORS.

There is in the hands of the collectors and others, for the enforcement of the laws, the following described ordnance, for which they are responsible:

Name.	District.	Springfield rifles.	Springfield carbines.	Schoffeld, Smith & Wesson's revolvers.	Cartridge, boxes.	Pistol-cartridge pouches.	Waist-belts and plates.	Arm-chests.
James T. Rapier Dennis Eagan W. H. Johnson L. M. Pleasant Morris Marks I. J. Young George B. Everitt T. N. Cooper E. M. Brayton J. M. Melton A. M. Hughes, jr R. F. Patterson J. H. Rives F. H. Pierpont Jacob Wagner, revénue agent T. C. Tracie, revenue agent	Second Tennessee Fifth Tennessee Eighth Tennessee Fifth Virginia Second West Virginia	8	5 5 59 -12 6 10 11 8 13 10 3 2 24 6 1 12	2 2 2 1 1	27 6 10 8	1 2 3	27 13 1	1

TERM OF OFFICE OF COLLECTORS.

I have the honor to again recommend that a law be passed fixing the term of office for collectors of internal revenue at four years, and I further recommend that said law shall provide that collectors of internal revenue shall not be subject to removal except for such causes as are designated in said law. I am satisfied that the incorporation into the civil service of the principle of a fixed term and removal for cause only, would result in a marked improvement in the public service, and would meet what seems to me a just and growing demand of public opinion.

FIXED SALARIES FOR UNITED STATES MARSHALS AND DISTRICT ATTORNEYS.

I respectfully call attention to the remarks under this head in my last annual report, and again recommend legislation in accordance with the recommendation therein contained.

REDEMPTION OF STAMPS.

I renew the recommendation made in my last two reports that that portion of section 17 of the act of March 1, 1879, which prohibits the redemption of stamps unless the same are presented within three years after their purchase from the government or a government agent for the sale of stamps, be repealed.

LEGISLATION CONCERNING MANUFACTURE OF VINEGAR.

I also renew the recommendation made in previous reports for the passage of a law prohibiting the manufacture of vinegar by the alcoholic vaporizing process provided for in section 5 of the act of March 1, 1879, or subjecting vinegar factories using the vaporizing process to the supervision of a government storekeeper, and to a certain extent to other safeguards, as now required in the case of distillers of spirits. Further experience only confirms the opinion which I have heretofore expressed of the necessity for the indicated legislation for the protection of the revenue from dangerous frauds. Should it be deemed best to continue the present system, under suitable safeguards, it might be well to make such additional provisions as will permit the manufacturer to fully avail himself of the right to condense alcoholic vapor without the waste of material incident to the present process. The compen. sation of store-keeper, if provided, should be reimbursed to the government by the manufacturer.

EXAMINATION OF GLUCOSE AND METHYLATED SPIRITS.

At the request of the Committee of Ways and Means of the House of Representatives I am having an examination made of a number of samples of glucose, both dry and sirup, for the purpose of testing its saccharine qualities and healthfulness.

Tests are also being made of methylated spirits to determine whether alcohol mixed with wood naphtha can be restored to its original purity. These experiments are being made by the Academy of Sciences, and reports are now expected, when they will be transmitted for the information of the committee.

MISCELLANEOUS EXPENSES.

The act of Congress approved March 3, 1881, making provision for the legislative, executive, and judicial expenses for the year ending June 30, 1882, required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue, for which appropriation was made in that act. In accordance with the aforesaid requirement, I submit the following detailed statement of miscellaneous expenses incurred:

successful of misogramous oxpenses mourieu.		
Express on public money to depositories.	\$7,040	
Stationery for internal-revenue officers	17,980	
Internal-Revenue Record for internal-revenue officers	2,409	80

EXPENDITURES FOR THE DISCOVERY AND PUNISHMENT OF FRAUD.

In accordance with the provisions of the act making the appropriation, the following detailed statement of expenditures from the appro-

priation for detecting and bringing to trial and punishment persons

guilty of violating the internal-revenue laws is submitted.

Amount expended through collectors of internal revenue in the employment of persons for the detection of frauds, and for information leading to the discovery of frauds, and punishment of guilty persons, as follows:

Name.	District.	Amount.
Bravton, E. M	South Carolina.	\$1,366 00
Blaine, John E	Ninth Kentucky	
Clark, Andrew	Second Georgia	2,636 00
Cooper, H. M		45 00
Duval, I. H	First West Virginia	44 00

The accounts for expenditures under this appropriation are rendered monthly, with an itemized statement, and in all cases supported by subvouchers duly sworn to: These accounts pass through all the accounting offices of the Treasury Department, and are filed in the Register's Office.

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1884, as follows.

For salaries and expenses of collectors	\$2,100,000	00
For salaries and expenses of thirty-five revenue agents, for surveyors,		
for fees and expenses of gaugers, for salaries of storekeepers, and for		
miscellaneous expenses	2, 300, 000	00
For dies, paper, and stamps	500,000	00
For detecting and bringing to trial and punishment persons guilty of		
violating the internal-revenue laws, including payment for informa-		
tion and detection	75,000	00
For salaries of officers, clerks, and employés in the office of the Com-		
missioner of Internal Revenue	299, 190	00
m the	F 084 100	
Total	5, 274, 190	00 .

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors for the fiscal year ending June 30, 1883, are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

 For collection of 	1 —		
\$25,000 or less.	00 410 500	\$2,000	
そう, ひひひ むり あうた、も	100 — @1.2, 300	2, 120	
37,500 to 50,0	000— 12,500	2,250	
50,000 to 75,0	$600-25,000\dots$	2,375	
	000— 25, 000		
	000′— 25′, 000		
125,000 to 175,0	000— 50, 000	2,750	
175,000 to 225,0	000— 50,000	2,875	
225,000 to 275,0	000— 50, 000	3,000	
275,000 to 325,0	000-50,000	3, 125	`
325,000 to 375,0	50,000	3,350	
375,000 to 425,0	900— 50,000	3,375	
425,000 to 475,0	000— 50, 000	3,500	
	000— 75,000		
550,000 to 625,0	000— 75, 000	3,750	
625,000 to 700,0	000— 75,000	3,875	
700,000 to 775,0	000— 75, 000	4,000	

OFFERS IN COMPROMISE.

EXAMINATION OF COLLECTORS' OFFICES.

The examination of the accounts of collectors has been continued during the past year with the usual gratifying results.

OFFICIAL FORCE.

The force connected with this Bureau in the various districts throughout the United States is as follows:

One hundred and twenty-six collectors, who receive salaries as follows:

$ \begin{array}{cccccccccccccccccccccccccccccccccccc$
Three 4,250 Twelve 3,000 Four 4,125 Seven 2,875
Four
Two
Two
Three 3,750 Fourteen 2,500
Two
Four 3,500 Two 2,250
Two

There are also employed nine hundred and seventy-six deputy collectors, who receive salaries and traveling expenses as follows:

\$3,000	Twelve	\$1,050
[2,000 s		1,000
1,950	One	970
1,900	Six	950
1,850	Twenty-three	900

1,750	One	850
1,700	Eight	800
1,650	Three	7 50
1,625	Eight	700
1,600	One	660
1,575	Eleven	600
1,550	Thirteen	500
1,500	Four	400
1,450	One	360
1,400	One	350
1,350	Nineteen	300
	Five	250
1,275	One	240
1,250	Ten	200
1,200	Two	150
1,175	Two	120
1,150	One	100
1,100	One	60
	1,950 1,850 1,850 1,800 1,750 1,700 1,650 1,650 1,575 1,500 1,450 1,450 1,350 1,350 1,275 1,250 1,200 1,175 1,250	2, 000

Total: Nine hundred and seventy-six.

Also, one hundred and ninety-nine clerks, messengers, and janitors, who receive salaries as follows:

		•	
One clerk	\$1,700	Two clerks	\$625
Two clerks	1,600	Eleven clerks	600
Three clerks	1,500	Nine clerks	500
Ten clerks	1,400	Two clerks	450
Two clerks	1,350	One clerk	400
Four clerks	1,300	Four clerks	300
Thirty-two clerks	1,200	One clerk	200
Four clerks	1, 150	One janitor	300
Fifteen clerks	1,100	One janitor	120
Nineteen clerks	1,000	One janitor	100
Thirty-four clerks	900	One janitor	75
Seventeen clerks	800	One messenger	600
Two clerks	750	One messenger	450
One clerk	725	Four messengers	300
Two clerks	720	One porter	360
Six clerks	700	One porter	300
Two clerks	675	One porter	100

There are also employed 867 gaugers, who receive fees not to exceed \$5 per diem; 1,000 storekeepers and gaugers, who receive not to exceed \$4 per diem; 552 storekeepers, who receive not to exceed \$4 per diem (all of the foregoing officers are paid only when actually employed); and 30 tobacco inspectors, who receive fees to be paid by the manufacturers.

Storekeepers and gaugers assigned to distilleries of a capacity not exceeding twenty bushels receive but \$3 per diem.

CONDITION OF THE OFFICE.

The work of the office has been brought up to date, and the diligence and faithfulness to duty of the force leave nothing to be desired in the conduct of the business. For this gratifying condition of affairs I again extend my thanks to the officers and clerks of the Bureau.

^{*}The deputy at \$3,000 is employed on legacy and succession taxes and is required to travel to different parts of the country, his traveling allowance being \$1,200.

REPORT OF WORK PERFORMED.

The work performed by the different divisions of the office during the fiscal year ended June 30, 1882, is shown by the following statement:

WORK OF REVENUE AGENTS.

Thirty-five revenue agents have been employed during the past year: 1 as chief of division in this office, 24 in charge of divisions, 4 employed in examining collectors' accounts, and 6 in assisting agents in charge of divisions. Seventeen hundred and thirty-five violations of law have been reported by revenue agents during the year; 851 persons have been arrested on their information; property to the value of \$120,716.96 has been reported by them for seizure and for assessment for unpaid taxes; and penalties amounting to \$670,671.04 have been reported by them.

There has been expended from the appropriation for salaries and expenses of revenue agents during the year as follows:

pensos or revenue agentes daring the year as follows:		
Aggregate salary of agents	\$78,852	00
Aggregate amount for traveling expenses	42,642	25
Stationery furnished agents	175	99
Transportation over Pacific railroads under orders from Treasury Depart-		
ment	1,176	25

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1884, the sum of \$299,190 as salaries for the following officers, clerks, and employés in this Bureau:

One Commissioner, at	\$6,000
One deputy commissioner, at	3,200
Two heads of division, at	$\sqrt{2},500$
Five heads of division, at	
One superintendent of stamp agencies, at	2,100
One superintendent of stamp vault, at	
One stenographer, at	
Twenty-four clerks, at	
Twenty-five clerks, at	1;600
Thirty-six clerks, at	1.400
Twenty-four clerks, at	1,200
Fourteen clerks, at	1,000
Seventy-nine clerks, at	
Two messengers, at	
Fourteen assistant messengers, at	
Thirteen laborers, at	
An aggregate of two hundred and forty three persons.	

I also recommend the appropriation of the sum of \$5,900 as salaries for two stamp agents, at \$1,600, and three counters, at \$900, the same to be reimbursed by the stamp manufacturers as provided by the act of August 5, 1882.

MANUFACTURE OF PAPER.

During the fiscal year there has been manufactured by Messrs. S. D. Warren & Co., of Boston, under the contract entered into May 24, 1880, 492,709 pounds of paper for internal-revenue stamps. The rates paid were 11½ cents per pound for vegetable-sized paper and 12½ cents per pound for animal-sized.

On the 19th of September, 1882, a contract was made with the Fairchild Paper Company, of Boston, Mass., the rates being 10\(^4\) cents per pound for vegetable-sized and 11\(^4\) cents per pound for animal-sized paper. Orders for the manufacture of 210,000 pounds have been given under this new contract. The paper furnished has been of satisfactory quality, and orders have been promptly executed.

PRODUCTION OF STAMPS.

During the last fiscal year all internal-revenue stamps have been produced by the Bureau of Engraving and Printing, except stamps imprinted upon bank checks, which have been supplied by the Graphic Company, of New York City, and stamps upon foil wrappers for tobacco, which have been printed by John J. Crooke & Co., of New York. All work done by the Graphic Company and Messrs. Crooke & Co. is under the superintendence of this office.

NUMBER AND VALUE OF STAMPS ISSUED.

During the fiscal year stamps were received by this office from the printers and issued to collectors, agents, and purchasers as follows, viz:

Kind.	Number.	Value.
Stamps for distilled spirits, tax-paid Stamps for distilled spirits, other than tax-paid Stamps for distilled spirits, aggregate Stamps for tobacco and sunff Stamps for cigars and cigarettes Stamps for fermented liquors and brewers' permits Stamps for special taxes Stamps for documents and proprietary articles	4, 400, 700 5, 757, 000 251, 198, 715 95, 970, 595 57, 665, 920 787, 050	\$70, 433, 280 00 10, 120 00 70, 443, 400 00 31, 086, 953 06 19, 718, 297 80 17, 423, 167 50 10, 428, 200 00 6, 331, 419 63
Total	906, 521, 775	155, 431, 437 99

All stamps delivered to this office by the Bureau of Engraving and Printing were, on their receipt, counted and placed in the vaults. The stamps issued were put up in 28,484 packages, 25,068 of which were shipped by registered mail and 3,416 by express, and were transported and delivered without loss. The officers of the Washington City post-office are hereby tendered the thanks of this office for the prompt and faithful manner in which the registered mail has been disposed of by them.

TOBACCO.

The total amount of collections from tobacco for the fiscal year ended June 30, 1882, was \$47,391,988.91. This amount includes the collections of internal-revenue taxes imposed upon imported manufactured tobacco, snuff, and cigars (in addition to customs duties); the taxes imposed on domestic manufactured tobacco, snuff, and cigars; the special taxes paid by manufacturers of tobacco, snuff, and cigars; the special taxes paid by dealers in leaf and dealers in manufactured tobacco; special taxes paid by peddlers of manufactured tobacco; and it also includes the receipt of money for export stamps sold to exporters of tobacco.

The collections from the several sources above named for the last fiscal year exceed those of the fiscal year immediately preceding by the

sum of \$4,536,997.60.

\sim		11, 939, 688,3

The quantity of tobacco removed from manufactories for exportation during the fiscal year ended June 30, 1882, is 143,083 pounds greater than that removed during the fiscal year ended June 30, 1881. The number of cigars is 725,920 greater; and of cigarettes is 26,338,440 greater. The number of cigarettes exported in 1882 exceeds the number exported in 1881 by 70 per cent.

In this connection I call attention to the following paragraph which appeared in my reports for 1880 and 1881, and renew the recommendation contained therein:

It, however, appears that in striking out a portion of section 3385 Revised Statutes, and substituting for the portion stricken out the amendatory provisions of the new law, the language of that part of section 3385 relied upon as authorizing the exportation of tobacco, snuff, and cigars by railroad cars and other land conveyances was, through inadvertence, not restored. I see no good reasons why the exportation of these articles under section 3385, as amended, should be confined to vessels, and I would therefore recommend that as early as possible in the next session of Congress the law be amended so as to clearly provide for the exportation of tobacco, snuff, and cigars by railroad or other land conveyances.

EXPORTATION OF CIGARS AND CIGARETTES IN BOND.

The number of cigars and cigarettes removed and unaccounted for to July 1, 1881, was:

	Cigars, at \$6 per M tax 81, 45 Cigarettes, at \$1.75 per M tax 4, 153, 00	0
٠	The number of cigars and cigarettes removed during the year ende June 30, 1882, was:

REVIEW OF TAXATION OF TOBACCO.

In June, 1872, a uniform tax of 20 cents a pound was imposed on all classes of manufactured tobacco except snuff, which was taxed at the rate of 32 cents a pound. In 1875 the uniform tax was increased from 20 to 24 cents a pound; and in March, 1879, the tax on all manufactured tobacco, including snuff, was reduced to 16 cents a pound. In 1875 the tax on cigars was increased from \$5 per thousand to \$6, and the tax on cigarettes from \$1.25 per thousand to \$1.75.

The following statement shows the collections from special and specific taxes on tobacco of all descriptions, including snuff, cigars, and

cigarettes:

Average annual collections \$12,612,725 Average number cigars tax-paid annually 2,346,672,

The large increase since 1878 over the general average of the last ten years in the quantity of manufactured tobacco and numbers of cigars and cigarettes on which taxes have been collected is, in my opinion, to be attributed to two causes:

First. The improved condition of the times, whereby all are enabled to purchase tobacco or eigars who desire to do so.

Second. The supervision exercised over the entire industry and the nereased vigilance of the various officers of the service in detecting an reporting all cases of fraud, and holding every man to a strict compliance with the law.

The amount collected during the last ten years in payment for export

stamps used on tobacco, snuff, and cigars, was \$68,910.30, being an av-

erage annual payment of \$6,891.03.

The aggregate amount paid for special-tax stamps by manufacturers and dealers in tobacco during the last ten years was \$20,410,605.25, being an average annual payment of \$2,041,060.52.

LEAF TOBACCO.

The annexed tables show that during the calendar year 1881 the number of pounds of leaf tobacco consumed in the manufacture of tobacco, snuff, cigars, cheroots, and cigarettes was as follows:

•	Pounds.
Manufactured into tobacco and snuff	170,079,013
Made into cigars, cheroots, and cigarettes	
Total leaf manufactured in 1881	
Doddov imported roar dodd	- 11, 100, 000
Domestic leaf used in 1881	225 401 399

Note.—From the above statements, compiled from the returns on Form 146, as given by the collectors, it appears that 16,048,721} pounds of manufactured tobacco and snuff, representing a tax of \$2,567,795.44, are accounted for in 1881, which had been manufactured in former years

DISTILLED SPIRITS AND MALT LIQUORS.

The quantity of spirits (105,853,161 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1882, was less than the production of the previous year (117,728,150 gallons) by 11,874,989 gallons.

The decrease in production for the fiscal year 1882 as compared with the production for the fiscal year 1881 is distributed among the differ-

ent varieties known to the trade as follows:

	056, 948
	706, 832
Alcohol	787, 298
Rum:	414, 422
High wines	101, 202
Total	366, 702

	not yet received at warehouse	35, 928
15.	Distilled spirits not actually in warehouse, claimed to have been lost	000 000
	by casualty	307, 730

The quantity of spirits, 89,962,645 gallons, actually remaining in warehouse June 30, 1882, is the quantity as shown by the original gauge of each package.

89, 962, 645

16. Distilled spirits actually remaining in warehouse June 30, 1882....

The quantity of spirits withdrawn from distillery warehouses for exportation during the year was 8,092,725 gallons.

DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORA-TION IN WAREHOUSES.

The quantity of spirits, 1,231,336 gallons, reported in the preceding table as lost by leakage or evaporation in warehouse is that portion of the actual leakage in warehouse from packages withdrawn during the year which has been allowed in accordance with the provisions of section 17 of the act of May 28, 1880. It is noted that in most cases the quantity allowed by the law has covered the entire loss, so that the above quantity is believed to indicate almost the entire loss in warehouse on the spirits withdrawn during the year, except in cases of casualty, and may be safely used as a factor in computing probable losses on spirits in distillery warehouses.

The leakage allowed during June, 1880, was 75,834 gallons, and the quantity allowed during the year ended June 30, 1881, was 811,466 gallons, making the total allowances to July 1, 1882, 2,118,636 gallons.

In the consideration of a bill to amend the laws relating to the entry of distilled spirits in distillery warehouses and special bonded warehouses, and the withdrawal of the same therefrom (H. R. 5656, Forty-

seventh Congress, first session), the question arose as to whether the allowances for leakage authorized by section 17 of the act of May 28,

1880, were adequate or excessive.

In order to assist in determining the question, a large number of gaugers' reports of withdrawals of spirits from warehouse was exam-The examination showed that under ordinary conditions the quantity lost was oftener less than the maximum allowance than more than the maximum allowance. The average losses in cold warehouses were found to be uniformly less than the maximum allowances. heated warehouses, however, the average loss was sometimes found to Upon examination of gaugers' reports, selected at random, covering spirits withdrawn from cold warehouses, it was found that the average actual loss as to 164 packages withdrawn within sixty days after deposit in warehouse, i. e., during the first period named in the law, was .96 of the maximum allowed by the law; the loss as to 146 packages withdrawn during the second period was .37 of the maximum allowance; as to 71 packages withdrawn during the third period, the loss was .53 of the maximum; as to 96 packages withdrawn during the fourth period, the loss was .69 of the maximum; as to 131 packages withdrawn during the fifth period, the loss was .78 of the maximum; as to 128 packages withdrawn during the sixth period, the loss was .75 of the maximum; as to 99 packages withdrawn during the seventh period, the loss was .71 of the maximum; as to 94 packages withdrawn during the eighth period, the loss was .60 of the maximum; as to 179 packages withdrawn during the ninth period, the loss was .65 of the maximum; as to 167 packages withdrawn during the tenth period, the loss was .68 of the maximum; as to 144 packages withdrawn during the eleventh period, the loss was .61 of the maximum; as to 85 packages withdrawn during the twelfth period, the loss was .66 of the maximum; as to 192 packages withdrawn during the thirteenth period, the loss was .70 of the maximum; and as to 421 packages withdrawn during the fourteenth and last period, the average loss was .76 of the maxi-

Very few withdrawals of spirits less than ten months old were found to have been made from heated warehouses, and the average losses as to these few cases did not vary materially from those occurring in cold As to 207 packages withdrawn from heated warehouses during the sixth period named in the law (eleven and twelve months), the average loss was .87 of the maximum; as to 217 packages withdrawn during the seventh period, the average loss was .94 of the maximum; as to 92 packages withdrawn during the eighth period, the average loss was .86 of the maximum; as to 23 packages withdrawn during the ninth period, the average loss was 1.00 of the maximum; as to 179 packages withdrawn during the tenth period, the average loss was .80 of the maximum; as to 92 packages withdrawn during the eleventh period, the average loss was .87 of the maximum; as to 43 packages withdrawn during the twelfth period, the average loss was .81 of the maximum; as to 43 packages withdrawn during the thirteenth period, the average loss was .90 of the maximum; and as to 379 packages withdrawn during the fourteenth period, the average loss was .91 of the maximum allowed by law.

LOSS OF SPIRITS BY CASUALTIES.

During the fiscal year 1882 there were reported as lost by fire and other casualties, while stored in warehouse, 257,016 taxable gallons of

spirits, or about fifteen ten-thousandths of the entire quantity of spirits (170,501,272 gallons) handled in the several distillery warehouses in the United States during that period. The loss so reported is distributed among the several kinds of spirits as follows:

		Gallons.
Bourbon whisky		145, 239
Rve whisky		32.964
Alcohol	****	10,557
High wines	**	116
Miscellaneous	***************************************	68, 140
	•	055 016
/D++1		OFF OLG

Of this quantity 167,890 gallons were destroyed by fire in one warehouse, and 57,674 gallons were destroyed by the falling of patent ricks in two other warehouses, making a loss of 225,564 gallons through three casualties.

EXPORTATION OF SPIRITS.

The following statements show the quantities of spirits withdrawn for export during the last two fiscal years:

SPIRITS WITHDRAWN FROM WAREHOUSES FOR SCIENTIFIC PURPOSES, AND FOR USE OF THE UNITED STATES.

The quantity of alcohol withdrawn free of tax from distillery warehouses for the use of colleges and other institutions of learning in the preservation of specimens of natural history in their several museums, or for use in their chemical laboratories, and of spirits of various kinds for use of the United States, amounted during the year to 14,048 gallons, or 10,854 gallons less than the quantity withdrawn during the previous year.

SPIRITS WITHDRAWN FOR TRANSFER TO MANUFACTURING WARE-HOUSES.

The quantity of spirits withdrawn free of tax from distillery warehouses for transfer to warehouses established at ports of entry for the manufacture of certain articles exclusively for exportation (see sec. 3433 R. S., and sec. 14, act of May 28, 1880), amounted during the year to 213,322 gallons, or 7,494 gallons more than the quantity withdrawn during the preceding year. The spirits withdrawn consisted of two varieties, as follows:

•		Gallons.
Alcohol		163, 556
Pure neutral or cologne spirits		49,766
0 1	_	
Total		213,322

SPIRITS REMAINING IN WAREHOUSES AT THE CLOSE OF THE YEAR.

In my report for the year ended June 30, 1879, it was shown that the quantity (19,212,470 gallons) in warehouses June 30, 1879, exceeded the quantity in warehouse at the close of any preceding fiscal year. This quantity, however, was much exceeded by the quantity (31,363,869 gallons) remaining in warehouse June 30, 1880, which latter quantity is more than doubled by the quantity (64,648,111 gallons) in warehouse June 30, 1881, and more than trebled by the quantity (89,962,645 gallons) in warehouse June 30, 1882.

The following table shows the quantity remaining in distillery warehouses at the close of each of the thirteen fiscal years during which spirits have been stored in such warehouses:

	Gailons.
Quantity remaining June 30, 1869.	16, 685, 166

EXPORTS, DRÁWBACKS, BANKS, AND ASSESSMENTS.

The subjoined tables give details of the exportation of the different articles subject to internal-revenue taxation, of the amount of drawback allowed, of the capital and deposits of banks and the assessments made thereon, and of the assessments made in regard to other objects of taxation.

EXPORTATION OF MATCHES.

The exportation of friction matches, proprietary articles, &c., under section 19 of the act of March 1, 1879, has been as follows:

	Number of articles.	Amount of
Remaining unaccounted for June 30, 1881 Bondod during the year ended June 30, 1882	235, 716 36, 066, 221	\$2, 723 52 377, 269 54
	36, 301, 937	379, 993 06

DRAWBACK.

Following is a statement of drawback of internal-revenue taxes allowed on exported merchandise during the fiscal year 1882:

Port.	Number of claims.	Proprietary articles.	Tobacco.	Cigars.	Fermen ted liquors.	Stills.	Distilled spirts.	Total.
Baltimore Boston Laredo Milwaukeo New York New Orleans Philadelphia Richmond San Francisco Saint Louis Suspension Bridge Troy	32 13 1 89 18	\$1, 106 14 433 52 29, 805 66 1, 220 40 258 16 774 14 12 96 84 24	4, 697 76	1, 309 87	698 39 1, 505 72 917 73	\$20 00 40 00	\$1, 049 40 917 10	\$1, 237 59 452 48 46 25- 698 39 32, 717 18 917 73 1, 220 40 258 16 7, 738 87 726 13 12 96 84 24
Total	909.	33, 695 22	5, 069 36	1,406 12	3, 913 18	60 00	1, 966 50	46, 110 38
Allowed 1881	749	28, 483 87	8, 596 60	1, 232 43	1, 128 38	220 00	1, 161 90	40, 849 26

In connection with the foregoing statement I have to renew the recommendation made in my previous reports (1880, 1881), that section 3244, Rev. Stat., be so amended as to include distilling worms belonging to stills manufactured for export, which, like stills, are subject to a tax of \$20 each. Also, that an appropriation be made for the payment of drawback on articles exported under said section 3244, Rev. Stat. While a number of claims covering stills have been allowed by this office during the past three years, and by the authority conferred by section 3244, yet the claimants in such cases have been unable to recover the amount of drawback so awarded them by this office, in consequence of the failure of Congress to make the necessary appropriation. While the

amounts due these claimants are not large, the promise made by the law to this class of tax payers should, nevertheless, be redeemed, and I urgently call attention to this matter, in order that the payment of these claims may be provided for.

CAPITAL AND DEPOSITS OF BANKS.

sessable taxes recovered; also, amount of penalties and interest received for validating unstamped instruments (Form 58)	275, 524	02	285, 250	n 90	9, 725 87	
Special taxes (licenses) Tax on income and dividends	60, 411 14, 903	59	61, 415	5 03	1, 003 44	13, 701 89
. Total	4, 669, 343	64	6, 023, 368	80	1, 354, 025 16	

The foregoing table shows that a decrease has occurred in the assessments of the following taxes as compared with the year ended June 30, 1881, viz:

On circulation of banks and others.

On fermented liquors removed from brewery unstamped, and on tobacco, snuff, and cigar removed from manufactory in like manner. On legacies and successions, and on incomes and dividends.

The reduction in the amount assessed on circulation, which has been principally the ten per centum tax, on notes issued by manufacturing establishments and used for circulation, shows how nearly this kind of currency has been supplanted by the legal money of the country. The small amount of only \$1,921.81 was assessed last year against \$10,788.02 in the previous fiscal year. It may be also stated that nearly all such notes on which the tax was assessed have already been withdrawn from circulation.

The reduction of taxes assessed on fermented liquors and tobacco, snuff, and cigars, removed from the place of manufacture unstamped, indicates a better observance of the law and regulations governing the taxation of these articles.

The reduction of the tax assessed on legacies and successions and on income and dividends is owing to the increased lapse of time since the repeal of the laws subjecting these objects to internal revenue taxation and to the fact that those taxes have been almost entirely collected.

The most remarkable increase exhibited in the above table is that of taxes assessed on the capital and deposits of banks, bankers, and savings institutions. The amount thus assessed was \$5,222,012.40 against \$3,955,183.20 of the year previous, showing an increase of \$1,266,829.20.

As stated in my last annual report, it had become known that several banks in the larger cities had, by misinterpretation of the law, understated in former reports the amount of their capital and deposits subject to tax. Investigations of these cases led to the discovery that such taxes, amounting to \$722,705, were due the United States.

Following up this discovery a circular letter was addressed in October, 1881, to each collector, requiring him to request from all banks in his district a re-examination of their former returns and to report as to their

liability to additional taxation.

This request having been generally complied with, and voluntary additional returns made by the banks, assessments amounting to \$460,676.79 were made last year on this account. This amount, added to that previously ascertained, gives a sum of \$1,183,381.79 so far assessed as tax due from previous years. In addition thereto, an amount of \$25,546.22 was recovered in compromise which was not assessed. The total tax so far recovered by the government is therefore \$1,205,928.01.

Several cases have not yet been fully investigated and determined upon; it is therefore likely that some further and perhaps very heavy

assessments will result therefrom.

Deducting, however, the above \$460,676.79 assessed as back taxes from the total amount assessed on capital and deposits last fiscal year, it still leaves the large amount of \$4,761,335.61 assessed against the banking business of last fiscal year, showing an increase over the previous one of \$806,152.41. Explanation of this fact is found in the enormous growth of the wealth of the country; the total average capital and deposits employed and held by banks and bankers other than national banks last year being \$1,955,190,686, an increase of \$256,100,308 over the previous year.

In explanation of the increase of tax assessed on deficiencies in the production of distilled spirits and on excess of materials used in such production, it may be stated that most of these assessments cover the unusually large production of distilled spirits in the year ended June 30, 1881. This also may be said in regard to the increased amount assessed on distilled spirits fraudulently removed or seized. A great number of distillers, who formerly carried on an illicit business, have recently

9 I

submitted to the law, have been regularly registered, and their short-comings are now ascertained and assessed.

Of the amount reported as assessments of penalties, the larger proportion consisted of 100 per centum penalties assessed against banks under a decision of the United States circuit court for the southern district of New York (German Savings Bank v. Joseph Archbold, collector), for erroneous returns made. This decision having been reversed by the United States Supreme Court, the larger part of these assessments have been or will be abated.

ASSESSMENTS FOR 1882.

The following statement shows the amount of assessments in each of the several States and Teritories of the United States during the fiscal year ended June 30, 1882, and includes the taxes assessed upon capital and deposits of banks and bankers:

OF

THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT, OFFICE OF THE COMPTROLLER OF THE CURRENCY, Washington, December 2, 1882.

I have the honor to submit for the consideration of Congress the twentieth annual report of the Comptroller of the Currency, in compliance with section 333 of the Revised Statutes of the United States.

The number of national banks organized during the year ending November 1, 1882, has been 171, with an aggregate authorized capital of \$15,767,300. Circulating notes have been issued to these associations amounting to \$6,500,680. This is the largest number of banks organized in any year since 1872, and they are located in the following States and Territories:

States and Territories.	No. of banks.	Capital.	Circulation issued.	States and Terri- tories.	No. of banks.	Capital.	Circulation issued.
Maine New Hampshire Massachusetts Connecticut New York Pennsylvania Maryland Virginia West Virginia Mississippi Louisiana Texas Arkansas Arkansas Kentucky Missouri Temnessee Ohio	2 2 2 14 10 2 3 1 1 1 8 1 6 3 5	\$150, 000 200, 000 400, 000 200, 000 1, 302, 000 350, 000 350, 000 100, 000 75, 000 505, 000 50, 000 1, 010, 000 505, 000 1, 010, 000 1, 010, 000 1, 010, 000 1, 010, 000 1, 010, 000 1, 010, 000 1, 010, 000 1, 010, 000 1, 010, 000 1, 010, 000 1, 010, 000 1, 010, 000 1, 010, 000	\$117, 000 180, 000 108, 000 162, 000 774, 000 357, 300 45, 000 67, 500 90, 000 160, 640 11, 240 103, 500 166, 500	Illinois Michigan Wisconsin Iowa. Minnesota Kansas Nebraska Colorado Oregon Utah Montana Wyoming New Mexico Dakota Washington Arizona California.	6 5 13 6 10 15 4 1 2 4 1 2 6 3 1	\$1, 200, 000 850, 000 325, 000 1, 125, 000 550, 000 10, 050, 000 270, 000 150, 000	76, 500 217, 790 593, 970 144, 000 45, 000 104, 000 45, 000 54, 000 135, 000 81, 000
Indiana	4	320, 000	148, 500	United States	171	15, 767, 300	6, 500, 680

These banks are located by geographical divisions as follows: Eastern States, nine banks with a capital of \$950,000; Middle States, twenty-six, with a capital of \$2,517,000; Southern States, twenty-nine, with a capital of \$2,775,300; Western States, eighty-six, with a capital of \$7,940,000; Pacific States and Territories, twenty-one, with a capital of \$1,585,000.

Nineteen banks, with an aggregate capital of \$1,855,000 and circulation of \$1,440,800, have voluntarily discontinued business during the year. The number of banks organized and in voluntary liquidation as given, is exclusive in each case of those banks which have gone into voluntary liquidation during the year and have been succeeded by other banks, with the same or nearly the same shareholders.

Three national banks, since November 1, have been placed in the hands of receivers, making 87 in all since the establishment of the system. The total number of banks which have voluntarily closed their

affairs by vote of shareholders owning two-thirds of their stock, under sections 5220 and 5221 of the Revised Statutes, has been 414; 72 of this number have gone into liquidation within the past year, of which 53 were closed by their stockholders for the purpose of organizing new banks, and all but three of this latter number in anticipation of the near approach of the expiration of their corporate existence.

The shareholders of six banks permitted their corporate existence to expire, and these associations are in liquidation under section 7 of the act of July 12, 1882. National banks are organized in every State of the Union and in every organized Territory. The total number in operation on October 3 last was 2,269—the largest number that has ever been in

operation at any one time.

The following table exhibits the resources and liabilities of the national banks at the close of business on the 3d day of October, 1882, the returns from New York City, from Boston, Philadelphia, and Baltimore, from the other reserve cities, and from the remaining banks of the country, being tabulated separately:

	New York City.	Baltimore.	Other reserve cities.*	oanks.	Aggregate.

In the Appendix will be found a table, showing the principal resources and liabilities on October 3, 1882. of the banks in the States, Territories, and reserve cities, arranged in eight divisions.

NUMBER, CAPITAL, AND DEPOSITS OF NATIONAL BANKS, STATE AND SAVINGS BANKS, AND PRIVATE BANKERS.

Section 333 of the Revised Statutes of the United States requires the Comptroller to present annually to Congress a statement of the condition of the banks and savings banks organized under State laws. Returns of capital and deposits are made by these institutions and by private bankers semi-annually, to this department for purposes of taxation. From these returns the following table has been compiled, exhibiting, in concise form, by geographical divisions, the total average capital and deposits of all the State and savings banks and private bankers of the country, for the six months ending May 31, 1882:

Geographical divi-	State banks and trust / companies.			Private bankers.			Savings banks with capital.			Savings banks with- out capital.	
sions:	No.	Capital.	Depos- its.	No.	Capital.	Depos- its.	No.	Capital.	Deposits.	No.	Depos- its.
New England States Middle States Southern States Western States and	40 205 246	40.56	Mill's. 24, 96 225, 51 48, 47	104 1014 293	Mill's. 7. 13 62. 19 6. 37	Mill's. 9. 42 113. 08 19. 98	2 8 6	Mill's. 09 .61 .53		418 173 2	Mill's. 421. 35 473. 26 1. 15
Territories	521	42. 54	153. 06	1980	38. 56	153. 14	22	2.63	34. 17	29	34. 07
United States	1012	116.79	452.00	3391	114. 25	295. 62	38	3.86	41. 24	622	929. 83

The capital of the 2,239 national banks in operation on July 1, 1882, as will be seen by a table in the Appendix, was \$477,184,390, not including surplus, which fund at that date amounted to more than 131 millions of dollars; while the average capital of all the State banks, private bankers, and savings banks, for the six months ending May 31, 1882, was but \$234,929,976. The latter amount is less than two-fifths of the combined capital and surplus of the national banks.

The table below exhibits the capital and net deposits of the national banks on July 1, 1882, together with the aggregate average capital and deposits of all classes of banks other than national, for the six months ending May 31, 1882:

Geographical divis-	State banks, savings banks, private bankeers, &c.			National banks.			Total.		
10ns.	No.	Capital.	Deposits.	No.	Capital.	Net de- posits.	No.	Capital.	Deposits.

United States		234. 9	1,718.7	796 2239	105. 3	305. 5	7302	712 1	2, 850. 4

The total number of banks and bankers in the country at the date named was 7,302, with a total banking capital of \$712,114,366, and total

deposits of \$2,850,678,178.

In the Appendix will be found similar tables for various periods from 1875 to 1882. On a subsequent page in this report, under the head of "State banks, savings banks, and trust companies," will be found tables showing the resources and liabilities of these corporations for the present year, and in the Appendix similar results for previous years.

A table arranged by States and principal cities, giving the number, capital, and deposits, and the tax thereon, of all banking institutions other than national and of the private bankers of the country, for the six mouths ending May 31, 1882, and for previous years, will also be

found in the Appendix.

The following table exhibits, for corresponding dates nearest to May 31 in each of the last seven years, the aggregate amounts of the capital and deposits of each of the classes of banks given in the foregoing table:

EXTENSION OF THE CORPORATE EXISTENCE OF NATIONAL BANKS.

Section 11 of the national bank act of February 25, 1863, provides that—

Every association formed pursuant to the provisions of this act may make and use a common seal, and shall have succession by the name designated in the articles of association, and for the period limited therein, not, however, exceeding twenty years' from the passage of this act.

Ninety eight national banks organized under this act were entitled, under their organization papers, to continue for nineteen years only, and the corporate existence of 307 other banks will expire on or before the close of business on February 24, next.

The Comptroller recommended in his last report-

That an act be passed during the present session, authorizing any national bank, with the approval of the Comptroller, at any time within two years prior to the date of the expiration of its corporate existence, to extend its period of succession for twenty years, by amending its articles of association. The bill may provide that such amendments must be authorized by the votes of shareholders owning notless than two-thirds of the capital of the association, the amendment to be certified to the Comptroller of the Currency, by the president or cashier, verified by the seal of the association, and not to be valid until the Comptroller's approval thereof shall have been obtained, and he shall have given to the association a certificate a thorizing it to continue its business under such extension. Responsibility for the extension of the corporate existence of the banks will thus, in a measure, rest with the Comptroller; and he can require such an examination of their affairs to be made prior to granting the extension, as may seem to him proper, in order to ascertain if the capital stock is intact, and all the assets of the bank in a satisfactory condition. * * *

If, for any reason, the legislation herein proposed shall not be favorably considered by Congress, the banks can still, under the present laws, renew their existence if they so desire; and in the absence of prohibitory legislation many of them undouttedly will, on the expiration of their present charters, organize new associations, with nearly the same stockholders as before, and will then apply for and obtain from the Comptroller certificates authorizing them to continue business for twenty years from the respective dates of their new organization certificates. Such a course of procedure will be perfectly legal, and, indeed, under the existing laws, the Comptroller has no discretionary power in the matter, but must necessarily sanction the organization, or reorganization, of such associations as shall have conformed in all respects to the legal requirements.

The passage, however, of a general act directly authorizing an extension of the corporate existence of associations whose charters are about to expire would, in many instances, relieve the banks from embarrassment. As the law now stands, if the shareholders of an association are all agreed, the process of reorganization is simple; but if any of the shareholders object to such reorganization, they are entitled to a complete liquidation of the bank's affairs, and to a pro rata distribution of all its assets, including its surplus fund. In many instances executors and administrators of estates hold national-bank stock in trust; and while they might prefer to retain their interests in the association which issued the stock, they would perhaps have no authority to subscribe for stock in the new organizations. While, therefore, the legislation asked for is not absolutely essential, yet its passage at an early day would be a great convenience to many of the national banks, and especially so to the class last referred to.

Some doubts having been expressed in reference to the right of the shareholders of national banks whose corporate existence had expired to organize new associations with the same names as those which had just expired, the opinion of the Attorney-General was requested on this point, and on the 23d of February, 1882, an opinion was given, in which he said:

The present national banking laws do not forbid the stockholders of an expiring corporation from organizing a new banking association, nor from assuming the name of the old corporation, with the approval of the Comptroller of the Currency, and, in the absence of any prohibition to that effect, no legal obstacle to the formation of a new association by such stockholders, and the adoption of the name of the old association, would, in my opinion, exist.

He also said:

I do not know of anything to prevent a national banking association, upon the expiration of the period limited for its duration, from being converted into a State bank under the laws of the State, provided it has liquidated its affairs agreeably to the laws of Congress; nor after it has thus become a State bank, to prevent such bank from being converted back into a national banking association under section 5154 of the Revised Statutes, and adopting the name of the expired corporation, with the approval of the Comptroller of the Currency. To enable a State bank so to reconvert itself into a national banking association, authority from the State is not necessary.*

In conformity with this opinion, fifty banks have been organized to succeed other institutions whose corporate existence has expired and which had previously given notice of liquidation. These banks have in most cases been organized with the same title as that of the banks which had been placed in liquidation and by the same stockholders.

Soon after the assembling of the present Congress a bill was introduced for the extension of the corporate existence of national banks, embodying the recommendations of the Comptroller. It was subsequently reported to the House from the committee with important amendments, and, after continued discussion, passed on May 30, 1882, by a vote of 125 to 67.† The bill was amended in the Senate in many particulars, and passed that body on June 22, 1882, by a vote of 34 to 14,‡ and was subsequently passed in the House July 10, upon the report of the con-

*Casey v. Galli, 94 U. S., 673. †Congressional Record No. 120, p. 25. ‡*Ibid.*, No. 147, p. 32. ference committee, yeas 110, nays 79, not voting 101,* and received the

approval of the President on July 12, 1882.

The act provides for the extension of the corporate existence of all national banks for twenty years by amending their articles of association, which amendment shall be authorized by the consent in writing of shareholders owning not less than two-thirds of the capital stock of the association. It provides that the Comptroller, upon receipt of the application of the bank and the amendment certified by the association, shall cause a special examination to be made to determine its condition, and authorizes him to grant his certificate for the proposed extension, if the condition of the association is found to be satisfactory. It provides that any shareholder not assenting to the amendment of the articles of association may give notice in writing to the directors, within thirty days of the date of the certificate of approval of the Comptroller, that he desires to withdraw from said association, in which case he is entitled in accordance with the method provided in the act to receive from said association the value of the shares; that in the organization of any association intended to replace any existing banking association and retaining the name thereof, holders of stock in the expiring association shall be entitled to preference in the allotment of the shares of the new bank in proportion to the number of shares held by them respectively in the expiring association; that the circulating notes of the association extending its period of succession, which were issued to it previous to such extension, shall be retired by redemption at the Treasury; that at the end of three years from the date of such extension lawful money shall be deposited by the bank with the Treasurer for the redemption of the circulation then outstanding; that any gain that may arise from the failure to present such circulating notes for redemption shall enure to the benefit of the United States; that new notes shall be issued to the banks thus extending, bearing such devices as shall make them readily distinguishable from those previously issued and that national banks whose corporate existence has expired or shall hereafter expire, which do not avail themselves of the privilege of extension, shall give notice of liquidation and deposit lawful money for the retirement of their circulating notes as required by law. It also provides for the extension of the franchise of expiring associations for the sole purpose of liquidation until their affairs are finally closed. The other provisions of the act in reference to national banks are general in their character and do not exclusively apply to banks whose corporate existence is extended by its provisions.

Immediately upon the passage of this act appropriate blanks were prepared for the use of those banks whose corporate existence was about to expire, and new circulating notes were subsequently issued to such institutions as conformed to the law. The note of the denomination of five dollars has for its vignette the portrait of the late President Garfield. The faces of the notes of other denominations are similar to those previously issued, but all the new notes have, as a distinctive feature, the charter number engraved six different times in the border, so that the name of the bank issuing the note may be ascertained from fragments thereof. The charter number of each bank is also printed conspicuously in the center of the reverse or back of each note. The brown and green colors of the back of the new notes are said to be a protection against the arts of the photographer and counterfeiter, and

^{*} Ibid., July 11, 1882.

are printed upon the new distinctive paper which has given general satisfaction.

Under the act of July 12, 1882, 30 banks have already extended their corporate existence, and nearly all of the banks which were organized under the act of February 25, 1863, have already given notice of their intention to take advantage of the act. The total number of banks whose corporate existence either has expired, or would have expired if no action had been taken by their stockholders, is 86, having a capital of \$18,877,500, and surplus of \$6,994,854, and circulation of \$12,840,010. Of these 50 were placed in liquidation by their stockholders previous to the date of the expiration of their corporate existence, and all but two before the passage of the act of July 12, 1882. The stockholders of 45 of these liquidating banks organized new associations with the same name; those of four organized new associations with different names, and those of one did not perfect any new organization. corporate existence of six of the 86 banks first mentioned expired* without having been previously put into liquidation. The united stockholders of three of these banks perfected new organizations with the same name, and in the case of two others a portion of the stockholders organized new associations with different names, while those of one took no action. The stockholders of the remaining 30 of the 86 banks mentioned, which are all of the banks whose corporate existence has expired since the passage of the act of July 12, 1882, have extended under this act.

The number of national banks yet in operation at the date of this report, organized under the act of February 25, 1863, is 307, and their corporate existence will expire on the following dates:

	•.	Date.		No. of banks.	Capital.	Circulation.
January, 188	882 3 83		· · · · · · · · · · · · · · · · · · ·	3	\$1, 420, 000 400, 000 69, 793, 250	\$1, 278, 000 360, 000 53, 232, 170

Section 8 of the act of June 3, 1864, provides that each association—

Shall have power to adopt a corporate seal, and shall have succession by the name designated in its organization certificate, for the period of twenty years from its organization, unless sooner dissolved according to the provisions of its articles of association, or by the act of its shareholders owning two-thirds of its stock, or unless the franchise shall be forfeited by a violation of this act.

Under the previous act, banking associations were entitled to succession for twenty years from the date of the passage of the law; but under the act of 1864, each association was entitled to an existence of twenty years from the date of its organization certificate. The Merchants' National Bank of Boston was the first association to organize under the act of June 3, 1864, and its organization was followed by the conversion of 28 other banks in the city of Boston and 22 in the city of Philadelphia during the same year, and by the conversion of 38 banks in the city of New York during the year 1865.

The provisions of the act of July 12, 1882, relating to the extension of the corporate existence of national banking associations, have proved to be well adapted to the purpose for which they were intended. They are simple in form and appear to be readily understood by the banks.

^{*} These banks were, however, revived for purpose of liquidation by section 7 of the act of July 12, 1882.

The whole number of banks now in operation which organized under the act of June 3, 1864, whose periods of succession will expire during each year previous to 1900 is 1608, with capital and circulation as follows:

9 .	Years.	<i>:</i>	No. of banks.	Capital.	Circulation.
			249	\$89, 611, 570	\$60,526,82

Totals			1, 608	354, 845, 985	241, 474, 3

One advantage in extending the corporate existence of associations under this law, over the only method possible previous to its passage, is in the retention of the surplus fund.

Thus, in the case of the fifty-four banks which have been liquidated, either under sections 5220 and 5221, or under section 7 of the act of July 12, 1882, by their stockholders, in order to organize new associations, the surplus was reduced from \$5,540,067 to \$2,559,252.

The aggregate surplus of the thirty banks extending their existence

under the act of July 12, 1882, has slightly increased.

COIN AND PAPER CIRCULATION OF THE UNITED STATES.

On another page, tables similar to those which have been given in the three preceding annual reports are published, exhibiting the amounts of gold and silver coin and paper currency which were in the Treasury, in the banks, and in the hands of the people at the time of the resumption of specie payments, and on the 1st of November of each year since that date.

The total amount of the circulating medium of the country on November 1 is given as follows:

Treasury notes outstanding	\$346,681,016
National bank notes outstanding	
Gold in the Treasury, less certificates held by the banks	148, 435, 473
Standard silver dollars in the Treasury	92, 414, 977
Subsidary silver coin and silver bullion in the Treasury	30,761,985
Coin in the national banks	102, 362, 063
Coin in State and savings banks	17,892,500
Estimated amount of coin held by the people	387, 562, 793
Total	1, 488, 838, 554

The estimated total currency of the country on November 1 thus appears to have been more than fourteen hundred and eighty eight millions,

which is four hundred and thirty-three millions in excess of the amount held on January 1, 1879, and one hundred and eighty six millions in excess of the amount held two years ago—on November 1, 1880. The gain in gold coin since the resumption of specie payments has been two hundred and eighty-eight millions, and in gold and silver coin three hundred and ninety-four millions. The increase in national bank notes has been nearly thirty nine millions.

No change has been made in the amount of legal-tender notes outstanding. It remains at \$346,681,016, which was the amount outstanding at the date of the passage of the act of May 31, 1878, which pro-

hibited any further reduction of the volume of these notes.

The act of January 14, 1875, required the Secretary of the Treasury on and after January 1, 1879, to redeem in coin these notes, on their presentation at the office of the Assistant Treasurer in the city of New York, in sums of not less than fifty dollars. In order that he might always be prepared to do this, he was "authorized to use any surplus revenue from time to time, in the Treasury not otherwise appropriated, and to issue, sell, and dispose of, at not less than par, in coin," any of the five, four and a half, and four per cent. bonds authorized by the act of July 14, 1870. This act is still in force, and gives the Secretary unlimited power with which to provide for the redemption in coin of the legal-tender notes. He is thus enabled, so long as the credit of the government continues good, to check, by the sale of United States bonds, any exportation of coin which might endanger the redemption of United States legal-tender notes.

These notes were issued at a time when the expenditures of the government were in excess of its revenue. Its receipts now so largely exceed its expenditures that more than 148 millions of the public debt was paid during the past year. The only reason that can be advanced for the increase of these issues, would be that they may be substituted for other forms of public debt, and the only method by which they can now be disbursed is in payment of United States bonds, at a time when the bonds are being paid from the surplus revenue at a rate unprecedented in the history of nations. It is evident that whatever difference of opinion may have heretofore existed upon the subject, so long as the revenue shall continue to supply more money than is needed for expenditures, there can be no sufficient reason for the authorization by Con-

gress of an increase of these notes.

The act of July 12, 1882, has again inaugurated the policy of issuing gold certificates. These substitutes for coin are hereafter to be issued against deposits of coin in the Treasury, and, together with certificates for silver deposited in like manner, are authorized to be included in the reserves of the banks, and to be used as clearing house certificates in the cities where clearing-houses are established. They will not increase the amount of the currency in the country, but, by saving the cost of transporting specie from one point to another, will render the stock of specie more available for use by the banks and the people.

The Comptroller, in his report for 1881, in elaborate tables giving the receipts of banks upon two different days, showed that the proportion of money required for the transaction of business throughout the whole country was about five per cent. of the total receipts, the remaining ninety-five per cent. being in checks and drafts. There has been during the current year an increase of 171 in the number of national banks in operation, and during the three preceding years the increase was 314. During the current year 36 additional State banks and 353 private bankers have commenced business. The rapid increase in these places of

deposit brings into use a larger number of the small checks of depositors, and largely diminishes the use of the circulating medium. These depositories, and the amount of capital employed in banking, notwith-standing the excessive taxation imposed upon this business, nearly keep pace with the advance in the population and wealth of the country; but the increase in the receipts and payment of banks and bankers, made by checks and drafts, shows the absurdity of the theory that the money required for business purposes, should bear a fixed propor-

tion to the population or to the wealth of the country.

The same causes which have operated to bring about a rapid reduction of the public debt have also tended to increase the circulating medium. The large imports of coin, in excess of exports, together with the products of the mines, have filled the channels of circulation. The circulation during the past year has undoubtedly been much larger than at any period since the organization of the government. The per capita of circulation is larger, and it is probable that its proportion to wealth is greater than at any previous time. It is undoubtedly large enough to supply the legitimate demands of business; and it is probable that the addition to the coin of the country, since the resumption of specie payments, has been in advance of such demands. There has been no complaint of scarcity of money which cannot probably be traced to those engaged in speculative business, and however great the aggregate of the circulating medium may become, complaints of scarcity will always be heard from those who desire a rise in prices.

No other nation economises the use of its circulating medium as does this, and it is probable that but a slight annual increase in the amount of national bank notes outstanding will hereafter be required, provided that the exports of coin are not greatly in excess of imports, and the receipts from our increasing revenue, in excess of the requisite reserve,

are kept in circulation and not hoarded in the Treasury.

The interest-bearing bonded debt of the United States has been rapidly reduced since 1869, at which time the funding of the miscellaneous obligations of the government had been successfully accomplished. The reduction of this debt during the twelve years ending June 30, 1881, has been more than six hundred and forty-eight millions (\$648,403,668) and the amount of interest paid more than one thousand two hundred and seventy millions (\$1,270,596,784); the average annual payment of the principal being \$54,033,639, and of interest, \$105,883,065. The annual average reduction in the interest-bearing debt during the last three years, ending November 1, has been \$126,295,816. The reduction during the past year was \$148,648,550.

The successful refunding of the five and six per cents as they matured, at first into four and four and one-half per cents, and subsequently into three and one-half per cents, and during the last year into three per cents, together with the rapid reduction of the debt, has had the effect of renewing the discussion as to the permanency of the national banking system, and its ability under existing laws to supply the additional circulation which may be hereafter annually required. The banks hold 40 millions of three and one half per cents, and nearly 180 millions of three per cents as security for their circulation. If the debt should hereafter continue to be reduced at the same rate as during the last year, all of these bonds will be called for payment in less than three years, and it will be necessary for the banks holding such called bonds, either to deposit lawful money for the purpose of retiring two hundred millions of their circulation, or to purchase four or four and one half per cents, or

Pacific Railway six per cents, which are now at a high premium in the market.

Many plans have been suggested for the purpose of supplying the deficiency in bank circulation, which it is probable will arise as these

bonds are paid.

The systems of banking in operation previous to the establishment of the national banking system, and particularly those known as the "charter" and "safety-fund" systems, have been brought forward for discussion, and opinions have been expressed that under the general restrictions of the national banking system, or with increased limitations, it would be advisable for Congress to authorize the issue of circulating notes based upon the capital, the assets, and the individual liability of stockholders, without requiring, as heretofore, the actual deposit of securities in the Treasury for such issues. It has been suggested if the circulation issued be considerably less than the actual capital paid up, and if the bill holder be entitled to a first lien upon all the assets of the bank, and to the amount which may be collected upon the individual liability of the shareholder, that the people would be abundantly secure from any loss upon the circulation so issued by the banks. mentary to this proposition, it has also been suggested that the banks be required to hold not less than the minimum amount of bonds now provided by law, which is estimated not to exceed 100 millions of dollars, and that in addition they be required to deposit ten per cent. upon their capital in coin with the Treasurer as a safety fund, and that they shall continue to receive each other's notes in payment of obligations due them.

It is not probable that the stockholders of those banks which do not desire to issue circulation, would be willing to continue business upon the condition that they should contribute so large an amount to a fund intended to insure the public against the issues of fraudulent or badly managed institutions. It is suggested, however, that the proposition would be improved if banks desiring to issue circulation be required to contribute to such a fund a percentage upon the circulation issued, instead of a percentage upon capital. If this fund, amounting to, say, 30 millions, be held in United States three per cent. bonds instead of coin, and the losses from the circulation of insolvent banks be small, the interest, in the course of a few years, if retained as proposed, would amount to a considerable sum. The large fund on deposit in the Treasury for the purpose of redeeming the notes of national banks retiring circulation now amounts to more than 38 millions. If it should be thought expedient to invest a considerable portion of this fund in three per cents, thus releasing it from the Treasury, the income might also be added to the The gain resulting from the failure on the part of the public, to present for redemption national bank notes which are being retired by an act of the present Congress, accrues to the benefit of the government, and it is estimated will amount to not less than from three to five millions during each twenty years. This gain might also properly be included in the proposed safety fund, and in the course of a few years these funds, by reinvestment, would increase to so large an amount, that the securities required to be deposited by the banks could be largely diminished.

The foregoing propositions have no precedents in any form of general legislation heretofore known in this country. Circulation authorized upon similar plans has heretofore been issued to banks which have been specially chartered, and not to banks organized under a general law.

Nearly every State in the Union has had its experience in authorizing

the issue of bank notes, based exclusively upon the capital and assets of the banks issuing the same; and many States have required the accumulation of a safety fund for the protection of the public from unsecured and uncurrent bank notes. In most cases circulation was authorized to be issued by such banks equal to the capital; sometimes the amount issued was less; sometimes it largely exceeded the capital.

The Suffolk system in the New England States, which was perhaps as good a system as could be desired to protect a bank circulation not secured by bonds, by a prompt and vigorous redemption of the notes, kept them in a healthy state, but the annual losses upon bank circulation, even in the New England States, up to the time of the organization of the national banking system, were by no means inconsiderable. Notwithstanding the restrictions then existing, banks of circulation were organized with but little capital paid in, and notes, either worthless or irredeemable, were placed in circulation atpoints remote from the places of issue. In New York under the safety fund system, and previous thereto, losses to the bill holders frequently occurred, and in other States, almost without exception, such losses were large, and have usually been estimated to have been, in the aggregate, not less than five per cent. annually of the whole amount outstanding. It is true that there are in England, Ireland, and Scotland 119 private and joint-stock banks, with many branches, which are authorized to issue circulation based upon their capital, but their authorized circulation is only about 100 millions of dollars. Thirty-five banks, with numerous branches in the Dominion of Canada, are also authorized to issue circulation in a similar manner, but the total circulation of these banks does not exceed 35 millions. Most of these are banks which have been in existence for many years, and were organized under special charters, and the liability of the shareholders in many cases, particularly in Great Britain, is

No State or nation has ever authorized the organization of banks under a general banking law, with the right to issue circulating notes proportionate to capital, except under a restriction requiring the deposit with the government of securities as the basis for the issue of such Banks in this and in other countries, which have been authorized to issue circulating notes without security, have been those organized under special charters, and in granting such charters the means and character of the applicants and proposed stockholders are subject to investigation by committees and legislators. Propositions for the issue of circulation without the fullest security cannot be too carefully con-The security of the national-bank note under the present sys-In twenty years not a single bank note has failed to tem is perfect. be redeemed at its face value. Banks organized under a general law, located so often at great distances from commercial centers, render a security for circulation of uniform and positive value an absolute ne-It is evident that the authorizing of more than three thousand banks, under a general or free banking law, to issue circulation without security, located in a country having such extensive territory as our own, would result disastrously.

Under the present banking system it is difficult in all cases to prevent the organization of banks with deficient capital, but if such banks are organized, at least no injury can happen from the issue of their circulating notes. The failure to pay the capital is almost certain soon to be ascertained, when such associations can be summarily closed, or required to make good the deficiency. If under the proposed system, banks should be organized with deficient capital and receive circula-

tion, an irreparable injury would be accomplished before the worthless character of the assets could be ascertained. It would be practically impossible for any government officer to prevent unprincipled men from organizing and controlling such associations for the purpose of benefiting themselves at the expense of the holders of their circu-

lating notes.

There are in this country more than a thousand State banks and trust companies, and nearly thirty-four hundred private bankers. The temptation would be strong, on the part of these corporations and individuals, to organize banks of circulation, if circulation could be obtained without depositing bonds as security therefor. The value of the different notes issued would depend upon the management of the bank and char-Many notes would be acter and standing of the different stockholders. at a discount in exchange for coin, and the failure of one bank to pay its notes, would throw discredit upon the whole volume of bank circulation and the system under which such banks were organized. issue of circulation were confined to a few banks, organized by men of character, integrity, and means, such associations would be characterized as a monopoly. Even if corporations are organized upon the condition that all should contribute a percentage of the circulation to a safety fund for the protection of the aggregate circulation, there is danger that the issues of fraudulent or badly-managed banks would soon consume the safety fund, and it is evident that the circulation would be paid, if at all, at the expense of the depositor, who would be, in some cases, stripped of the dividends which under existing laws are distributed to unfortunate creditors.

Under the national banking system, it is provided that the circulation issued shall first be paid from the proceeds of the bonds deposited to secure the same. The proceeds of the remaining assets are distributed pro rata among the creditors. Eighty-seven national banks, in all having an aggregate capital of \$19,262,600, have failed during the last twenty years, and since the organization of the system. The amount of circulation to which these banks were entitled under existing laws, namely, ninety per cent. upon capital, is \$17,336,340, which is a less amount in the aggregate than the amount of dividends which will have been paid to the creditors of these insolvent institutions. of these banks, having a capital of \$10,094,000, would each have paid in full their circulation, if ninety per cent. had been issued upon their capital, from the proceeds of their assets, and would also have paid small dividends to their depositors. The remaining forty-three insolvent banks, having a capital of \$9,168,600, would in the aggregate have paid, it is estimated, seventy-five per cent. only, from the avails of their assets upon the circulation authorized; entailing a loss upon the bill-holders of over \$2,000,000, and leaving no assets whatever for the benefit of the depositors, whose claims are \$9,043,605, and upon which dividends will be paid averaging, it is estimated, sixty-eight per cent. While these forty three banks would in the aggregate have paid seventyfive per cent. to the bill-holders, about one-half of this number would have paid on the average from the avails of their assets not exceeding fifty per cent. of the amount of their circulating notes.

The losses which the holders of the notes of insolvent banks would have experienced under the national banking system, if securities had not been required to have been deposited, would have been small in comparison with the whole circulation. But the fact that such losses would have occurred in so many banks, and that, too, at the expense of the depositors under a system with so many safeguards and restrictions, is

an argument from experience against any proposition to issue notes for circulation under any general system, without requiring sufficient secu-

rity, which cannot easily be answered.

If the public debt is to be paid hereafter as rapidly as during the past three years, all of the interest-bearing bonds will soon be surrendered and canceled, and there is danger that the bank circulation will be so rapidly retired as to cause a contraction of the currency which will affect the price of commodities and create embarrassments in business; but there is now no such pressing necessity for a speedy payment of the public debt as there is for the reduction of the redundant revenue. It is believed that Congress will soon provide for so large a reduction of the revenue that a sufficient amount of bonds will remain for the security of the bank circulation.

The national banks held, on November 1, bonds for circulation, not

payable at the pleasure of the government, as follows:

Four and one-half per cent. bonds	- 	*************	\$33,754,650
Pacific Railway sixes			
Four per cent. bonds		. 	104, 917, 500
-			•

None of these bonds will be payable until nine years hence, in the year 1891. The total amount of bonds outstanding, held by the banks and by the people, which are available for circulation, and not payable at the pleasure of the government, and cannot be redeemed except by purchase in the market, is as follows:

Four per cents., payable July 1, 1907	\$738, 929, 600
Four and one-half per cents, payable September 1, 1891	250,000,000
Pacific Railway sixes, payable September 1, 1895 \$3,002,000

64,623,512

1,053,553,112

These bonds, including the Pacific sixes, amount to nearly 1,054 millions, and are abundantly sufficient as a basis for banking during the next twenty years. In fact, one-fourth of this debt, exclusive of the 142 millions held by the banks, is sufficient to supply a basis for the bank notes now outstanding. The law provides that any bank may reduce the amount of its bonds held as security for circulation, to an amount not less than \$50,000, and, by an act of the present Congress, banks having a capital of \$150,000 or less can reduce their bonds to a minimum of one-fourth of their capital. The aggregate amount of bank circulation outstanding has not been reduced for a series of years, as may be seen from the following table, which gives the total amount of the national bank circulation outstanding on the 1st of June and 1st of November of each year since 1873:

Date.	National-bank notes.	Date.	National-bank notes.
June 1, 1874 June 1, 1875 June 1, 1876 June 1, 1877 June 1, 1878 June 1, 1878 June 1, 1889 June 1, 1881 June 1, 1882	354, 455, 473 336, 665, 930 319, 096, 212 323, 988, 085 329, 539, 411 345, 183, 783 354, 151, 718	November 1, 1874 November 1, 1875 November 1, 1876 November 1, 1877 November 1, 1877 November 1, 1878 November 1, 1879 November 1, 1880 November 1, 1881 November 1, 1881	348, 216, 902 323, 241, 308 318, 207, 231 322, 460, 715 337, 181, 418 343, 834, 107 360, 344, 250

The above table exhibits the total circulation actually outstanding, which includes the notes of the insolvent banks, of those in voluntary liquidation, and of those which have deposited lawful money for the purpose of reducing their circulation.

The circulation of the banks in operation during the present year has, however, by the payment of the bonds held as security and the voluntary retirement of bank notes, been reduced from \$320,200,069 to \$314,721,215, as will be seen from the table below, which gives, by geographical divisions, the amount of notes outstanding of the banks in operation in the month of October yearly since 1877.

New England States	550 657 179 660		banks.			<u> </u>

The reduction from January 1 to July 1 of the present year was still greater, and amounted to more than 16 millions, but the amount has again increased, as is usual in the fall season of the year. Banks, during the year, have been frequently called upon to surrender their bonds to the Secretary for payment. In such cases the three and the three and one-half per cents have usually been substituted or the circulation surrendered. The amount of four and four and one-half per cents held as security for bank notes have, however, during the year increased more than 14 millons.

The banks hold, as has been seen, 220 millions of dollars of United States bonds which are subject to the call of the government, and these bonds can be replaced only by other bonds bearing a high premium, and payable after a fixed date. If these latter bonds are not substituted for the former, the circulation of the banks will be reduced about 200 millions.

The profit upon circulation upon the four and four and a half per cent. bonds, where the rate of interest is six per cent., is not much in excess of three-fifths of one per cent., and where the rates of interest are above eight per cent. the profits are nominal, and are not sufficient to induce the banks to purchase large amounts as security for circulation. Where the profits are so small there is a serious objection to the investment of

so large an amount of capital in premium, which, in the case of four per cent. bonds, amounts to one-fifth of the face value of the bonds.

If the whole public debt were reduced to a uniform rate of three per cent., the present high premium upon bonds would almost entirely disappear, and the volume of circulation would respond more readily to the demands of business. The temptation to sell such bonds for the purpose of realizing the premium would no longer remain. osition for refunding all the bonds, not payable at the pleasure of the government, into three per cents. was suggested during the last session of Congress. The proposition is that inducements be offered to the holders of the four and four and one-half per cent. bonds to surrender them to the government, receiving in payment therefor three per cent. bonds having the same dates of maturity as the bonds which are to be surrendered. The new three per cent. bonds issued would themselves bear a small premium, and it is believed that the holders of four per cents. would consent to such an exchange if accompanied by an offer of not more than fifteen per cent. premium. The amount of the premium upon this class of bonds, say 700 millions, now outstanding at fifteen per cent. would be 105 millions of dollars, and this premium could be paid, as the bonds are surrendered for exchange, from the surplus revenue of the government, thus in effect reducing the debt of the government 105 millions by a prepayment of interest which must be paid at a greater rate each year until their maturity.

The benefits of this plan both to the holder and to the government are apparent. The holders would receive, in the shape of fifteen per cent. premium upon the bonds, a portion of their interest in advance, which would be available for loans at rates, greatly exceeding the borrowing power of the government, which is now less than three per cent. The government would be enabled by this use of its surplus to save a portion of the interest which otherwise it would be compelled to pay

hereafter.

The market price of the four per cent. twenty-five-year bonds is now 119.20, which indicates a market estimate of a borrowing rate of interest of 2.92 per cent. per annum to the government. At this rate the present value of one per cent. of interest upon each \$100 bond annually for twenty five years, relinquished by the holder, is \$17.70. If the holder accepts fifteen dollars as an equivalent for these twenty-five annual payments, instead of \$17.70-a reduction of \$2.70 from the market estimate of the value—the government will practically purchase from the holder of the bond at a four and one-half per cent. rate of interest instead of at 2.92 per cent. In other words, the present value of the twenty-five one dollar annual payments relinquished by the holder, when computed at the rate of 2.92 per cent. per annum, is worth \$17.70; but computed at the rate of four and one half per cent. is worth only \$15, a premium which, it is believed, the holders would be willing to accept; and if the government be able to invest its surplus revenue at a rate so favorable to itself as four and one-half per cent., there would seem to be good reason for Congress to provide the necessary legislation for authorizing an arrangement which can also be shown to be of advantage to the holders of the four per cent. bonds.

One alternative would be to reduce the tax upon circulation to onehalf of one per cent. per annum, and another to amend section 12 of the act of July 12, 1882, so as to authorize the banks to receive circulation at the rate of ninety per cent. upon the average current market value of the bonds for the six months previous. If the bonds shall decline in the market, additional bonds may be required to be deposited, or the interest may be retained by the Treasurer upon notice from the Comptroller to make up the deficiency. Such an amendment has frequently been suggested, and, in fact, the original national bank act authorized the issue of circulating notes to the amount of 90 per centum of the current market value of United States six per cent. bonds deposited, provided that such 90 per centum was not in excess of the amount of the bonds at their par value, or in excess of the paid-in capital stock. That law also provided for the deposit of additional bonds or money upon their depreciation, or the suspension of payment of interest upon the bonds held, so long as the depreciation should continue.

It is submitted that the issue of circulation upon four and four and a half per cents at ninety per cent. upon their current market value, under a restriction similar to that last mentioned, is equally safe with the issue of ninety per cent. upon the three per cents now outstanding at par; or that a reduction of the tax upon circulation to one half of one per cent., or to an amount sufficient to reimburse the Treasury for the whole expense of the issue of bank circulation and all expenses incident thereto, is not unreasonable in view of the fact of the large reduction upon the income derived from United States bonds, amounting to more than two per cent. since this tax was imposed.

Either of these plans is feasible and would prevent a sudden contraction of the currency, by bringing into possession of the banks a sufficient amount of bonds to supply the circulation which is needed, and is certainly greatly to be preferred to the propositions for a large increase in legal-tender notes—if such issues were practicable—or to the issue of bank circulation without a deposit of bond security under restrictions

however stringent.

If, however, it shall be the policy of the government to accumulate the revenue instead of largely reducing it, thus rendering it necessary to continue the rapid reduction of the debt even if it is to be purchased at the price fixed by the holders, it is of the greatest importance that the basis upon which the bank currency is issued should be enlarged so as to include some other form of security besides government credit.

The national banking system has been in operation nearly twenty years, and may be said to have not yet attained its majority. It is part of the machinery of the government. Its advantages have been well tested in good and in evil times, and during the searching and acrimonious discussions of the last ten years, the final result of which has been the legislation of the present Congress authorizing the extension of the period of succession of each one of these institutions for twenty years from the date of the expiration of its corporate existence. troller, while he believes it is for the best interests of the government to continue the national banking system, subject to such improvements as shall hereafter be authorized by Congress, is after all of opinion that it would be better that the circulation should diminish in volume, than that the issue should be increased at the risk of placing in the hands of the poorer classes uncurrent and irredeemable circulation, or of giving to associations organized by unscrupulous men an opportunity to use an excellent system of banking for bad purposes.

The national banking system was established with a view to uproot other and evil systems, and nothing but the heroic legislation of taxing bad issues of circulation out of existence, which was passed in the interests of the government during a great war, could have accomplished this purpose. By increasing the rate of issue upon the bonds pledged by the banks as security for their circulation, or by reducing the tax upon bank notes, or by a proper refunding of the debt,

and reducing the revenue derived in many instances from unjust and burdensome taxation, the system may continue for twenty-five years, or until the maturity of the four per cents; but it is far better that the right to issue notes should be gradually discontinued than that so good a system should be used to bring again upon the country the very evils which were experienced at the time of its organization, twenty years ago.

DISTRIBUTION OF COIN AND PAPER CURRENCY.

In the reports of the Comptroller for the three years preceding 1882, tables have been given showing the amount of coin and currency, and its distribution in the Treasury, in the banks, and in the hands of the people on January 1, 1879, the date of the resumption of specie payments, and on November 1 of that and each succeeding year. These tables are again presented, the amounts on November 1, 1882, having been added.

From November 1, 1881, to November 1, 1882, the production of gold by the mines of the United States is estimated at \$43,359,021, and the amount of gold exported from the country, in excess of the amount imported, has been \$36,122,536. The difference, \$7,236,485, is the increase during the year. The Director of the Mint estimates that \$2,700,000 of this amount has been used in the arts, leaving \$4,536,485 as the increase in the stock of gold remaining in the country and available for circulation. The total excess of imports of gold over exports, from the date of resumption to November 1, 1882, has been \$161,311,578, and the total gold product of the mines of the United States for the same period is estimated to have been \$147,509,021. This is the first year since 1879 during which the exportation of gold has exceeded the importation. During the last two months (September and October, 1882) the imports have, however, slightly exceeded the exports.

The amount of standard silver dollars coined during the year has been \$27,657,175, and the total amount coined up to November 1, 1882, since the passage of the law of February 28, 1878, authorizing their coinage,

has been \$128,329,880.

The following table shows the amount of coin and currency in the country on January 1, 1879, and on November 1 of the years 1879, 1880, 1881, and 1882:

	January	November	November	November	November
	1, 1879.	1, 1879.	1, 1880.	1, 1881.	1, 1882.
Gold coin*. Silver coin* Legal-tender notes National-bank notes Totals	325, 791, 674	\$355, 681, 532 126, 009, 537 346, 681, 016 337, 181, 418 1, 165, 553, 503	\$453, 882, 692 158, 320, 911 346, 681, 016 343, 834, 107 1, 302, 718, 726	\$562, 568, 971 186, 037, 365 346, 681, 016 360, 344, 250 1, 455, 631, 602	\$567, 105, 456 212, 324, 335 346, 681, 016 362, 727, 747 1, 488, 838, 554

There has been no change in the aggregate of legal-tender notes outstanding, which remains as fixed by the act of May 31, 1878. National-bank notes have increased \$2,383,497 during the year; the amounts of gold and silver coin have increased \$4,536,485 and \$26,280,970, respectively, making a total increase in coin and currency of \$33,206,952.

The table below gives the portion of coin and currency held by the United States Treasury, and by the national and State banks. The amounts in the Treasury are for the same dates as in the preceding

^{*}Estimate of Director of the Mint, which includes bullion in process of coinage.

table, and those in the national banks are for the dates of the bank returns nearest thereto, viz, January 1 and October 2, 1879, October 1, 1880 and 1881, and October 3, 1882. The amounts in the State banks, trust companies, and savings banks have been compiled in this office from official reports for the nearest obtainable dates.

If the amounts of gold and silver coin and of currency in the above table—that is, the amounts of these items in the Treasury and the banks—be deducted in each case from the amounts of gold and silver coin and currency in the country, as shown in the first table, the remainder will be, approximately, the amounts which are in the hands of the people, as follows:

	January	November	November	November	November
	1, 1879.	1, 1879.	1, 1880.	1, 1881.	1, 1882.
Gold	\$119, 629, 771	\$149, 415, 016	\$200, 250, 181	\$267, 663, 402	\$306, 650, 159
	67, 693, 895	67, 228, 714	73, 848, 285	82, 939, 158	80, 912, 634
	459, 097, 051	502, 168, 488	542, 951, 898	567, 445, 959	548, 828, 288
	646, 420, 717	718, 812, 218	817, 050, 364	918, 048, 519	936, 391, 081

The gold in the Treasury, including bullion in the process of coinage, has decreased during the year \$19,346,436, and in the banks \$15,103,846. The paper currency in the Treasury has increased \$3,449,418, and in the banks \$17,557,650. The increase of gold outside of the Treasury and the banks has been \$38,986,757, and the decrease of paper currency, exclusive of silver certificates, \$18,617,671. In the foregoing tables the silver certificates issued by the Treasury have not been included, but the standard silver dollars held for their redemption on presentation

form a portion of the silver coin in the Treasury. The silver certificates in the hands of the people and the banks, at dates corresponding with those given in the preceding tables, were as follows:

January 1, 1879	\$413, 360
November 1, 1879	1,604,370
November 1, 1880	19, 780, 240
November 1, 1881	58, 838, 770
November 1, 1882	65, 620, 450

It will be seen that the amount of these certificates in circulation has increased only \$6,781,680 during the past year, and if this whole increase were held outside of the banks, it would not offset the decrease of \$18,617,671 in other forms of paper currency in the hands of the people, for which coin has been substituted.

As before stated, the total amount of standard silver dollars coined up to November 1, 1882, was \$128,329,880, of which, as shown in one of the foregoing tables, \$92,414,977 was then in the Treasury, although an amount equal to \$65,620,450 was represented by certificates in the hands of the people and the banks, leaving \$26,794,527 belonging to the Treasury. Of the \$128,329,880 coined, \$35,914,903 was therefore circulating outside of the Treasury in the form of coin, and \$65,620,450 in the form of certificates. The remainder of the silver, \$83,994,455, consisted of subsidiary coin, trade dollars, and bullion, of which \$30,761,935 was in the Treasury, and \$53,232,520 was in use in place of the paper fractional currency for which it was substituted, as against \$55,955,398 similarly employed on November 1, 1881. The increase of gold and silver coin and paper currency, outside of the Treasury, since the date of resumption is thus estimated to have been \$289,964,414, and the increase during the year ending November 1, \$18,336,612; or, if the amount of silver certificates in circulation be added, the total increase since resumption would be \$355,172,504, and during the past year, \$25,118,292.

ILLEGAL CERTIFICATION OF CHECKS.

The practice of certifying checks had been in use for more than thirty years, previous to the organization of the national banking system, and at least twenty years previous to the establishment of the clearing house.

In the beginning, this certification was not considered as legally binding the bank to pay the check. For many years it had little signification other than as giving clerical information, and the amount of the check, when certified, was not charged to the account of the drawer until it was afterwards presented for payment. Subsequently, after the year 1854, when the clearing house was organized, it became the custom to present checks, and also bills receivable or acceptances on the day of maturity at the bank where they were made payable for certification. The bills and checks which were certified, were then returned to the bank messenger who had presented them, and on the following morning were transmitted to the clearing house with other exchanges.

The certification consisted of the signature of the paying teller, written across the face of the paper inside of a stamp bearing the date of the certification and the title of the bank. This form of certification was regarded as a legal obligation of the bank, and the amount of the check was charged to the account of the drawer at the date of the certification. If the maker or acceptor of notes or bills was in good standing at the bank at which it was made payable, such bills were not unfrequently certified, even if the full amount was not to the credit of the account to

which it was subsequently charged. Bills or checks are usually presented for certification during the first business hours of the day, and the deposits of merchants and brokers are not usually made until the later hours of the day. The officers of the bank, who know the usual habits of their dealers in making their deposits, as well as their responsibility, do not hesitate to assume the payment of checks or drafts which they feel assured will be provided for before the exchanges of the clearing house are received. If these certifications were confined to mercantile and commercial transactions, little objection would have been raised to the practice, and it is not probable that there would have been any legislation prohibiting it. It would certainly seem to be advisable to leave to the discretion of a bank the right to accept bills drawn by correspondents at a distance, or by merchants at home, whose standing is beyond question, and whose deficiency in the account is known to arise from delay in receiving remittances or making deposits. A refusal to certify or pay under such circumstances would be likely to subject the bank to the loss of the accounts of its most valuable dealers.

Such legitimate certifications in mercantile or commercial transactions are for comparatively small amounts, and would not attract attention as a large item in the abstracts of the condition of the banks in the city of New York, to which this practice is chiefly confined.

The large use of these instruments by which the banks in effect guarantee the contracts of stock-brokers with their customers has grown to be a great abuse during the past few years, and cannot be defended upon any correct principle of banking. This business is chiefly done by nine or ten national banks, although other banks, organized under State laws as well as national, certify similar checks for considerable amounts.

Section 5208 of the Revised Statutes makes it—

Unlawful for any officer, clerk or agent of any national banking association to certify any check drawn upon the association, unless the person or company drawing the check has on deposit with the association, at the time such check is certified, an amount of money equal to the amount specified in such check.

There are many methods of evading this law. If certification is required in excess of the amount on deposit a demand note is made, and the amount thereof is entered to the credit of the broker desiring the accommodation; or his check upon another bank is received without certification, and a temporary credit entered upon his account, and these temporary credits are canceled at the close of business when the account has been made good. Brokers asking for such over-certifications keep large balances to their credit, on which the bank pays no interest. Certification is made without charge, the bank receiving its compensation in the large deposits which stand to the credit of the broker. The banks justify the practice upon the ground that it is of great convenience to the community, and that stock transactions, particularly, could not be carried on without some such arrangement. They insist that for many years only trifling losses have arisen from the practice—very much less than the losses incurred by them in ordinary discounts.

Section 13 of the act of July 12, 1882, provides:

That any officer, clerk, or agent of any national banking association who shall willfully violate the provisions of an act entitled "An act in reference to certifying checks by national banks," approved March third, eighteen hundred and sixty-nine, being section fifty-two hundred and eight of the Revised Statutes of the United States, or who shall resort to any device, or receive any fictitious obligation, direct or collateral, in order to evade the provisions thereof, or who shall certify checks before the

amount thereof shall have been regularly entered to the credit of the dealer upon the books of the banking association, shall be deemed guilty of a misdemeanor, and shall, on conviction thereof in any circuit or district court of the United States, be fined not more than five thousand dollars, or shall be imprisoned not more than five years, or both, in the discretion of the court.

Previous to the passage of this act those national banks which are accustomed to make large advances to brokers for stock transactions certified checks for large amounts under evasions of the law, or such arrangements or agreements as were deemed by them not to be in conflict with section 5208 of the Revised Statutes. The latter act seems to have been passed for the purpose of preventing the evasions of the previous law to which reference has been made. The language of the section is: "Or who shall resort to any device or receive any fictitious obligation, direct or collateral, in order to evade the provisions thereof."

Since the passage of this act the banks have accepted checks which have been drawn upon them instead of certifying them, and have assumed that such acceptance is not in violation of law. In some cases these acceptances are made payable through the clearing house, the effect of which form of acceptance is that such checks are payable upon the following day; in other cases the acceptance is made without any condition as to the mode of its payment. The banks claim that they have power to accept checks under the third and seventh paragraphs of section 5136 of the Revised Statutes. The former authorizes national banks "to make contracts," and the latter provides for the "exercise of all such incidental powers as shall be necessary to carry on the business of banking." It is also claimed that section 5209 of the Revised Statutes, which provides that it shall be a misdemeanor for an officer of a bank to make acceptances without proper authority, by implication authorizes acceptances to be made with the authority of the directors, and that the act of July 12, 1882, does not, in plain terms, prohibit such acceptance. The Comptroller being in doubt in reference to the proper construction of the section, prepared a letter containing the following questions, which, at his request, was submitted by the Secretary to the Attorney-General for his opinion:

Has a national bank the legal right to accept checks drawn upon it, unless the drawer has the amount stated in the check actually on deposit in the bank?

If a national bank has the power to make such an acceptance, would such acceptance at a time when the money was not on deposit to the credit of the drawer be a liability to it for money borrowed, and as such be required to be limited to one-tenth of the paid-in capital of the bank, as provided by section 5200 United States Revised Statutes?

If a national bank has the power to accept such checks equal in amount in any one case to one-tenth of its capital, would the acceptance of any number of checks to an amount exceeding, in the aggregate, the amount of its paid-in capital be in violation of section 5202 United States Revised Statutes?

The violation of section 5208, Revised Statutes, subjected a national bank to the appointment of a receiver. The law was not mandatory, and the appointment was left to the judgment and discretion of the Comptroller. The proper ground for the appointment of a receiver is insolvency, and it may be questioned whether the responsibility for taking a bank from the control of its owners should be exercised in other cases than insolvency until the question of violation of law shall have been brought before the courts for determination. No appointments of receivers have ever been made since the organization of the national banking system, except in cases of insolvency, although two large banks which had previously been found to be insolvent, were placed in charge of a receiver for illegal certification of checks.

The passage of the act of March 3, 1869 (section 5208, Revised Statutes), and the examinations which followed, had the effect to check and The practice has, however, diminish the practice of certification. greatly increased during the last three years, and the returns of the banks for October 3, the date of their last statement, discloses the fact that the amount of certificates or acceptances made on that day was nearly one-third greater than for a corresponding date in the year previous; and that the amount of acceptances for stock brokers of nine national banks on that day was more than nine times the aggregate capital stock of those banks, as may be seen from the following table, which exhibits the amount of capital and certified checks or acceptances outstanding of all the national banks of New York City for corresponding dates from 1875 to 1882 inclusive, and like information in reference to nine national banks for the same dates.

Date.	No. of banks.	Capital.	Certified checks.	Date.	No. of banks.	Capital.	Certified checks.

The penalty for the violation of section 13 of the act of July 12, 1882, is a fine of not more than \$5,000, or imprisonment for not more than five years, or both, upon conviction thereof in any circuit or district court of the United States; and the penalty for the violation of other laws relating to the national banks where the penalty is not specified is the forfeiture of the rights, privileges, and franchises of an association, to be determined and adjudged by a proper circuit, district, or Territorial court of the United States.

The Attorney General, in answer to the questions submitted to him, has returned an opinion, in which he says:

These provisions together [section 5208 Revised Statutes, and section 13 of the act of July 12, 1882] prohibit the certification of a check drawn upon a national bank, where, at the time of certification, the drawer has not on deposit with the bank, and regularly entered to his credit on its books, an amount of money equal to the amount of the check.

What, then, is certification of a check? It is an act on the part of the bank upon which the check is drawn, implying (as is observed by the Supreme Court in the case of Merchants' Bank v. State Bank, 10 Wall., 604). "That the check is drawn upon sufficient funds in the hands of the drawee, that they have been set apart for its satisfaction, and that they shall be so applied whenever the check is presented for payment. It is

and that they shall be so applied whenever the check is presented for payment. It is an undertaking that the check is good then and shall continue good, and this agreement is as binding on the bank as its notes of circulation, a certificate of deposit payable to the order of the depositor, or any other obligation it can assume."

No particular form is required for the certification. Ordinarily this is done by simply writing the word "good" upon the face of the check, adding thereto the signature or initials of the certifying officer. But any language employed by such officer, importing that the check is good and will be paid, would seem to be sufficient. (See 2 Daniel on Neg. Inst., Sec. 1606.)

A check being an order for the payment of money addressed to a bank or banker, it is always presumed to be drawn against funds on deposit therewith. It is not, when considered with reference to its purpose, presentable for acceptance, but only for payment—that is to say, payment is the only acceptance which in contemplation of law enters into the engagement of the parties. Hence, if the payee or holder of the

law enters into the engagement of the parties. Hence, if the payee or holder of the check presents it with the view of having it certified, instead of paid, he does so at the peril of discharging the drawer. (First Nat. Bank v. Leach, 52 N. Y., 353.)

In Security Bank v. National Bank, (67 N. Y., 462), the court says: "The manifest object of a certification is to indicate the assent of the certifying bank to the request of the drawer of the check that the drawer will pay to the holder the sum mentioned; and this is what an acceptor does by his acceptance of a bill." Whether such assent is indicated by writing the word "good" or the word "accepted" upon the check can make no difference as between the holder of the check and the bank, the obligation make no difference as between the inducer of the check and the bank, the configation assumed by the latter is precisely the same in either case; and thus the legal effect of marking a check "accepted" being the same as marking it "good," the employment of the former expression may, equally with that of the other, well be deemed to import a certification thereof. Agreeably to this view, the acceptance of a check, other than for immediate payment, is not legally distinguishable from its certification. In fact and effect the words are equivalents; they are for the same forbidden purpose to produce the same forbidden results.

The aim of the statute, in prohibiting the certification of checks by national banks where the amount thereof is not on deposit to the credit of the drawer, is obviously to provide a guard against the risks and evils attending such pledging of their credit without adequate security. The mischief sought to be avoided is the incurring of liabilities by these banks on checks drawn upon them without sufficient funds; and inasmuch as the liability is the same whether the check be marked by the bank "accepted" or simply "good," either of these modes of incurring it would seem to be sufficient to bring the case within the prohibition referred to. Each may properly be regarded as constituting a certification, according to the meaning and intent of the statute. To construe otherwise would be to allow a "device" to "evade the pro-

vision" of the law, and such, too, as by express terms is prohibited and punished.

In answer to the first question I accordingly reply that in my opinion a national bank cannot legally accept checks drawn upon it, where the drawer has not on deposit

therewith the amount stated in the check.

To do so renders the bank subject to certain proceedings on the part of the Comptroller of the Currency (under section 5234, R. S.), and the officer by whom the acceptance is made becomes liable to the penalties provided in the act of July 12, 1882.

The case presented in the second question is not, in my opinion, covered by the pro-

visions of section 5200 Revised Statutes.

The restriction then applies only to liabilities "for money borrowed." The acceptance of a check, where the drawer has no funds on deposit, would be a loan of the credit of the bank, rather than a loan of money, and, if otherwise unobjectionable, it could not properly be regarded as within the terms of the restriction adverted to.

The third question presents the same case in connection with section 5202, Revised Statutes, which declares that "no association shall at any time be indebted or in any way liable to an amount exceeding the amount of its capital stock actually paid in and remaining undiminished by losses or otherwise," except on account of demands of the nature therein described. Liabilities incurred by the acceptance of checks, the drawers thereof having at the time no funds on deposit with the bank, do not appear to fall within any of the exceptions enumerated; and assuming such acceptance to be lawful, I am of the opinion that the limit imposed by section 5202 extends to liabilities thus incurred, and that the acceptance of checks by a bank, without the existence of funds on deposit therewith, to an amount exceeding in the aggregate the amount of its paid-in capital, would be a violation of that section.

Under this opinion of the Attorney General it will be the duty of the Comptroller to bring such evidence as he can obtain by frequent examinations to the attention of the proper officers, in order that such violation may be determined by the courts, and the penalty enforced as provided by the statute.

THE AMOUNT OF THE INTEREST-BEARING FUNDED DEBT OF THE UNITED STATES, AND THE AMOUNT HELD BY THE NATIONAL BANKS.

The report for 1881 contained tables exhibiting a classification of the interest-bearing debt of the United States, and of the bonds held by the national banks for a series of years. These tables are again presented, and now exhibit also the amount of the outstanding bonds of the government, and the amount held by the banks on November 1st of the present year.

The most important operations of the Secretary of the Treasury, during the years which followed the close of the war, were the funding of large amounts of temporary obligations then outstanding of the gov-

ernment chiefly into six per cent. bonds.

The six per cent. bonds were gradually reduced during the year 1869, and the seven years following, by payment and refunding, into five per cents. The six per cents, together with the five per cents, were subsequently rapidly replaced by four and a half and four per cents, which were authorized to be issued by the act of July 14, 1870. In the year 1881 all of the unredeemed five and six per cent. bonds, amounting to \$579,560,050, were continued, payable at the pleasure of the government, with interest at three and one-half per cent., by agreement with the holders, and since that time \$164,833,200 of these three and one-half per cent. bonds have been paid, and during the present year \$259,370,500 have been replaced by three per cents, under the att of June 12, 1882.

The following table exhibits the classification of the unmatured interest-bearing bonded debt of the United States* on August 31, 1865, when the public debt reached its maximum, and on the 1st day of July of each year thereafter, together with the amount outstanding on November 1 of the present year:

Date	Six per cent. bonds.	Five per cent. bends.	Four and a half per cent. bonds.		Total.
Aug. 31, 1865. July 1, 1866. July 1, 1867. July 1, 1868. July 1, 1869. July 1, 1870. July 1, 1871. July 1, 1872. July 1, 1873. July 1, 1874. July 1, 1875. July 1, 1876. July 1, 1876. July 1, 1877. July 1, 1878. July 1, 1878. July 1, 1878. July 1, 1878. July 1, 1878. July 1, 1878. July 1, 1878. July 1, 1878. July 1, 1878. July 1, 1880. July 1, 1880. July 1, 1882 Nov. 1, 1882	Continued at 3½ per cent. 58, 957, 150	Continued at 3½ per cent. 401, 503, 900 155, 356, 350 3 per cents. 246, 138, 850	250, 000, 000 250, 000, 000	739, 349, 350 739, 353, 350	1, 449, 810, 400 1, 404, 080, 200

The operations of the Treasury Department for a series of years have largely reduced the amount of interest receivable by the national banks on the bonds held by them. During the present year, ending November 1, the three and one half per cents have been reduced more than two hundred millions (\$200,769,200), and \$179,685,550 of three per cents have been deposited in place thereof.

Sixteen years ago the banks had on deposit as security for circulation, 327 millions in United States bonds, of which amount 241 millions bore interest at six per cent. and 86 millions at five per cent. These

^{*}The Navy pension fund, amounting to \$14,000,000 in three per cents, the interest upon which is applied to the payment of naval pensions exclusively, is not included in the table

bonds have now entirely disappeared from the list of securities held by the national banks. The average rate of interest now paid by the United States on the bonds deposited as security for circulating notes is about 3.5 per cent. upon their par value; but is equal to about 3.26 per cent. only of the current market value of the bonds. The banks now hold 33 millions of four and one-halfs; nearly 105 millions of fours; 40 millions of three and one-half per cents converted from five and six per cents, and 179 millions of three per cents, which have been refunded from three and one-half per cents, during the present year. This will be seen from the following table, which exhibits the amount and classes of United States bonds owned by the banks, including those pledged as security for circulation and for public deposits on the first day of July in each year since 1865, and upon November 1 of the present year.

	United	States bonds	held as secu	urity for circ	ulation.	United States	
Date.	6 per cent. bonds.	5 per cent. bonds.	4½ per cent. bonds.	4 per cent. bonds.	Total.	bonds held for other purposes at nearest date.	Grand total.

Nov. 1; 1882	3 per cents: 7, 788, 100	3 per ceats: 171, 897, 450	33, 754, 650	104, 917, 500	358, 964, 650	37, 563, 750	396, 528, 400

The banks also held \$3,526,000 of Pacific Railroad six per cents, and \$15,000 of five per cents upon which interest has ceased.

AMOUNT OF UNITED STATES BONDS HELD BY THE NATIONAL BANKS, BY BANKS ORGANIZED UNDER STATE LAWS, AND BY PRIVATE BANKERS.

The amounts of United States bonds held by the national banks on November 1, 1880, 1881, and 1882, were, respectively, \$403,369,350, \$426,120,950, and \$396,528,400.

In the following table these amounts have been combined with the average amount of United States bonds held by the savings banks, State banks and trust companies, and private bankers of the country during the six months ending May 31 of the same years:

	1880.	1881.	1882.
National banks. Savings banks State banks and trust companies. Private bankers	189, 187, 816 24, 498, 604	\$426, 120, 950 214, 880, 178 21, 650, 668 16, 670, 494	\$395, 057, 500 242, 028; 782 23, 211, 430 14, 870, 745
Totals	631, 422, 454	679, 322, 290	675, 168, 457

The interest-bearing funded debt of the United States was, on November 1 last, \$1,418,080,200. The total amount of bonds held by all the banks and bankers in the country as given above was \$675,168,457, which is not greatly less than one half of the interest-bearing debt. The amounts for the banks other than national have been obtained from the semi-annual reports made by them to the Commissioner of Internal Revenue, for purposes of taxation. The table given below has also been compiled from these reports, and shows, by geographical divisions, the average amount invested by State banks, private bankers, trust companies, and savings banks in United States bonds, for the six months ending May 31 for the four years named:

•	Amount invested in United States bonds.				
Geographical divisions.	By State banks, private bank- ers, and trust companies.	By savings banks.	Total.

Southern States.		100, 110, 042	1, 862, 946		
Western States		2, 354, 710	9, 454, 584		
Pacific States and Territories	5, 897, 637	12, 851, 605	18, 749, 242		
United States	38, 082, 175	242, 028, 782,	280, 110, 957		

The above table gives the average amount of capital invested in United States bonds, from which should be deducted the amount of premium paid at the time of purchase, which cannot be ascertained.

Through the courtesy of State officers the Comptroller has obtained the official reports made to them, under State laws, by State banks in twenty-one States, by trust companies in five States, and by savings banks in fifteen States, at different dates during the year 1882, and from these returns the following table has been compiled:

Held by State banks in twenty-one States. Held by trust companies in five States. Held by savings banks in fifteen States.	16, 934, 812
Total	263, 460, 426

The amount held by geographical divisions during the years 1880, 1881, and 1882, was as follows:

Geographical divisions.	1880.	1881,	1882.
Eastern States Middle States Southern States Western States Pacific States	157, 563, 757 958, 470 2, 672, 242	\$40, 468, 340 176, 373, 889 1, 073, 460 5, 735, 518 14, 874, 332	\$42, 667, 248 197, 135, 239 268, 350 3, 369, 414 20, 020, 175
Total	213, 665, 402	238, 525, 539	263, 460, 426

The amounts of United States bonds held, as shown by the tables compiled from returns made by State banks, trust companies, and savings banks to State officers, in twenty-one States and Territories were, in 1882, \$16,650,531 less than the average amount shown by the table compiled from the reports made to the Commissioner of Internal Revenue, which were received from similar institutions.

The first-named table shows the actual amounts held at various dates in 1882, while the last gives the average amount held for the six months ending May 30, 1882. Although obtained from different sources and based on data that are not equally complete, the amounts obtained from the one source serve to corroborate those obtained from the other.

NATIONAL BANK FAILURES.

Three national banks have been placed in the bands of receivers during the year ending November 1, 1882, namely: The Mechanics' National Bank of Newark, N. J., on November 2, 1881; the Pacific National Bank of Boston, Mass., on May 22, 1882, and the First National Bank of Buffalo, N. Y., on April 22, 1882. The suspension of the first-named two banks was mentioned in the report of the Comptroller for the year ending November 1, 1881, and the causes which led to both these fail ures were then fully discussed. The directors of the Pacific National Bank of Boston undertook to make good the impairment of its capital stock in the manner authorized by section 5205 of the Revised Statutes, but, as they failed to do so within the time fixed by law, a receiver was appointed to take charge of its affairs. The failure of the First National Bank of Buffalo was the result of the misappropriation of its funds by its president. Its condition was discovered by the bank examiner when making his annual examination, and a receiver was appointed as before stated.

The affairs of ten national banks have been finally closed within the year. These banks, with the total dividend paid by each to their creditors, are as follows:

The First National Bank of Selma, Ala
The First National Bank of Carlisle, Pa
The First National Bank of Greenfield, Ohio

The following banks have been closed, with the exception of litigation pending in the courts, and the expenses of the receiverships, in-

cluding the amounts paid to receivers for personal services, are in each case no more than is necessary to carry on the suits. In each of these instances, if litigation results favorably to the banks, some additional dividends may be paid.

The dividends already paid to the creditors of these associations are as follows:

Per	cent.
The Charlottesville National Bank, Charlottesville, Va	
The First National Bank of Norfolk, Va	49
The First National Bank of Anderson, Ind	25
The Venango National Bank of Franklin, Pa	15
The Atlantic National Bank, of New York City	95
The First National Bank of Mansfield, Ohio	45
The Miners' National Bank of Georgetown, Colo	65
The First National Bank of Bedford, Iowa	12.5
The City National Bank of Chicago, Ill	77
The First National Bank of Georgetown, Colo	
The First National Bank of Dallas, Tex.	37
The Central National Bank of Chicago, Ill	
The People's National Bank of Helena, Mont	40
The First National Bank of Allentown, Pa	
The First National Bank of Waynesburg, Pa	

If the litigation now in progress should result favorably, it is estimated that additional dividends will be paid as follows: To the creditors of the First National Bank, Waynesburg, 25 per cent.; of the First National Bank, Allentown, Pa., and First National Bank, Georgetown, Col., 20 per cent.; the First National Bank of Mansfield, Ohio, and Miners' National Bank of Georgetown, Col., 10 per cent., and to the remaining banks, dividends less than 5 per cent.

The affairs of the Cook County and Scandinavian National Banks of Chicago, and of the National Bank of the State of Missouri of Saint Louis also, cannot be closed until pending litigation is brought to a conclusion. The latter bank has already paid to its creditors 100 per cent. of the principal of their claims, and more than 50 per cent. of interest accrued up to December 1, 1882. It is expected that a considerable portion, though not the whole, of the remaining interest will hereafter

The First National Bank of New Orleans has been closed during the year. The payment of a final dividend had been necessarily postponed on account of delay experienced in adjusting accounts due to and from the government, but which have during the year been finally settled by an appropriation by Congress resulting in a recovery by the bank of \$94,000. The three following banks have paid their creditors the full amount of their claims, principal and interest, and their affairs are still in the hands of receivers appointed by the Comptroller, who are administrating the remaining assets in the interest of the stockholders:

First National Bank of Newark, N. J. 100 per cent. and interest in full. First National Bank of Brattleboro, Vt. 100 per cent. and interest in full. Third National Bank of Chicago, Ill. 100 per cent. and interest in full.

It is probable that in each of these cases the shareholders will eventually receive a handsome percentage upon the capital stock of the bank. The following banks in the hands of receivers have paid dividends during the past year. The total dividends up to November 1, 1882, being also given.

The First National Bank of Selma, Ala., 4.6 per cent.; total, 46.6 per cent. The First National Bank of New Orleans, La., 9 per cent.; total, 79 per cent. The National Bank of Vicksburg, Miss., 13 per cent.; total, 49.2 per cent.

The Ocean National Bank, New York City. Interest dividend; total, 100 per cent., and interest.

The New Orleans National Banking Association, New Orleans, La., 5 per cent.; total, 60 per cent.

The Charlottesville National Bank, Charlottesville, Va., 7 per cent.; total, 62 per cent. The First National Bank of La Crosse, Wis., 3. 4 per cent.; total, 48. 4 per cent. The First National Bank of Greenfield, Ohio, 27 per cent.; total, 27 per cent.

The First National Bank of Franklin, Ind., 15 per cent. to stockholders; creditors paid

in full.

The National Bank of the State of Missouri, Saint Louis, Mo., 5 per cent., and 50 per cent. of interest; total, 100 per cent., and 50 per cent. of interest.

The Lock Haven National Bank, Lock Haven, Pa., 10 per cent.; total, 100 per cent.

The Third National Bank of Chicago, Ill. Interest in full; total, 100 per cent. and interest.

*The Commercial National Bank of Kansas City, Mo., 6. 165 per cent. to stockholders;

total, to stockholders, 37.165.

total, to stockholders, 37. 165.

The First National Bank of Tarrytown, N. Y., 5. 5 per cent.; total, 90. 5 per cent. The First National Bank of Allentown, Pa., 20 per cent.; total, 70 per cent.

The People's National Bank of Helena, Mont., 10 per cent.; total, 40 per cent.

The German American National Bank, Washington, D. C., 10 per cent.; total, 50 per cent.

The Second National Bank of Scranton, Pa., 50 per cent.; total, 75 per cent.

The First National Bank of Butler, Pa., 20 per cent.; total, 60 per cent.

The First National Bank of Meadville, Pa. Interest in full. 100 per cent. and interest.

The First National Bank of Newark, N. J. Interest in full. 100 per cent. and interest.

The Mechanics' National Bank of Newark, N. J., 55 per cent.; total, 55 per cent.

Since the commencement of the national banking system 87 banks have been placed in the hands of receivers, and 420 banks have voluntarily closed their business by the votes of shareholders owning two thirds of their stock, under the provisions of sections 5220 and 5221 of the Revised Statutes of the United States. Of the banks so placed in voluntary liquidation by their stockholders, 7 failed to pay their depositors, and in these cases receivers were appointed by the Comptroller to wind up their affairs. Of the 87 banks placed in the hands of receivers, 51 have been finally closed, leaving 36 still in process of settlement. The loss to creditors of national banks which have been placed in the hands of receivers during the nearly twenty years that have elapsed since the passage of the act of February 25, 1863, as near as can be estimated, including dividends which will probably be hereafter paid, has been about \$7,000,000. The average annual loss has been, therefore, about \$400,000 in the business of corporations having an average capital of about \$450,000,000, and which have been responsible for the safe keeping of deposits in their hands averaging constantly over \$800,000,000, or about one-twentieth of one per cent. of annual loss to depositors. The time required for liquidating the affairs of insolvent banks depends chiefly upon the amount of litigation which may arise, as in any case it is impossible to tell in advance what questions it may become necessary to refer to the courts for decision. these cases no conclusion can be reached until the matter has been brought before the courts of last resort. The dockets of the supreme courts in most of the States, and that of the Supreme Court of the United States, are crowded, and when an appeal is made to these tribunals, years often elapse before the case can be reached. Owing, however, to the decisions already made, the forms of procedure, under the laws governing national banks, are better understood, and in collecting assets, in allowing offsets, and enforcing the liabilities of stockholders, there is now no inducement to protract litigation, either on the part of the ordinary debtors of the bank or of the stockholders who become such debtors when assessed under their liability, as provided in section 5151 of the Revised Statutes. In all cases of failure of national banks there are many claims presented to the receivers which, for various reasons, do not appear to be properly liabilities of the association, and it is necessary, in order to protect the interests of the genuine creditors, that such claims should be rejected until their merits have been properly investigated by a court of competent jurisdiction.

The liability of directors for negligent discharge of their duties, or for malfeasance, is not yet clearly defined by any authoritative decision, but such decisions as there are bearing upon this matter point to a complete remedy against them also. The total amount paid to creditors of insolvent national banks amounts to \$20,945,090; upon proved claims amounting to \$29,586,558. The dividends so far paid thus equal about 70 per cent. of the proved claims. The amount paid during the year was \$2,283,392.

Assessments amounting to \$8,101,750 have been made upon the stock-holders of insolvent national banks for the purpose of enforcing their individual liability under section 5151 of the Revised Statutes, of which about \$3,200,000 have been collected and \$534,080.70 during the past year.

A table showing the national banks which have been placed in the hands of receivers, the amount of their capital, of claims proved, the rates of dividends paid, and also showing the amount of circulation of such banks issued, redeemed, and outstanding, will be found in the Appendix.

LOANS AND RATES OF INTEREST.

The following table gives the classification of the loans of the banks in the city of New York, in Boston, Philadelphia, and Baltimore, and in the other reserve cities, at corresponding dates in each of the last three years:

	Oc	TOBER 1, 1880.

S. bonds on demand On other stock, &c., on demand On real-estate security Payable in gold All other loans	\$83, 924, 333 17, 297, 475 7, 003, 085 51, 152, 021 786, 521 6, 752, 181 2, 670, 371	\$81, 520, 129 22, 491, 926 8, 286, 525 78, 062, 085 670, 021 4, 821, 216	\$107, 058, 860 27, 755, 152 3, 915, 077 92, 630, 982 1, 336, 513	\$112, 049, 004 26, 935, 878 2, 539, 928 97, 249, 162 236, 100 7, 747, 587	\$118, 692, 651 21, 203, 573 1, 797, 687 89, 532, 762 304, 732 7, 600, 487	
Totals	169, 585, 980	195, 851, 902	238, 428, 501	246, 757, 659	239, 041, 892	

The attention of Congress has previously been called to section 5200 of the Revised Statutes, which places restrictions upon loans, and to the difficulty of enforcing its provisions. In cities where large amounts of produce are received and stored, it is represented that it is impossible for the banks to transact this class of business, if restricted to loans for an amount not exceeding in any instance one-tenth of their capital. It is true that the limitation does not apply to loans upon produce in transit, where the drafts are drawn on existing values; but if produce is stored, instead of being shipped, large loans cannot be made except in violation of law. In such case the Comptroller has no means of enforcing the law, except by bringing a suit for forfeiture of charter, and this course might result in great embarrassment to business, as well as loss to many innocent stockholders of the banks. It is evident that the law should be so amended as to exclude from the limitation mentioned legitimate loans upon produce or warehouse receipts, and some other classes of collateral security, as well as loans upon United States bonds.

RATES OF INTEREST IN NEW YORK CITY, AND IN THE BANK OF ENGLAND AND THE BANK OF FRANCE.

The average rate of interest in New York City for each of the fiscal years from 1874 to 1881, as ascertained from data derived from the Journal of Commerce and The Commercial and Financial Chronicle, was as follows:

```
1874, call loans, 3.8 per cent.; commercial paper, 6.4 per cent. 1875, call loans, 3.0 per cent.; commercial paper, 5.8 per cent. 1876, call loans, 3.3 per cent.; commercial paper, 5.3 per cent. 1877, call loans, 3.0 per cent.; commercial paper, 5.2 per cent. 1878, call loans, 4.4 per cent.; commercial paper, 5.1 per cent. 1879, call loans, 4.4 per cent.; commercial paper, 4.4 per cent. 1880, call loans, 4.9 per cent.; commercial paper, 5.3 per cent. 1881, call loans, 3.8 per cent.; commercial paper, 5.0 per cent. 1882, call loans, 4.4 per cent.; commercial paper, 5.4 per cent.
```

The average rate of discount of the Bank of England for the same years was as follows:

```
During the calendar year ending December 31, 1874, 3.69 per cent. During the calendar year ending December 31, 1875, 3.23 per cent. During the calendar year ending December 31, 1876, 2.61 per cent. During the calendar year ending December 31, 1877, 2.91 per cent. During the calendar year ending December 31, 1878, 3.78 per cent. During the calendar year ending December 31, 1879, 2.50 per cent. During the calendar year ending December 31, 1880, 2.76 per cent. During the calendar year ending December 31, 1881, 3.49 per cent. During the fiscal year ending June 30, 1882, 4.01 per cent.
```

^{*} From the Financial Chronicle only.

In the calendar year ending December 31, 1881, the rate of discount of the Bank of England was increased four times, and only twice reduced. During the fiscal year ending June 30, 1882, the rate was increased four times and decreased three times. The present rate is 5 per cent.

The rate of interest in the city of New York on November 28 was, on call loans, from 4 to 7 per cent., and on commercial paper from 7 to 8

per cent.

SPECIE IN BANK AND IN THE TREASURY OF THE UNITED STATES, AND ESTIMATED AMOUNT IN THE COUNTRY—SPECIE IN THE BANK OF ENGLAND AND IN THE BANK OF FRANCE.

The following table exhibits the amounts of specie held by the national banks at the dates of their reports for the last ten years, the coin and coin certificates held by the New York City banks being stated separately:

	Held by	r national ba	nks in New Yo	k City.		. *

The national banks held silver coin amounting, on October 1, 1877, to \$3,700,703, and on October 1, 1878, to \$5,392,628. On October 2, 1879, the amount held was \$4,986,493, and on October 1, 1880, it was \$6,495,477, including \$1,165,120 in silver treasury certificates, and on October 3, 1882, it was \$8,273,815, including \$1,807,600 of silver certificates. On October 1, of the present year, the official reports of the State banks in New England, New York, Pennsylvania, Maryland, Louisiana, Ohio, Indiana, Iowa, Wisconsin, Missouri, and Minnesota show that these banks then held specie amounting to \$7,140,867, of which the banks in New York City held \$3,484,913. The official returns from the State banks of California do not give separately the amount of coin held by them; but it is estimated that of the total cash reported, amounting to \$10,542,859, \$10,060,622 consisted of coin. The amount of coin held by State banks in the States before mentioned, including California, was, therefore, \$17,201,489.

The Director of the Mint, in his report for 1881, estimates the amount of coin in the country on June 30, 1880, at \$501,555,711, of which \$358,958,691 was gold and \$142,597,020 was silver. His estimate for

the fiscal year ending June 30, 1882, is as follows:

United States coin.	Gold.	Silver.	Total.
Circulation June 30, 1881 Coinage for the year, less deposits for recoinage Excess of exports over imports	88, 814, 091	\$171, 459, 766 27, 655, 816 517, 778	\$611, 236, 519 116, 469, 907 517, 778
Total Less excess of exports over imports	528, 590, 844 25, 008, 659	199, 633, 360	728, 224, 204 25, 008, 659
Remainder	503, 582, 185 2, 700, 000	199, 633, 360 60, 000	703, 215, 545 2, 760, 000
Circulation July 1, 1882	500, 882, 185	199, 573, 360	700, 455, 545

From July 1, 1882, to November 1, the Director estimates that there was added to the coin \$15,306,491 of gold and \$8,738,472 of silver, making the stock of coin in the country at the latter date \$724,500,508, of which \$516,188,676 was gold and \$208,311,832 was silver.

The amount of bullion in the mint and in the New York assay office on November 1 is stated to have been \$50,916,780 of gold and \$4,012,503 of silver, making in all \$54,929,283; which, added to the estimated amount of coin stated above, gives \$779,429,791, of which amount \$567,105,456

was gold and \$212,324,335 was silver.

The following table shows the amount of gold and silver, including the amount held to protect gold and silver certificates, and the percentage of each, in the Treasury of the United States, on September 30 of each year from 1876 to 1882, and on November 1, 1882:

Silver.			Gold coin	Total coin	Per cent of-

TRANSACTIONS OF THE NEW YORK CLEARING HOUSE.

The New York Clearing House Association is composed of forty-seven national and fourteen State banks, and the assistant treasurer of the United States at New York.

Through the courtesy of Mr. W. A. Camp, its manager, a statement of the transactions during the year ending October 1, 1882, has been obtained, which shows that the total exchanges were more than forty-six thousand millions of dollars, while the balances paid in money were nearly 1,600 millions. The daily average balances paid were somewhat more than \$5,000,000, or about 3.4 per cent. of the amount of the The balances paid in money during the year consisted of \$1,325,990,000 in clearing house certificates of the Bank of America, legal tenders amounting to \$10,220,245, and \$258,550,000 in gold coin, weighing 476½ tons. If, instead of gold coin, silver had been used, the weight would have been nearly 8,000 tons. Since the date of the issue of the new gold certificates (October 4), authorized by the act of July 12, 1882, the balances due from the government have been paid in these

The following interesting table has been copied from the Public, of New York City, of November 23, which gives the latest information concerning the exchanges at New York and other cities having clearing-houses, for the week ending November 18, 1882, comparing them with those for the corresponding week in 1881, and showing the percentage of differences. The exchanges at the same places for the week ending November 11, 1882, are also given with the percentage of differences resulting from a comparison with the exchanges for the same week of the previous year.

CLEARING-HOUSE CERTIFICATES.

Section 5192 Revised Statutes provides that clearing house certificates, representing specie or lawful money specially deposited for the purposes of any clearing house association, shall also be deemed to be lawful money in the possession of any association belonging to such clearing house holding and owning such certificate; and section 5193 provides that the Secretary of the Treasury may receive United States notes on deposit, without interest, from any national banking association, in sums not less than ten thousand dollars, and issue certificates therefor in denominations of not less than five thousand dollars, which certificates may be counted as part of the lawful-money reserve, and may be accepted in the settlement of clearing-house balances at the places where the deposits therefor were made.

The legal-tender note certificates were first issued in the fiscal year 1873. On June 30, 1875, there were outstanding \$59,045,000 of these certificates, of which the national banks held \$47,310,000. On June 30, 1876, the amount outstanding was \$33,140,000, of which the banks held \$27,955,000. On June 30, 1879, the amount had been reduced to \$29,330,000, and the banks held on June 14 of the same year, \$25,180,000. The amount outstanding on October 3, 1882, was \$10,725,000, and the

national banks held on that day, \$8,645,000.

The issue of the gold certificates was authorized by the fifth section of the act of March 3, 1863, and they were used for clearing-house purposes soon after the passage of the national bank act. The first issue was made on November 13, 1865. On June 30, 1875, there were outstanding \$21.796.300.of which the national banks in New York City held \$12.642.180. The issue of these certificates was discontinued on December 1, 1878, and the amount outstanding had decreased on June 30, 1879, to \$15,413,700, and on October 1, 1880, to \$7,480,100. The amount outstanding on October 3, was \$4,907,440, of which the national banks held \$4,594,300. The issue of gold certificates having been discontinued by the government, and the amount of gold coin having rapidly increased, the banks in New York found it necessary to establish a depository of gold coin for the convenience of the clearing house. This depository at the present time is the Bank of America, by which bank certificates of deposit were first issued on October 14, 1879. The amount of such certificates outstanding on November 1, 1882, was \$26,390,000; on January 1, 1880, \$25,610,000. The largest amount of coin on deposit, during the year, was on January 21, 1882, viz, \$45,330,000, the capacity of the vault having been increased since 1880. The national banks of New York City held on July 1, 1882, \$34,486,000; on October 3, \$41,132,000.

The act of February 28, 1878, authorized any holder of silver dollars of the weight of 412½ grains troy of standard silver, to deposit the same with the Treasurer, or any assistant treasurer, of the United States, in sums not less than ten dollars, and receive therefor certificates of not less than ten dollars each, corresponding with the denominations of the United States notes. It required that the coin deposited, or representing the certificates, should be retained in the Treasury for the payment of the same on demand, and that said certificates should be receivable for customs, taxes, and all public dues, and also authorized their reissue. This act did not authorize their use as clearing-house certificates, nor make them available as reserve for the national banks.

The act of July 12, 1882, authorized and directed the Secretary of the Treasury to receive deposits of gold coin in denominations of not less than \$20 each, corresponding with the denominations of United States

notes. The coin deposited for the certificates is required to be retained for the payment of the same on demand, and these certificates, and also silver certificates, are authorized to be counted as part of the lawful reserve of the national banks.

The act also provides that—

No national banking association shall be a member of any clearing house in which such certificates shall not be receivable in the settlement of clearing-house balances.

The amount of silver certificates outstanding on November 1 was \$65,620,450. The amount of gold certificates which had been issued under this act on November 1, 1882, was \$21,790,000.

STATE BANKS, TRUST COMPANIES, AND SAVINGS BANKS.

The act of Congress of February 19, 1873, section 333 of the United States Revised Statutes, requires the Comptroller to obtain from authentic sources, and report to Congress, statements, exhibiting under appropriate heads, the resources and liabilities of such banks and savings banks as are organized under the laws of the several States and Territories. In compliance with this act, he has presented annually in the appendices to his reports, the resources and liabilities of these corporations, so far as it has been possible to obtain them. Through the courtesy of State officers, returns of State banks, savings banks, and trust and loan companies have, during the past year, been received from twenty-three States. Many of the States and Territories, including Illinois, Kansas, Nebraska, Dakota, Oregon, Virginia, and Tennessee do not require periodical returns of the condition of the different classes of banks organized under their laws.

From these returns, the following abstract has been compiled, showing the resources and liabilities of State banks and trust companies for the last three years, the number reporting in 1880 being 650; in 1881,

683, and in 1882, 704.

The foregoing table was prepared from returns from all the New England States, except Maine; from four Middle States, not including Delaware, and from all the Western States, excepting Illinois, Kausas, and Nebraska. The only Southern States from which reports have been received were South Carolina, Georgia, Louisiana, Texas, and Kentucky. The only Pacific State is California. There no are State banks in Maine, but one in New Hampshire, six in Vermont, and none in Massachusetts. There are, however, six trust and loan companies in the latter State, one in Rhode Island, and seven in Connecticut.

SAVINGS BANKS.

LIABILITIES. Deposits Surplus fund Undivided profits Other liabilities Total	4, 740, 861 6, 603, 044	891, 961, 142 60, 289, 905 10, 325, 800 5, 213, 815	966, 797, 081 69, 454, 512 11, 136, 219 5, 594, 253 1, 052, 982, 065

The foregoing table includes the returns from the six New England States, from four Middle States, not including Delaware, from the States of Ohio, Indiana, California, and the District of Columbia. The aggregate of loans in the New England States is \$252,010,803, and of deposits, \$430,233,402. In the Middle States the aggregate of loans is \$145,099,593, and of deposits, \$469,058,085.

Some of the largest savings banks in the city of Philadelphia, organized under old charters, are not required to make reports to any State officer. Returns received directly from four of these banks, having deposits amounting to \$29,913,605, are included in the returns from the

State of Pennsylvania.

The savings banks deposits, given in the foregoing table for 1882, based upon reports made to State authorities, are \$966,797,081, and the deposits of the State banks and trust companies were \$426,677,092. These returns do not include bank deposits. The deposits of the national banks on October 3, 1882, exclusive of those due to banks, were \$1,138,071,777. These deposits of the national banks bear to those of the savings banks the proportion, nearly, of 55 to 45; to those of the State banks and trust companies the proportion of 73 to 27; and to the combined deposits of both, the proportion of 45 to 55.

The total population of New England, according to the census of 1880,

was 4,010,529, and the number of open deposit accounts of the savings banks in the year 1882 is 1,294,859, which is equal to 32.3 accounts to each one hundred of the entire population. The average amount of each account is \$332.26, and if the total deposits were divided among the entire population, the average sum of \$107.27 could be given to each individual.

The deposits of the savings banks in the State of New York were \$387,832,893, while the population is 5,082,871, showing that an equal distribution of the savings-banks deposits among the entire population of the State would give \$76.30 to each individual. Tables showing the aggregate resources and liabilities of State banks, trust companies, and savings banks in each State, from which returns have been received from the State authorities appear in the Appendix.

A table is also there given showing by States the number of savings-bank depositors and the average amount due to each in 1881 and 1882.

PRIVATE BANKERS.

In the Appendix will be found three comprehensive tables of two pages each, giving by geographical divisions, and by States, Territories, and principal cities, the number of State banks, savings banks, trust and loan companies, and private bankers of the country, for the present and two previous years, together with the amount of their capital and deposits, and the amount of their capital invested by them in United States bonds. The first official information of this character ever published in regard to the private bankers of the country was contained in a table in the Comptroller's report for 1880. The following information in reference to the private bankers in sixteen of the principal cities has been compiled from the table in the Appendix for the year 1882:

			•	
Cities.	Number of banks.	Capital.	Deposits.	Invested in United States bonds.

Totals	796	74, 440, 599	109, 741, 746	10, 016, 200

The total number of private bankers in the foregoing cities is 796, with an aggregate capital of \$74,440,599, and aggregate deposits of \$109,741,746; the average capital being \$93,518, and the average deposits \$137,867. About 68 per cent. of these private banks are located in New York City, representing more than two-thirds of the aggregate capital and over one-half of the aggregate deposits. In the city of New York the average amount of capital is \$96,370 and deposits \$105,157 for each private banker; and the bankers in that city also held \$7,846,422 of United States bonds, or nearly one-half of the amount of such bonds held by all of the private bankers of the country.

The following table gives similar information for the thirty-three States and Territories, exclusive of the cities in the above table, having an amount of capital in excess of \$100,000. In this table the number of private bankers is 2,530; the aggregate amount of capital, \$39,287,623, and of deposits \$181,970,664, the average capital being \$15,529, and the average deposits \$71,925.

The remaining thirteen States and Territories, not enumerated in the above table, contain 65 private bankers, with an aggregate capital of \$527,670, and aggregate deposits of \$3,909,750. Massachusetts has only three private bankers, outside the city of Boston, with an aggregate capital of \$64,167, and aggregate deposits of \$618,206. Maryland has but two private bankers outside of the city of Baltimore. The State of Maine has ten private bankers, North Carolina but four, New Hampshire two, New Jersey four, Delaware and Vermont only one each, and Arizona eleven. The average amount of capital held by each of these 65 private bankers is \$8,511, and of deposits \$63,060.

The following table shows, by geographical divisions, the number of private bankers in the United States, with the aggregate amount of their capital, deposits, and investments in United States bonds, for the six months ending May 31, 1882:

Geographical divisions.	No. of banks.	Capital.	Deposits.	Invested in United States bonds.
New England States Middle States Southern States Western States and Territories	1,014	\$7, 130, 196 62, 193, 765 6, 369, 701 38, 552, 230	\$9, 417, 712 113, 079, 792 19, 981, 042 153, 143, 614	\$981, 371 9, 204, 616 227, 131 4, 457, 627
United States	3, 391	114, 255, 892	295, 622, 160	14, 870, 745

The table below is a recapitulation of the foregoing, showing by groups the aggregates for the bankers in the sixteen principal cities, in the thirty-three States and Territories having a private banking capital in excess of \$100,000, and in the thirteen remaining States and Territories, for the last year:

RECAPITULATION.

	No. of banks.	Capital.	Deposits.	Invested in United States bonds.
Principal cities	2, 530	\$74, 440, 599 39, 287, 623 527, 670	\$109, 741, 746 181, 970, 664 3, 909, 750	\$10, 016, 206 4, 753, 852 100, 687

SECURITY FOR CIRCULATING NOTES.

During previous years there have been many changes in the classes of United States bonds held by the national banks as security for their circulation, owing to the payment or refunding or extension of the different issues of five and six per cent. bonds bearing interest at four and one-half, four, three and one-half, and three per cent. During the present year 259 millions of three and one-half per cent. bonds, held by the banks, which were extended from five or six per cent. bonds in the year 1881, have been changed into three per cent. bonds. The amount of United States bonds held by the Treasurer as security for the circulating notes of the national banks on the first day of November, 1882, is exhibited in the following table:

Class of bonds.	Authorizing act.	Rate of interest.	Amount.
Funded loan of 1881 (5's, interest ceased) Funded loan of 1891 Funded loan of 1907 Loan of July and August continued Loan of 1863 continued (81's) Funded loan of 1881 continued Funded loan of July 12, 1882 Pacific Railway bonds Total	.do. .do. July 17 and August 5, 1861 March 3, 1863 July 14, 1870, and January 20, 1871. July 12, 1882 July 1, 1862, and July 2, 1864	413 4 313 313 313 3 6	\$15, 000 33, 754, 659 104, 927, 500 749, 500 1, 351, 700 38, 505, 750 179, 675, 550 3, 526, 000

During the year 1871, and previous thereto, a large portion of the bonds bore interest at the rate of six per cent., and until the year 1877 all of the bonds bore interest at either five or six per cent. The five or six per cent. bonds, in the year 1881, entirely disappeared from the list of these securities, with the exception of three and a half million of Pacific sixes.

At the present time more than eleven per cent. of the amount, pledged for circulation, consists of bonds bearing interest at three and a half per cent. only, and nearly fifty per cent. of them bear interest at three per cent., and the remainder, with the exception of three and one-half millions of Pacifics, bear interest at the rate of four and four and a half per cent.

COUNTERFEIT AND UNSIGNED NATIONAL-BANK NOTES.

Section 5 of the act of June 30, 1876, provides—

That all United States officers, charged with the receipt or disbursement of public moneys, and all officers of national banks, shall stamp or write in plain letters the word "counterfeit," "altered" or "worthless," upon all fraudulent notes issued in the form of, and intended to circulate as money, which shall be presented at their place of business, and if such officers shall wrongfully stamp any genuine note of the United States, or of the national banks, they shall, upon presentation, redeem such notes at the face value thereof.

This section makes it the duty, not only of every-officer of the United States charged with the receipt or disbursement of public moneys, but also of all officers of the national banks, to stamp every fraudulent note which shall be presented at their counters, in such a manner as shall thereafter prevent its circulation.

There is no doubt that there has been great neglect on the part of national bank officers to comply with this law. The number of counterfeit national bank notes which have been issued is very small in proportion to the number issued previous to the establishment of the national banking system, but the number in circulation has largely increased during the last few years, probably owing to the fact that the bank notes which are presented at the counters of the banks, and which are known to be fraudulent, are not immediately stamped "counterfeit," "altered," or "worthless," as required by law. If a genuine note is wrongfully stamped, the officer thus stamping it can immediately obtain a genuine note in exchange by forwarding the same to the Treasurer for redemption, so that there is no risk whatever on the part of the officers of national banks, even if they should wrongfully stamp a genuine note.

Section 5172 of the Revised Statutes provides that national bank notes shall express upon their face the promise of the association issuing the same to pay on demand, attested by the signatures of the president or vice-president and cashier, and section 5182 of the Revised Statutes provides, that after any association receiving circulating notes has caused its promise to pay such notes on demand to be signed by the president or vice-president and cashier thereof, in such manner as to make them obligatory promissory notes, payable on demand at its place of business, such association may issue and circulate the same as money.

There can be no doubt as to the meaning and intention of these sections. The law requires that national bank notes shall be signed by the president or vice president and cashier, before they are placed in circulation, and every bank issuing notes, not thus signed by these officers, subjects itself to a forfeiture of its charter. Notwithstanding this plain provision of law, various banks have issued their notes with printed signatures, and in some cases with lithographic signatures, which are so badly executed as to excite suspicion as to the genuineness of the notes. The written signature of the officers of the bank are necessary as an additional precaution against counterfeiting. The signature of at least one bank officer is necessary as a check between this office and the issuing bank, for if the question of an overissue of notes should arise, the signature of such officer would, without question, determine the genuineness of the note.

A bill is now pending in Congress, imposing a fine of twenty dollars for every circulating note issued by any national bank without the written signature thereon of at least one of its officers.

National bank notes, with new designs, are now being rapidly issued

12 F

to banks whose corporate existence has been extended, and to other national banks which are being organized, and it is important that these new notes should not be issued unless signed by the officers in accordance with law. The Comptroller respectfully repeats his previous recommendations for the passage of the act referred to, which act should also impose a penalty upon any engraver or lithographer who shall print the signature of bank officers upon such notes.

TAXATION.

In previous reports the repeal of the law imposing a tax upon bank capital and deposits, and of the two cent stamp tax on checks, has been recommended as a measure of justice to the banks, and as a benefit to the people, and to the manufacturing and commercial interests of the country. During the last session of Congress a bill including a provision for repealing these taxes was passed by the House by a vote of 127 to 79. The debate in the Senate, as well as some votes on preliminary questions, showed that if a vote upon the bill had been reached it would The force of the reasons heretofore urged for the have become a law. The revenue still continues in repeal of these taxes is as great as ever. excess of the amount required for the expenses of the government, including interest on the public debt which is being rapidly reduced; and the taxes imposed upon banking capital by the government, State, and municipal authorities are larger than during any previous year. Comptroller presents, herewith, a table which gives, for the year 1881, the amount of the banking capital invested in national banks, and the amount and rates of United States and State taxes paid by the national banks in every State and principal city in the Union.

It will be seen that the per centage of State taxation during the year 1881 varies from 1.3 per cent. in the Southern States to 1.9 per cent. in the Middle and Western States, and that the average percentage throughout the United States remains the same as it was during the year 1880, but has increased one-tenth of one per cent. as compared with that paid during the year 1879. The total of United States and State taxes paid by national banks to capital is 3.7 per cent. during the year 1881, having increased one-tenth of one per cent. over those paid in 1880, and one half of one per cent. over those paid during the year 1879.

The rates of United States taxation are the same in all sections of the country. The inequality in the percentages of United States taxes to capital arises from the fact that while the United States tax is imposed on the three items of capital, deposits, and circulation, the percentages given in the tables are those of the total tax derived from these three sources to capital only. Where the deposits are large in proportion to capital, the proportion of the United States tax, as measured by capital, appears greater. The first table given below shows the percentages to capital of taxation paid by the banks in the principal cities of the country. Particular attention is called to the inequality in State taxation shown by it. The second table gives the States in which the taxes, United States and State, are most excessive.

The uniform rates of United States taxes are annually one per cent. upon their notes in circulation; one half of one per cent. upon their deposits, and the same rate upon the average amount of their capital, in excess of that invested by them in United States bonds. These taxes are paid semi-annually by the national banks to the Treasurer of the United States, and subject the government to no expense for their collection.

The whole cost of the national banking system to the government, from the date of its establishment in 1863, has been \$5,366,908; on the other hand, the government has, in about twenty years, collected taxes upon the capital, circulation, and deposits of national banks at the rates heretofore specified, amounting, as may be seen by the following table, to \$118,005,706.25:

The tax imposed upon banks other than national is collected by the Commissioner of Internal Revenue. The rates upon capital and deposits are the same as in the case of the national banks. A tax of ten per cent. is imposed, under section 3412 of the Revised Statutes, on the use, in payments, of notes issued by any banks other than national. This tax has the effect of preventing the issue of circulating notes by State banks. The table below gives the taxes collected annually by the Commissioner of Internal Revenue during the years from 1864 to

1882, inclusive, showing the whole amount paid during that period by banks, other than national, to have been \$66,793,930.

This table shows that the percentages to capital of taxes have never been less than three per cent. annually, and that during the last four years given there has been an increase in the rate from 3.1 per cent. to 3.7 per cent. It is probable that the rates of State taxation paid by banks, other than national, do not vary much from the rate of those paid by the national banks, although in many of the States, the laws relative to the assessment of taxes upon bank capital have, heretofore, somewhat discriminated against national banks. The repeal of the law imposing the government taxes will still leave the banks subject to a burden of taxation by the different States much greater than that imposed by them upon any other kind of capital, and this repeal is again urgently recommended. The reduction of the annual rate of the tax on circulation to one-half of one per cent. is also recommended for reasons given in another portion of this report.

DECISIONS RELATIVE TO STATE TAXATION OF NATIONAL BANK SHARES.

In the last annual report of the Comptroller of the Currency reference was made to the decision of the United States circuit court of the northern district of the State of New York, in the case of the National Albany Exchange Bank vs. Charles A. Hills et al., supervisors of Albany County, New York, namely, that the law of the State of New York under which taxes had been assessed for fourteen years upon bank shares was void and invalid, for the reason that this act did not permit the owners of national bank shares to reduce the assessment by the amount of their debts, while owners of other moneyed capital possessed that privilege. The circuit court rendered a judgment in favor of Stanley, the assignee and representative of the stockholders of the National Albany Exchange Bank, for taxes previously exacted and paid. The supervisors appealed to the Supreme Court of the United States. The decision of the latter court was rendered April 3, 1882, and reversed the decision of the circuit court in the case of all except one of the stockholders represented by Stanley.

The court said:

The question here to be decided arises under two statutes of the State of New York in regard to taxation. The first of these is the act of 1850, relating to the assessment The sixth section of the act requires and collection of taxes in the city of Albany. the board of assessors to prepare an assessment roll, in which there shall be set opposite the name of each tax-payer (1) all his real estate liable to taxation, and its value; (2) the full value of all his personal property, after deducting the just debts owing by him. Section 9 of the act is as follows: "If any person shall at any time before the assessors shall have completed their assessments make affidavit that the value of his real estate does not exceed a certain sum, to be specified in such affidavit, or that the value of the personal estate owned by him, after deducting his just debts and his property invested in the stock of any corporation or association liable to be taxed therefor, does not exceed a certain sum, to be specified in the affidavit, it shall be the duty of the board of assessors to value such real or personal estate, or both, as the case may be, at the sum specified in such affidavit, and no more."

In 1866 the State enacted a law concerning the taxation of bank shares, which was evidently intended to meet the requirements of the act of Congress in relation to State taxation of the shares of national banks, and the provision of this statute relates only to taxing stockholders in banks, and to the capital invested in individual banks. The first section of this act reads as follows, and it contains no other provisions for deductions as the basis of taxation, except what is found in this section:

"No tax shall hereafter be assessed upon the capital of any bank or banking association organized under the authority of this State or of the United States, but the stockholders in such banks and banking associations shall be assessed and taxed on the value of their shares of stock therein," &c.

In the case of People v. Dolan (36 N. Y., 59) the question was whether, taking the

two statutes together, an owner of shares of stock was entitled to deduct from the assessed value of his shares the just debts due him. The court of appeals decided that no such deduction should be made under the law of 1866. In the case of Williams v Weaver, Williams had made the affidavit required by section 9 of the act of 1850, and demanded a deduction of the assessors, which they refused. case was taken to the court of appeals, which reaffirmed the principles held in the case of People v. Dolau. The Williams case coming to the United States Supreme Court by writ of error, it was held that while we are bound to accept the decision of the highest court of the State in construction of its own statute, the act of 1866 as thus construed was in that particular in conflict with the act of Congress, because it did tax shares of the national banks at a higher rate than other moneyed capital in the State. * * * Accenting therefore as we must the state. the State. * * * Accepting, therefore, as we must, the act of 1866, as construed by the court of appeals of New York, as not authorizing any deduction for debts by a share-bolder of a national bank just for that reason absolutely yold? * * * It would holder of a national bank, is it for that reason absolutely void? seem that if the act remains a valid rule of assessment for shares of State banks and for individual bankers, it should also remain the rule for shareholders of national banks who have no debts to deduct.

None of the stockholders except Williams made the affidavit required by the act of 1850, showing they had debts to deduct, and therefore in their case the judgment of the circuit court was reversed, and in that of Williams affirmed.

This decision seems to cut off all remedy for taxes already paid by stockholders of Albany national banks who neglected to make the affi-

davit required under the act of 1850.

In People v. Weaver the Supreme Court pointed out that the method to pursue in cases where the taxation by State authority of shares of national banks was greater than that of other monied capital in the same State, was by enjoining the collection of the excessive taxation. In the case of National Albany Exchange Bank v. Hills, the bank brought, on behalf of its stockholders, a suit to enjoin the collection for taxes assessed but unpaid for the year 1879, and the circuit court of the northern district of New York granted a perpetual injunction. The Supreme Court decided that the injunction was properly granted as to one stockholder, who made affidavit and demand on account of deduction of his debts, but not as to the others, who had made no such affidavit or demand, but in the case of the latter the lower court was directed to permit them to bring their action in an amended form, on the ground that they refrained from making affidavit and demand, because they knew it would have no effect.

In the case of German National Bank of Chicago v. Kimball, appealed to the United States Supreme Court from circuit court for the northern district of Illinois, it was decided that no one can be permitted to go into a court of equity to enjoin the collection of a tax, until he has shown himself entitled to the aid of the court by paying so much of the tax assessed against him as it can be plainly seen he ought to pay, nor should he be permitted, because his tax is in excess of what is just and lawful, to screen himself from paying any tax at all, until the precise amount which he ought to pay, is ascertained by a court of equity.

In the case of Evansville National Bank v. Britton, referred to

last year, as decided in the United States circuit court for the district of Indiana, the Supreme Court affirms the decree of the lower court, perpetually enjoining the collector as to those shareholders who at the time of the assessment proved that they owed debts which should rightfully be deducted, and dismissing the bill as to other shareholders.

All of these decisions appear to have grown out of matters pending when the decision of the United States Supreme Court in the case of People v. Weaver was rendered. It is probable that in most States the degislatures will so modify their laws taxing bank shares as hereafter to conform with the principles laid down in that decision; but these supplementary decisions are valuable in that they point out a mode of action in all cases where discrimination in any form is made in assessing or collecting taxes on national bank shares. The party aggrieved must clearly state the amount of the excessive taxation, pay what is justly due, and enjoin the collection of the remainder. In stating the amount believed to be unjustly demanded, strict regard must be had to the forms required by the State laws in force in the place where the bank in located. While the Supreme Court of the United States is extremely careful not unnecessarily to interfere with the effect of State legislation in the taxation of national bank shares, it upholds the rights of individuals under Federal laws when actions based on equitable grounds are brought in a proper manner.

In New York City it is claimed that under the act now in force in the State, taxing national and other bank shares, which permits the deduction of debts, there is still great discrimination in the valuation of bank shares as compared with the valuation of other personal property and

real estate.

DIVIDENDS.

From the semi-annual returns made to this office under section 5212 of the Revised Statutes of the United States, the following table has been prepared, showing the dividends and total earnings, and the ratio of each to capital and combined capital and surplus, for each semi-annual period from September 1, 1869, the close of the period for which these reports were first received, to September 1, 1882.

							RATIOS.

In the appendix may be found tables exhibiting the amount of dividends and earnings of the national banks, arranged by geographical divisions, for semi-annual periods from September 1, 1873; also an abstract of reports of dividends and earnings for the two semi-annual periods of the present year, and a table, by States and reserve cities, of the ratios to capital and to combined capital and surplus of the dividends and earnings from March 1, 1877, to September 1, 1882.

LOSSES.

During the year ending September, 1882, losses in their business on every account, including losses on technical bad debts, under section 5204 of the Revised Statutes, and premiums on United States bonds, have been charged off by the national banks, amounting to \$11,324,912.93. Of this sum \$4,963,155.22 was charged off during the six months ending March 1, 1882, and \$6,361,757.71 during the six months ending September 1, 1882.

The following table shows the number of banks charging off these losses and the amount charged off in each State and reserve city in the United States for the semi-annual periods named above.

The total losses charged off in each of the five preceding years are added to this table. A considerable portion of these technical losses have already been collected, and other large amounts will undoubtedly be hereafter recovered. Full tables for the six preceding years may be found in the appendix.*

^{*} See note at foot of page 197.

The following table gives the losses for the last five years of the national banks located in each geographical division of the United States. The number of banks reporting losses and the total losses for five years are also shown in this table.

Of the losses exhibited by the foregoing tables, \$2,025,502 was on account of premiums on United States bonds charged off. The high premiums upon the United States bonds not subject to redemption at the option of the government, compel those organizing new national banks to invest a portion of their capital in a premium account. the premium may entirely disappear at the maturity of the bonds it has been a requirement of this office that a portion of such premium account shall be charged to undivided profits each half year before the declaration of a dividend until the whole account shall have disappeared. course, possible that many of these amounts charged off, either on account of premiums or on account of technical bad debts, may eventually be realized by the bank. The bank may close and withdraw and sell its bonds while they yet command a premium. Debts, though technically bad on account of interest remaining due and unpaid over six months, may nevertheless be afterwards paid. These recovered losses are included in the profits of each half year. Banks holding 4 per cent. bonds have been instructed to charge off each year one-twentieth part of the premium paid thereon, and counted as an asset; those holding 43. per cent. bonds have been instructed to similarly charge off one tenth of the premium, and those holding Pacific Railroad sixes to charge off one fifteenth. The charges in each case were to be made previous to the semi-annual declaration of a dividend, and at no time is the amount of premium counted as an asset to exceed the current market premium on the bonds held.

In the following table the losses charged off by the national banks in the principal cities of the country are given for each of the years covered by the preceding tables, with the total for the period.

SURPLUS.

In the following table is exhibited the gradual accumulation of a surplus fund under the provisions of section 5199, requiring each association, before the declaration of the semi-annual dividend, to carry to surplus one-tenth of its net profits for the preceding half year, until such fund shall amount to 20 per cent. of its capital.

Practically the law requires that the surplus fund of each bank shall at all times equal an amount equal to one tenth of its total net earnings since it commenced business. Many of the banks accumulate the fund much faster than this, and some pass dividends for the purpose of doing so. Some do not stop at the twenty per cent. limit named in section 5199, but continue to increase their surplus until the latter is often greater than the capital stock. As the fund is very rarely diminished except for such extraordinary losses as cannot be met out of current profits, it, together with the capital, constitutes the working fund of the bank by the use of which dividends are earned. Bearing this in mind, it will be seen that the returns made to stockholders of national banks for their investment are not excessive.

In an excellent paper on the national banks of the United States, read before the Banker's Institute of London, England, May 17, 1882, by Mr. Robert W. Barnett, an associate of the Institute, and published

in the journal of the Institute for July, 1882, the following comment is made:

"Dividends paid by the banks have, on the whole, been satisfactory; although, taking into consideration the value of capital in the United States and the general rates of interest prevailing, the average rate of dividends must be pronounced moderate."

UNITED STATES LEGAL-TENDER NOTES AND NATIONAL BANK CIR-CULATION.

The acts of February 25, 1862, July 11, 1862, and March 3, 1863, each authorized the issue of 150 millions of dollars of legal-tender notes, mak-

ing an aggregate of 450 millions of dollars.

On January 30, 1864, the amount of such notes outstanding was \$449,338,902, which was the highest amount outstanding at any one The act of June 30, 1864, provided that the total amount of United States notes issued, or to be issued, should not exceed 400 millions of dollars, and such additional sum, not exceeding 50 millions, as might be temporarily required for the redemption of temporary loans. By the act of June 20, 1874, the maximum amount was fixed at 382 mill-Section 3, act of January 14, 1875, authorized an increase of the circulation of national banks in accordance with existing law, without respect to the limit previously existing, and required the Secretary of the Treasury to retire legal-tender notes to an amount equal to eighty per cent. of the national bank notes thereafter issued, until the amount of such legal tender notes outstanding should be 300 millions, and no Under the operation of this act, \$35,318,984 of legal-tender notes. were retired, leaving the amount in circulation on May 31, 1878, the date of the repeal of the act, \$346,681,016, which is the amount now out-

In the following table are given the amount and kinds of the outstanding currency of the United States and of the national banks on January 1 of each year, from 1866 to 1882, and on November 1, 1882, to which is prefixed the amount on August 31, 1865, when the public debt

reached its maximum.

The act of June 20, 1874, provided that any national banking association might withdraw its circulating notes upon the deposit of lawful money with the Treasurer of the United States in sums of not less than \$9,000. Since the passage of this act, \$154,424,641 of lawful money have been deposited with the Treasurer by the national banks for the purpose of reducing their circulation, and \$120,156,646 of bank notes have been redeemed, destroyed, and retired.

In the following table is shown, by States, the amount of circulation issued and retired during the year ending November 1, 1882, and the

total amount issued and retired since June 20, 1874.

The amount of circulation issued to national banks for the year ending November 1, 1882, was \$22,464,250, including \$6,500,680 issued to banks organized during the year. The amount retired during the year

retirement of bank circulation.

was \$19,937,630, and the actual increase for the same period was therefore \$2,526,620, making the total on November 1, \$361,949,358.

During the year ending November 1,1882, lawful money to the amount of \$26,501,045 was deposited with the Treasurer to retire circulation, of

which amount \$7,895,754 was deposited by banks in liquidation. The amount previously deposited under the act of June 20, 1874, was \$107,978,052; by banks in liquidation \$19,945,544, to which is to be added a balance of \$3,813,675 remaining from deposits made by liquidating banks prior to the passage of that act. Deducting from the total the amount of circulating notes redeemed and destroyed without reissue (\$120,156,646), there remained in the hands of the Treasurer, on November 1, 1882, \$38,081,670 of lawful money for the redemption and

NATIONAL BANK AND LEGAL-TENDER NOTES BY DENOMINATIONS.

-CIRCULATING NOTES OF THE BANK OF FRANCE AND IMPERIAL BANK OF GERMANY, BY DENOMINATIONS.

In accordance with law, no national bank notes of a less denomination than five dollars have been issued since January1, 1879, when the amount outstanding was \$7,718,747. Since that date the amount of ones and twos issued by the banks has been reduced \$6,778,189, and during the same period the legal-tender notes of these denominations have been increased \$12,435,707.

During the last year the amount of national-bank notes of these denominations has decreased nearly one half, to 940,558, the amount of the decrease being \$910,724. The total increase of the amount of ones and twos outstanding, in national-bank and legal-tender notes, is \$5.657,518.

The following table shows, by denominations, the amount of national-bank and legal-tender notes outstanding on October 31, 1882, and the aggregate amounts of both kinds of notes at the same period in 1880 and 1881:

		1882.		1881.	1880.

destroyed in Chicago fire		-1, 000, 000	1, 000, 000	—1, 000, 000	1, 000, 000
Total	361, 000, 946	346, 681, 016	707, 681, 962	705, 622, 504	688, 744, 467

The amount of one and two dollar notes outstanding is but one-fourth of one per cent. of the whole circulation of the banks; the fives constitute 26.9 per cent., the tens 34 per cent., the twenties 23.3 per cent.,

while the fifties and larger notes are only 15.6 per cent. of the entire circulation. While the amount of ones and twos of the national-bank circulation is steadily diminishing, the legal-tender notes of these de-

nominations are as steadily increasing.

Of the entire amount of national bank and legal-tender notes outstanding, about 7.5 per cent. consists of one and two dollar notes; more than 30.8 per cent. of ones, twos, and fives; more than 58.3 per cent. is in notes of a less denomination than twenty dollars, while about 79.6 per cent. is in notes of a lower denomination than fifty dollars. Of the entire issue about twenty per cent. is in denominations of fifties, one hundreds, five hundreds, and one thousands. There are also outstanding 479 legal-tender notes of the denomination of five thousand, and 23 notes of the denomination of ten thousand.

The following table* exhibits by denominations the circulation of the Imperial Bank of Germany on January 1, 1882, in thalers and marks,

which are here converted into our currency:

•	Tha	lers.		Marks.				
Number of pieces.	Denomina- tions.	Value of each piece in dollars.	Amount in dollars (Thaler= 75 cents.)	Number of pieces.	Denomina- tions.	Value of each piece in dollars.	Amount in dollars. (Mark=25 cents.)

The circulation of the Imperial Bank of Germany on January 1, 1881, was \$201,036,187, showing an increase during the following year of \$13,323,563; on January 1, 1879, the circulation was \$165,933,942, showing an increase during the three years preceding January 1, 1882, of \$48,425,808.

The following tablet gives the circulation of the Bank of France and its branches, with the number of pieces, and the denominations in francs

and in dollars, on January 26, 1882:

Number of pieces.	Denominations.	Value of each piece in dollars.	Amount in francs.	Amount in dollars (Franc=20 cents.)
5 /	5, 000 francs.	1,000	25,000	5,000

The amount of circulation of the Bank of France on January 27, 1881, was 2,524,081,780 francs, or say \$504,816,356, showing an increase be-

^{*}London Banker's Magazine, August, 1882, p. 623. †*Ibid.*, September, p. 742.

tween that time and January 26, 1882, the date of the foregoing table, of 328,234,895 francs, or \$65,646,979, and since January 30, 1879, an in-

crease of 561,345,845 francs, or \$112,269,169.

It will be seen that the Imperial Bank of Germany has in circulation no notes of a less denomination than seven dollars and a half (ten thalers), and issues none of less than twenty-five dollars (one hundred marks); and that the Bank of France issues but little over a million and a quarter of a less denomination than ten dollars. The Bank of England issues no notes of less than £5, or twenty-five dollars, and the Irish and Scotch banks none of less than £1, or five dollars.

REDEMPTION.

Since the passage of the act of June 20, 1874, section 3 of which requires the banks at all times to keep on deposit in the Treasury 5 per centum of their circulation as a redemption fund, that fund as a rule has been maintained, and circulating notes of the banks have been promptly redeemed at the Treasury, without expense to the government.

The following table exhibits the amount of national bank notes received for redemption monthly by the Comptroller of the Currency for the year ending October 31, 1882, and the amount received for the same period at the redemption agency of the Treasury, together with the total amount received since the passage of the act of June 20, 1874:

		Received	by the Compti	oller.

From the passage of the act of June 20, 1874, to November 1, 1882, there was received at the redemption agency of the Treasury \$1,184,674,058 of national-bank currency for redemption. During the year there was received \$84,150,789, of which amount \$30,577,000, or about 30.3 per cent., was received from banks in the city of New York, and \$8,766,000, or about 10.4 per cent., from banks in the city of Boston. The amount received from Philadelphia was \$6,412,000; from Chicago, \$4,465,000; Providence, \$1,532,000; Baltimore, \$1,102,000; Cincinnati, \$1,430,000; Saint Louis, \$1,201,000; Pittsburgh, \$929,000. The amount of notes fit for circulation returned by the redemption agency to the

781, 425, 668

banks of issue during the year was \$4,017,100. The decrease in this class of notes has been very marked in the past five years, the amount for the year ending October 31, 1878, having been \$151,683,200, or 75.4 per cent. of the whole amount received, and for the year only 4.7 per cent.

The total amount received by the Comptroller of the Currency for destruction from the agency and from national banks direct was \$74,995,283. Of this amount \$5,820,140 were the issues of banks in the city of New York, \$7,287,443 of Boston, \$3,104,471 of Philadelphia, \$2,359,692 of Providence, \$1,170,578 of Baltimore, \$1,475,062 of Pittsburgh, \$598,100 of Cincinnati, \$580,274 of Louisville, \$264,530 of Chicago, \$159,406 of Saint Louis, \$404,969 of New Orleans, and of each of the other principal cities less than \$400,000.

The following table exhibits the number and amount of national-bank notes, of each denomination, which have been issued and redeemed since the organization of the system, and the number and amount out-

standing on November 1, 1882:

1,		Number.		Amount

A table showing the number and denomination of national-bank notes issued and redeemed, and the number of each denomination outstanding on October 31 for the last fourteen years will be found in the Appendix.

The following table shows the amount of national-bank notes received at this office and destroyed yearly since the establishment of the system:

at this time and destroyed jearly since the establishment of	one system.
Prior to November 1, 1865	\$175,490
During the year ending October 31, 1866	1,050,382
During the year ending October 31, 1867	3, 401, 423
During the year ending October 31, 1868	4,602,825
During the year ending October 31, 1869	8, 603, 729
During the year ending October 31, 1870	14, 305, 689
During the year ending October 31, 1871	24, 344, 047
During the year ending October 31, 1872	30, 211, 720
During the year ending October 31, 1873	36, 433, 171
During the year ending October 31, 1874	49, 939, 741
During the year ending October 31, 1875	137, 697, 696
During the year ending October 31, 1876	98,672,716
During the year ending October 31, 1877	76, 918, 963
During the year ending October 31, 1878	57, 381, 249
During the year ending October 31, 1879	41, 101, 830
During the year ending October 31, 1880	35, 539, 660
During the year ending October 31, 1881	54, 941, 130
During the year ending October 31, 1882	74, 917, 611
Additional amount of notes of national banks in liquidation	31, 126, 596
	

RESERVE.

The following table exhibits the amount of net deposits, and the reserve required thereon by the act of June 20, 1874, together with the amount and classification of reserve held by the national banks in New York City, in the other reserve cities, and by the remaining banks, at the dates of their reports in October of each year from 1875 to 1882:

APPENDIX.*

Tables will be found in the appendix, exhibiting the reserve of the national banks as shown by their reports, from October 2, 1874, to October 3, 1882; the reserve by States and principal cities for October 3, 1882; and in the States and Territories, in New York City, and in the other reserve cities, separately, at three dates in each year, from 1878 to 1882.

Special attention is called to the synopsis of judicial decisions, to the numerous and carefully prepared tables in both report and appendix, and to the index of subjects and list of tables to be found at the close of the appendix. At the end of the full volume of more than seven hundred pages, which contains separate statements of 2,269 national banks as returned by them for October 3, is an alphabetical list of the cities and villages in which the national banks are situated.

In concluding this report the Comptroller gratefully acknowledges the efficiency of the officers and clerks associated with him in the discharge

of official duties.

JOHN JAY KNOX, Comptroller of the Currency.

Hon. Joseph W. Keifer,
Speaker of the House of Representatives.

^{*} The appendix, which is omitted for want of space, may be found in the bound volumes of the Comptroller's report.

Federal Reserve Bank of St. Louis

REPORT

OF

THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
October 12, 1882.

SIR: I have the honor to submit my fourth, the tenth annual report of the Director of the Mint since the organization of this Bureau, showing the operations of the mints and assay offices of the United States

during the fiscal year ended June 30, 1882.

The receipts of foreign coin and bullion declined, and at the close of the year had almost entirely ceased, yet a large amount of bullion was deposited for parting and refining, and the mints were fully occupied in coining the silver purchased for that purpose, and the large amount of gold previously received from foreign countries as well as that produced during the year by the mines of the United States.

The import of gold continued to exceed its export during the first half of the fiscal year, at the close of which the excess amounted to \$30,100,230. In the latter part of the year the movement was reversed and the excess of the exports over the gold imports was \$28,311,047, reducing the net gain during the whole of the fiscal year to \$1,789,183.

DEPOSITS AND PURCHASES.

The deposits of bullion and coin, exclusive of redeposits, were, of gold, \$66,756,652.95, and of silver, including purchases, \$33,720,491.42, making a total of \$100,477,144.37; of which \$7,993,086.03 of gold and \$1,787,385.67 of silver were again deposited, making the total amount received and operated upon during the year at all the mints and assay offices \$124,749,738.98 of gold and \$35,507,877.09 of silver, a total of \$160,257,616.07.

The deposits of domestic production were, gold, \$31,298,511.97, and silver, \$30,956,588.18, a total of \$62,255,100.15; of foreign coin and bullion, gold, \$33,038,617.82, and of silver, \$2,287,463.17; of United States coin, gold, \$599,356.80, of silver, \$127,572.40, a total of \$726,929.20, and

of jewelry, plate, &c., gold, \$1,770,166.36; silver, \$348,867.67.

COINAGE.

The gold coinage of the mints during both the fiscal and calendar year was greater than that of any previous year in their history; being for the latter nearly eleven millions greater than the gold coinage of the fiscal year 1881, and nearly twenty-seven millions in excess of the heavy coinage in 1851 of \$62,614,492.50.

201

At the commencement of the fiscal year the coinage mints and New York assay office held of uncoined gold bullion \$86,548,696.96, and at the close of the year there remained \$53,700,225.57, the amount on hand having been reduced \$32,848,471.39. With this and \$66,756,652.95 gold deposited during the year there were coined 11,266,003 pieces of gold of the value of \$89,413,447.50, the balance having been paid to depositors in fine bars and accounted for in the wastage of the operative officers and the loss on sale of sweeps. About five-sixths (\$65,000,000) of the total gold coinage was in eagles and half eagles. The coinage of double eagles being \$14,563,920; of eagles, \$44,369,410, and of half eagles, \$30,473,955.

The gold coinage of the Philadelphia Mint was nearly all in eagles and half eagles, the value of the former being \$36,700,050 and of the

latter \$22,971,725.

At the San Francisco Mint little over half of the coinage was in eagles and half eagles, the denominations coined being, double eagles, \$14,200,000; eagles, \$7,400,000; half eagles, \$7,250,000. Coinage at the San Francisco Mint of a portion of the bullion belonging to the United States into denominations of \$20 has been permitted because of the greater demand for large coins on the Pacific coast, where the large exchanges and settlements are generally effected by the actual use of gold, and less paper is employed for the purpose than in other portions of the country.

The silver coinage amounted to \$27,783,388.75, of which \$27,772,075 were silver dollars and \$11,313.75 were proof silver coins of other de-

nominations.

The total number of pieces struck during the year, and their value, were as follows:

	Pieces.	Value.
Gold	11, 266, 003 27, 821, 300 46, 865, 725	
Total	85, 953, 028	117, 841, 594 00

The coinage of gold, silver, and minor coins executed during the calendar year 1881 compares with the fiscal year 1881-'82 as follows:

	· · · · · · · · · · · · · · · · · · ·	•	Calendar year 1881.	Fiscal year 1882.
GoldSilver	4.		\$96, 850, 890 00 27, 939, 203 75	\$89, 413, 447 5 27, 783, 388 7

Total coinage	<u> </u>	,	125, 218, 245, 50	117, 841, 594 0

The stock of 5 cent nickel coins in the Treasury having become depleted, and there being a demand for such coin, the Secretary of the Treasury, on the 12th day of November, 1881, directed that the coinage of 5-cent nickels be resumed, and that the copper and nickel cents issued under acts in force prior to the passage of the Coinage Act of 1873, held in the custody of the superintendent of the mint at Philadelphia for the Treasurer of the United States, should be recoined into

5-cent nickel pieces, of which 4,400,775 pieces, of a value of \$220,038.75, were struck during the year. This recoinage has occasioned no loss, but on the contrary has resulted in a large profit.

BARS.

Gold bars were manufactured during the year to the value of \$37,505,120.04. At the New York Assay Office, fine bars of the value of \$12,147,674.90 were prepared for depositors, and bars of standard fineness of the value of \$23,739,978.18 were made for shipment to the Philadelphia Mint for coinage. Fine silver bars of the value of \$7,769,898.15 were manufactured for depositors, principally at the New York Assay Office.

The total value of fine, standard, and unparted silver bars manufactured at all the mints and assay offices was \$8,129,202.94, and the total value of both gold and silver bars \$45,634,322.98.

BARS EXCHANGED FOR COIN.

The act, approved on the 26th of May last, authorizing the receipt of United States gold coin in exchange for gold bars has been found, as was anticipated, advantageous to the government. Under its provisions, during the month of June, gold bullion to the value of \$2,697,166.15, in the form of fine bars suitable for export, was exchanged at the New York Assay Office for gold coin, saving to the government the expense of its coinage, as well as of transporting it to Philadelphia and of the resulting coin back to New York. During the months of July, August, and September there was a further exchange of gold bullion for coin to the amount of \$3,890,833.91, a total of \$6,588,000.06 since the passage of the law and up to October 1.

PARTING AND REFINING.

The deposits of bullion for parting and refining were about one million of gross ounces more than in the previous year, resulting chiefly from increased receipts for that purpose at the New York Assay Office.

The following table shows the gross ounces of bullion sent to the acid refineries of the coinage mints and the New York Assay Office, and the ounces of standard gold and silver received:

OUNCES.

DIES AND MEDALS.

Of the dies executed at the Philadelphia Mint, 410 were prepared to be used in striking gold coins, 260 for silver, 567 for minor and 30 for proof coins, and 28 for the striking of medals; a total of 1,295.

Medals were made and sold to the number of, in fine gold, 876; silver, 4,522; bronze, 803; a total of 6,201; and proof sets, of gold, 34; silver,

1,112.

SILVER PURCHASES.

The silver bullion purchased for coinage, on hand in the coinage mints at the commencement of the fiscal year, amounted to 3,145,014.83 ounces,

costing \$3,191,092.25.

There were purchased during the year, including partings and bullion received in payment of charges, 23,465,452.39 ounces, costing \$23,975,165.22. Of this amount 23,875,720.37 ounces of standard silver bullion, costing \$24,342,501.60, were used in coining standard silver dollars and subsidiary proof coins, and 31,524.25 ounces were wasted and sold in sweeps, costing \$31,992.83, leaving of purchased silver at the close of the year 2,703,222.60 ounces of standard fineness, costing \$2,791,763.04.

The average monthly coinage was 1,988,885 50 ounces of standard fine-

ness, at an average cost of \$2,027,777.04.

In addition to the purchases at the mints, 161,776.98 standard ounces were obtained at the New York Assay Office, at \$1 per standard ounce, in payment of charges, making the total receipts of silver by purchase during the year as follows:

SILVER BULLION PURCHASES, 1882.

In the weekly purchases it has been the purpose to obtain not less

than \$2,000,000 worth of silver bullion for each month.

Where this has not been the case, it was either on account of the failure of sellers of silver to deliver their bullion promptly during the month in which it was purchased, or from the fact that sufficient silver was not offered at rates not exceeding the market price. The table of purchases during the year shows, however, a monthly delivery and coinage averaging over \$2,000,000 worth of silver bullion, and a compliance with the provisions of the law as far as practicable.

The average price paid during the year for silver bullion was \$1.02.15 per ounce standard. The average London quotation for silver bullion of British standard was $51\frac{13}{16}$ pence per ounce, equivalent at the par of exchange to \$1.13.623 per ounce fine, or \$1.02.26 per ounce standard. The New York selling price of silver during the year was \$1.13.799 per ounce fine, or \$1.02.419 per ounce standard. No offers of silver were

accepted or purchases made at rates in excess of the equivalent of the

London price on the date of purchase.

The difficulties heretofore experienced in supplying the New Orleans Mint with silver at market rates have been overcome, and purchases of silver bullion are now made for delivery at that inint at rates little, if any, in excess of the price paid for delivery at the Philadelphia Mint. It was therefore deemed expedient to keep the New Orleans Mint well supplied with silver bullion and employed in the coinage of silver dollars. This enabled the Philadelphia Mint to meet the requirements of the Treasury and of the public for gold and minor coins, and relieved it from the necessity of increasing its silver coinage when the high prices asked for silver bullion at San Francisco prevented the mint at that place from obtaining a supply.

The Secretary of the Treasury, on the 30th of January, 1882, authorized the superintendents of the coinage mints to purchase mutilated and uncurrent silver coin when delivered in sums of \$3 and upwards and to pay, without previous melt or assay, at the rate of \$1 per ounce of silver of standard fineness contained, the coins so purchased to be used in the coinage of the standard silver dollars. The mutilated and uncurrent silver coin presented in sums of \$3 and upward, from the 1st of February to June 30, 1882, have amounted, as nearly as can be ascer-

tained, to about \$29,000.

The assayers in charge of the United States mint at Denver and of the assay offices at Helena, Charlotte, Boise, and Saint Louis were authorized, under date of February 7, 1882, to purchase the silver taken for assay of silver bullion deposited for unparted bars and to pay for the same in coin at the rate of \$1 per ounce of standard silver, and the bullion thus purchased to be transmitted by them, with other bullion, to the coinage mints, to be used in the coinage of the standard silver dollars.

The profits on the silver bullion coined during the year and credited to the silver profit fund amounted to \$3,440,887.15. Of this sum \$3,438,829.41 were profits on the coinage of standard silver dollars, and the remainder, \$2.057.74, were profits on the fractional silver coined.

Fractional silver coins of the nominal value of \$11,313.75 were struck at the Philadelphia Mint by the superintendent's orders, to enable him to supply numismatists and others desiring to keep up complete collec-

tions of the coinage.

Of the profits on the coinage of silver \$2,554,729.33 were deposited in the Treasury during the year, together with \$1,101,645.43 standing to the credit of that account at the commencement of the year; \$64,026.11 were paid for transportation, and \$15,055.99 for wastage and loss on sale of sweeps, leaving a balance to the credit of the silver profit fund in the mints, on June 30, 1882, of \$807,075.72, which sum has since been deposited in the Treasury.

DISTRIBUTION.

The following statement exhibits the balance on hand June 30, 1881, coinage and distribution of silver dollars at each mint, being compiled from statements made to this Bureau, from which it will be seen that the amount distributed during the year from the mints aggregates \$15,747.463:

AMOUNT of SILVER DOLLARS REPORTED by the COINAGE MINTS on HAND June 30, 1881, COINED during the year and on HAND at the CLOSE of the FISCAL YEAR ended June 30, 1882.

	Period.	Philadel- phia	San Fran- cisco.	Carson.	New Or-	Total.
	ne 30, 1881 al year 1882	\$1, 250, 802 11, 051, 075	\$15, 941, 135 11, 000, 000	\$1, 060, 991 763, 000	\$5, 088, 132 4, 958, 000	\$23, 341, 060 27, 772, 075
	ne 30, 1882	12, 301, 877 4, 248, 069	26, 941, 135 25, 114, 407	1, 823, 991 1, 260, 901	10, 046, 132 4, 742, 295	51, 113, 135 35, 365, 672
Distributed		 8, 053, 808	1, 826, 728	563, 090	5, 303, 837	15, 747, 463

Of the \$27,772,075 coined during the year, \$12,025,783 had not at the close of the year been called for or moved from the mints, and of the total standard dollar coinage there were still in the mints \$35,365,672.

From the monthly statement of assets and liabilities the following table exhibits the coinage, movement and circulation, by periods of six months each, from July 1, 1882, to October 1, 1882:

COMPARATIVE STATEMENT of the COINAGE, MOVEMENT and CIRCULATION of STANDARD SILVER DOLLARS at the end of each six months from July 1, 1881, to July 1, 1882, and for the three months ending September 30, 1882.

		In	the Treasur	Y -	
Period.	Total coinage.	Held for payment of certificates out- standing.	For distribution.	Total.	In circulation.
July 1, 1881 January 1, 1882. July 1, 1882. October 1, 1882.	\$91, 372, 705 105, 380, 980 119, 144, 780 126, 029, 880	\$39, 110, 729 62, 315, 320 54, 506, 090 63, 205, 780	7, 274, 617	\$62, 544, 722 69, 589, 937 87, 153, 816 92, 228, 649	\$28, 827, 983 35, 791, 043 31, 980, 964 34, 007, 011

The amount of silver dollars put into circulation from the New Orleans Mint exceeded the coinage of the year at that mint about \$400,000, while at the Philadelphia Mint it was \$3,000,000 less, at the San Francisco Mint over \$9,000,000 less, and at the Carson Mint \$200,000 less than the yearly coinage of these mints respectively.

APPROPRIATIONS, EARNINGS, AND EXPENDITURES.

The total amount appropriated for the support of the mints and assay offices for the fiscal year ended June 30, 1882, was \$1,209,000, of which amount the sum of \$1,176,265.21 was expended. In addition thereto there was expended from the appropriation contained in the act authorizing the coinage of the standard silver dollar, passed February 28, 1878, the sum of \$137,559.61 on account of the mints, and \$2,173.37 at the Treasury Department, a total of \$139,732.98. Of this amount \$10,124.89 was paid for four automatic weighing machines, two of them to be used at Philadelphia and two at San Francisco.

The appropriations for the several mints and assay offices, and the amounts expended from them, are shown in the following table:

APPROPRIATIONS, 1882.

^{*} Includes \$10,000 for fixtures and apparatus. †Includes \$6,896.11 for fixtures and apparatus.

In the appendix will be found a statement showing the total earnings and gains from all sources at the mints and assay offices during the year, and the total expenditures, wastages, and losses of all kinds. The gross earnings amounted to \$4,268,742.56, and the gross expenditures and losses to \$1,689,544.68.

A statement is also given showing the wastage of the precious metals at each of the mints during the year and the loss occasioned by the sale

of bullion in sweeps.

The total value of the precious metals wasted during the year at the four coinage mints and the New York Assay Office was only \$36.658.93; while bullion of the value of \$16,685.28 was returned by the melter and refiner of the mint at San Francisco in excess of the amount with which he was charged, and by the melter and refiner at the New York Assay Office of the value of \$21,729.15, making a total gain of \$38,414.43, or a net excess over and above the entire amount of bullion wasted of the value of \$1,755.50; showing that on the large amount of gold and silver bullion operated upon at the mints of the United States and the New York Assay Office, there was an absolute gain of over seventeen hundred dollars.

The loss on the sale of sweeps is not, strictly speaking, a loss in the

ordinary operations of the mints, but represents the difference between the value of the gold and silver contained in sweepings, as determined by assay, and the price received for the sweeps, which are sold because the mints, with their inadequate facilities for working such material, cannot extract gold and silver of sufficient value, less expenses, to equal the sum which smelters will pay for them.

REFINERY EARNINGS AND EXPENDITURES.

The charges collected during the year for parting and refining bullion, which by law are appropriated for the payment of the expenses of those operations, amounted to \$278,882, of which the sum of \$264,609.56 was paid out for expenses.

The following statement shows the amounts collected and expended for parting and refining bullion, including that portion of the wastages of the operative officers and the loss on sweeps sold, properly payable from

that fund:

Institution.	Charges col- lected.	Expenditures.
Philadelphia Mint. San Francisco Mint. Carson Mint New Orleans Mint. New York Assay Office.	158, 200 21 14, 749 24	\$6, 518 51 154, 864 62 15, 320 61 252 26 87, 653 56
Total	278, 882 00	264, 609 56

The net excess of the earnings of the refineries over the expenses from the first of July, 1876, to June 30, 1882, remaining in the Treasury of the United States, amounted on the first day of July last to \$153,311.80. This is a very satisfactory exhibit, especially in view of the fact that the rates charged for parting and refining at some of the mints had been reduced and were less than in previous years, and shows that the refineries have been more than self-supporting.

The charges for parting and refining collected during the year at each institution were sufficient to defray the expenditures of those operations, except at Carson and New Orleans. The slight deficiencies at those mints were occasioned in part by the payments of bills accruing in former years, and will not, it is believed, necessitate an increase in the

rates of charges.

ANNUAL ASSAY.

The annual assay to test the weight and fineness of the coins struck at the mints during the calendar year 1881 was made at the Philadelphia Mint on the second Wednesday of February last, as required by law. Assays were made and the weights tested of the reserved coins from deliveries in each month throughout the year, and the results were reported by the committee on weighing "that all the coins weighed are within the limits of exactness required by law, and that, in fact, very few vary from the standard by one-half the tolerance"; and by the committee on assaying that they had taken the gold and silver coins reserved from the several mints "and have assayed the same in mass, and also the individual coins," and that—

The greatest deviation from the standard in the coinage examined is far within the limits allowed by law, and exhibits a remarkable degree of uniformity in mixture,

while there appears a very great perfection of workmanship. An analysis of the copper alloy present shows that it is substantially in accordance with the law and regulations.

Whereupon it was resolved by the commission—

That the assay commission having examined and tested the reserved coins of the several mints for the year 1881, and it appearing that these coins are within the tolerance prescribed by law, the trial is considered and reported as satisfactory.

ESTIMATION OF THE VALUES OF FOREIGN COINS.

The estimation of the Director of the Mint and the proclamation of the Secretary of the Treasury, on the 1st day of January, 1882, of the values of standard coins in circulation of the various nations of the world will be found in the appendix.

The valuation of foreign coins estimated in the circular of January 1, 1882, was based upon the average price of silver bullion for the last three

months of 1881 to December 29.

The average price was 51.886 pence per ounce British standard, and

the equivalent price 113.74 cents per fine ounce.

Upon this basis the following changes were made in the values of silver coins from those estimated by the circular of January 1, 1881: The Austrian florin, from 40.7 cents to 40.6 cents; the Japan yen, from 88.8 cents to 88.7 cents. The "gourde" of Hayti was estimated to be worth 96.5 cents.

EXAMINATIONS AND ANNUAL SETTLEMENTS.

An account was taken at each of the mints and at the New York Assay Office at the close of the fiscal year of the coin, bullion, and other moneys belonging to those institutions in the hands of the superintendent, and delivered to him by the operative officers.

The annual examinations of the operative officers were superintended by the Director or a representative of the Bureau, and were found sat-

isfactory, the wastage in no case exceeding the legal limits.

The gold bullion operated upon in the melter and refiner's departments in the mints and New York Assay Office amounted to 14,618,071 standard ounces, on which the legal allowance for wastage was 14,618 standard ounces, and the actual wastage 835.27 standard ounces. Of silver bullion 54,540,070 ounces of standard fineness were operated upon, on which the legal limit of wastage was 81,810 ounces, and the actual wastage 7,996 ounces.

In the coiner's departments, 10,616,313 ounces of gold of standard fineness were operated upon, on which the legal limit of wastage was 5,308 ounces, and the actual wastage 470 ounces. Of silver bullion 47,293,782 ounces were operated upon, upon which the legal limit of

wastage was 47,293 ounces, and the actual wastage 4,279 ounces.

The total wastage at all the institutions during the year was 1,305.27 ounces of gold, of the value of \$24,306.30, and 12,275 ounces of silver, of

the value \$12,352.63.

Besides the annual settlements, special examinations were had at the San Francisco and New Orleans Mints to ascertain the facts in respect to charges affecting their management, and the result of the examinations, with the evidence, were submitted to the Secretary of the Treasury. A special settlement also was made at the close of the calendar year at the New York Assay Office, having been rendered necessary by reason of the resignation of the superintendent, Thomas C. Acton, and the appointment of Pierre C. Van Wyck as his successor.

REVIEW OF THE MINT SERVICE.

Besides the current office work of this Bureau in supervising the operations of the mints and assay offices, their contracts, purchases, and expenditures, in examining their monthly and quarterly accounts, and their daily, weekly, and monthly reports, their business transactions, coinage, &c., much time was given to the procuring and compiling of statistical information concerning the production of the precious metals in the United States and the preparation of a special report thereon.

At the laboratory of the Bureau 166 deliveries of gold coins and 168 silver coins were tested by assays of the coins forwarded from the mints for that purpose, and assays were made of ores received at this office from various portions of the country, the receipts for which,

amounting to \$261, were deposited in the Treasury.

The business of the mints and assay offices has been conducted with fidelity and skill, and to the general satisfaction of the public. While less gold bullion was received and handled than in the preceding year, the work of the coinage mints and the New York Assay Office in parting, refining, and coining bullion was greater. The receipts of bullion from the public and deliveries to and from the operative officers involved transactions and accounts, accompanied by vouchers, which received careful examination in the Mint Bureau as well as in the accounting offices of the Treasury Department.

PHILADELPHIA MINT.

At this mint, besides striking a large number of silver coins and an unprecedented coinage of gold, there was a continuous demand for minor coins, of which, during the year, 4,400,775 five-cent pieces and 42,461,475 one-cent pieces were coined. The total number of pieces coined at the mint in 1882 was 66,236,475, being 11,500,000 more than in the preceding year.

The demand for small coins, as has been noticed in other countries, increases with business activity, and is a favorable indication of the frequency of actual exchanges and of a prosperous condition of the

country.

A greater amount of gold and silver was operated upon by the melter

and refiner and by the coiner than in any previous year.

The heavy coinage of gold and of minor coins at the Philadelphia Mint has continued to require large expenditures, and to defray a considerable portion of the expense of the silver coinage has necessitated the use of the appropriation contained in the act for the coinage of the standard silver dollar. It is believed, however, that as the gold coinage will be diminished, the efficient superintendent of that mint will have effected, and at the close of the year will be able to show a considerable reduction in the expenses of the mint.

SAN FRANCISCO MINT.

This mint at its annual settlement made a favorable exhibit of its condition and operations, and appeared in all its departments to be in excellent order. The coiner had a small wastage. The melter and refiner's settlement was quite satisfactory and creditable to him. He returned an excess of \$16,685.28 in gold and \$1,560.43 in silver above the amount charged to him.

The work of this mint in coinage was about the same as in the previous year, 13,900,000 pieces having been struck in 1882, and 14,234,000 in 1881. Although the value of the gold coinage in 1882 was less, the number of

pieces executed was 334,000 greater than in 1881, while the silver coinage,

which was wholly of silver dollars, was \$460,000 less.

Some official changes occurred during the year. At the commencement Mr. E. F. White superseded F. X. Cicott as coiner, and the superintendency of the mint, which for over four years had been under the able and careful management of Mr. H. L. Dodge, was at the close of the year surrendered to Mr. E. F. Burton, who, although previously appointed and commissioned, preferred not to enter upon duty until after the annual settlement and with the commencement of a new fiscal year.

CARSON MINT.

The difficulty in procuring silver for coinage was less than that experienced in former years, and coinage operations, which had been previously suspended, were resumed in the month of October and continued during the remainder of the year.

The refinery was kept open during the whole year for the purchase

of silver and reception of deposits for parting and refining.

The work performed at the Carson Mint, as to the value of the deposits, number of pieces, and value of the coinage, was nearly double that of the preceding year.

The annual settlement made at the close of the fiscal year was satis-

factory.

NEW ORLEANS MINT.

Less silver was purchased for coinage at the New Orleans Mint than in the preceding year, and although there was a greater coinage of gold, the number of pieces and value of the silver coinage was about a million and a half dollars less than the previous year.

At the commencement of the year the coiner, Mr. J. W. Helffrich, resigned. Mr. B. F. Butler, his assistant, was designated by the Secretary as acting coiner, and had charge of that department of the mint until appointment of Mr. F. K. Jones, February 10, 1882, who, as soon as confirmed, was placed in charge.

NEW YORK ASSAY OFFICE.

Mr. Thomas C. Acton, the superintendent of the New York Assay Office, whose administration of its affairs for over twelve years had been characterized by a most faithful, efficient, and economical management, having been tendered a more responsible official position, resigned the superintendency and delivered the office at the close of the calendar year to his successor, Mr. Pierre C. Van Wyck. During the year deposits amounting to \$35,994,087 in gold and \$7,168,260 in silver were received. The silver deposits were nearly \$2,000,000 in excess of those of the preceding year, while the gold deposits were upwards of \$63,000,000 less in amount, owing to a decrease in imports of foreign bullion and coin.

Bars were manufactured to the value of, gold, \$35,887,653.08, and silver, \$7,092,393.25, being about \$64,000,000 less of gold bars and about \$2,000,000 more of silver bars than were made in the previous year.

DENVER MINT, AND ASSAY OFFICES AT CHARLOTTE, HELENA, BOISE, AND SAINT LOUIS.

The value of the gold and silver bullion deposited at these institutions, and of the unparted bars manufactured, was much greater than in the preceding year. The charges collected for melting, assaying, and stamping bars were \$1,694.07, and for assays of ores, \$2,138. The total earnings of all the institutions were \$4,955.72, some \$700 less than in the previous year.

The increased value of the deposits and of the bars manufactured arose from a greater amount of bullion being received and bars manufactured at the Denver Mint and Helena Assay Office, the deposits of gold at the former having increased from \$235,137.15 to \$458,847.07; silver, from \$3,805.77 to \$7,053.02; and the value of bars manufactured from \$238,942.92 to \$465,900.09.

The growth of business at Helena was, in deposits of gold, from \$568,525.13 in 1881 to \$684,475.53 in 1882, and in silver deposits from \$84,314.97 to \$145,306.05, and in the value of bars manufactured from

\$652,840.10 to \$829,781.5\$.

MONETARY STATISTICS OF THE UNITED STATES.

Since submitting my last annual report inquiries relative to the production, import, export, and consumption of the precious metals, and to their circulation as money, have been, as heretofore, diligently prosecuted, and much valuable information obtained.

The facts that have been gathered are here classified and summarized, and the more important tabulated for convenient comparison or refer-

ence.

PRODUCTION OF THE PRECIOUS METALS IN THE UNITED STATES FOR THE FISCAL YEAR 1882.

At the close of the calendar year 1881, after an extended review of the production of gold and silver in the mining districts and counties in the States and Territories, a careful estimate was made of the total production of the United States and published in the special report transmitted by the Secretary of the Treasury to Congress in June last. I then estimated the total production for the calendar year 1881 to have been, of gold, \$34,700,000, and of silver, \$43,000,000; a total of \$77,700,000. The production by States and Territories was estimated to have been as follows:

Production of gold and silver in the United States during the calendar year, 1881 by States and Territories.

	Gold.	Silver.	Total.
Alaska			\$15,000
Arizona		\$7, 300, 000	8, 360, 000
California	18, 200, 000	750,000	18, 950, 000
Colorado	3, 300, 000	17, 160, 000	20, 460, 000
Dakota		70,000	4, 070, 000
Georgia			125, 000
Idaho		1, 300, 000	3, 000, 000
Maine		5, 000	5, 000
Montana		2, 630, 000	4, 960, 000
Nevada		7, 060, 000	9, 310, 000
New Mexico		275, 000	460, 000
North Carolina.		2.0,000	115, 000
Oregon		50,000	1, 150, 000
South Carolina		30,000	35, 000
rennessee.			5, 000
Utah		6, 400, 000	6, 545, 000
Virginia		0, 400, 000	10, 000
Washington	120, 000		
Washington Wyoming	120,000		120, 000
w young	5, 000		5, 000
Total	34, 700, 000	43, 000, 000	77, 700, 000

The production of gold had declined and that of silver increased over their production in previous years. From the deposits made at the mints and the exports of domestic bullion there appears to have been a still further falling off in the production of gold and an increase in that of silver.

The deposits of domestic gold at the mints and assay offices during the calendar year 1881 amounted to \$34,271,359.46, and during the fiscal year 1882 to \$31,298,511.97, a falling off of about three millions of dollars. This decline appears to have been in the production of the States on the Pacific slope. The deposits of domestic gold at the San Francisco and Carson Mints, which amounted to \$26,011,017.50 in the calendar year 1881, during the fiscal year amounted to only \$22,708,663.44, a decline of \$3,302,354.06.

During the calandar year 1881 the deposits and purchases of domestic silver were \$27,899,213.12, while during the fiscal year ended June 30, 1882, they had increased to \$30,956,588.18, a gain of over three millions of dollars; but the exports of domestic silver, which in the calendar year were reported, at their commercial value, at \$12,796,280, were reduced in the fiscal year to \$11,653,547, a decline in the export of domestic silver bullion, computed at its coining value, of about \$1,300,000, leaving the net gain in the silver production for the year over that of the preceding year about \$1,700,000. Making allowance for the same amount of domestic undeposited gold and silver used in the arts during the fiscal year as in the calendar year, the total production for the fiscal year may be approximately estimated at \$31,500,000 for gold and \$44,700,000 for silver.

CONSUMPTION OF THE PRECIOUS METALS.

As the inquiries prosecuted for three years to ascertain the amount of gold and silver annually used in the United States in manufactures, the arts, and ornamentation had resulted in obtaining for the year 1881 sufficient data for future approximate estimates, no circulars were sent for obtaining information as to the amount used during the last fiscal year. It was estimated in last year's report that there were annually consumed in the United States for industrial purposes \$11,000,000 of of gold and \$6,000,000 of silver, of which amounts \$5,500,000 of gold and \$5,000,000 of silver were estimated to be domestic bullion.

A report was obtained, as usual, from the New York Assay Office, which is published in the appendix, and shows the following as the amount and character of the gold and silver deposited for bars to be

supplied to manufacturers:

Bars furnished to manufacturers.	Gold.	Silver.	Total gold and silver.
,	\$45, 511 06 532, 154 28 843, 281 26 690, 063 81 5, 206, 075 85 7, 317, 086 26	\$15, 867 73 154, 522 07 192, 226 35 191, 719 33 5, 444, 111 16 5, 998, 446 64	1, 035, 507 61

The statement shows that the bars prepared and delivered for the use of manufacturers exceeded in value those of the previous year by,

gold, \$1,500,000, and silver, \$870,000; and that the increased consump-

tion consisted of gold and silver of domestic production.

For the fiscal year 1882 the consumption, therefore, of the precious metals in the United States for use in the arts, &c., probably exceeded \$12,000,000 of gold and \$7,000,000 of silver, of which \$7,000,000 of gold and \$6,000,000 of silver were of domestic production.

COIN CIRCULATION OF THE UNITED STATES.

The total circulation of the United States coin amounted, as nearly as can be ascertained, on the 1st of July, 1882, to \$500,000,000 of gold

and \$200,000,000 of silver, a total of \$700,000,000.

This estimation is based upon the gains to the metallic circulation by coinage less recoinage, and imports less exports of United States coin since 1873, at which time I estimated the circulation of United States gold coins at \$135,000,000, and of United States silver coins at \$5,000,000.

The circulation was estimated in my last annual report to have been, on the 30th of June, 1881, \$439,776,753 of gold and \$171,459,766 of silver. During the year \$599,357 of United States gold coin and \$127,572 of United States silver coin were deposited at the mints and remelted.

There were also exported of United States gold coin \$29,805,289, and imported \$4,796,630, being an excess of exports over imports of \$25,008,659. Of silver coin the imports were \$940,877, and the exports \$423,099, being an excess of imports over exports of \$517,778. Subtracting from the total gold coinage of the year the recoinage, the excess of exports over imports, and the coins used in the arts, not deposited at the mints or assay offices, estimated at \$2,700,000 (based on last year's estimate of \$3,300,000 as the total consumption of such coins), makes the gain during the year in United States gold coin \$61,005,432, and the total amount in the country on the 1st of July, 1882, \$500,882,185.

In like manner, subtracting from the silver the deposits for recoinage, and the estimated consumption of \$60,000 undeposited silver coins used in the arts, and adding the excess of imports over exports, makes the gain to the silver circulation during the year \$28,113,594, and the total silver circulation of United States silver coin on the 1st of July, 1882,

\$199,573,360.

The following table shows the gain during the year:

United States coin.	Gold.	Silver.	Total-
Circulation, June 30, 1881. Year's coinage, less deposits for recoinage. Excess of imports over exports.		\$171, 459, 766 27, 655, 816 517, 778	\$611, 236, 519 116, 469, 907 517, 778
Total. Less excess of exports over imports	528, 590, 844 25, 008, 659	199, 633, 360	728, 224, 204 25, 008, 659
Remainder	503, 582, 185 2, 700, 000	199, 633, 360 60, 000	703, 215, 545 2, 760, 000
Circulation July 1, 1882	500, 882, 185	199, 573, 360	700, 455, 545

From the Treasurer's statements of the amount of coin in the Treasury, and gold and silver certificates outstanding, and from the reports of the national banks to the Comptroller of the Currency, and certificates held by them, it would appear that on the 1st of July, 1882, the gold and silver of the country, deducting from the amount held by the Treasury

the certificates outstanding and counting as coin those held by banks and in circulation, belonged as follows:

Notes of sector	0.11		Silver.		Total United States gold
Belonging to—	Gold.	Legal tender.	Subsidiary.	Total.	and silver coins.
Treasury National banks Other banks Private hands	* \$86, 935, 483 † 103, 943, 999 † 20, 000, 000 } ¶ 290, 002, 703 }	* \$32, 647, 726 ‡ 4, 000, 000 62, 497, 054	\$28, 048, 630 ‡3, 750, 263 48, 629, 687	\$60, 696, 356 †7, 750, 263 131, 126, 741	*\$147, 631, 839 †111, 694, 262 ¶441, 129, 444
Total	500, 882, 185	119, 144, 780	80, 428, 580	199, 573, 360	700, 455, 545

^{*} Less outstanding certificates. † Including Treasury certificates.

Since the 1st of July and up to October 1, 1882, the coinage of gold was \$13,339,863, and of silver, \$6,915,185; the excess of exports of gold coin over imports about \$2,031,012, and of imports over exports of silver coin, \$121,225; leaving the circulation on the 1st instant of United States coins, gold, \$512,191,036, and silver, \$206,609,770, and total of \$718,800,806, as appears from the following statement:

	Gold.	Silver.	Total.
Circulation July 1, 1882 Coinage to October 1, 1882 Excess of imports over exports to October 1, 1882	13, 339, 863	\$199, 573, 360 6, 915, 185 121, 225	\$700, 455, 545 20, 255, 048 121, 225
Total *Less excess of exports over imports	514, 222, 048 2, 031, 012	206, 609, 770	720, 831, 818 2, 031, 012
Circulation October 1, 1882	512, 191, 036	206, 609, 770	718, 800, 806

^{*}All ports for July and August, only New York and San Francisco for September.

Besides this amount of gold and silver coin, there was in the mints and assay offices on the 1st of October, deposited or purchased for coinage, gold bullion of the value, approximately, of \$51,440,420, and silver bullion costing \$3,343,565, making a total of coin and bullion belonging to the United States and awaiting coinage, of gold, \$563,631,456, and of silver, \$209,953,335, a total of \$773,584,791.

TOTAL CIRCULATION OF THE UNITED STATES.

The total paper and metallic circulation of the United States in General Table No. XXXI, showing the circulation of the various countries of the world, is given for October 1, 1882, as \$793,074,878 paper, and \$773,585,790 metallic,* a total of \$1,566,659,668, being a per capita of \$15.81 paper and \$15.42 metallic.

The paper circulation of the United States in that table includes United States notes, national bank notes, and gold and silver certificates, fractional currency to the amount of \$7,028,078, omitting the small amounts of unredeemed legal tender, demand, and interest-bearing notes, which are seldom if ever seen in active circulation.

As only a portion of the paper and metallic money is in actual circulation, in Table XXXII the Treasury and bank metallic reserves are

[†] Estimated.
¶ Including Treasury certificates.

^{*}The figures given for the metallic circulation include the bullion in the mints and assay offices.

stated; but the actual active circulation on the 1st day of July in the possession of the general public is to be reduced by the amounts of paper held at that date by the Treasury and banks, which is shown in the following table, compiled in this Bureau from the bank and Treasury statements prepared by the Comptroller of the Currency and the Treasurer of the United States:

State of circulation July 1, 1882.

,	In Treasury,	In banks.	In active eir- culation.	Total.
Gold bullion Silver bullion Gold coin Silver dollars Fractional silver coin Gold certificates Silver certificates United States notes National bank notes Fractional currency	3, 230, 908 91, 964, 503 87, 153, 816 28, 048, 631 8, 100 11, 590, 620 34, 670, 589 6, 277, 247		\$309, 354, 082 28, 790, 964 48, 683, 726 588, 620 53, 652, 050 247, 990, 909 324, 656, 768	\$56, 541, 887 3, 230, 908 500, 822, 184 119, 144, 789 80, 428, 580 5, 037, 120 66, 096, 710 346, 681, 016 358, 680, 000 7, 047, 247
Total	319, 504, 055	203, 833, 800	1, 020, 372, 577	1, 543, 710, 43

The character and possession of the paper and specie circulation of the United States at the commencement of the fiscal year appears in the following table, prepared from the same sources of information:

State of circulation July 1, 1881.

	In Treasury.	In bank.	In active cir- culation.	Total.
Gold bullion Silver bullion Gold coin Silver dollars Fractional silver coin Gold certificates Silver certificates United States notes. National-bank notes Fractional currency	3, 309, 949 74, 153, 945 62, 544, 722 27, 247, 697 23, 400 12, 055, 801 30, 204, 092 5, 296, 382	\$116, 073, 276 3, 000, 000 3, 482, 561 5, 137, 500 945, 590 58, 728, 713 27, 932, 850 372, 140	\$249, 549, 532 25, 827, 983 49, 356, 803 622, 020 38, 165, 139 257, 748, 211 321, 812, 768 6, 680, 654	\$89, 017, 716 3, 309, 949 439, 776, 753 91, 372, 705 80, 987, 061 5, 782, 920 51, 166, 530 346, 681, 016 355, 042, 000 7, 105, 953
Total	303, 906, 863	215, 672, 630	949, 342, 603	1, 469, 342, 603

By comparing the foregoing tables for 1881 and 1882 it will be seen: 1st. That of the 74½ millions of paper and metallic circulation gained to the total circulation the Treasury received 15½ millions, the people gained 71 millions, and the banks lost 11½ millions.

2d. That of the 61 millions of dollars of gold coin gained to the circulation the Treasury, in reducing its stock of gold bullion, retained nearly 18 millions of the resulting gold coin and reduced the outstanding gold certificates \$750,000, while the national banks lost \$16,500,000 in gold coin and nearly \$700,000 of gold certificates, and the general public gained \$60,000,000.

3d. That as to the silver circulation, the silver dollars and silver certificates in the hands of the public, including the banks, at the close of the fiscal year, were over \$18,600,000 more than at its commencement, while the silver coin in the Treasury not represented by outstanding certificates increased \$24,600,000

certificates increased \$24,600,000.

COURSE OF PRICES IN THE UNITED STATES 1881-1882.

The prices of domestic exports, as indicated by an average of the values declared at the custom house, shows an advance of 7 per cent. on the export prices of the previous year. The advance was principally in the prices of food exports, such as breadstuffs, provisions, live animals, &c., which constituted in value a large portion of the total exports.

The prices of 1882, however, remained below the currency prices of exports in 1870, being an average of 84 per cent. of the average declared prices of the principal commodities in the latter year. United States notes were at that period at a discount of 13 per cent., the prices of the exports in 1882 were 3 per cent. below the currency prices of 1870, reduced to the gold standard. A table is also inserted containing the average yearly prices in the New York market for the calendar years 1880 and 1881 of a large number of staple articles, and the comparative percentage of such prices for the year 1881, on their prices for the year 1880, and on their average prices for the preceding fifty-six years. The quotations for the last two years have been compiled semi-weekly from the New York Shipping and Commercial List, taking for each article, as far as practicable, the same grade and quality as that used in preparing the table for my last report. The average of the percentages of the prices of 1881 compared with the prices of 1880 and with the average prices for the fifty-six preceding years also indicate an advance in prices averaging on the prices of the same articles for the previous year of 10.6 per cent., and on their average prices for fifty-six years of 2.7 per cent.

MONETARY STATISTICS OF FOREIGN COUNTRIES.

Additional replies to those published in my last and previous annual reports have been received from our representatives abroad, containing valuable information in relation to the monetary statistics of foreign countries, and are given in full in the appendix.* The information which they contain has enabled me to correct the tables of circulation, coinage, and production to later dates.

A condensed statement of the contents of these papers and of the monetary condition of the countries to which they respectively relate

may be found useful, and is herewith submitted:

GREAT BRITAIN AND COLONIES.

Great Britain and Ireland.—The report of Mr. C. W. Fremantle, the deputy master of the royal mint of Great Britain, was received at my office, and found to contain, as usual, much important information, not only in regard to the coinage of the mints of the British Empire, but of

the operations of the mints in other countries.

From his report it appears that no gold coinage was executed during the year 1881 in Great Britain, but the silver coinage exceeded that of any previous year except 1872 and 1873, and amounted to £997,128, equal to \$4,852,523, of which £146,175 were transmitted to the British colonies to replace £67,543 16s. 6d. of worn coin withdrawn. The new silver coins sent to the colonies in 1880 amounted to £308,940, equal to \$1,503,457, and the worn silver coin withdrawn to £86,425, equal to \$420,587. The total amount of worn coin withdrawn from circulation during the year 1881 in the kingdom was £340,286, equal to \$1,656,002. The value of the bronze coinage, pence, half pence, and farthings, at its nominal value, was £23,405, equal to \$113,900.

^{*}The documents here referred to are ommitted for want of space, but they may be found in the volumes of the Director's report.

For the use of the treasury chests abroad in 1881 there were shipped 384,400 sovereigns and half sovereigns, equal to \$1,870,683; £12,040 in silver, equal to \$58,593; and £60 in bronze pence and half pence.

The average price paid for silver during the year was $51\frac{1}{16}d$. per ounce (British standard), while the average market price was $51\frac{3}{4}d$., and the seigniorage accruing was $14\frac{3}{16}d$. per ounce, or $27\frac{1}{3}$ per cent., amounting to £166,823, equal to \$811,844.

The imports and exports of gold and silver for the last five years

were as follows:

SILVER.

•		Imports.	Exports.
1878 1879 1880	•	11, 000, 000 10, 500, 000 6, 500, 000	£19, 000, 000 11, 250, 000 11, 000, 000 7, 250, 000 7, 000, 000
•	GOLD.		
1878 1879 1880		21, 000, 000 13, 250, 000 9, 000, 000	£20, 000, 000 14, 000, 000 16, 500, 000 11, 500, 000 15, 500, 000

Showing a net loss to the country in 1881 of gold £5,500,000, equal to \$26,750,000, and of silver, £300,000, equal to \$1,460,000.

The amount of circulation, including bank reserves, is reported by our minister as—

Gold	£121,630,000	\$591, 912, 395
Silver		92, 638, 694
Paper	42, 399, 000	206, 334, 733

William King, esq., the consul of the United States at Birmingham, forwards, under date of July 19, 1882, an interesting report on the assay office at that city, established in 1873 for the purpose of assaying and stamping with official marks articles of jewelry, &c.

India.—Mr. C. C. Bancroft, acting vice consul-general of the United States at Calcutta, forwards, under date of September 10, 1881, a reply from the secretary of the government for India to certain inquiries con-

tained in a circular of this department.

The coinage for the year 1879 and 1880 is given as follows, to wit:

•	Kupees.	
Gold Silver		

The gold coinage is probably given for the fiscal year ended March 31, 1880, and the silver coinage for the calendar year ended December 31, 1880. The net gain of coin and bullion by imports for the calendar year 1880 is stated as—

•	Rupees.	
Gold	33, 142, 538	\$12,925,590
Silver	50, 460, 502	19,679,596

The circulation of silver coin is given as from \$250,000,000 to \$500,000,000, with 57,270,495 rupees=\$22,335,493 of silver coin in the Treasury, and 6,905,525 rupees=\$2,693,155 in banks, and the governernment paper outstanding on December 31, 1880, as 143,268,925 rupees=\$55,874,880.

The silver coin in circulation has been estimated, for reasons and upon data given in my previous reports, at more than double the amount stated by Mr. Bancroft.

Australasia.—O. M. Spencer, consul-general at Melbourne, furnishes an important report on the production, consumption, and movement of

the precious metals in Australia.

During the year 1881 the gold coined in Melbourne and Sydney mints

is stated as £4,047,902=\$19,699,115.

The gold exported from the different provinces in 1880 exceeded the imports by £3,260,774=\$15,868,556, while the stock of silver the same year was increased by a net gain from imports of £186,085=\$905,582.

The product of the mines for 1880 was as follows:

Gold	£5,910,819	\$28,765,001
Silver	46, 673	197, 935

The condition of the banks on December 31, 1880, is shown by the following statement:

Gold and silver coin	£11, 475, 294	\$55,844,518
Gold and silver bullion	804, 699	3, 916, 068
Notes in circulation	4,405,276	21, 438, 276

G. W. Griffin, United States consul at Auckland, furnishes the following statement of the production and exportation of gold from New Zealand since the discovery of that metal in 1857:

1857	\$202,210	1869	\$11, 814, 975
1858	262, 215	1870	
1859	142, 135	1871	13, 937, 600
1860	87,925	1872	8, 654, 960
1861	5, 763, 285	1873	9, 937, 125
1862	7, 956, 945	1874	7, 526, 655
1863	12, 158, 615	1875	7, 038, 850
1864	9,289,235	1876	6, 342, 795
1865	11, 132, 370	1877	7, 480, 400
1866	14, 222, 585	1878	6,200,395
1867	13, 501, 375	1879	5, 993, 205
1868	12, 521, 630	1880 (to June 30, 1880)	2, 996, 000

British Guiana.—The United States consul at Demarara writes that no mines of gold or silver exist in that colony, and that it has no mint.

The value of the bullion imported during the year was \$95,702, and of that exported \$11,421.

The principal coins in circulation are British silver, but American gold

and Spanish doubloons also circulate.

The outstanding paper circulation of the two banks of the colony on the 31st of December, 1880, is estimated at \$691,790.

FRANCE.

Our minister at Paris furnishes, under date of July 8, 1882, very complete statistics from the minister of finance, touching the monetary affairs of France.

The coinage for the year was-

	E tancs.	
Gold	2, 167, 000	\$418, 231
Silver	6, 733, 445	1, 299, 554

The gain in gold bullion by imports during the year amounted to 33,638,040 francs, but there was a loss by export of 23,453,920 francs in gold coin, leaving a net gain to the country in gold of 10,184,120 francs =\$1,965,553.

In silver there was a gain during the year of both coin and bullion as follows:

	Francs.	
Coin Bullion		

The amount of cash in the Bank of France on December 29, 1881, was, gold, 655,696,391.13 francs=\$126,549,403; silver, 1,161,468,130.11 francs=\$224,163,349, an aggregate of 1,817,164,521.24 francs=\$350,712,752, and the paper circulation outstanding at the same date was 2,778,428,840 francs=\$536,236,766.

SWITZERLAND.

In the dispatch of Minister Cramer, the gain in the precious metals by excess of importation into Switzerland during the year 1881 is stated as—

Luogra	ms.
Gold	200 \$1,462,120
Silver	300 4,293,148

The circulation of bank notes amounted on December 31, 1881, to 109,867,000 francs=\$21,204,331, and the coin in the Federal Treasury was at the same time as follows:

BELGIIM.	20.0,000	,
Silver		89,166
Gold	1 324 000	\$255,532
	Francs.	

The Belgian government transmits, under date of April 4 of the present year, three responses of the different bureaus of the government to the circular of this department.

No gold was coined in either 1880 or 1881 for the home government, but 3,261.457 kilograms=\$135,546 were coined into fractional silver in 1880, and 915.676 kilograms=\$38,055 in 1881.

There was coined for the republic of Venezuela, during the year 1880, 487.547 kilograms of gold=\$324,024, into 20-Bolivar pieces.

The imports and exports for the two years are given as follows:

	Kilograms.	
1880. Imports, gold,	1,259	\$836,731
1880. Imports, silver	29,649	1,232,212
1881. Imports, gold	488	324,325
1881. Imports, silver	112, 211	4, 663, 489
1880. Exports, gold	149	99,025
1880. Exports, silver	1,011	42,017
1881. Exports, gold	26	17,280
1881. Exports, silver	80,293	3,336,977

The gold and silver used in manufactures, presented for stamping at the bureau of guarantée during 1880, amounted to 32 kilograms of gold = \$21,267, and 2,193 kilograms of silver = \$91,141, which does not include that used in the arts.

The circulation on December 31, 1881, was estimated to be about 533,823,529 francs in gold = \$103,027,941; in silver, 275,000,000 francs = \$53,075,000, besides 32,780,000 = \$6,326,540 in fractional silver coins, and 354,753,670 francs in paper = \$68,467,462.

In addition to these amounts the banks held a reserve in gold, amounting to 77,394,960 francs = \$14,937,227, and 18,982,000 francs in silver = \$3,663,526.

ITALY.

The chargé d'affaires of the United States at Rome forwards, under date of July 14 of the present year, an original report from the Italian minister of the treasury in regard to the monetary affairs of that kingdom.

The coinage for the year 1880 was, gold, 2,590,660 lire = \$499,997; no silver was coined during the year.

For 1881 the coinage was as follows:

	Lire.	
Gold	16,860,560	\$3,253,988
Silver	8, 281, 588	1,598,346

The imports and exports during the year 1880 were as follows:

	Lire.	
Gold imports	8,824,280	\$1,703,086
Silver imports	23, 377, 600	4,511,877
Gold exports	7,561,760	1, 459, 420
Silver exports	12, 291, 120	2, 372, 186

The aggregate coinage from 1862 to 1880, inclusive, amounted to—

•	Lire.	
Gold	255, 134, 980	\$49, 241, 051
Silver	520, 637, 025	100, 482, 946

The paper circulation December 31, 1881, was—

	Lire.	
State notes	940,000,000	\$181, 420, 000
Bank notes		141, 966, 767

The reserves held December 31, 1881, were—

In banks:	Lire.	
Gold	71, 304, 720	\$13,761,811
Silver	63, 573, 305	12, 269, 648
Treasury: Gold	7 654 370	1 477 909
Silver	32,707,024	6, 312, 456

The following, on the resumption of specie payments by the Italian Government, is taken from the London Economist of May 13, 1882:

Some attempts have been made to calculate the amount of coined gold and silver which will exist in the country at the time of the resumption of specie payments. The following data may, perhaps, be considered approximate:

•	r rancs.	
In Treasury: Gold	550 000 000	\$106, 150, 000
Gold	330,000,000	
Five-franc, silver	100,000,000	19, 300, 000
Fractional silver currency		18, 335, 000
In banks:		
Gold		21, 230, 000
Five-franc silver pieces	15, 000, 000	2,895,000
Fractional silver currency	51,000,000.	9,843,000
In the country:		
Gold	90,000,000	17, 370, 000
Five-franc silver pieces		19, 300, 000
Fractional silver currency	10,000,000	1,930,000

Or a grand total of 1,121,000,000 francs of coin, in addition to 340,000,000 of state notes, and 750,000,000 of legal-tender bank notes.

The government is at present taking back from France the last installment of silver fractional currency of about 16,000,000 francs, paying for it in five-franc silver pieces. The amount of five-franc silver pieces coined by Italy is estimated at 380,000,000 francs, of which it is believed about 160,000,000 or 180,000,000 will be out of Italy at the time of the resumption of specie payments. There is, besides, in the country a large amount of old silver money coined by the past governments, and which it would be rather difficult to estimate. The government has lately tried to issue some small quantity of silver pieces of 50 centimes (5d), but they were immediately hoarded for the payment of custom duties. This would have caused a scarcity of chance were it the payment of custom duties. This would have caused a scarcity of change were it not for the large quantity of heavy copper money.

SPAIN.

The dispatch from Hon. Dwight T. Reed, of the United States legation at Madrid, under date of September 19, 1881, contains the following information relative to the finances of Spain for the year 1880. The coinage executed was as follows:

	Pesetas.	
Gold	171, 573, 675	\$33, 113, 719
Silver	1, 393, 551	268, 955
NII VI	1,000,00,1	200,000

The net loss of gold coin by export was 9,110,484 pesetas = \$1,758,323,

while there was a gain in silver coin of 3.528,662 = \$681,032.

There were 74,500 kilograms of silver produced from the mines of Spain during the year, valued at \$3,096,220. The coin in the Treasury on December 31, 1880, is reported to have been:

	Pesetas.	
Gold	4.017.847	\$775,444
Silver	10, 400, 920	2,019,923

PORTUGAL.

A communication from Minister Moran, dated December 28, 1881, contains the following statistics regarding the coinage, &c., of Portugal during the year 1880:

	Kilograms.	
Gold coinage	Kilograms. 524. 775	\$348,765
Silver coinage	3,500.768	145, 492

The imports and exports for the same year are given as follows:

* S	Milreis.	
Imports: Gold	2, 573, 801	\$2,779,705 47,181
Silver Exports:		,
GoldSilver		30, 489 33, 035
	,	,

Showing a net gain in gold of \$2,749,216. and in silver of \$14,146.

GERMANY.

Hon. H. Sidney Everett furnishes, under date of September 12, 1881, a statement of the gold imports and exports of Germany for the year 1880:

K	ilograms.	
ImportsExports		

Showing a net loss to Germany during the year named by export of \$2,145,993 in gold.

AUSTRIA-HUNGARY.

The Hon. William Walter Phelps, our minister to Austria, has forwarded two dispatches, under dates of November 29, 1881, and June 21, 1882, containing very complete information in relation to the monetary affairs of the Austro-Hungarian Empire.

The coinage for 1880 is given as:

Vienna mint, gold	florins	2,585,706	\$1,247,264
Hungarian mint, goldl			1, 198, 991
Vienna mint, silver			2, 765, 177
Hungarian mint, silver	kilograms	42, 384. 644	1,761,506

And for the year 1881:

	Florins.	
Vienna mint, gold	4, 147, 434 6, 673, 482	\$2,000,584 2,709,434

The imports and exports for 1880 and 1881 were as follows:

1880. Imports:	Florins.	
1880. Imports: Gold	21, 355, 000	\$10, 300, 584
Silver	6, 965, 217	2,827,878
1881. Imports:		
Gold	19, 798, 000	9, 549, 565
Silver	13, 034, 447	5, 291, 985
1880. Exports:		
Gold		1,581,095
Silver	15, 342, 351	6,228,995
1881. Exports:		
Gold		1,057,480
Silver	269, 836	109,553
•		

Showing a net gain by imports in the two years of gold \$17,211,574, and of \$1,781,315 in silver.

The production of the precious metals during the same years was:

Kilograms.	
Austria, 1885, gold	\$28,578 1,066,018
Austria, 1881, gold	1,240,808
Austria, 1880, silver 30, 257 Hungary, 1880, silver 17, 743	1,257,481 $737,399$
Austria, 1881, silver	1, 303, 280
An aggregate of	5,633,564

The paper circulation of the empire on the 31st of December, 1881, is given as state notes, 320,434,947 florins=\$130,096,000, and Austro-Hungarian Bank notes (legal tender), 354,287,560 florins=\$143,836,000. The cash reserve in the treasury and in Austro-Hungarian Bank at the date mentioned was:

In treasuries:	Florins.	
Gold coin	6,000,000	\$2,894,100
Silver coin	14,000,000	5, 684, 000
Austro-Hungarian Bank:		
Gold coin	68,725,532	33, 159, 760
Silver coin	122, 130, 827	49, 585, 116

The following comparative table of imports and exports of gold and silver from Austro-Hungary during the years 1881-'82 is from the London Economist of July 22, 1882, and is for the year ending April 30:

	Imports. Exports.			
	1881.	1882.	1881.	1882.
Gold		260, 516 18, 304	£496 62, 108 400 7, 670	£200 274, 534 2, 929, 400
Total	616, 138	299, 505	70, 674	3, 204, 134

RUSSIA.

The following statistics in relation to the drain of gold from Russia, compiled from the annual report of the Russian customs department, are taken from the London Economist of April 8, 1882:

Years.	Imports.	Exports.
1875 1876 1877 1878 1878 1879 1880	6, 711, 600 10, 462, 200 9, 146, 200 7, 501, 200 4, 474, 400	\$18, 095, 000 67, 576, 600 12, 238, 800 8, 751, 400 5, 856, 200 17, 305, 400 44, 612, 400
	45, 204, 600	174, 435, 800 45, 204, 600
Excess of exports		129, 231, 200

NORWAY AND SWEDEN.

Hon. John L. Stevens, in a communication dated September 9, 1881, furnishes two official dispatches, which contain valuable statistical information relating to the finances of this kingdom. The coinage of 1880 (calendar year) was— Tilognoma

IX.	rograms.	
Norway, silver	12	\$499
Sweden, silver		223, 094
Sweden, gold		752, 992
2 " ouez, 6 ou	-,	

The importation into Norway during the year amounted to, gold and silver, 2,483,000 crowns=\$665,444; the exports for the same period were, gold and silver, 753,800 crowns=\$202,018; showing a net gain in both metals of \$463,426.

The imports and exports of Sweden are given as follows:

Imports:	Kilograms.	
Gold	4,730	\$3, 143, 558 155, 767
Silver		155,767
Exports:	•	,
Gold	. 57	37,882
Silver	. 586	37, 882 24, 354
The production of the mines is given as—	Wile whoma	.

. К	ilograms.	÷
Norway, silver	4, 436	\$184, 360
Sweden, silver		54, 527
Sweden, gold		3, 323
, 5		

The circulation of Norway on the 31st of December, 1880, was about 24,000,000 crowns in gold=\$6,332,000; 4,000,000 crowns in silver= \$1,072,000, and 38,714,000 crowns in paper=\$10,375,352; and most of the gold was held by the banks and the public treasury.

The circulation of Sweden at the same date is stated as follows:

•	Crowns.	1
Gold	5,500,000	\$1,474,000
Silver		2,948,000
Paper		24, 022, 298

With bank reserves amounting to \$6,330,315 in gold, and \$1,481,572 in silver.

DENMARK.

Henry B. Ryder, United States consul at Copenhagen, forwards two dispatches, under date of March 9 and May 23 of the present year, in relation to the Kingdom of Denmark.

No coinage was executed during the years 1880 and 1881. The importation of gold in 1880 is stated as about 13,000,000 crowns= \$3,484,000. The amount exported is not given.

In 1881 there was a loss through excess of exports of gold of about

2,500,000 crowns = \$670,000.

The circulation is estimated at the close of the year 1881 to have been, of gold, 8,000,000 crowns=\$2,144,000, with 29,000,000 crowns =\$7,772,000 in the national bank; of silver, 15,350,000 crowns=\$4,113,-800, and 2,800,000 crowns = \$750,400 in the bank; and of bank notes outstanding 75,219,280 crowns = \$20,158,767.

General Wallace forwards, under date of the 14th of June of the present year, a dispatch in relation to the financial condition of the Ottoman Empire, from which it would appear that it is almost impossible to obtain any reliable information in relation to the monetary affairs of that country, for the reasons that no statistics are kept, and that both the government and banks are solicitous to conceal their affairs. He gives the product of the two lead mines worked by the government, from 1880 to June, 1882, as 557,092 drams in silver=\$71,441, and 2,307 in gold = \$4,918.

The paper money known as "Caimé" has been mostly withdrawn from

circulation, for the reason that no one would accept it.

JAPAN.

The annual report of the commissioner of the imperial mint of Japan for the year ending June 30, 1881, has been received, and shows the imports of gold and silver to have been—

	Ounces.	
		\$518,052 4,981,609

The coinage of gold was confined to 5-yen pieces, and of silver to 1-yen pieces, as follows: Gold, 98,117 pieces, valued at \$490,585; silver, 5,089,113 pieces, valued at \$4,514,043.

Of copper coins 73,841,406 pieces were struck of a tale value of

1,112,624 yens = \$986,897.5.

SANDWICH ISLANDS.

An extract from a dispatch from Mr. Comly, minister to the Hawaiian Islands, states that no mines or mints exist in those islands; that business is conducted on a silver basis, and that the principal coins in circulation are United States trade dollars and French five franc pieces.

CHINA.

Hon. Joseph B. Angell, minister to China, states in his dispatch that the Chinese Government collects no statistics in relation to its monetary. affairs.

MEXICO.

Minister Morgan forwards two dispatches—one under date of February 8, 1882, and the other June 29, 1882—relative to the coinage and movement of gold and silver in Mexico. The importation of gold is stated as very inconsiderable, being principally that brought by individuals to defray their personal expenses.

The exportation of gold during the fiscal year 1880 amounted to \$1,401,382, and of silver to \$20,137,932, besides \$496,437 in ores.

The circulation of the country is composed principally of silver, gold forming not more than 5 per cent. of the entire amount.

The general government has issued no paper money.

The coinage for the fiscal year 1881, was, gold, \$438,778; silver, \$24,139, 023.60.

The El Minero Mexicano, of April 13, 1882, publishes the following as the coinage of the various mints of the Republic of Mexico during the fiscal years 1879-'80 and '81, but does not give the values separately of the different metals coined; in fact the amounts include the bronze coinage of the period covered:

Amount coined in-

1879	 	\$22, 821, 183	65

The same paper furnishes the following statement of the aggregate exports of gold and silver during the years 1878, 1879, and 1880:

-Exported in-

1878	\$22,663,437 86
1879	21, 528, 938 19
	22, 086, 418 36

ARGENTINE REPUBLIC.

Ed. L. Baker, United States consul at Buenos Ayres, furnishes an interesting article relative to the new coinage law of the Republic, providing that the gold or silver "peso," or dollar, shall be the unit of value—the gold dollar to contain 25.1 grains of standard gold, 900 fine, and the silver dollar 25 grams (385.8 grains), the same weight as 2 half-dollars of our present coinage. He states that the national mint is now running day and night with a view to putting the new coins (8 millions of gold and 4 millions of silver) into circulation as soon as possible.

The government has issued a decree fixing the value of the old coins and moneys in circulation with respect to the new unit of value. This is the first authorized metallic currency of the republic, the circulating medium heretofore having been paper money and coins of gold and

silver of foreign countries.

The bank-notes outstanding June 30, 1881, amounted to \$37,101,756. By the terms of the new coinage law all these notes must, within two years, be withdrawn and replaced by notes corresponding with the new monetary unit.

BOLIVIA.

Hon. Charles Adams, minister at La Paz, forwards a communication, dated August 30 of the present year, treating of the coinage, production, and consumption of the precious metals in that country during the year 1881. He states that no gold was coined during the year, but 47,425 kilograms of silver, equal to \$1,970,983, were coined at the national mint at Potosi into 20-cent and 10-cent pieces.

The silver exported amounted to about 500,000 Bolivianos, equal to \$411,500 in coin, and \$,000,000 Bolivianos, equal to \$6,584,000 in ores.

The production of the mines was, of gold, about 3,500 ounces, \$72,345; and of silver, 1,100,000 marks, valued at \$11,000,000. No gold is in circulation or in reserve in the banks.

The silver circulation of Bolivia on the 31st of December, 1881, is estimated to have been 6,000,000 Bolivianos, equal to \$4,938,000, with about 539,000 Bolivianos, equal to \$443,597, in the various banks.

The paper circulation at the same time (bank exclusively) amounted

to about 1,374,869 Bolivianos, equal to \$1,131,517.

CHILL.

The United States consul at Valparaiso forwards a dispatch relating to the finances of Chili.

The coinage for the year 1880 was, gold, \$108, 930; silver, \$2,226,392.75, and for 1881, gold, \$125,280; silver, \$3,020,000.95.

The imports and exports for the year 1880 are given as—

Gold imports	\$16,945
Silver imports	26, 104
Gold exports	64, 4 76
Silver exports	4, 546, 799

The production of the mines was about \$128,869, gold, and \$5,081,747 in silver.

The circulation of the country on the 31st of December, 1880, was, coin, \$2,500,000; paper, \$28,469,813; and the paper circulation on December 31, 1881, was \$26,555,341.

The coin in reserve is stated as follows:

In banks	 . \$1,600,000
In treasury	

HAYTI.

Minister Langston forwards a special report on the national bank of Hayti, and a copy of a law passed by the *Corps Legislatif* of the Republic of Hayti fixing the standard of weight, value, and denomination of the new gold, silver, and bronze national money, to be known as "gourdes," the aggregate to be 2,000,000 gourdes, and the coinage to be executed at Paris. He also furnishes a reply, under date of July 14 of the present year, to the Treasury Department circular inquiring in relation to the monetary affairs of that republic. He states that \$780,000 of the new silver "gourdes" were coined during the calendar year 1881, and put in circulation.

The imports of gold coin amounted to \$11,494, and of silver coin, including the new national money, \$836,785, while the exports for the

same period were, gold, \$1,550, and silver, \$517,488.

Mr. Langston estimates the gold of the republic to have been, on December 31, 1881, from three to five millions of dollars.

URUGUAY.

Consul A. L. Russell forwards from Montevideo a dispatch relative to the coins used in Uruguay and value at which the coins of other countries are received.

THE WORLD'S PRODUCTION OF GOLD AND SILVER.

The production of the precious metals in twenty countries whose mines furnish nearly the entire product, is given as revised for the years 1879 and 1880, and is brought down to the close of the calendar year 1881.

For the latter year, based upon estimates for some of the smaller producing countries, the total production of gold was, kilograms, 162,163, \$107,773,157; silver, kilograms, 2,349,689, \$97,659,460. This is a slight increase upon the production stated for 1880, being about one and a half millions more in gold and three millions in silver.

THE WORLD'S COINAGE.

The coinage of the United States in both gold and silver has continued to be greater than that of any other nation. For the calendar year 1881 more than two-thirds of the year's gold coinage—\$136,387,383—and over one-fourth of the total silver coinage—\$100,705,824—were executed at the mints of the United States.

The coinage for the three years 1879, 1880, 1881, officially obtained, is as follows:

Years.	Countries.	Gold.	Silver.	Total.
1879		\$90, 752, 811 149, 645, 236 136, 387 383	\$104, 888, 313 82, 397, 154 100, 705, 824	\$195, 641, 124 232, 042, 390 237, 093, 207
Total		376, 785, 430	287, 991, 291	664, 776, 721

CIRCULATION OF THE PRINCIPAL COUNTRIES OF THE WORLD.

A table giving the paper and specie circulation of thirty-four of the principal countries of the world, total and per capita, has been compiled from official dispatches and other accessible data.

The paper circulation embraces both bank and government issues intended to be used as money, and the total amount of gold and silver coin in the countries, respectively, without deduction for such amounts as may be held as treasury or bank reserves, and in most cases probably includes the bullion as well as the coin of the countries.

The total amount of circulation of these countries is \$3,825,220,078 paper, \$3,353,673,748 gold coin, \$2,182,768,866 silver full legal tender, \$438,000,969 limited legal tender; total specie, \$5,974,443,583; total circulation, including reserves, \$9,799,663,661.

A further table has been prepared stating the government and bank issues and the reported metallic reserves of gold and silver held in bank and treasury vaults. The total amount of government paper issue of thirty one countries, given in Table No. XXXII, was \$1,183,054,771 and the bank issue \$2,642,165,307, a total of \$3,825,220,078. The metallic reserves in the treasuries and banks of the same countries, as far as known, amounted to \$1,698,986,763.

An additional table is appended in which the amount of the bank and treasury reserves is deducted from the total metallic and paper circulation, for the purpose of showing, in thirty-five countries, the total amount in active circulation, which, outside of the banks and treasuries, was \$8,100,676,898. The per capita of active circulation in each of the countries is also given.

I have again to acknowledge the faithful and efficient services of the clerks of the Mint Bureau, among whom Messrs. Preston, Leech, and Eckfeldt are entitled to special mention for their valuable assistance in preparing tables and compiling and arranging statistical material embodied in this report.

I am, very respectfully,

HORATIO C. BURCHARD, Director.

Hon. Charles J. Folger, Secretary of the Treasury.

APPENDIX.

1.-DEPOSITS and PURCHASES of GOLD and SILVER BULLION during the fiscal year ended June 30, 1882.

XIX.-ASSAY of COINS of JAPAN.

[Translation.]

LEGATION OF JAPAN, Washington, 1st, 10th month, 14 Meiji.

Sir: Under instructions from my government I have again the honor of transmitting to you, for the purpose of having them assayed at the mint of the United States, a number of cuttings and dips from the coinage of the Japanese mint for the financial year 1880-1881. According to the letter from the assayer of the imperial mint, a copy of which is inclosed for information, the accompanying packet contains three five-yen pyx pieces of gold coin and one gold cutting from bar, and five silver yen coins and one granulated dip.

It is hardly necessary for me to add that the kindness with which the Treasury Department has hitherto responded to the wishes of my government is most fully appreciated.

Accept, sir, the renewed assurance of my highest consideration.

YOSHIDA KIYONARI.

Hon. James G. Blaine, Secretary of State.

IMPERIAL MINT, ASSAY DEPARMENT, June 29, 1881.

DEAR SIR: Three five-yen and five silver yen coins, selected this morning by Mr. Yoshihara, vice-minister of finance, from the "pyx" pieces representing the coinage of the mint for the financial year 1880-1881, have been individually assayed by me. Ninety-eight, being the remaining five-yen coins, were melted and cast into a bar. A cutting was taken from this bar and assayed. Two hundred of the silver yen coins were melted, a "dip" was taken from the molten metal and granulated, and the granules were assayed.

The results are as follows:

Gold five-yen coin, August 21, 1880	900.0
Gold five-yen coin, February 28, 1881	900.1
Gold five-yen coin, May 5, 1881	900.0
Gold five-yen cutting from bar	899.8

Silver yen coin, August 21, 1880 Silver yen coin, December 16, 1880 Silver yen coin, January 21, 1881 Silver yen coin, April 14, 1881	900. 2 900. 3 899. 9
Silver yen coin, June 8, 1881 Dip granulated	902.2

Each coin, as well as the "cutting from bar" and the granules from "dip," was divided into four parts; one part was assayed by me as above, and the other three parts were separately sealed up in your presence and delivered to you.

In every case the coins are well within the permitted deviation as to fineness. I have the honor to be, sirs, your obedient servant,

WILLIAM GOWLAND, F. C. S., Associate of the Royal School of Mines.

The COMMISSIONER.

TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., October 13, 1881.

SIR: The following is the result of assays of the samples of gold and silver coin from the Japanese mint handed me by you for assay. I also give the assays of the mint of Japan:

	Japan.	United States.
Five yen, August 21, 1880 Five yen, February 28, 1881 Five yen, May 5, 1881 Cutting from bar Silver yen, August 21, 1880 Silver yen, December 16, 1880 Silver yen, January 21, 1881 Silver yen, April 14, 1881 Silver yen, June 8, 1881 Silver yen, dip granulated	900 899. 8 900. 4 900. 2 900. 3	900 900. 2 900. 1 900. 1 900. 6 901. 6 902. 6 900. 3 900

Very respectfully,

W. P. LAWVER, Assayer.

Hon. HORATIO C. BURCHARD, Director of the Mint.

XXI.-SILVER PURCHASES.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., January 13, 1882.

SIR: You are authorized to instruct the superintendents of the coinage mints, in the coinage of standard silver dollars, to use silver parted from gold deposits or received in payment of the charges on silver bullion deposited for bars, and to direct that all silver bullion procured in this manner, not needed to be held under the provisions of section 3545 of the Revised Statutes for the immediate payment of deposits for bars, be transferred to the silver-bullion-purchase account, and thereby become a purchase for silver coinage at the rate paid or allowed depositors therefor.

Very respectfully,

CHAS. J. FOLGER, Secretary.

Hon. Horatio C. Burchard, Director of the Mint.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., January 30, 1882.

Sir: The several superintendents of the coinage mints are hereby authorized to purchase and receive for use in the coinage of standard silver dollars any mutilated, worn, or otherwise uncorrent United States silver coins of standard fineness when delivered in sums of three dollars and upwards, and to pay for the same, without previous melt or assay, at a rate not exceeding one dollar per onnce of silver of standard fineness therein contained.

Silver purchased under this authority may be held until the end of each month, and then deposited and entered in gross as a purchase from the superintendent or from one of his clerks.

Respectfully,

CHAS. J. FOLGER, Secretary.

Hon. Horatio C. Burchard, Director of the Mint.

TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., February 7, 1882.

The silver contained in bullion taken for assay from silver bullion deposited for unparted bars may be paid for by the assayers in charge of the United States mint at Denver and the assay offices at Helena, Boisé City, Charlotte, and Saint Louis in coin at the rate of one dollar per ounce of standard silver, and will be transmitted by them with other bullion to the coinage mints to be used in the coinage of standard silver dollars.

Respectfully,

HORATIO C. BURCHARD, Director.

Approved: Chas. J. Folger, Secretary.

XXII.—STATEMENT showing the NUMBER OF OUNCES at STANDARD and COST of SILVER BULLION PURCHASED and DELIVERED at the COINAGE MINTS and the ASSAY OFFICE at NEW YORK, and the NUMBER of SILVER DOLLARS COINED EACH MONTH from March 1, 1878, to December 31, 1881.

|This statement includes bullion carried to silver-purchase account since January 1, 1881, received in payment of charges retained in fractions of bars paid for in coin and surplus deposited or returned at annual settlement.]

Date.	Ounces at standard of silver bullion purchased and delivered.	Cost.	Standard silver dollars coined.

XXIII.—CIRCULAR, ESTIMATING AND PROCLAIMING, IN UNITED STATES MONEY OF ACCOUNT, THE VALUES OF THE STANDARD COINS IN CIRCULATION OF THE VARIOUS NATIONS OF THE WORLD.

DEPARTMENT No. 1. Secretary's Office.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, D. C., January 2, 1882.

SIR: In pursuance of the provisions of section 3564 of the Revised Statutes of the United States, I have estimated the values of the standard coins in circulation of the various nations of the world, and submit the same in the accompanying table.

Very respectfully,

HORATIO C. BURCHARD,
Director of the Mint.

Hon. Chas. J. Folger, Secretary of the Treasury.

ESTIMATE of VALUES of FOREIGN COINS.

TREASURY DEPARTMENT, Washington, D. C., January 2, 1882.

The foregoing estimation, made by the Director of the Mint, of the value of the foreign coins above mentioned, I hereby proclaim to be the values of such coins expressed in the money of account of the United States, and to be taken in estimating the values of all foreign merchandise, made out in any of said currencies, imported on or after January 1, 1882.

CHAS. J. FOLGER, Secretary of the Treasury.

^{*} Official estimate, "L'Economiste Français," July, 1881, p. 112. † Estimated the same as 1879. £ Estimated the same as 1880. § Production for 1880 with increased production of Victoria, New South Wales, and Tasmania in 1881 added.

[|] Dr. A. Soetheer.

a From total production 17 per cent. of gold and 25 per cent. of silver deducted for foreign ores.

b Estimated.

d Production of British Columbia only, shipped through Wells, Fargo & Co., and the official report of the yield of the mines of Nova Scotia.

The foregoing statement omits mention of a large amount of official work which does not admit of systematic classification and detailed report, and yet has occupied much time and care; such as, e. g., investigation of legal points arising in the adjustment of accounts, and the preparation of opinions and decisions printed under the authority of Congress; the examination of, and decision upon applications for the issuing of duplicate bonds and other securities lost and destroyed; examination of powers of attorney for collection of money due to creditors of the United States; decisions upon the rights of persons claiming to be executors, administrators, or heirs of deceased claimants, to receive money due from the United States; examination of official bonds; copying of letters forwarded; answering calls for information made by Congress, the Departments, and private persons; receiving and examining emolument returns, and other work of a miscellaneous character.

RENEWAL OF THE ACT OF JUNE 14, 1878.

The fourth section of the act of June 14, 1878 (20 Stat., 130), provides that—

It shall be the duty of the several accounting officers of the Treasury to continue to receive, examine, and consider the justice and validity of all claims under appropria-

Pages copied.....

tions the balances of which have been exhausted or carried to the surplus fund under the provisions of said section that may be brought before them within a period of five years. And the Secretary of the Treasury shall report the amount due each claimant at the commencement of each session to the Speaker of the House of Representatives, who shall lay the same before Congress for consideration: Provided, That nothing in this act shall be construed to authorize the re-examination and payment of any claim or account which has been once examined and rejected, unless reopened in accordance with existing laws.

The "period of five years" mentioned in this section will expire June 14, 1883, before the Forty-eighth Congress will assemble. I respectfully recommend that you will call the attention of Congress to this subject, as it would seem proper that the provision above cited should be extended.

It may be well to consider whether it is not desirable that there should be a *permanent statute* authorizing the examination and report to Congress of all claims under appropriations, the balances of which have been exhausted or carried to the surplus fund, which may be brought before the proper accounting officers within five years after the appropriation was made, or, perhaps, more properly, within five years after the right of the claimant originated.

DISBURSING OFFICERS.

By existing law, most of the money with which disbursing officers make payments is placed to the credit, respectively, of these officers with an assistant treasurer or designated depository of the United States, and is disbursed on checks to the order of each claimant entitled to payment. When payment is thus made by check, a voucher is executed to the disbursing officer, and on such vouchers his accounts are settled. There is generally no settlement of an account by the accounting officer of the Treasury Department of the money so deposited.

It is possible that some, if not many, of the disbursing officers' checks may never be presented for payment, and there is no general mode of verifying the accuracy of the accounts of depositaries with disbursing officers.

I respectfully call attention to the subject, so that you may consider whether it is desirable to recommend to Congress that provision be made for the settlement of such accounts.

Under section 310 of the Revised Statutes the Secretary of the Treasury is every year in receipt of returns from the proper officers or designated depositaries, reporting outstanding balances to the credit of disbursing officers or agents which have remained unchanged on the books of their respective offices for three years.

Generally, in the cases thus reported, the disbursing officers have long before ceased to act in that capacity, and in many instances their accounts as such officers or agents have been adjusted and closed on the books of this Department.

Frequently, after a lapse of three years, in consequence of the death or unknown residence of the late disbursing officer, it is found impracticable to secure the returns from him, as contemplated by the last clause of said section, and therefore very difficult to determine to what fund or appropriation the reported outstanding balance belongs. To avoid the doubt and difficulty arising in such cases, I respectfully rec-

ommend that said section 310 be amended by an additional provision, as follows:

Every disbursing officer of any Department of the Government, on rendering his account at the end of his term of service, shall report therewith whether or not any public funds remain standing to his credit, as such officer, in any office or bank or other depository; and if so, what checks, if any, have been drawn against the same or any part thereof, which are still unpaid and outstanding.

In this connection I respectfully call attention to the following extract, taken from the Report of the Secretary, dated December 2, 1878:

By an act approved March 3, 1857, public disbursing officers were required to place all public funds, intrusted to them for disbursement, on deposit with a public depositary, and to draw for the same only in favor of the persons to whom payment was to be made, excepting that they might check in their own names when the payments did not exceed twenty dollars.

The enforcement of this provision, according to its letter, was found impracticable, and the attention of Congress was called to it in the annual reports of the Secretary

for 1857 and 1858, with a recommendation for its modification.

No action in the matter appears to have been taken by Congress until the act of June 14, 1866, reproduced as section 3620 Revised Statutes, was passed. This appeared to supersede the act of 1857, in removing the restrictions as to the method in which the money was to be drawn; but by an act approved February 27, 1877, section 3620 has been amended by requiring the checks to be drawn only in favor of the persons to whom payments are to be made.

The object which the law evidently seeks to accomplish meets the entire approval of the department, but to carry its provisions into effect would require paymasters in the Army to draw their checks in favor of the soldiers to be paid, by name, and paymasters on naval vessels, even during absences for years from the United States, to pay the officers and men only by drawing checks in their favor, on depositaries in the

United States.

The same embarrassment extends to all public disbursements, and the attention of Congress is called to the matter, with the recommendation that the section be so amended that disbursements may be made under regulations to be prescribed by the Secretary of the Treasury.

The difficulties presented by this statement remain, and hence attention is called to the subject. See Report Secretary of the Treasury of December 5, 1881, and Report of 1856–'57, page 24.

DEPUTY COMPTROLLER.

The usage in this office, which is probably required by law, has been that the First Comptroller, when present in person, countersigns all warrants and signs other official papers. I respectfully recommend that the Deputy Comptroller be authorized, under the direction of the Comptroller, to sign all official papers and countersign warrants, except, perhaps, "accountable warrants," which require the signature of the Secretary of the Treasury himself, when present.

As the duty of signing all official papers is, by law, imposed on the Deputy as Acting Comptroller in case of the Comptroller's absence, and as the time of the Comptroller, when present, is almost wholly required for the proper examination of questions of law and matters of official importance, there would seem to be no ground of objection to

the measure proposed.

Under orders of the House of Representatives, a volume of the decisions of the Comptroller for the year 1880, and one for 1881, were printed, and copies will be furnished, fixed in number by law. In addition to these, fifty copies were distributed to the Departments in sheets, as originally printed under the authority of the Treasury Department. The Comptroller ordered printed, on his own account and expense, a limited number of copies, which can, if desired, be furnished

at cost to Departments, or be disposed of otherwise, if Congress, at its next session, shall so direct, but if not, they will be disposed of by the Comptroller.

Your attention is respectfully invited to the recommendations contained in my last annual report, the propriety of which seems to me to be confirmed by observation and experience during the past year.

I have the honor to be, very respectfully,

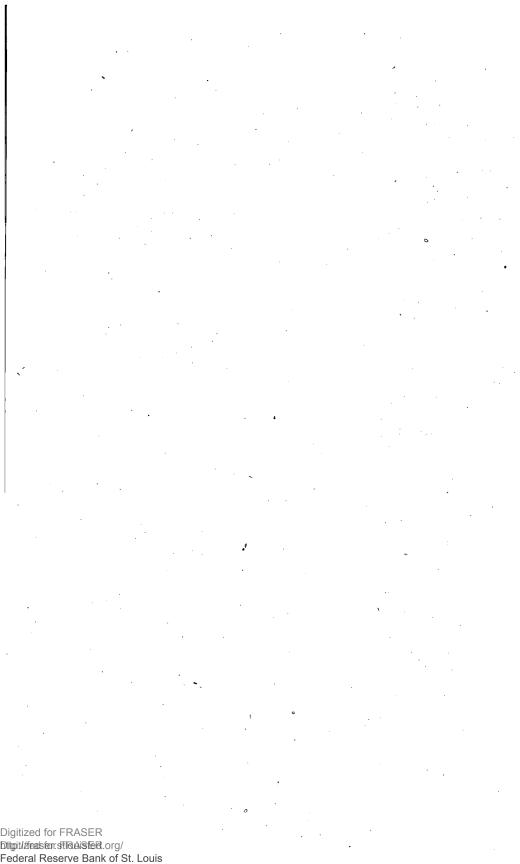

° WILLIAM LAWRENCE, First Comptroller.

Hon. Chas. J. Folger, Secretary of the Treasury.

REPORT

OF

THE SECOND COMPTROLLER OF THE TREASURY.

TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, Washington, October 26, 1882.

SIR: In compliance with your direction, by letter of the 8th ultimo, I submit a report, in two tabular statements, of the transactions of this office during the fiscal year which ended on the 30th day of June, 1882.

The first tabular statement shows the total number of accounts, claims, and cases of every kind settled and adjusted and the amounts allowed

thereon.

The second table furnishes a more detailed statement of the same accounts, claims, and cases, showing the character of the accounts, the source from which received, the number of each kind, and the amounts allowed. A still more detailed statement is prepared and filed for preservation in this office, but it is deemed too voluminous for publication.

NUMBER of CASES SETTLED.

Federal Reserve Bank of St. Louis

The current work of the office is in a more advanced condition than it has previously been since the year 1861, the quantity of delayed current accounts having been steadily diminished each quarter year for several years past, with a corresponding diminution of time between their rendition and settlement; and, except in the settlement of the accounts and claims hereinafter specially referred to, the work of the office has been promptly dispatched during the year.

Owing to the effect of the decision of the Supreme Court of the United States in the case of Capt. R. W. Tyler vs. the United States, rendered at the October term, 1881, which changed the mode of computing the longevity increase payable to officers of the Army, a very great amount of additional work has devolved upon this office in the

adjustment of Army officers' accounts.

In addition to the new work thus originated, it has been deemed necessary to enter upon the settlement of the accounts heretofore accrued in favor of the Soldiers' Home under the act of March 3, 1851 (section 4818, Revised Statutes), which grants to that institution all stoppages and fines adjudged against soldiers, all forfeitures on account of desertions, and the custody of the money of deceased soldiers remaining unclaimed for three years. It is estimated that the amount due to the Soldiers' Home on these accounts exceeds a million dollars, and that the settlement of these two classes of accounts will require labor more than equivalent to that of eight experts for a period of one year.

It also happens that the number of soldiers' bounty claims transmitted to this office for settlement during the last ten months is much in excess of those transmitted for similar periods within several years

past.

The pressing necessity for early settlement of these three classes of claims has made it necessary to place upon them nearly all the force heretofore employed in the current work of settling paymasters' accounts; thirteen out of the fourteen men on duty in the Army pay division of the office being at present engaged thereon.

Whatever means can be lawfully taken to increase the number of experts in the revision of Army pay accounts thus accumulating in the

office will be greatly to the advantage of the service.

Very respectfully,

W. W. UPTON, Comptroller.

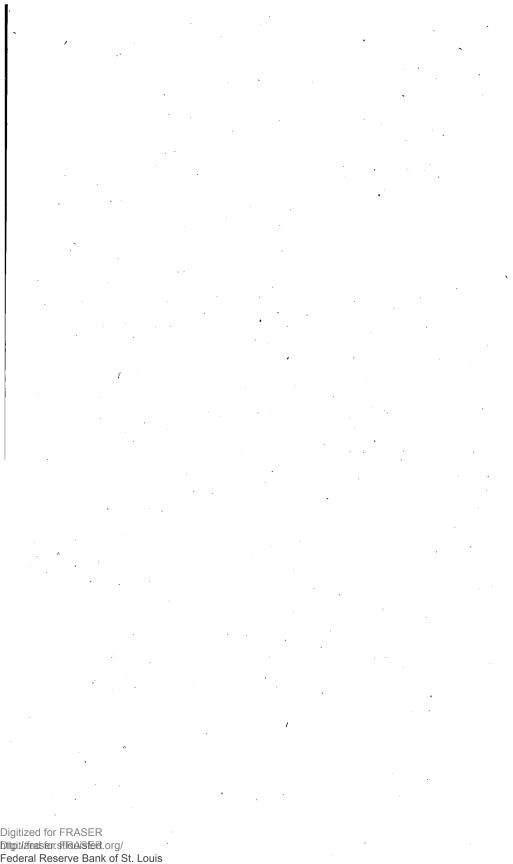

Hon. Chas. J. Folger, Secretary of the Treasury.

REPORT OF THE COMMISSIONER OF CUSTOMS.

The foregoing exhibits and enumeration of the various accounts which have been examined during the year and the balances certified as by law

provided, show a further increase of clerical labor required over that shown in my report for fiscal year ended June 30, 1881, and this clearly indicates the necessity for an increase in the number of clerks assigned to this bureau.

In view of the fact that the official work of this office gradually increased for twenty years, as was shown in detail in official report of 1880, and the further fact that this increase of labor continued during the fiscal years 1881 and 1882, the necessity for greater clerical force is more clearly demonstrated.

The work for the fiscal year is unprecedented in the history of the

bureau.

The increased number of appropriations for erection of public buildings and for miscellaneous purposes indicates larger requirements upon the office for the fiscal year ending June 30, 1883.

For the foregoing reasons, and for reasons stated more fully in my last report, I respectfully and earnestly ask for an additional chief of

division and for at least three clerks of class three.

While I well know that one additional clerk beyond the necessities of the public service in any bureau or office is an injury to the service as well as a needless expenditure of the public moneys, I am convinced that the increase now asked grows out of a necessity pressing upon this office; and I would be derelict in duty should I not call attention to the condition of the work demanding additional clerical force.

In closing this report, I desire to commend the deputy auditor and the chiefs of divisions, through whose diligence, energy, and care the increased work of this bureau has been so promptly dispatched during

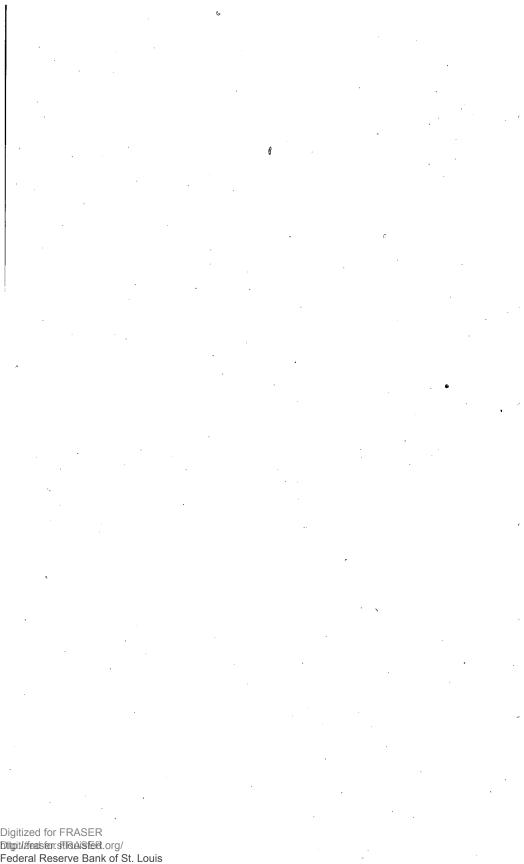

the fiscal year.

I wish to renew to them and to the clerks and employes of this office expressions of esteem and confidence.

I am, most respectfully, your obedient servant,

R. M. REYNOLDS, First Auditor. REPORT OF THE SECOND AUDITOR.

297

REPORT

OF

THE SECOND AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, Washington, October 11, 1882.

SIR: In compliance with your request of the 6th ultimo, I have the honor to submit my report for the fiscal year ending June 30, 1882, showing the work performed during that period and the condition of the public business intrusted to my charge at the close of the year.

BOOKKEEPERS' DIVISION.

The following statement of amounts drawn from and repaid to the War Department appropriations on the books of this office, is furnished pursuant to the act of March 3, 1817 (section 283 of the Revised Statutes), which requires that the auditors charged with the examination of the accounts of the Department of War shall annually report to the Secretary of the Treasury the application of the money appropriated for that Department. To this statement are added the drafts and repayments on account of the appropriations for the Indian service, without which the record of the financial transactions of the office would be incomplete.

Appropriated by special act of relief	14,675 85

ers' division, incidental to keeping the accounts of the office:

Requisitions registered, journalized, and posted, 4,960; settlements recorded, journalized, and posted, 4,197; settlements made in the division chiefly to adjust and close accounts, 428; statements of balances, &c., furnished to settling clerks, 1,257; certificates of deposit listed and indexed, 1,078; repay requisitions prepared for the War and Interior Departments, 505; appropriation warrants recorded and posted, 45; official bonds of disbursing officers entered, 52; certificates of non-indebtedness issued in cases of officers, 416; and enlisted men, 913; letters written, 584; amount drawn from the Treasury on settlements made in this division, \$264,811.28.

PAYMASTERS' DIVISION.

	Paymasters' accounts.	Longevity claims.
On hand unexamined July 1, 1881	312 588	1, 120
Total. Audited and reported to the Second Comptroller	900 398	1, 120
On hand not examined June 30, 1882.	502	1,083

The amount involved in 398 disb	ursing accounts, 37 claims, and 339
miscellaneous settlements was \$10,	

Amount disbursed by paymasters	\$10,674,983	91
Amount paid to officers of the United States Army under the decision	" , ,	
of the Supreme Court in the matter of computing "longevity" pay.	15,538	68
Amount paid to the Soldiers' Home	81,877	81
Amount transferred to the books of the Third Auditor's office on ac-	ŕ	
count of—		
Tobacco sold to soldiers	106, 271	53
Stoppages for subsistence stores, &c	33, 429	29
Charges on account of overpayments	9,920	48
Amount of overpayments refunded	4, 495	79
Sundry charges and credits		49
Total	10, 938, 144	98

The service records of 233 officers have been re-examined to determine their pay status under the acts of June 13, 1878, and February 24, 1881.

The record of deposits by and repayment of deposits to enlisted men of the Regular Army, under the act of May 15, 1872, shows that 8,558 deposits were made, amounting to \$480,150.69, and that 6,673 deposits, amounting to \$399,032.32 were repaid to soldiers on their discharge from the service. During the four years that this record has been kept the deposits have aggregated \$1,762,280.24, and the repayments, inclusive of interest, \$1,127,293.73.

Letters received, 1,216; letters written, 2,776.

MISCELLANEOUS DIVISION.

Received during the year from the Secretary of War, the Adjutant-General,	514
Surgeon-General, and Chief of Orduance	1,869
	
Total	
Accounts settled during the year	1,889
• • • • • • • • • • • • • • • • • • •	
Remaining on hand June 30, 1882	494
The amount of disbursements allowed in the settlement of acco	unts

The amount of disbursements allowed in the settlement of accounts was \$3,937,981.30, under the following appropriations:

Arming and equipping the militia, armament of fortifications, manu-

facture of arms at national armories, ordinance, ordinance stores a	
supplies, ordnance service and other appropriations of the Ordnan	
Department	\$1,755,179 65
Medical and hospital department, artificial limbs, medical museum a	nd
library, and other appropriations of the Medical Department	455, 895 10
Regular and volunteer recruiting, claims for repayment of local boun	ty,
accounts for payment of arrears of pay and bounty to colored soldie	ers,
&c	369, 163 54
Contingencies of the Army, expenses of military convicts, publicati	on
of Official Records of the War of the Rebellion, contingencies of the	Ad-

The work of compiling the pay record of officers of the Regular Army and volunteer force has progressed rapidly, 109,611 payments having been entered during the year. Incidentally twenty-seven double payments to volunteer soldiers were discovered and reported for collection. A comprehensive index to this voluminous record has been completed and has proved of great assistance to the many clerks whose work necessitates constant reference to it. Letters written, 2,755.

INDIAN DIVISION.

The work done in this division is shown by the following statement:

	Money accounts.	Property accounts.	Claims.
On hand July 1, 1881	24	331	60
	958	558	3, 009
Total	982	889	3, 129
	797	513	3, 026
On hand June 30, 1882	185	376	103

The amount disbursed was \$6,154,440.83, as follows:

Sixty-three transcripts of Indian agents' accounts have been forwarded to the Second Comptroller for transmittal to the Department of Justice in order that suits may be entered against the agents and their sureties. The balances declared to be due the United States in these sixty three cases amount to more than \$1,000,000, and consist to a great extent of items disallowed by the accounting officers for reasons not necessarily incompatible with the personal integrity of the agents to be sued.

During last year the sum of \$6,783.06 was recovered by suit and otherwise in full settlement of the accounts of certain agents no longer in commission. Letters written, 4,834.

PAY AND BOUNTY DIVISION.

This division is charged with the settlement of all claims for bounty and arrears of pay, except such claims as are filed by officers of the Army, still in service, for increased longevity allowance under the recent decision of the United States Supreme Court—these claims having been assigned to the Paymasters' Division. As will be seen by the subjoined tabular statements, fair progress has been made in the examination and settlement of claims during the past year:

Examining Branch.

	·					
Classes of claims.	Claims pending July 1, 1881.	New claims received.	Sent to settling branch.	Disallowed.	Keferred to other offices.	Claims pending June 30, 1882.
White soldiers. Commissioned officers Enlisted men, subsequent to April, 1861—arrears of pay and all bounties Claims for pay prior to April, 1861 Claims of Army laundresses, sutlers, tailors, &c Colored soldiers.		1, 023 8, 160 216 40	175 2, 328 38 29	178 7, 867 123 9	22 2, 243 5	2, 005 19, 662 227 55
Arrears of pay and bounty	6, 153	3, 230	864	1, 342	86	7,091
Total	31, 680	12, 669	3, 434	9, 519	2, 356	29, 040

Settling Branch.

Classes of claims.	Claims pending July 1, 1881.	Received from examining branch.	Claims settled and allowed.	Claims disallowed.	Referred to other offices.	Claims pending June 30, 1882.
White soldiers.	[
Commissioned officers Enlisted men, subsequent to April, 1861—arrears of pay and all bounties Claims for pay prior to April, 1861 Claims of Army laundresses, sutlers, tailors, &c	950	2, 521 38 29	c2, 466 38 29	, 45	75	885
Colored soldiers.						
Arrears of pay and bounty	117	846	838	10	21	94
Total	1, 067	3, 434	3, 371	55	96	979

The claims settled and allowed averaged a fraction more than \$132.68 each, the total amount being \$447,267.10. The claims disallowed amounted to upward of one million dollars. Letters written, 78,114.

DIVISION FOR THE INVESTIGATION OF FRAUD.

On July 1, 1881, 7,823 cases remained on hand; 380 new cases have been received during the year, making a total of 8,203 before the division. Of these, 6,135 were examined and partially investigated; 1,317 were finally disposed of, and 6,886 remain on hand for further action. The cases not disposed of are as follows:

Unsettled claims:	
White soldiers	432
Colored soldiers	1 584
	2,016
Settled claims:	•
White soldiers	734
Colored soldiers	3 779
	4,513
Double payments to officers	357
Total	6.886

The sum of \$4,311.66 has been recovered by suit and otherwise, and deposited in the Treasury; judgments amounting to \$2,002.46 have been obtained, but are not yet satisfied; \$1,242.20 has been secured to claimants from persons unlawfully withholding it, and \$226 has been returned to the Treasury by the Pay Department in cases of colored soldiers.

Abstracts of material facts have been made in 478 cases; 40 cases were prepared for suit and criminal prosecution and transmitted to the Department of Justice, and 5,655 letters were written.

I would again invite attention to a matter that has been referred to in half a dozen annual reports, namely: The necessity for some act on on the part of Congress looking to an adjustment of the claims of those colored soldiers who allege that they were defrauded out of their arrears of pay and bounty by the subordinate agents of the late Freedmen's Bureau.

PROPERTY DIVISION.

The work of this division is now confined to the examination and settlement of the quarterly returns of clothing, camp and garrison equipage, rendered by all officers of the Army who are responsible for that description of property. These returns, by which upward of one million dollars worth of property is accounted for annually, are not examined by any other accounting officer, so that the action of this office is final.

On July 1, 1881, 6,241 returns were on hand unsettled; 3,569 have since been received; 4,652 have been examined, and 4,132 have been settled, leaving 5,678 on hand June 30, 1882. Charges amounting to \$4,178.84 have been made against officers for property not satisfactorily accounted for, and \$1,235.81 has been collected on that account. Letters written, 2,419; letters recorded, 906.

DIVISION OF INQUIRIES AND REPLIES.

In addition to the 12,937 inquiries from various bureaus which have been answered during the year, as shown by the subjoined statement, the following miscellaneous work was performed in this division: 412 rolls and vouchers copied and verified; 3,097 accounts-current, affidavits, abstracts, certificates of disability, final statements, furloughs, general orders, letters, statements of differences, &c., copied for the office; 13,790 descriptive lists briefed and filed; 3,557 signatures compared, and 4,131 letters written.

Overpayments amounting to \$8,696.50 have been discovered and reported for collection, and the sum of \$968.82 on account of overpayments previously reported has been recovered and repaid to the appro-

priations from which the money was drawn.

Office making inquiry.	On hand July 1, 1881.	Received.	Answered.	On hand June 30, 1882.
Adjutant-General Quartermaster-General Commissary-General Commissioner of Pensions Third Auditor Miscellaneous	93 818 203	4, 962 272 1, 796 1, 073 627 751	7, 324 328 1, 885 1, 866 783 751	424 111 4 25 47 3
Total	3, 970	9, 481	12, 937	514

DIVISION OF CORRESPONDENCE AND RECORD.

Letters received, 23,069; letters written, 18,990; letters referred to other offices, 598; letters recorded and indexed, 1,040; letters returned uncalled for, 354; claims received, briefed, and registered, 16,213; miscellaneous vouchers received, stamped, and distributed, 75,081; letters containing additional evidence to perfect suspended claims briefed and registered, 13,371; pay and bounty certificates examined, registered and mailed, 4,236; pay and bounty certificates examined, registered and sent to the Pay Department, 3,859; reports calling for requisitions sent to the Secretary of War, 465; miscellaneous cases disposed of, 5,869.

ARCHIVES DIVISION.

The increased and much-needed accommodation provided for the files of the office, to which reference was made in last year's report, has been

20 F

taken advantage of to as great an extent as possible. Between three and four million muster and pay rolls and other important and valuable vouchers have been placed in permanent boxes and rearranged with a view, first, to their preservation; secondly, to facility of reference; and thirdly, to economy in space. Incidental to this work it was necessary to examine and verify 1,820,285 vouchers; to steucil 7,331 file-boxes with the number, date, &c., of the settlements, and to brief 6,268 boxes, so as to clearly indicate the character of the vouchers therein contained. The regular business of the division is shown by the following statement:

Paymasters' accounts received from the Pay Department	519
dexed, and filed: Paymasters', 107; Indian, 2,393; miscellaneous, 1,017	3,517
Miscellaneous accounts withdrawn for reference and returned to the files	1,768
Vouchers withdrawn from the files for use in the settlement of accounts and	
claims and for repairs	29,657
Vouchers returned to files	43,958
Vouchers briefed	60,237
Mutilated and worn vouchers repaired and retured to the files	15,090
Number of pages copied	2,797
Letters written	319

PROCEEDS OF INDIAN LABOR. ..

For several years past questions have arisen from time to time, in the settlement of Indian agents' accounts, as to the proper disposition of moneys derived from the product of Indian labor, pasturage on Indian lands, &c. In June, 1876, the matter was referred to the First Comptroller (Hon. R. W. Tayler), who said: "In my opinion, receipts for the product of labor of Indians and for use and occupancy of their lands are not public moneys, within the meaning of section 3,618 of the Revised Statutes, which are to be covered into the Treasury as miscellaneous receipts. If such moneys should be covered into the Treasury they cannot be withdrawn except on appropriations made by law. While it is probable such moneys may, under the direction of the Department of the Interior, be expended for the benefit of the Indians, I am not aware of any law which provides for it. If the Secretary of the Interior should deem it proper, I think Congress would direct the mode of expenditure." The Secretary of the Treasury concurred in this view and recommended to the Secretary of the Interior that Congress be requested to authorize the deposit of such funds to the credit of an appropriation for the benefit of the particular tribe or band of Indians entitled thereto. On October 18, 1876, the Secretary of the Interior wrote as follows to the Commissioner of Indian Affairs: "The money may be expended under your personal direction, but, as a rule, when the money is received for the sale of produce, the result of the labor of any individual Indian, it should be expended for his sole benefit, and if of any considerable number less than a band it should be expended for their benefit, so that in all cases the Indian shall receive the benefit of his or her personal industry." In 1880 the Second Comptroller and Second Auditor agreed that in the settlement of Indian agents' accounts all such moneys should be charged and credited under the special caption of "Indian moneys—proceeds of labor, &c."

"Indian moneys—proceeds of labor, &c."

There can be no doubt as to the justice and equity of treating these moneys in the manner indicated above, but it needs the authority of law, and to that end I suggest that the subject be brought to the at-

tention of Congress.

MILEAGE OF ARMY OFFICERS.

Under section 1273 of the Revised Statutes, as amended by the act of July 26, 1876 (19 Stat., 100), officers of the Army traveling under orders, without troops, are allowed eight cents per mile, provided they have not been furnished with transportation in kind by the United I suggest that the law be further amended so that mileage shall not be allowed when an officer travels on a free pass. Officers o the Treasury and Interior Departments, and I presume of all other Executive Departments who present accounts for traveling expenses, are required to make affidavit that "no part of the travel has been under any free pass on any railway, steamboat, or other conveyance." It is neither just nor reasonable that officers of the Army should be paid eight cents per mile while traveling on free passes. In such cases they should be placed on equality with the civil officers of the United States, and should be reimbursed to the extent of their actual and necessary expenses, and no more. In analogy to what is demanded, under oath, from Treasury and Interior Department officials, Army officers should be required to certify on honor that charges for traveling expenses were actually paid or incurred, and that no part of the travel for which they claim mileage was made on a free pass on any railway, steamboat, or other conveyance.

THE SOLDIERS' HOME.

By section 4818 of the Revised Statutes all forfeitures on account of desertion and all moneys belonging to the estates of deceased soldiers, remaining unclaimed for three years subsequent to the death of such soldiers, are set apart and appropriated for the support of the Soldiers' Home. I find that twenty one years' arrearages are due said Home on account of moneys forfeited by those deserters from the regular Army who were never heard of after desertion. With a few trifling exceptions the accounts of such deserters have not been settled. When the men were dropped from the rolls of the Army such data as were necessary to an adjustment of their pay accounts were entered on the musterrolls, and there the matter ended. There is also a large sum due the Home on account of unclaimed money belonging to the estates of soldiers

who died prior to July 1, 1879. The aggregate amount payable to the Home from these two sources is estimated at upward of one million dollars. It is clearly the duty of the accounting officers of the Treasury Department to adjust and settle the accounts of deceased soldiers and deserters so that the Home may receive what the law has set apart and appropriated for its support, but the necessary clerical force is lacking. I estimate that it would take six experienced clerks five years in this office, and a proportionate number for the same period in the Second

Comptroller's Office, to bring the work up to date.

In view of all the circumstances, and considering especially the length of time that the Soldiers' Home has been deprived of a portion of its legitimate income, I venture to suggest a plan by which an equitable settlement between the United States and the Home can be arrived at without the expense and delay of examining and adjusting the pay accounts of deceased soldiers and deserters, namely: That Congress shall appropriate a reasonable amount, say one million dollars, to be deposited in the Treasury in accordance with the provisions of section 8 of Senate bill No. 1821, prescribing regulations for the Soldiers' Home, and now pending in Congress; said amount to be accepted by the Home in full discharge of all obligations on the part of the United States, under section 4818 of the Revised Statutes, up to and including June 30, 1879.

A STATUTE OF LIMITATION NEEDED.

Adverting to the remarks in my last annual report in regard to a statute of limitation, I again invite attention to the subject as one that calls for early and favorable consideration. There exists a continually increasing necessity for such a law. It is required, not that the payment of just debts may be evaded, but that the public treasury may be protected from unscrupulous claimants and from the vexatious demands of persons who, having received all they are entitled to, make new applications in the hope, apparently, that something in their favor may "turn up" on a re-examination of their claims, or that the evidence of former payment may not have been preserved. Of the claims growing out of the war of the rebellion only a small percentage of those last presented possess either merit or validity, and that percentage is diminishing with the lapse of time, while the labor of examination and investigation is materially increasing. A statute of limitation that would bar and preclude from settlement all claims growing out of the late war not presented within two years from the date of the enactment, and all other claims not presented within six years from the time they accrued would, I believe, be regarded with favor by all the accounting officers of the Treasury Department. Without such a statute no child now living will ever see the day when the presentation for payment by the government of claims of the class first mentioned will have ceased.

CONDITION OF THE PUBLIC BUSINESS.

The condition of the public business intrusted to my charge is shown by the following comparative statement of accounts and claims received, disposed of, and remaining on hand in the fiscal years 1881 and 1882:

	FISCAL YEAR 1881. Number of accounts and claims.			FISCAL YEAR 1882. Number of accounts and claims.			
Description of accounts, &c.							
	Received.	Disposed of.	On hand, June 30.	Received.	Disposed of.	On band, June 30.	
Disbursing accounts.			•				
Army paymasters	601	419	312	588	398	502	
Recruiting, medical, ord- nance, and miscellaneous. Indian agents	1, 732 847	1, 664 1, 166	514 24	1, 869 958	1, 889 797	494 185	
Totaldisbursingaccounts	3, 180	3, 249	850	3, 415	3, 084	1, 181	
Claims.							
Arrears of pay and bounty	8, 682 3, 052	9, 110 3, 140	32,747 60	13, 789 3, 069	15,434 3,026	31, 102 103	
Total claims	11, 734	12, 250	32, 807	16, 858	18, 460	31, 205	
Property accounts.							
Clothing, camp and garrison equipage	3, 649 354	4, 969 372	6, 241 331	3, 569 558	4, 132 513	5, 678 376	
Total property accounts.	4, 003	5, 341	6, 572	4, 127	4, 645	6, 054	
Aggregate	18, 917	20, 840	40, 229	24, 400	26, 189	38, 440	

It will be seen by the foregoing statement that, as compared with last year's record, there was an increase of 5,483 in the number of accounts and claims received, and of 5,349 in the number disposed of; and a decrease of 1,789 in the number on hand. While the business of the office is thus shown to be in a satisfactory condition in the aggregate, the state of disbursing accounts calls for some explanation. The recruiting, medical, ordnance, and miscellaneous disbursing accounts are promptly rendered to this office and are settled with sufficient dispatch to prevent accumulation. The accounts of Indian agents have temporarily accumulated, there being 185 on hand June 30, 1882, against 24 on hand June 30, 1881. This increase is accounted for by the fact that an unusually large number was received from the Indian Office too late to be taken up for settlement before the close of the fiscal year. The accounts of paymasters have unavoidably accumulated since June 30, 1880, on which date only 130 remained unexamined. On June 30, 1881, the number had increased to 312, and on June 30, 1882, it had still further increased to 502. This increase is due to two causes, namely, the insufficient clerical force of the paymasters' division, and the complex nature of the accounts, which now consist, not only of the ordinary bi-monthly muster and pay rolls of companies and detachments, final payments to discharged soldiers, and monthly pay accounts of commissioned officers, but also of mileage accounts and vouchers for telegrams, expenses of witnesses before courts martial, &c. The proper examination of mileage and telegram accounts adds very materially to the work of the auditing The delay in the settlement of paymasters' accounts now averages two years, so that a paymaster does not know how he stands officially on the books of the Treasury Department until two years after he has rendered his accounts, neither does the Treasury Department know until after the same lapse of time whether the paymaster has properly accounted for the large sums of money advanced to him for disburse-The law requires that "the Secretary of the Treasury shall cause all accounts of the expenditure of public money to be settled within each fiscal year" (section 250 Revised Statutes), and it would seem to be due to the paymaster and the sureties on his official bond as

well as to the United States, that some measure should be adopted which will enable the accounting officers to settle these accounts within the time prescribed by the statutes. The following case is given as a fair sample of the delay that occurs in the three offices through which an Army paymaster's accounts pass after leaving his hands:

. STATEMENT showing DELAY in SETTLING a PAYMASTER'S ACCOUNTS.

Date of accounts.	Received in the Pay- master-General's office.	Received in the Second Auditor's office.	Remarks.
July and Aug., 1879. Sept and Oct., 1879. Nov. and Dec., 1879. January, 1880. February, 1880. March, 1880. April, 1880. May and June, 1880.	January 13, 1880 February 16, 1880 March 15, 1880 May 11, 1880 May 15, 1880	March 25, 1880 June 14, 1880 July 3, 1880 July 27, 1880 August 25, 1880 August 25, 1880	

The average delay in each office was as follows: Paymaster-General's office, $3\frac{1}{6}$ months; Second Auditor's office, $10\frac{5}{6}$ months; Second Comptroller's office, $7\frac{1}{2}$ months.

The comparatively slight progress that has been made toward clearing off accumulated work is chiefly attributable to the repeated demands upon this office for clerks to assist in other bureaus of the Department. Emergencies will continue to arise when the power given to the head of a Department by section 166 of the Revised Statutes to alter the distribution of the clerks allowed by law and detail clerks credited to one bureau for service in another must be exercised. At one time, in consequence of an unusual amount of labor suddenly imposed upon the Loan Division and Register's office, no less than sixteen clerks on the pay-rolls of this office were detailed for work elsewhere. At the present time five are so absent, and the average for the last fiscal year was at least five. All these were experienced and efficient clerks, for such are always asked for, and none others taken or received.

While the clerical force was nominally the same, 5,349 more accounts and claims were disposed of than during the preceding year, and the number unsettled diminished by 1,789. The additional work of five efficient and experienced clerks would have largely increased these figures. No bureau of the department needs more than this the entire force accorded to it by law. Of the 38,440 unsettled accounts and claims, a very large proportion has been pending more than five years. It is not surprising, then, that claimants become importunate and not unfrequently abusive in their correspondence. They are entitled to a settlement, and it is extremely difficult to give a satisfactory reason for the delay. At the present time, so far as I am aware, there is no extraordinary demand upon any of the bureaus of the Treasury Department, and if more clerical force is needed it should be supplied by legislation. The business of this office is pressing. It has never to my knowledge had any assistance from other bureaus; certainly not without according an equivalent by an exchange, and it is fairly entitled to its legal complement of clerks.

The facts herein set forth as to the work performed during the year are sufficiently indicative of the faithfulness and efficiency of the clerical force of the bureau.

Very respectfully,

O. FERRISS, Auditor.

The Hon. SECRETARY OF THE TREASURY.

REPORT OF THE THIRD AUDITOR.

311

Digitized for FRASER

REPORT

OF

THE THIRD AUDITOR OF THE TREASURY

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, Washington, D. C., October 30, 1882.

SIR: I have the honor to transmit herewith report of the operations of this office for the fiscal year ended June 30, 1882. The following statement shows, in tabular form, the number and amount of accounts and claims remaining on hand unsettled at the close of the last fiscal year, the number received and audited, and the number and amount of accounts and claims remaining unsettled June 30, 1882, viz:

REPORT of BUSINESS TRANSACTED in the fiscal year ended June 30, 1882.

		•

QUARTERMASTERS' DIVISION.

The accounts of quartermasters cover a wide range of money and property responsibility. The former embraces disbursements for barracks and quarters, hospitals, storehouses, offices, stables, and transportation of Army supplies, the purchase of Army clothing, camp and garrison equipage, cavalry and artillery horses, fuel, forage, straw, material for bedding, and stationery; payment of hired men and of "per diem" to extra duty men; expenses incurred in the pursuit and apprehension of deserters; for the burial of officers and soldiers, for hired escorts, expresses, interpreters, spies, and guides; for veterinary surgeons and medicines for horses, for supplying posts with water, and for all other proper and authorized outlays connected with the movements and operations of the Army not expressly assigned to any other depart-Property purchased with the funds of the Quartermaster's Department is accounted for upon "returns" transmitted through the Quartermaster-General to this office (with the exception of "returns of clothing, camp and garrison equipage," which come under the supervision of the Second Auditor), showing that the disposition made of it is in accordance with law and Army regulations.

SUBSISTENCE DIVISION.

The subsistence division examines the accounts of all commissaries and acting commissaries in the Army, whose duties are to purchase the provisions and stores necessary for its subsistence, and see to their proper distribution. These commissaries render monthly money accounts, with proper vouchers for disbursements of the funds intrusted to them, together with a provision return, showing the disposition of provisions and stores purchased or derived from other sources. These accounts are received through the Commissary-General of Subsistence, and are examined and audited in this division. The money accounts and vouchers, together with a certified statement of the result of said examinations, are then referred to the Second Comptroller of the Treasury for revision. Upon their return from the Comptroller, with the settlement approved, the officers are notified of the result, and called upon to adjust or explain any omissions or errors that may have been discovered. money and provision accounts, together with the papers belonging thereto, are then placed in the settled files for future reference, and remain permanently in the custody of this office. The engineer branch is engaged in the examination of the accounts of officers and agents of the Engineer Department, who, under the direction of the Chief of Engineers of the Army (except the Superintendent of the Military Academy at West Point, whose disbursements are directed by the Inspector-General), disburse moneys out of the various appropriations, now 248 in number, made from time to time by Congress for works of a public nature, which may be classed under the following heads, viz: The purchase of sites and materials for and construction and repairs of the various fortifications throughout the United States; construction and repairs of roads, bridges, bridge-trains, &c., for armies in the field; survevs on the Atlantic and Pacific coasts; examination and surveys of the northern and western lakes and rivers; construction and repairs of breakwaters; repairs and improvement of harbors, both on sea and lake coasts; improvement of rivers, and purchase of snag and dredge boats for the same; and the expenses of the Military Academy at West Point.

The transactions of the subsistence and engineer branches for the fiscal year are shown by the following statement, viz:

STATE AND HORSE CLAIMS DIVISION.

The duties of this division embrace the settlement, under the various acts and resolutions of Congress relating thereto, of all claims of the several States and Territories for the costs, charges, and expenses properly incurred by them for enrolling, subsisting, clothing, supplying, arming, equipping, paying, and transporting their troops, employed in aiding to suppress the recent insurrection against the United States, and all claims arising out of Indian and other border invasions. Also the settlement of claims for compensation for loss of horses and equipage sustained by officers or enlisted men while in the military service of the United States, and for the loss of horses, mules, oxen, wagons, sleighs, and harness, while in said service, by impressment or contrat.

The average number of clerks employed in the Pension Division during the year, 40.

COLLECTION DIVISION.

STATEMENT of BUSINESS TRANSACTED by the COLLECTION DIVISION during the fiscal year ended June 30, 1882.

Tuly, 1881		Entries on register.	Number of special cases.	Accounts referred to.	Bounty land and pension cases examined.	Letters written.	Names of soldiers of war of 1812 ab- stracted.	Days comparing.	Cases prepared for suit.	Transcripts prepared for authentication.
Total	August, 1881 September, 1881 October, 1881 November, 1881 December, 1881 January, 1882 March, 1882 April, 1882 May, 1882 June, 1882 June, 1882	720 576 582 683 114 1, 245 990 586 575 814	128 212 367 354 334 313 844 336 259 235 273	2, 401 3, 318 6, 782 5, 667 6, 924 6, 303 6, 360 6, 882 4, 536 5, 104 5, 552	117 25 85 148 9 80 102 137 156 96 120	160 252 381 352 348 310 349 350 201 223 295	22, 455 14, 048 20, 036 24, 774 20, 268 18, 662 14, 923 21, 311 19, 999 20, 338 16, 592	28 46 32 40 54 52 42 54 50 54 52	1 4	12

There have been added to the files during the year new settlements as follows, viz: Miscellaneous claims, 3,505; money accounts of disbursing officers of the Army, 1,463; accounts of agents for paying Army pensions, 227; property returns of Army officers, 2,298; making a total of 7,493. A portion of the old settlements have been rearranged and relabeled, and a large number of mutilated abstracts have been repaired. All the records are now systematically arranged, and the old rooms are entirely filled. The room formerly occupied by the Bureau of Engraving and Printing, and assigned to this office, is not yet half filled, and it will suffice for at least three years. The records are in a good state of preservation. Four clerks have been constantly employed in arranging and keeping the files in good condition.

There were eight lady copyists employed in this office during the year. The number of pages copied and compared was as follows, viz: Miscellaneous papers, 17,780 pages; difference sheets, 1,480; letters, 5,575; total, 23,835. The papers received for copying and registered, were:

Miscellaneous, 3,588; difference sheets, 480; total, 4,068.

Under the provisions of section 886 of the Revised Statutes, in cases where suit is instituted to collect money due from pension agents the transcripts can be certified only by the Register of the Treasury, who has nothing whatever to do either with the settlement of said account or the custody of the same after settlement, and who can have no knowledge respecting the correctness of the transcript, except that gained from the Third Auditor. The Third Auditor is also without authority to certify transcripts for suit against failing contractors and other persons charged upon the books of his office. To remedy this defect in the law I respectfully suggest that section 886 of the Revised Statutes ought to be so amended as to provide that upon the trial of a suit against any person, on a contract with the United States, express or implied, or against any person accountable for public money, or the sureties of such person, a transcript from the books and proceedings of the Auditor of the Treasury Department, charged with the examination and settlement of the account with such person or persons, certi-

fied by the Auditor and authenticated under the seal of the Treasury Department shall be admitted on the trial of such suit as evidence of the balance due to the United States, and be entitled to the same degree of credit which would be due to the original papers or records if produced and authenticated in court.

By the act of Congress approved June 23, 1874, and the act of Congress approved March 3, 1875, authority is given the Secretary of War to pay the expenses of operating and keeping in repair the telegraph lines constructed and operated by the War Department in Texas, New Mexico, the Territory of Arizona, &c., out of any moneys received for dispatches sent over said lines, and any balance remaining after the payment of such expenses must be covered into the Treasury as a miscellaneous receipt. Under the construction placed by the accounting officers upon the several acts making appropriations for the construction, maintenance, operating, and keeping in repair the several telegraph lines under the control of the War Department, all funds received from the public for the transmission of private dispatches (excepting receipts from line extending from Bismarck, Dak., to Fort Ellis, Mont.) may be used by the War Department as hereinbefore indicated, instead of making deposit of the same in the Treasury, and said sums enter into the gross amount disbursed by the Signal Bureau of the War Department during a given fiscal year, but do not constitute any portion of the sums specifically appropriated by Congress in the usual manner, such funds having never been in the Treasury, thereby showing an excess of expenditures over amounts appropriated by Congress for that particular Section 3617 Revised Statutes, second edition, provides that the gross amount of all moneys received from whatever source for the use of the United States, except as otherwise provided in section 3618, shall be paid by the officer or agent receiving the same, into the Treasury at as early a day as practicable, without any abatement or deduction on account of salary, fees, costs, charges, expenses, or claim of any Receipts from these telegraph lines are not emdescription whatever. braced within the provisions of section 3618, and are not exceptions to the general law bearing upon the subject.

I think it requires no argument to show the wisdom of a provision of law which keeps the expenditure of the public revenue entirely under the control of Congress; and I am of opinion that a wise policy dictates that every dollar expended for the support of the government in all its branches should be traced directly to the Treasury, and the authority under which it was drawn therefrom. Inasmuch, therefore, as there appears to be a conflict between section 3617 of the Revised Statutes and the acts recited, I would respectfully suggest the propriety of legislation requiring all moneys received for the transmission of private dispatches over any and all of the lines owned or operated by the general

I respectfully renew my recommendation in regard to a statute of limitation. Such statutes are no longer looked upon with disfavor by courts or legislative bodies, and provisions of this kind respecting suits between individuals are, I believe, nearly universal. That which is everywhere conceded to be wise and just as between citizens of a State can but be considered fair and just as between the citizen and the State. Few claims that are fair and houest fail of presentation within six years from their origin, and the claimant who waits longer, if laboring under no legal disability, should be barred, in my opinion. One thing is certain, no one can be familiar with the business of this office for any period, however brief, without being thoroughly convinced that such a

limitation would be of great value as a protection to the public Treasury, would remove a great temptation from the viciously inclined, and would give much needed relief to the Executive Departments.

I take pleasure in bearing testimony to the general good character, intelligence, and diligence of the persons employed in this bureau, and commend them for the faithful manner in which they have discharged their duties.

Respectfully submitted.

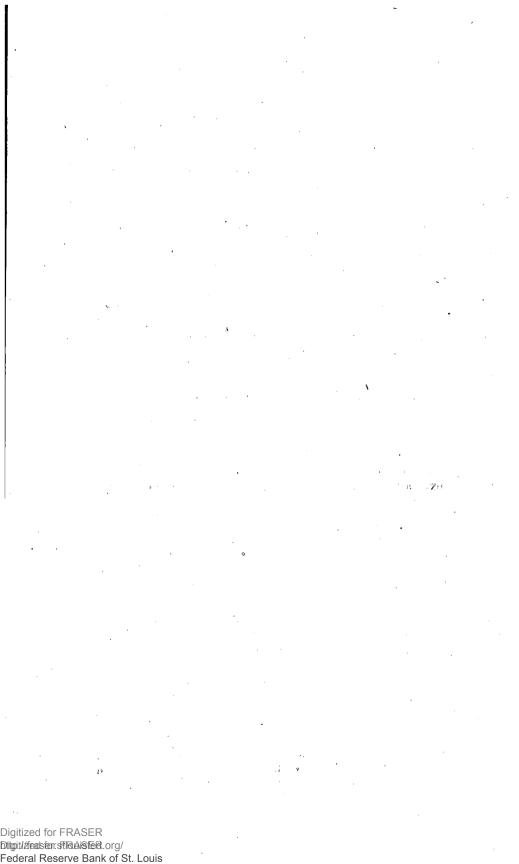

E. W. KEIGHTLEY,
Auditor.

Hon. Charles J. Folger, Secretary of the Treasury.

REPORT OF THE FOURTH AUDITOR.

REPORT

 \mathbf{or}

THE FOURTH AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, Washington, November 1, 1882.

SIR: In accordance with the law requiring the Auditor charged with the examination of the accounts of the Department of the Navy to report annually, on the first Monday in November, to the Secretary of the Treasury, the application of the money appropriated for the Navy Department, I have the honor to submit the following tabular statements for the fiscal year ending June 30, 1882, with such comments and expla-

nations as they seem to require at my hands.

Disbursing officers in foreign waters, as authorized by law, make their payments from a fund (which has been drawn from the Treasury under a "general account of advances,") charging each particular payment to its proper appropriation, subject to revision here. Monthly statements of these expenditures are made to this office. Many of them, of course, are not received until weeks, in some cases months, after the close of the fiscal year, but all were in when the table immediately following was made up, and which is designed to exhibit the several appropriations made by Congress, and the expenditures with which they are properly chargeable, as shown by the reports of the officers who have disbursed the money. Pay officers at home draw money under the respective heads of appropriation, keeping in hand sufficient sums to meet current liabilities, and returning unavailable balances to the Treasury, as required by law. Appropriations with balances to their credit will still be drawn upon to meet liabilities lawfully incurred during the fiscal year. Payments of the latter character are shown in this table where expenditures under appropriations for years prior to 1882 are mentioned. It will be observed that the aggregate payments during the year are a little less than the aggregate of the appropriations for 1882. appropriations have been overexpended, some deficiencies have already been made good by appropriations, while others remain for the future consideration of Congress. A deficiency not made good by a subsequent appropriation must fall at last upon the continuous appropriations—to wit, Pay of the Navy and the Marine Corps. To the credit of these appropriations there were standing at the beginning of the fiscal year: Pay of the Navy, \$1,747,521.73, and Pay of the Marine Corps, \$798,712.25. These sums have been added to their respective appropriations in the following table, making the amounts available for the year for pay of officers and men:

329

APPROPRIATIONS and EXPENDITURES of the	UNITED STATES NAVY for the fiscal year ending June 30, 1882.

Pay officers are instructed to draw on the Secretary of the Navy when such bills can be as advantageously sold as those drawn on Lon-It will be seen that the drafts on the Secretary during the past year were very considerably increased over those of the two previous years. In the autumn of 1881, Paymaster Foster sold in Yokohama, Japan, bills to the amount of \$156,000 on the Secretary, and received \$771.82 more than he would had the same amount been sold on Lon-The condition of the market was rather exceptional at that time, due largely to the fact that London was sending large sums to New York to pay the balance of trade then in our favor. It seems probable that conditions which will be favorable to the sale of United States bills will increase, as our own trade is extended to distant nations, and as the balance of trade is favorable to us in our transactions with European countries. London is still the money center, the world's clearing-house, and is likely to remain so for many years to come. Our progress in that direction is not very rapid, but it must in the end be sure. The above tables are indications pointing that way.

In accordance with the suggestion made in my report two years ago some of the pay officers are in the habit of sending with their report of sales clippings of market reports in the daily papers of even date, showing that they have obtained the highest market rates, or even better at times when active competition has been invited. The following extract from a letter of Paymaster Foster, written at Yokohama, Japan, February 10, 1882, will illustrate this:

I inclose a cutting from the Japan Gazette, of Yokohama, Japan, of February 9, 1882 (evening edition), showing the rate of exchange on the day of sale for silver yen, in which the bill was negotiated. The published bank selling rates were 3s. 84d. sterling for bank bills on demand on London, and 90 cents United States gold, on New York, per silver yen. Bids were requested from five banks, and the best rates obtainable were 3s. 84d. sterling, and 91 cents, respectively, per silver yen. The sterling exchange shows but a reasonable difference between the buying and selling price, but on Washington exchange the margin is larger, owing to the expected rise in exchange between New York and London, on account of the close of the American export season. The bill was drawn on London, that rate being more favorable by \$34.02, United States coin, and it will probably continue so for several months. Washington exchange was more favorable from September, 1881, to January, 1882, inclusive.

ACCOUNT WITH SELIGMAN BROTHERS.

A commission of 1 per cent. is paid to Seligman Brothers, London, for disbursements made by them. Their commissions for the year amounted

to \$14,760.36. They pay 4 per cent. interest on daily balances remaining on deposit with them; and receive 5 per cent. interest on advances they make. The interest paid by them during the year was \$4,969.56; and that received \$1,650.27, making the net interest received by the department \$3,319.29. Money is transferred to London from New York by means of sixty-day bills. Exchange was favorable during the greater part of the year, and the net gain from this source was \$7,220.16.

THE PUBLIC CREDIT.

I have respectfully to suggest in reference to the work of the London fiscal agents that it could be equally well done by one of the Navy Department's own disbursing officers, thereby saving the commission now paid, and adding otherwise but little to current expenses. Such a change would also comport with the dignity and character of the Government, which should be able to transact its business at home and abroad by the agency of its own citizens and officers. pay corps of the Navy men of ample experience and ability for such a trust, also of high and unquestioned character. If this suggestion should not be thought feasible, then at least the commission paid should be reduced to not more than one-half of what it now is. One-half of 1 per cent. would be ample compensation for paying out this money. time the present commission was adopted, forty years ago or more, the credit of the country was not very high, and it needed the name of a banking house to make its paper current. Upon this point it is instructive to refer to the annual message of President Tyler, of December, 1842. Speaking of an effort of the Government to make a small loan he says:

After a failure to do so in the American market, a citizen of high character and talent was sent to Europe with no better success; and thus the mortifying spectacle has been presented of the inability of this government to obtain a loan so small as not in the whole to amount to more than one-fourth of its ordinary annual income, at a time when the governments of Europe, although involved in debt, and with their subjects heavily burdened with taxation, readily obtain loans of any amount at a greatly reduced rate of interest.

In 1844, Benjamin R. Curtis, late justice of the Supreme Court of the United States, published in the North American Review a very able and eloquent article on the importance of maintaining the public faith, in which he refers to this attempt to borrow money, saying:

It was offered on terms most advantageous to the creditor—terms which in former times would have been eagerly accepted, and after going begging through all the exchanges of Europe, the agent gave up the attempt to obtain money in despair. It is impossible to believe that any capitalist refused to lend his money because he doubted the ability of the United States to pay their debts. Nor is it credible that the mere failure of a few of the State governments to meet their engagements would have produced this extraordinary effect. It is the truth, and it should sink into the heart of every American, that this loan was refused because Europe doubted the honor of this country.

It can be readily understood that, at that time, a draft on a respectable London bank was a great deal better than a draft on the Government of this country. It is unnecessary to say that all this has changed. Our public credit does not now require the support of any private firm or corporation, and it is not good economy to continue paying for that which we no longer need.

war with Mexico, and amount to the sum of \$2,672.70. There had been previously settled of these claims 1048, and payments made of \$43,501.68.

The act just referred to provides that the gratuity is to be paid subject to the limitations of the act of July 18, 1848. As has been previously stated in one of my reports, that law was passed for the exclusive benefit of persons who were employed in the military service during the Mexican war, and limited the payment to those who "served out their term of engagement, or have been or may be honorably discharged," and to the widows, children, &c., of those "who have been killed in battle, or who died in service, or who, having been honorably discharged, have since died, or may hereafter die, without receiving the three mouths, pay." The term honorably discharged, as used in the law, applied to the enlisted men and to the volunteer officers of the Army who received an honorable discharge when mustered out at the close of the war, or when their services were no longer required. It will be seen, therefore, that the "limitations" of the law of 1848 necessarily excluded those officers of the Navy and Marine Corps who resigned their positions or remained in the service, and also the heirs of those who resigned or died in the service after the 19th of July, 1848. Bills have been introduced designed to change the act of 1879 so that its benefits may be shared by all, whether in the regular or volunteer Navy, who participated in the Mexican war and were not discharged or dismissed for dishonorable conduct during its continuance; but they have made little or no progress, and the matter remains in statu quo.

MILEAGE FOR TRAVEL ABROAD.

Apparently from the foundation of the Navy, certainly from 1835, it had been the practice to pay mileage for travel at home and actual expenses abroad. In 1874 all mileage was abolished by act of Congress. In 1876 mileage was re-established for travel in the Navy, and under the advice of the Attorney-General the old practice of paying actual expenses abroad was continued. The question of the legality of this practice was tested in the case of Temple vs. the United States, and decided by the United States Supreme Court against the defendants. above-settled claims 253, amounting to \$63,254.94, were adjusted in accordance with this decision. An additional number have been adjusted and paid since the close of the fiscal year, and others continue to be received. At the late session of Congress a provision was added to the naval appropriation bill giving legal sanction to what had been so long the practice-namely, the payment of actual expenses only for travel abroad. Claims for mileage, arising under the law of 1835 (in force until 1874), are still pending in the Court of Claims. A large number have also been received by this office, but no action will be taken until a final decision has been reached in the courts.

PAYMENTS TO MACHINISTS.

Of the above settled claims 47, amounting to \$28,764, were allowed under the act of June 16, 1880, giving gratuities to discharged machinists in lieu of re-enlistment, one third of one year's pay for each good-conduct badge, not to exceed three in number. A fair proportion of the claimants have three of these badges, entitling them to a year's extra pay, \$918. There have been reported previously 51 of these settled claims, amounting to \$27,540. Claims under this act are still being received.

LONGEVITY CLAIMS.

Under the decision of the court in the Tyler case only seven claims of marine officers had been settled at the close of the year, involving the sum of \$1,249.89. This decision is held in the Department of Justice as not applicable to longevity claims in the Navy; and such claims will be contested in the Court of Claims, where one is now pending, and, probably, in the Supreme Court. Until a decision is reached no action will be taken on similar claims now in this office.

This division is charged, also, with the preparation of all reports and tabular statements called for by Congress and the Secretary of the Treasury; the preservation and care of the files; keeping a record of appointments, resignations, removals, and absences; the care and issuing of stationery used in the office, and the payment of salaries to employés.

NEW ORLEANS PRIZE-MONEY.

I regret to have to say that Congress have as yet made no appropriation to pay what is known as the "third installment of New Orleans prize-money." Besides the vessels captured by the fleet under the command of Admiral Farragut, during the engagements near Forts Jackson and Saint Philip, a large number of vessels were destroyed, for which the court, in 1873, awarded the sum of \$268,600. At the date of the award there was in the Treasury, after paying fees, &c., but \$93,865.20 to the credit of the appropriation "Bounty for the destruction of enemies' vessels." This amount was distributed to all the captors. There remains to be appropriated by Congress the sum of \$143,644.47. There are several thousand persons directly interested as creditors in this matter. This money is as justly due as that arising under any other obligation of the government. The claimants are worthy men who have rendered valuable services to the government, and are clearly

entitled to the money which has been awarded to them by the proper court. If Congress failed to provide for the interest on the public debt, or the principal when due, it would be recognized as a national disgrace. So, also, if they neglected to appropriate the money to meet the claims settled by the accounting officers or judgments rendered by the United States courts against the Government, it would be regarded as highly reprehensible, and discreditable to our whole people. The claims of officers and seamen for this New Orleans prize-money—claims properly adjudicated and judgment given—are just as valid as those named, and they ought to be paid with the same promptitude that all other lawful obligations are paid. It is respectfully urged that there is no shadow of a reasonable excuse for longer delay on the part of Congress.

ABOLITION OF PRIZE-MONEY.

It has been suggested that prize-money ought to be abolished; and one or more amendments were offered to the last naval appropriation bill to accomplish this purpose, but they were ruled out of order, and no direct vote was reached upon them. It would seem that this is a move in the right direction and in accordance with the spirit of the age, as well as with the laws and regulations governing the military arm of the public service. It would be difficult, perhaps, to give any good reason why captures made at sea should be awarded to the captors any more than captures made on land. The hopes of such prizes may stimulate to greater exertion in the naval service, and in naval engagements particularly, as they would, doubtless, in military enterprises on land; but in both cases would it not be better to rely on the honor, the sense of duty, the courage, the discipline, and the patriotism of officers and men, rather than upon the hope of incidental pecuniary reward? inequalities, jealousies, and dissatisfactions growing out of the distribution of prize money are proverbial, and can be remedied only by a discontinuance of this relic of ruder ages.

ACCOUNTS OF DISBURSING OFFICERS.

I am pleased to report that, as a rule, the accounts of the disbursing officers of the Navy have been promptly and accurately rendered during the year, showing a clear sense of responsibility, and a laudable purpose to discharge their important duties with the utmost fidelity. There have been some exceptions, but it is believed that these are diminishing, and that there is an increasing sense of honor and accountability apparent, which promises well for the future of this branch of the service. The disbursements of the year have been made without loss to the Government so far as accounts have been examined in detail, and it is believed that final settlements will exhibit this gratifying result.

VISITORS TO NAVAL ACADEMY.

The act of February 14, 1879, provides that there shall be appointed every year a board of visitors to attend the annual examination at the Naval Academy. This board consists of twelve members, seven of them appointed by the President of the United States, two Senators appointed by the Vice President or President pro tempore of the Senate, and three Representatives appointed by the Speaker of the House. The act also provides that each member of this board shall receive not exceeding eight cents per mile traveled by the most direct route from his residence to Annapolis, and eight cents per mile for each mile from said place to his residence on returning. For the expenses of this board of visitors Congress appropriates \$2,600 annually. The manner in which this sum was expended in the last fiscal year is shown by the following statement:

ITEMS COMPRISING COMMISSARY ACCOUNT WITH BOARD HOUSE.

Carriages Barber Expense cards, &c. Umbrellas, &c. Glass Flowers U. S. Naval storekeeper China	15 00 4 57 39 17 6 52 13 76 25 36	Ice Telegraphing Tinware Freight Washing Groceries Meats Fish	6	67 23 38 00 97 55

		Total	2 189	76

L. G. BILLINGS, Paymaster, U. S. N., Commissary, N. A.

The remainder of the appropriation was exhausted in the payment of mileage. I respectfully suggest that the appropriation of a gross sum for the payment of expenses of this kind is unwise, as the above bill abundantly shows; and that it would be better to follow the usual practice of paying a per diem and mileage and permitting the members of the board to pay their own expenses, as do nearly all other officers, agents, and employés of the Government. There are comfortable hotels at Annapolis, and there can be no good reason given why they should be ignored and such public expenditures made as the above statement exhibits.

THE CIVIL SERVICE.

In acknowledging my obligations to the deputy auditor, Mr. B. P. Davis, to the chiefs of divisions, the clerks and employés generally of

this office, I am constrained to say a few words concerning the civil service here in Washington as it has come under my observation, with some suggestions as to its permanency and further improvement. It is well known to those acquainted with this service by practical experience, that it is not nearly so bad as it is frequently painted by persons who have not had such experience. The improvements in the methods of doing business and in the personnel of the Departments have been marked during the last twenty years, as many clerks can testify whose service extends over the greater part of that time. There has been a survival of the fittest. The inefficient and those wanting in good character have been dropped, while the capable, the careful, and the upright have been retained. So that the service to-day, to say the least, is in a very fair condition.

There are in this bureau, as there are doubtless in every one, clerks who are receiving but moderate salaries whose capacity and experience, were they available in private business, would command not only much better compensation, but would insure to their owners positions of independence and influence in any community. The services of such employés are very valuable to the Government, and, as long as they remain so, they ought to be retained. To secure permanency in this service and to insure its future efficiency and still further improvement.

two or three simple enactments are suggested:

1. The law at present requires that "appointments in the Treasury Department shall be so managed as to be equally distributed between the several States, Territories, and the District of Columbia, according to population." This principle should be applied to all of the Depart-

ments, thus keeping up the representative idea.

2. As is well known, much of the time of the heads of Departments, Senators, and Representatives is now taken up in listening to and presenting the reasons why certain persons should be given places. days and weeks after President Garfield was inaugurated, the Secretaries of the Treasury and Interior were overwhelmed with work of this To obviate this and to make the service equally open to all, let the law provide that a suitable examination—competitive probably the best—under established general rules, shall take place in the State or congressional district where the applicant resides. Commercial colleges, business men, and literary institutions could easily be found doubtless who would, free of expense to the Government, furnish the requisite boards for conducting these examinations. Clerical vacancies in the Departments and new positions would then be filled by requisitions on States or districts entitled to receive appointments. home examination should be sufficient to entitle the applicant to a probationary appointment for a few months, upon the expiration of which he should receive a permanent one, if proved to be qualified.

3. A fixed tenure of office of five or seven years, (with privilege of reappointment,) during which the appointee could not be removed except

for inefficiency or bad conduct.

4. Promotions, other things in the aggregate being fairly equal, as shown by suitable examination, to be in accordance with seniority of service.

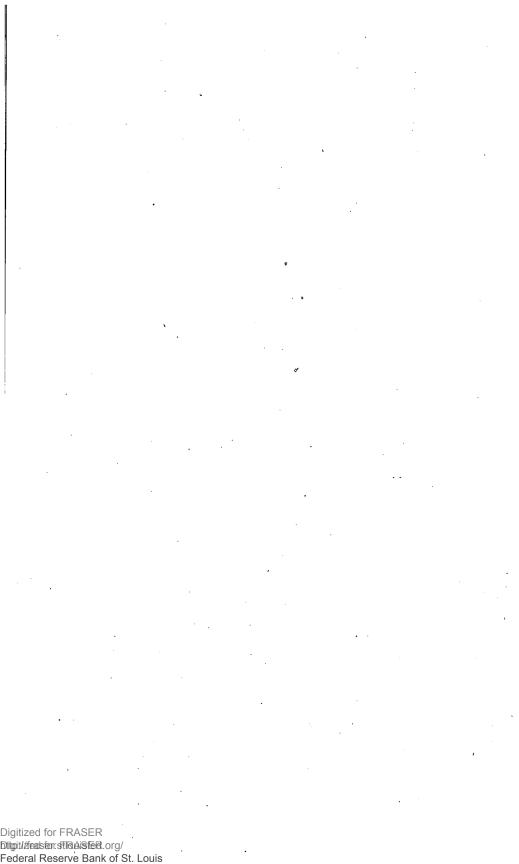

It appears to me, from such reflection as I have been able to give the subject, that a law embodying these suggestions would relieve the civil service in Washington of the odium now attaching to it, and Cabinet officers and Congressmen of much laborious, vexatious, and profitless work; while many thousands of our fellow-citizens would be saved time, money, and self-respect, which are now lost in weary journeying,

waiting, and beseeching only to find at last that there are no places for them, and the ratio of applicants to vacancies is as twenty or more to one. The service, also, which is the great point to be gained, would be rendered in due time vastly more permanent and efficient than it could reasonably be expected to be where numerous and frequent changes may be made by the whims of individuals, the pressure of partisans, or the varying fortunes of political parties.

Very respectfully,

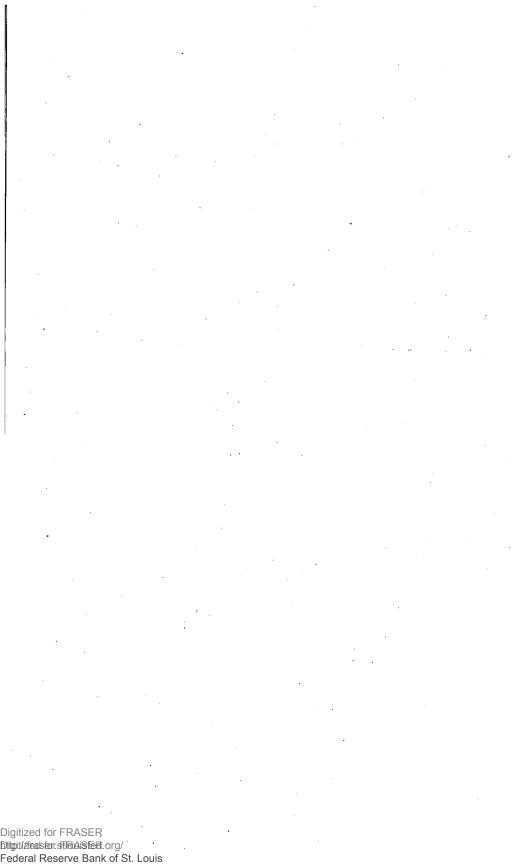

CHAS. BEARDSLEY,
Auditor.

Hon. Charles J. Folger, Secretary of the Treasury.

347

REPORT

OR

THE FIFTH AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE, Washington, October 31, 1882.

SIR: I have the honor to submit herewith the annual report of this office for the fiscal year ending June 30, 1882.

DIPLOMATIC AND CONSULAR SERVICE.

The accounts of ministers and others in the diplomatic service (*Exhibit A) show that there were paid for salaries \$310,627.24 and for contingent expenses \$69,525.23, aggregating \$380,162.47. Passport and official fees amounted to \$3,724.21.

The Revised Statutes classify the consulates-general, consulates, and commercial agencies into three classes: 1. Those embraced in a schedule known as Schedule B, the incumbents of which receive a fixed salary, and are not allowed to engage in private business. 2. Those embraced in a schedule known as Schedule C, the incumbents of which receive a fixed salary and are allowed to engage in business. 3. All other consulates the incumbents of which are compensated by the fees collected in their offices and are allowed to transact business. In tabulating consular accounts for fees, salaries, and other expenditures (*Exhibits B, C, D, E, and F) this classification has been observed. The following are the totals presented:

Fees for official services Consular salaries Loss by exchange Compensation from fees Rent, clerk hire, &c., (sec. 1732 R. S.) Contingent expenses Allowance for clerks Rent of prison, wages of keepers, &c., China Rent of prisons, wages of keepers, &c., Japan Rent of prisons, wages of keepers, &c., Siam and Turkey Salaries of interpreters to consulates in China, Japan, and Siam Salaries of marshals for consular courts		48 90 98 92 86 63 87 60 45	\$889,840	55
		77		
account receipts over expenditures			838, 822	
xcess of receipts over expenditures	 .		51,018	47

Included in the amount reported for consular salaries are \$4,882.55 paid consular officers not citizens, covered by a separate appropriation of \$5,000.

CONSULAR FEES.

The revised tariff of fees which took effect in October, 1881, not only changed the character of many fees from official to private, but materially reduced the charges for certain services. The fee for "acknowledgments," for example, was cut down from \$2.50 and \$2 to \$1; "authenticating signatures" from \$2 to \$1; "orders and letters" from \$2 to \$1, and several shipping certificates from \$2 to \$1, while "landing certificates" were fixed at \$2.50, uniformly, except on the Rio Grande, Mexico. Notwithstanding this very considerable decrease, the fees received are \$46,774.19 in excess of those for the year 1881, showing a decided increase in the business transacted.

In this connection I desire to call attention to the table (*Exhibit I), indicating the sources from which official fees were derived. The following are the totals given:

VESSELS' FEES and CHARGES.

(D-+-)		•	005 400	

RECEIPTS AND INVOICES.

A law passed in August, 1856 (section 4213 Revised Statutes, 1878) makes it the duty of owners, agents, consignees, masters, and commanders of vessels to furnish copies of consular receipts for fees to collectors of ports, who shall forward them, as well as statements of all certified invoices, to the Secretary of the Treasury. During the past year an effort has been made to comply with the provisions of this act, the plain intention of it being to furnish evidence of the correctness of consular returns of official fees and charges. The work which was entirely new to this office, has been prosecuted under difficulties arising from incomplete returns and insufficient clerical force; but it has progressed farenough to indicate that the law, when properly complied with, is sufficient for the purpose intended. The additional clerical force allowed this office by the appropriation act of August 5, 1882, will enable the work to be done promptly, the importance of which is too obvious to require further remark.

RELIEF OF SEAMEN.

Thirteen hundred and eighty seamen were relieved during the year at an average cost of about \$22.50 each, and seven hundred and four were sent to the United States on certificate payable at the Treasury

^{*} See note at foot of page 356.

at an additional cost of \$12.50 each. The accounts adjusted (*Exhibits G and H) present the following totals:

Board and lodging Clothing Passage paid by consuls. Passage to the United States paid at Treasury Other expenses.	6, 253 4, 416 8, 799	88 96 00 80	መ ያሴ ሴሪድ	
Extra wages and arrears Amount refunded	51,530	53 31	*. /	•
Excess of relief over extra wages and arrears		_	6,603	98

As extra wages and arrears are devoted to purposes of relief, the actual outlay by the government is thus reduced to less than one-sixth of the entire amount expended. In other words, of the \$60,000 appropriated by Congress for the relief of destitute American seamen, less than \$7,000 have been used.

Although the relief afforded for 1882 is less than for many years, as will be seen by reference to the tabulated statement below, I am of opinion that the sum paid is considerably larger than it need be. Extending relief to seamen who are properly entitled to it is often attended with much difficulty, and it is perhaps not surprising that in some instances consular officers cannot discriminate between the deserving and undeserving. In a circular letter addressed them by this office in April last, with the approval of the First Comptroller, mention was made of the fact that in several cases the seamen relieved never served upon the vessels reported, and that in one instance no such vessel sailed under the American flag. It was also stated that seamen sent from one consulate to another often received clothing at both places, the second supply being given within a week after the first was received. Since the reception of this circular greater care seems to have been exercised.

In this connection it is proper to add that consuls are often called upon to relieve unworthy persons whose demands they cannot refuse. A careful study of the returns shows that about ten per centum of those relieved are "deserters," many of whom are little better than tramps, who seize upon every opportunity to desert their vessels and live at the expense of the Government which they disgrace. Yet under existing regulations consular officers find it difficult to avoid aiding them. The precedent seems long to have been established that an American seaman who is also an American citizen is entitled to relief, except only when actually employed upon a foreign vessel. He may desert and take employment upon a railroad, or conceal himself until his vessel sails, and immediately thereafter return to the consulate and obtain relief. Several cases of this character have been reported during the past year, the relief being given solely for the reason that the seamen were citizens of the United States.

It would be a manifest hardship to withhold relief from "deserters" in all cases, for men are frequently driven to desertion by unusual or cruel treatment. But it would clearly be better for all parties in interest if consular officers were authorized to relieve this class of seamen only when it is satisfactorily ascertained that the desertion is justifiable regardless of the seaman's citizenship. The course pursued at present.

^{*} See note at foot of page 356.

not only operates as an incitement to desertion, but compels the consulto grant relief in cases manifestly undeserving.

GROWTH OF CONSULAR BUSINESS.

The following table not only affords basis for a comparison of consular receipts and expenses for the past year with former years, but indicates the rapid growth of consular business since the close of the war.

Years.	Fees received.	Salaries.	Relief of sea- men:	Contingent expenses.	Allowance for clerks.

In the adjustment of accounts of 172 stamp agents the amount involved was \$3,194,588.31, and of 625 claims for the redemption of stamps, amounting to \$34,909.53, there was discounted \$1,107.96, leaving an amount actually paid of \$33,801.57.

By the last report the Secretary of the Treasury had on deposit to his credit on account of "fines, penalties, and forfeitures," a balance of \$62,908.55.

During the year deposits have been made to the amount of \$235,954.08, and disbursements made to the amount of \$145,014.69, leaving a balance to his credit January 1, 1882, of \$153,847.94.

An account has also been rendered by him on account of "offers in compromise" (special deposit account No 5) from January 1 to December 31, 1881, as follows: Balance per last report \$38,873.67; amount de-

^{*} See note at foot of page 356.

posited during the year, \$206,900.78; amount disbursed \$170,041.10, leaving a balance on deposit to his credit January 1, 1882, of \$75,733.35. This account remains unadjusted.

The following sums were refunded: Taxes erroneously assessed and collected, \$80,311.56; drawbacks on merchandise exported, \$43,061.49; and moneys refunded under private act of Congress, \$7,211.77.

The disbursements by George Waterhouse, chairman of the South

Carolina Free School Fund Commissioners, amounted to \$1,490.

A judgment of \$18,711.11, rendered by the Court of Claims to reimburse disbursing clerk for moneys deposited in Merchants' National Bank, Washington, D. C., April 27, 1866, has also been adjusted.

DISBURSING CLERKS' ACCOUNTS.

The accounts audited aggregate \$1,069,431,700.61, which of itself indicates the character of the business transacted as well as the large amounts involved in its settlement. During the year 9,699 accounts were adjusted, 236,797 vouchers examined, 3,717 letters written, 8,115 reports recorded and copied, 25,790 coupon books counted, and 25,867 books scheduled. An examination of the accompanying tables,*lettered from A to N and to which frequent reference has been made, will further convey some idea of the work performed by the clerks of this office, whose industry and efficiency I take this opportunity of commending.

I have the honor to be, very respectfully, your obedient servant, D. S. ALEXANDER,

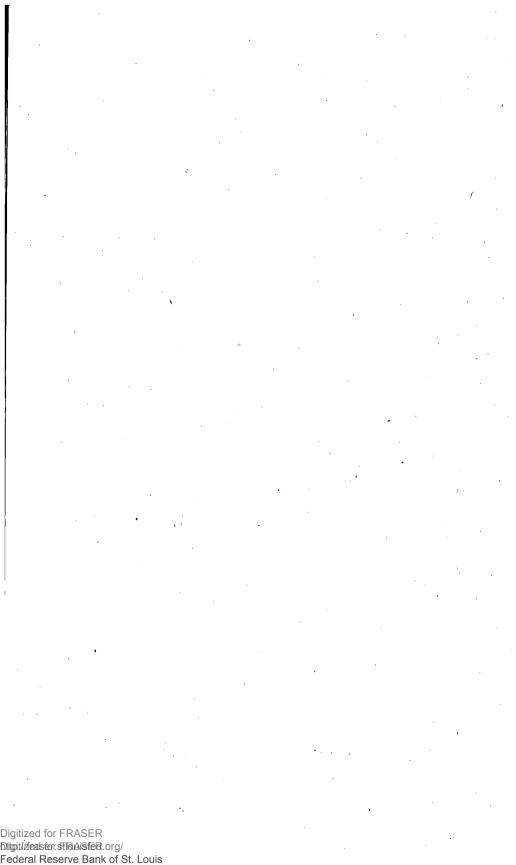

Auditor.

Hon. Charles J. Folger, Secretary of the Treasury.

^{*} Note.—The tabular statements pertaining to this report are omitted for want of space, but they may be found in the Auditor's pamphlet edition.

REPORT OF THE SIXTH AUDITOR.

357

REPORT

OF THE

AUDITOR OF THE TREASURY FOR THE POST-OFFICE DEPARTMENT.

OFFICE OF THE AUDITOR OF THE TREASURY FOR THE POST-OFFICE DEPARTMENT, Washington, D. C., November 6, 1882.

SIR: I have the honor to submit the report of the business opera-

tions of this office for the fiscal year ended June 30, 1882.

My annual report to the Postmaster-General exhibits in detail the financial transactions of the Post Office Department during the last fiscal year.

The increase in the business of this office during the past year has been very great, not only by the addition of new post-offices, but by the growth in the business of those already existing, and in both the postal and money order branches. There has also been a great increase in the number of new mail-routes, and of changes in old routes, owing to our extended railroad system. This rapid growth and increase of business has brought with it augmented revenues, which has not only made the post-office system self-sustaining, but has carried more than a million and a half dollars into the Treasury the past year, instead of taking millions out, as heretofore. The present year will greatly swell this net surplus to be carried into the Treasury.

This increase of business, with the added work from the removals and change of quarters during the year has kept the office short-handed, notwithstanding the addition to the clerical force last year, and the faithful and diligent labors of the clerks, a large portion of whom have worked more than the established office hours to keep up their work, and more than justifies the required increase of force for the coming

In closing this report, I desire to call your attention to the tenure by which the Sixth Auditor's Office occupies rooms in the post-office building, and the building rented for money-order business. Since the erection of the Post-Office Building it has been jointly occupied by the Post-Office Department and the Sixth Auditor's Office; and no law, so far as I am aware, gives control of the building to either party. When Congress was asked, in 1863, to put the control of the building in the hands of the Postmaster-General, it refused or neglected to do so. The

359

NOTE.—A summary of the principal labors performed by the several Divisions of this office, here omitted for want of space, will be found in the pamphlet edition of the Auditor's report.

question of control now arises from the incapacity of the building to afford room for the transaction of post-office business and the auditing The number of employés occupying these buildof post-office accounts. ings is in the proportion of six and a third to the Treasury Department, and ten to the Post-Office Department. When the money-order business was removed from the Post-Office Building, by order of the Postmaster-General, to the new quarters rented for its use, twelve rooms on the first floor of the Post-Office Building, which were still occupied by Treasury clerks (as they had been for twenty or more years), were desired by the Post-Office Department, and the Sixth Auditor was ordered by the Postmaster-General to vacate these rooms and go to others upon the third floor. He protested against the removal on account of the great inconvenience it would occasion for the transaction of the business of his office, and besides suggested the inequitable assignment which had been made, and the absence of any law which authorized one Department of the Government to remove at its pleasure the employés of another Department from quarters which had been occupied by them from the erection of the Post-Office Building, or changed by joint consent, all of which was unheeded.

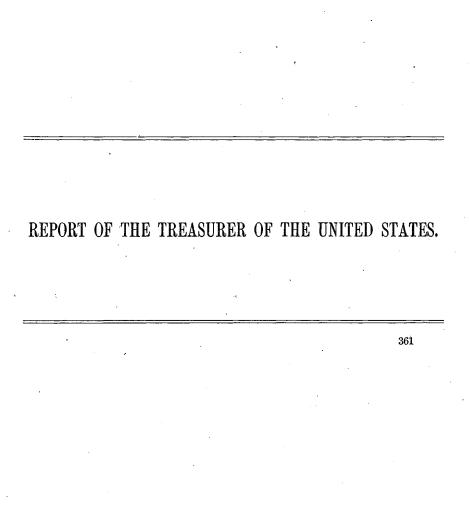

It is manifestly right and proper that the Post-Office Department should have all the room which it needs for the performance of its business and the full custody and control of it; and it has no more than it needs. It is also equally right and proper if a bureau of the Treasury Department is to occupy a part of the Post-Office Building that it should have some rights to the space occupied, and not be subject to removal at the pleasure of another Department, or dependent upon it for its supplies and repairs. The employés of the Treasury Department still remaining in the Post-Office Building are two-fifths as many as are employed by the Post-Office Department. In the new building rented for money-order business nearly three-fourths of the employés belong to the Treasury Department, yet it is claimed that they are dependent upon the Post-Office Department for their quarters, supplies, and repairs.

For these reasons I suggest that the tenure by which this bureau of the Treasury Department holds its quarters be established by law.

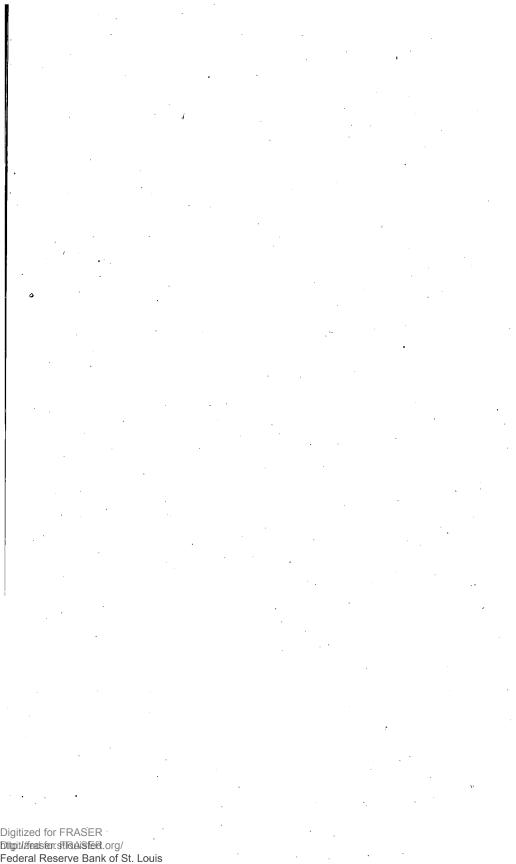

I am, sir, very respectfully,

J. H. ELA, Auditor.

Hon. C. J. Folger, Secretary of the Treasury.

REPORT

O F

THE TREASURER OF THE UNITED STATES.

TREASURY OF THE UNITED STATES, Washington, D. C., November 1, 1882.

SIR: I have the honor to submit a report showing the operations of the Treasury of the United States for the fiscal year 1882, and its condition on June 30, 1882.

SUMMARY OF OPERATIONS.

The receipts of the government show an increase over those of 1881 of \$22,251,054.23 in the revenue from customs; \$11,233,209.94 from internal revenue; \$2,551,277.20 from sales of public lands, and \$6,707,416.34 from miscellaneous sources, making a total increase in the net revenue of \$42,742,957.71. The total net revenue was \$403,525,250.28. The net expenditures decreased from \$260,712,887.59 to \$257,981,440.20, a reduction of \$2,731,447.39, which, added to the increase in receipts, makes an increase of \$45,474,405.10 in the surplus revenues applicable to the reduction of the public debt. The expenditures on account of interest on the public debt show a reduction of \$11,431,534.39, from \$82,508,741.18, in 1881, to \$71,077,206.79, in 1882. The excess of revenues over expenditures was \$145,543,810.08, and the amount applied to the reduction of the debt \$166,281,505.55.

The amount standing on the books of the Treasury to the credit of disbursing officers of the United States at the close of the fiscal year

was \$36,067,872.48.

The receipts for the fiscal year on account of the Post-Office Department were \$41,368,062.30, and the expenditures \$39,265,299.43. Of these amounts \$20,211,991.78, or about one-half, was received and expended directly by postmasters, without being deposited in the Treasury.

The unavailable funds of the Treasury decreased from \$29,521,632.72 to \$29,517,275.32 by reason of the collection of \$4,357.40 of the \$8,750.31 heretofore reported as unavailable in the sub-treasury in New York on account of counterfeit 7.30 notes redeemed in 1867. The unavailable funds of the Post Office Department remain unchanged at \$40,078.06.

The amount collected from national banks on account of semi-annual duty accruing on their capital, circulation, and deposits during the year was \$9,150,684.35. The total amount collected on this account since the beginning of the national banking system is \$118,005,706.25.

There were in the custody of this office at the close of the fiscal year \$376,647,700 in United States bonds held in trust for national banks, of which \$360,722,700 were held as security for circulation and \$15,925,000 to secure deposits of public money with national bank depositaries. During the year \$129,474,400 in bonds were deposited for these purposes and \$128,628,100 withdrawn.

363

The amount of United States currency outstanding at the close of the year was \$362,464,582.10. There was redeemed during the year \$105,773,706.05 in United States currency, silver certificates, and notes of failed, liquidating, and reducing national banks, making the total redemptions since the first issue of currency \$2,405,914,779.41.

The issues of silver certificates during the year were \$24,300,000 and the redemptions \$20,133,290, leaving the amount nominally outstanding

at the close of the year \$66,096,710.

There were paid during the year at the various offices of the Treasury and forwarded to the Treasurer's office for examination coupons from United States bonds amounting to \$11,088,609.02, and there were issued by the Treasurer 321,623 checks on the Treasurer and assistant treasurers of the United States, amounting to \$57,547,821.20, in payment of interest on registered bonds.

There were also issued 32,550 drafts on warrants of the Secretary of the Treasury, 38,853 drafts on warrants of the Postmaster-General, and 49,089 transfer checks on assistant treasurers, making a total of 442,115 drafts and checks issued from this office during the year.

United States bonds were redeemed during the year to the amount of \$166,204,450, of which \$60,079,100 was applied to the sinking fund. The total amount of bonds retired by purchase, redemption, conversion, or exchange from March 11, 1869, to June 30, 1882, is \$2,149,549,250.

National-bank notes amounting to \$76,089,327 were redeemed during the year, making the total redemptions of these notes, under the act of June 20, 1874, \$1,175,735,322.

THE STATE OF THE TREASURY.

The following statement shows the condition of the Treasury at the close of September in each of the last four years:

· .	September 30, 1879.	September 30, 1880.	September 30, 1881.	September 30, 1882.

Total	303, 485, 995 07	267, 676, 912 40	331, 981, 210 11	346, 552, 990 3

The most noteworthy change in the last year is the decrease of the gold coin and bullion, held by the Treasury, from \$176,791,566.41 to \$153,047,964.12, and the increase of the standard silver dollars from \$65,949,279 to \$92,025,350; a decrease in the gold of \$23,743,602.29, and an increase in the silver dollars of \$26,076,071. Deducting the amount held for the redemption of gold certificates, the gold belonging to the government in the Treasury on the 30th of September was \$154,987,371.29 in 1879; \$128,160,085.77 in 1880; \$169,552,746.41 in 1881, and \$148,140,524.12 in 1882. Notwithstanding the decrease in the last year, the gold owned by the government is nearly \$20,000,000 more than two years ago, the amount held last year having been swelled by the deposit of gold coin for exchange on the West and South.

Deducting in like manner the silver certificates actually outstanding, the standard silver dollars owned by the government were \$30,366,054 on September 30, 1879; \$35,355,363 on the same date in 1880; \$13,108,839

in 1881, and \$28,699,970 in 1882.

The fund for the redemption of notes of national banks which have failed, gone into voluntary liquidation, or made deposits of lawful money for the reduction of their circulation, increased during the year from \$31,152,713.60 to \$38,507,029.10; the silver certificates actually outstanding, after deducting the amount held by the Treasury, from \$52,840,440 to \$63,325,380; the United States notes on hand, from \$28,422,170 to \$32,918,256, and the fractional silver coin held, from \$26,343,477.17 to \$27,429,246.56. The aggregate amount of gold and silver coin and bullion held by the Treasury increased from \$269,706,998.76 in 1881 to \$276,144,150.05 in 1882. The amount now held is \$53,336,782.04 greater than that held in 1879, and \$61,840,934.67 greater than in 1880. The gross assets of the Treasury increased during the

year from \$331,981,210.11 to \$346,552,990.39, although the balance remaining after deducting the moneys held for the redemption of gold, silver and currency certificates, and for the payment of matured debt and interest, and the amount to the credit of special or trust funds, ran down from \$151,336,116.73 to \$143,964,893.79.

THE RESERVE.

The following statement shows the excess of the cash assets of the government over its net demand liabilities on the first day of November:

. Total Liabilities		·	192, 628, 738	18
Reserve—Excess of Assets		-		99

The above liabilities are the net liabilities after deducting the redeemed or unissued obligations of the various classes held by the

The reserve is computed by deducting from the cash in the Treasury the aggregate of the current liabilities other than United States notes. The remainder of \$135,151,688.99 is considered to be the reserve available for the redemption of United States notes. In other words, if all of the liabilities of the government payable on demand should be at once discharged, if the entire amount advanced from the Treasury and placed to the credit of disbursing officers of the government should be drawn out, if the funds deposited for the redemption of national bank notes should be immediately called for, and if that portion of the public funds held for the Post Office Department should be set aside, there would still remain \$135,151,688.99 in cash to meet any demand for the redemption of United States notes. The reserve has apparently run down \$11,291,802.78 since October 1, 1881. This reduction is accounted for by the fact that by direction of the Secretary payment has been anticipated on \$12,063,714.72 in called bonds, not yet matured.

The following statement shows the percentage of reserve when computed on this plan, and what the percentage would be if sufficient funds were set aside for the payment in full of the gold, silver, and currency

certificates, and the remainder of the cash were considered as a pro rata reserve against all of the other demand liabilities of the government:

Month.	Current liabilities excluding United States notes and coin and currency certificates.	Current liabilities excluding certificates and including United States notes, viz: \$346,681,016.	Cash less amount of coin and cur- rency certifi- cates.	Present reserve-percentage of excess of assets over liabilities to Uni ed States notee outstanding.	Percentage of cash, less coin and currency certificates, to demand liabilities includ- ing United States notes and excluding certificates.

months	95, 026, 993 46	441, 708, 009 46	230, 358, 016 54	39. 0	52. 1

On the first assumption the reserve for the redemption of United States notes has ranged during the last thirteen months from 34.2 to 43.8 per cent., and the monthly average since the resumption of specie payments has been 39 per cent. On the second assumption the ratio of the reserve to the liabilities has varied during the thirteen months from 51.5 to 55.9 per cent., and has averaged since resumption 52.1 per cent. Were the 40 per cent. reserve, which it is deemed necessary to maintain, computed on the latter basis, the amount now held would be \$59,961,093.50 in excess of the required amount.

UNITED STATES NOTES.

The following statement shows the changes which have taken place in the denominations of United States notes outstanding at the close of each of the last four fiscal years:

Denomination.	1879.	1880.	1881.	1882.
One dollar Two dollars Five dollars Ten dollars Twenty dollars Fifty dollars Fifty dollars Fifty dollars One hundred dollars Five hundred dollars Five thousand dollars Ten thousand dollars Ten thousand dollars	18, 092, 653 20 54, 107, 113 00 64, 638, 562 00 60, 470, 887 00 25, 523, 340 00 32, 038, 480 00 32, 569, 500 00 35, 070, 500 00 4, 000, 000 00	\$20, 332, 332 00 20, 352, 813 00 65, 432, 548 00 74, 916, 751 00 72, 143, 207 00 24, 808, 995 00 32, 797, 870 00 19, 224, 000 00 680, 000 00 460, 000 00	\$22, 645, 761 60 22, 214, 122 40 69, 569, 078 00 76, 990, 387 00 72, 271, 597 00 23, 702, 910 00 32, 947, 660 00 14, 570, 000 00 12, 024, 500 00 455, 000 00 260, 000 00	\$25, 720, 953 60 24, 622, 625 40 67, 342, 540 00 72, 784, 766 00 68, 657, 471 00 24, 191, 770 00 34, 463, 390 00 112, 335, 500 00 420, 000 00 2, 260, 000 00
Total	347, 681, 016 00 1, 000, 000 00	347, 681, 016 00 1, 000, 000 00	347, 681, 016 00 1, 000, 000 00	347, 681, 016 00 1, 000, 000 00
Outstanding	346, 681, 016 00	346, 681, 016 00	346, 681, 016 00	346, 681, 016 00

During the year there was an increase of \$3,075,192 in the one dollar notes outstanding; \$2,378,503 in two-dollar notes; \$488,860 in fifty-dollar notes; \$1,521,730 in one-hundred-dollar notes; \$306,000 in five-hundred-dollar notes; \$311,000 in one-thousand-dollar notes, and \$2,000,000 in ten-thousand-dollar notes; and a decrease of \$2,226,538 in five-dollar notes; \$4,205,621 in ten-dollar notes; \$3,614,126 in twenty-dollar notes, and \$35,000 in five-thousand-dollar notes.

The number of notes outstanding at the close of the fiscal year was 63,083,047 as against 59,839,069 outstanding on June 30, 1881. The amount of ones and twos outstanding has increased \$14,040,945 in three

years.

The issues and redemptions during the last three fiscal years have been as follows:

	. 1	.880.	· 1	881.	1:	882.
Denomination.	Issued.	Redeemed.	Issued.	Redeemed.	Issued.	Redeemed.
One dollar Two dollars Five dollars Ten dollars Twenty dollars Fifty dollars One hundred dollars Five hundred dollars One thousand dollars Tive thousand dollars Ten thousand dollars Ten thousand dollars	8, 232, 000 19, 680, 000 16, 520, 000 17, 360, 000 1, 400, 000 3, 052, 700 2, 300, 000	\$6, 935, 511 80 5, 971, 840 20 8, 354, 565 00 6, 241, 811 00 5, 687, 680 00 2, 114, 345 00 2, 293, 310 00 15, 645, 500 00 19, 238, 000 00 4, 320, 000 00 4, 500, 000 00	\$9, 889, 034 8, 752, 000 14, 760, 000 9, 160, 000 1, 200, 000 1, 200, 000 2, 944, 300 700, 000 900, 000	6, 860, 690 60 10, 623, 470 00 7, 086, 364 00 6, 111, 610 00 2, 306, 085 00 2, 794, 510 00 5, 354, 000 00 5, 408, 000 00	\$11, 445, 524 10, 472, 000 14, 280, 000 6, 680, 000 3, 200, 000 4, 527, 900 1, 750, 600 4, 995, 000 14, 990, 000	\$8, 370, 332 00 8, 093, 497 00 16, 506, 538 00 10, 885, 621 00 9, 294, 126 00 2, 711, 140 00 3, 006, 170 00 1, 189, 000 00 5, 030, 000 00 12, 990, 000 00
Total	81, 302, 563	81, 302, 563 00	54, 545, 334	54, 545, 334 00	79, 520, 424	79, 520, 424 0

Under the provision for the payment of the express charges on worn and mutilated United States notes, the redemptions have much increased, the amount redeemed during the fiscal year being \$79,520,424 as against \$54,545,334 redeemed in 1881. The number of notes redeemed increased from 14,235,106 to 17,362,320. The notes of the denominations of \$5,000 and \$10,000 reported as issued and redeemed during the year had been held in the reserve fund of unissued notes, and were passed through the accounts in order that they might be destroyed.

The amount of United States notes received in payment of duties on imports during the year just ended is \$24,650,576 as against \$19,079,753 in the year ending October 31, 1881. The total amount so received since the resumption of specie payments is \$186,053,930, an average of \$4,044,650 a month.

The monthly receipts since January 1, 1879, have been as follows:

Month.	1879.	1880.	1881.	1882.
January February March April May June July August September October November	9, 340, 452 11, 919, 876 10, 562, 006 9, 703, 566 9, 336, 778 10, 588, 145 11, 261, 307 12, 506, 018 9, 281, 243 4, 612, 198	\$4, 126, 450 4, 477, 161 3, 702, 727 3, 231, 697 2, 888, 138 3, 951, 588 4, 029, 892 2, 844, 658 2, 241, 305 1, 802, 288 1, 567, 184 1, 405, 984	\$1, 689, 738 2, 049, 956 1, 830, 813 1, 310, 292 1, 402, 118 1, 479, 503 1, 641, 006 1, 873, 788 1, 476, 118 1, 353, 253 1, 341, 614 1, 145, 065	\$1, 779, 336 1, 886, 585 1, 931, 273 2, 032, 592 2, 089, 332 2, 045, 150 2, 619, 515 2, 732, 499 2, 599, 294 2, 448, 314

CLEARING-HOUSE TRANSACTIONS.

The transactions of the Treasury with the clearing-house in New York, for the last thirteen months, are shown by the following statement:

Date.	Checks sent to clearing house.	Checks received from clearing- house.	Balances due as- sistant treasurer.	Balances due clearing bouse.
1881.		#41 200 F40 16		400 000 005 50

The assistant treasurer received from the clearing-house checks for payment amounting to \$383,060,211.13 and \$2,126,076.99 in cash in payment of balances in his favor, and sent to the clearing-house checks for payment amounting to \$135,482,679.27 and \$249,703,608.85 in cash in payment of balances against him, making the aggregate transactions on each side \$385,186,288.12.

STANDARD SILVER DOLLARS.

The amount of standard silver dollars coined from February 28, 1878, the date of the act requiring their coinage, to October 31, 1882, is \$128,329,880,of which \$93,006,382 remains in the Treasury and \$35,323,498, or about 27½ per cent., is in circulation. The proportion of the total coinage in circulation on September 30, 1881, was nearly 33 per cent. Of the \$30,007,175 coined during the last thirteen months, \$2,950,072 has gone into circulation and \$27,057,103 remains in the Treasury. During seven months of that period the dollars returned to the Treasury exceeded in amount those issued, the number in circulation running down from 34,950,123 on December 31, 1881, to 31,560,755 on July 31, 1882.

The following table gives the amount of silver dollars coined, on hand, distributed, and outstanding to September 30 in each year since the coinage was resumed:

Year.	Annual coin- age.	Total coin- age.	On hand at close of year.	Net distribu- tion during year.	Outstanding at close of year.
March to September 30, 1878 To September 30, 1879 To September 30, 1880 To September 30, 1881 To September 30, 1882	26, 421, 600 27, 934, 650 27, 753, 955	\$16, 212, 500 42, 634, 100 70, 568, 750 98, 322, 705 126, 029, 880	\$12, 155, 205 31, 806, 774 47, 784, 744 65, 949, 279 92, 468, 038	\$4, 057, 295 6, 770, 031 11, 956, 680 9, 589, 420 1, 188, 416	\$4, 057, 295 10, 827, 326 22, 784, 006 32, 373, 426 33, 561, 842

The coinage and distribution of silver dollars during each of the last thirteen months are shown below:

Month.	Monthly coinage.	Coined to the end of the month.	On hand at close of month.

SILVER CERTIFICATES.

The amount of silver certificates outstanding increased during the fiscal year from \$51,166,530 to \$66,096,710. This increase was entirely in certificates of the denominations of ten and twenty dollars. The amount nominally outstanding at this date is \$73,607,710, of which \$7,987,260 is held by the Treasury. The departmental circular of September 18, 1880, authorizing exchange payable in these certificates at the sub-treasuries in the West and South to be furnished for deposits of gold coin with the assistant treasurer in New York, under which large amounts of silver certificates were put in circulation, was modified in November, 1881, by reducing the amount which might be deposited on this account to \$25,000 a day, and was finally rescinded October 15, 1882.

The issues and redemptions of silver certificates of each denomination during the fiscal year have been as follows:

•	Outstand.	Iss	ued.	Rede	Outstand-	
Denomination.	ing June 30, 1881.	During fis- cal year.	To June 30, 1882.	During fis- cal year.	To June 30, 1882.	ing June 30, 1882.

Total	51, 166, 530	24, 300, 000	86, 230, 000	9, 369, 820	20, 133, 290	66, 096, 71

GOLD CERTIFICATES.

Of the old issue of gold certificates under the act of March 3, 1863, there were redeemed during the fiscal year \$745,800, making the total redemptions \$976,097,760.46, and reducing the amount outstanding to \$5,037,120.

Of the issue authorized by the act of July 12, 1882, \$138,000,000 have been printed for issue by the assistant treasurer of the United States in New York. Of these there have been issued to October 31, \$21,790,000, of which \$14,827,720 are held in the cash of the various sub-treasuries,

leaving the amount actually outstanding \$6,962,280. There is in preparation a separate series of certificates known as the "Washington issue," to be issued through this office for the use of the assistant treasurers in other cities than New York.

CLEARING-HOUSE CERTIFICATES.

During the fiscal year \$16,910,000 in clearing house certificates was issued and \$15,165,000 redeemed, leaving the amount outstanding \$13,360,000 as compared with \$11,615,000 outstanding at the close of the last fiscal year. The amount now actually oustanding is \$9,835,000.

The following table shows the total amount issued and redeemed, and the amount outstanding at the close of each fiscal year from 1873 to 1882:

Fiscal year.	Total amount issued.	Total amount redeemed.	Outstanding as shown by the Treasurer's books.
1873 1874 1875 1876 1877 1878 1879 1880 1881	219, 000, 000 301, 400, 000 378, 285, 000 464, 965, 000 554, 730, 000	\$25, 430, 000 78, 915, 000 159, 955, 000 268, 260, 000 324, 365, 000 418, 720, 000 525, 400, 000 001, 235, 000 616, 400, 000	\$31, 810, 000 58, 990, 000 59, 045, 000 33, 140, 000 53, 980, 000 46, 245, 000 29, 330, 000 11, 615, 000 13, 360, 000

The highest amount outstanding at the close of any fiscal year was \$59,045,000, on June 30, 1875. The use of these certificates has greatly declined since the resumption of specie payments.

FRACTIONAL SILVER AND MINOR COIN.

During the fiscal year 4,150 packages containing \$3,367,754.18 in fractional silver coin were forwarded from this office, at the expense of the government for express charges, in return for currency redeemed

or for deposits of lawful money in the Treasury.
Under the appropriation of \$25,000 made by the act of August 7, 1882, for the recoinage of uncurrent silver coins in the Treasury, \$383,273.96 in uncurrent silver three-cent and five-cent pieces, \$5,798.15 in foreign silver coins, and \$621 in standard silver dollars were recoined into \$363,821.34 in dimes, at a net loss of \$25,871.77. The excess of the loss over the \$25,000 appropriated was borne from the appropriation for the recoinage of gold and silver coins.

The denominations of the minor coin in the Treasury on September

30, 1882, were as follows:

Five-cent nickel				
Two-cent bronze One-cent bronze, nickel, and copper	 	 	4,834 52	,
Mixed				

504, 515 29

The supply of five cent nickel coins in the Treasury, which three years ago reached the sum of \$1,184,252.95, was exhausted during the year and their coinage was resumed by the Mint. None of these coins are supplied by the Treasury, but the one cent and five cent pieces are furnished in multiples of \$20 by the Mint, which bears the expense of their transportation.

Included in the amount on hand is a considerable quantity of coins of the various denominations unfit for circulation, for the recoinage of which an appropriation of \$1,000 has been made.

FRACTIONAL CURRENCY.

The amount of fractional currency redeemed during the fiscal year was only \$58,705.55, against \$109,001.05 in the preceding year. The amount outstanding at the close of the year was \$15,423,186.10. The redemptions for each year since 1876, when the issue ceased, have been as follows:

1877	\$14,043,458 05
1878	3,855,368 5 7
1879	705, 158 66
1880	251,717 41
1881	109,001 05
1882	58,705 55

MUTILATED, STOLEN, AND COUNTERFEIT CURRENCY.

There was detected by this office, in remittances of currency received for redemption during the year, \$5,436 in counterfeit United States notes, \$370.10 in counterfeit fractional currency, \$3,429 in counterfeit national-bank notes, and \$775 in "stolen" national-bank notes. The denominations of the counterfeit United States notes and national-bank notes rejected were as follows:

Denomination.	United States notes.	National-bank notes.
One d-llar Two dollars Five dollars Ten dollars Ten dollars Twonty dollars Fifty dollars One hundred dollars One thousand dollars	34 00 420 00 580 00 1, 380 00	\$84 00 1, 425 00 720 00 600 00
Total	5, 436 00	3, 429 00

The number of the counterfeit United States notes was 286, and of the counterfeit national bank notes 435.

During the year one of the national banks, a portion of whose notes was stolen when signed by but one of its officers, and put in circulation with the fictitious signature of the other, went into voluntary liquidation and deposited in the Treasury lawful money for the redemption of all of its circulation, including the stolen notes. By consent of the officers of the bank, and with the approval of the Secretary of the Treasury, the stolen notes when presented at this office have been redeemed from the bank's deposit of lawful money.

There was deducted during the year, on account of mutilations, from the face value of United States notes redeemed \$12,086; from fractional currency, \$199.68; and from notes of failed, liquidating, and reducing national banks, \$86.50; making the total deductions on this account \$319,149.16 on notes of the face value of \$2,406,233,928.57 redeemed. In accordance with the recommendation made in the Treasurer's last a mual report, the rule subjecting mutilated United States currency to a discount proportioned to the part lacking was modified, in March, 1882,

so that fragments equal to three-fifths of whole notes are redeemed in full, and notes of which from one-half to three-fifths remains at one-half their face value. This rule has been found to be sufficient for the protection of the Treasury from fraud, and its application has saved much labor and annoyance to this office, while it has relieved the holders of mutilated notes from the hardship to which they were formerly subjected. Mutilated United States notes and national-bank notes are now redeemed under substantially the same regulations.

SALES OF EXCHANGE.

During the year ending September 30, 1882, exchange between the principal cities was furnished by the Treasury Department to the amount of \$30,844,100. For deposits of gold coin in New York, telegraphic orders payable in silver certificates, amounting to \$14,929,500, were drawn on the assistant treasurers in Cincinnati, Chicago, Saint Louis, and New Orleans, of which \$8,499,500 was payable in New Orleans; and, for like deposits, orders payable in gold coin were drawn on Philadelphia for \$6,569,600, and on New Orleans for \$3,550,000. The exchange on New Orleans was sold for a premium of \$2,808.75. For deposits in New York and Baltimore, exchange amounting to \$795,000, payable in standard silver dollars, was drawn on Philadelphia, and \$5,000,000 in exchange on New York was sold in San Francisco for United States notes.

DEPOSITARY BANKS.

The public funds deposited with national bank depositaries during the fiscal year amounted to \$143,261,541.41, making the total receipts of public moneys by these depositaries since the establishment of the national banking system \$3,812,722,588.02. The balance remaining with them at the close of the year to the credit of the Treasurer was \$9,610,432.86, and the balance to the credit of disbursing officers amounted to \$3,152,254.56, making a total deposit of \$12,762,687.42, which is protected by \$15,925,000 in United States bonds lodged with the Treasurer.

The receipts and disbursements of public funds by bank depositaries during the last nineteen fiscal years have been as follows:

Fiscal year.	Receipts.	Funds transfer- red to deposi- tary banks.	to the Treasury	Drafts drawn on depositary banks.	
864	\$153, 395, 108 71	\$816,000 00	\$85, 507, 674 08	\$28, 726, 695 88	\$39, 976, 738 73

PACIFIC RAILROAD SINKING FUNDS.

There are held by this office on account of the Pacific Railroad sinking funds, established by the act of May 7, 1878 (20 Statutes, 56), bonds as follows:

For the Union Pacific Railroad Company.

Pacific Railway bonds, currency sixes. Loan of July 12, 1882, 3 per cents Funded loan of 1907, 4 per cents.	256, 450
	650, 100

For the Central Pacific Railroad Company.

Pacific Railway bonds, currency Loan of July 12, 1882, 3 per centruded loan of 1907, 4 per centruded.	its	 194,900
		838,000

Bonds of the funded loan of 1881, to the amount of \$256,450, held for the Union Pacific Railroad Company, and \$194,900, for the Central Pacific Railroad Company, continued at 3½ per cent., were exchanged for bonds of the loan of July 12, 1882, bearing 3 per cent.

TRUST FUNDS.

The Indian Trust Funds.

The bonds and stocks of the Indian Trust Fund, at the close of the fiscal year, in the custody of this office, in conformity with the act of Congress of June 10, 1876 (19 Statutes, 58), amounted to \$1,878,816.83\frac{3}{3}. Of this amount \$280,000 was in Pacific Railway bonds, currency sixes, and the remainder in State and corporation stocks and bonds, as shown in the table in the appendix.

During the fiscal year United States bonds to the amount of \$2,186,050 were sold, in pursuance of instructions from the Secretary of the Interior, and the proceeds, amounting to \$2,231,021, deposited in the Treasury, as provided for in the act of April 1, 1880 (21 Statutes, 70), and one bond of \$500, of the loan of July and August, 1861, was delivered to the Secretary of the Treasury for redemption, and the proceeds deposited in pursuance of the same act.

The remaining \$121,000 in bonds of the Nashville and Chattanooga Railroad Company, due July 1, 1882, were paid by the company at maturity, and the principal deposited in the Treasury in accordance with the act of April 1, 1880; the interest, \$3,630, was deposited in the Treasury to the credit of the Secretary of the Interior, trustee of various Indian tribes. Detached and unpaid coupons from these bonds to the amount of \$153,510 are held in this office. Action to obtain payment of this amount, with interest, is now pending in the United States circuit court at Nashville, Tenn.

American Printing-House for the Blind.

Under the act of March 3, 1879 (20 Statutes, 467), \$250,000 in United States four per cent. bonds are held in the name of the Secretary of the Treasury, trustee, "to promote the education of the blind," the interest on which is paid to the trustees of the American Printing House for the Blind, in Louisville, Ky., in conformity with that act.

Pennsylvania Company.

Under the provisions of department circular No. 146, dated November 29, 1876, \$200,000 in registered bonds of the funded loan of 1891, are held in trust for the Pennsylvania Company for the security of unappraised dutiable merchandise, and dutiable merchandise in bond, transported by it.

Manhattan Savings Institution.

United States bonds issued to replace those alleged to have been stolen from the vaults of the Manhattan Savings Institution, New York, are held in this office to the amount of \$200,000 to protect the United States from loss, as provided by the act of December 19, 1878 (20 Statutes, 589).

Cincinnati Chamber of Commerce.

Forty thousand dollars in United States 4 per cent. bonds, in the name of the Treasurer of the United States, in trust for the Cincinnati Chamber of Commerce and Merchants' Exchange, are held in this office in pursuance of a contract between the Secretary of the Treasury and the Cincinnati Chamber of Commerce and Merchants' Exchange, made under the authority of a joint resolution of Congress approved February 27, 1879 (20 Statutes, 488), being the investment of a partial payment for the site of the old post-office and custom house in the city of Cincinnati. The bonds are to be sold and the proceeds applied in payment of the property when a deed of conveyance is executed.

UNITED STATES BONDS HELD FOR NATIONAL BANKS.

At the close of the fiscal year the United States bonds held in trust for the national banks amounted to \$376,647,700. Of this amount \$360,722,700 was held to secure circulation, and \$15,925,000 to secure public moneys, as follows:

TO SECURE CIRCULATION.

TO SECURE CIRCULATION.	
Ten-forties of 1864, 5 per cents. Pacific Railway bonds, 6 per cents Funded loan of 1881, 5 per cents. Funded loan of 1881, continued at 3½ per cent Loan of July and August, 1861, centinued at 3½ per cent.	3, 326, 000 24, 000 202, 147, 650
Loan of 1863 ('81s), continued at 3½ per cent Funded loan of 1891, 4½ per cents.	18,004,300
Funded loan of 1907, 4 per cents.	97, 279, 800
	360, 722, 700
TO SECURE PUBLIC MONEYS.	

Pacific Railway bonds, 6 per cents	\$33,000
Loan of July and August, 1861, continued at 31 per cent	88, 300
Loan of 1863 ('81s), continued at 3½ per cent	797, 100
Funded loan of 1881, continued at 3½ per cent	
Funded loan of 1891, $4\frac{1}{2}$ per cents	854, 100
Funded loan of 1907, 4 per cents	6, 538, 500

15, 925, 000

The amount of bonds deposited during the year was \$129,474,400, and of bonds withdrawn, \$128,628,100. The total movement of bonds

held in trust for national banks was \$258,102,500.

The amount of United States bonds continued at 3½ per cent. held in trust for national banks July 1, 1882, was \$235,789,650. During the month of July \$795,000 of the above bonds, included in calls for redemption, were withdrawn. Of the remaining 3½ per cent. bonds \$180,524,250 have since been withdrawn and exchanged into 3 per cent. bonds, under the provisions of the act of July 12, 1882.

SEMI-ANNUAL DUTY.

The semi-annual duty assessed upon and collected from the national banks by the Treasurer of the United States for the fiscal year is as follows:

On circulation.	\$3,190,981 98
On deposits	5, 521, 927 47
On capital	437,774 90

9, 150, 684 35

This amount of semi-annual duty, which is the largest collected in any year since the establishment of the national banking system, exceeds the amount collected in the fiscal year ended June 30, 1881, by \$657.131.80.

The total amount of semi-annual duty collected by this office from the national banks for the fiscal years from 1864 to 1882, as shown in the appendix, is:

On circulation	\$52,253,518 24
On deposits	
On capital	7,585,911 31
m 1	

THE REDEMPTION OF NATIONAL-BANK NOTES.

The national bank notes received for redemption during the fiscal year amounted to \$76,089,327, an increase over the preceding year of \$16,439,068, or more than 27½ per cent. Notwithstanding this increase the redemptions were less than one-third as great as in 1877, when they reached \$236,210,375. \$28,012,000 was received from the city of New York, \$7,370,000 from Boston, and \$5,939,000 from Philadelphia. The largest amount received in any year from New York was \$80,925,000 in 1875, and from Boston \$80,527,000 in 1878, the amount in each case being greater than the entire redemptions during the fiscal year 1882.

The amount assorted during the year was \$74,593,730, of which \$3,801,500 was fit for circulation and returned to the banks that issued it, \$53,838,500 was unfit for circulation, and \$16,953,730 was of the issue of banks which have failed, gone into liquidation, or made deposits of lawful money for the retirement of part of their circulation. The amount of notes fit for circulation redeemed was less than in any preceding year, constituting but 5 per cent. of the total redemptions, while the amount of notes unfit for circulation was greater than in any of the preceding four years. The amount of notes fit for circulation redeemed has steadily declined since 1878. In that year they amounted to \$152,437,300, and constituted more than 70 per cent. of the total redemptions. The proportion of notes of reducing banks included in the

amount redeemed was greater than in any preceding year, being \$14,150,026, or nearly 19 per cent. of the total amount assorted.

The expenses incurred in the redemption of national-bank notes during the year were \$129,529.38 as against \$126,212.12 during the preceding year. The increase is more than covered by the increase in the charges for transportation, the expenses of redeeming and assorting the notes having been reduced from \$92,368.26 in 1881 to \$90,326.07 in 1882—a smaller expenditure than in any preceding year. Heretofore, in accordance with a construction of the law adopted at the outset, the charges for transportation have been assessed upon the several national banks in proportion to the amount, and the expenses of assorting in proportion to the number, of their notes redeemed. For the last fiscal year, for the first time, all of the expenses of redemption have been assessed in proportion to the amount of the notes of each bank redeemed. This method seems to conform more closely than the former one to the requirement of the law that "the amount assessed upon each association shall be in proportion to the circulation redeemed," while it saves the labor and expense of computing the number of notes redeemed for each

At the Treasurer's suggestion there was inserted in the act of July 12, 1882, extending the corporate existence of national banks, a provision that "all national banks which have heretofore made or shall hereafter make deposits of lawful money for the reduction of their circulation shall be assessed * * * for the cost of transporting and redeeming their notes redeemed from such deposits subsequently to June 30, 1881." Accordingly, all notes of reducing banks redeemed during the last fiscal year have been subjected to assessment, making the total amount assessed \$71,794,526, and the average rate \$1.80 $\frac{410}{1000}$ for each \$1,000 redeemed and assorted. Had the reducing banks been relieved from assessment as heretofore, the assessment upon the other banks would have been at the rate of \$2.25 for each \$1,000, or one-fourth greater.

The same section provides that the national banks which shall thereafter make deposits of lawful money for the retirement in full of their circulation shall, at the time of their deposit, be assessed for the cost of transporting and redeeming their notes then outstanding a sum equal to the average cost of the redemption of national bank notes during the preceding year. The assessments made under this section on national banks going into voluntary liquidation are credited to a consolidated account to which are to be annually charged the actual expenses of transporting and redeeming the notes of such banks.

DEPOSITS FOR RETIFEMENT OF BANK CIRCULATION.

The ninth section of the act of July 12, 1882, extending the charters of national banks, limits to \$3,000,000 a month the deposits of lawful money which may be made for the withdrawal of bank circulation under section 4 of the act of June 20, 1874, exclusive of the amount which may be withdrawn in consequence of the calling by the Secretary of the Treasury of bonds for redemption. The amount deposited on this account from the date of the passage of the act to October 31, was \$4,581,825, of which \$1,882,340 consisted of lawful money deposited with the Treasurer and assistant treasurers of the United States, and \$2,699,485 of the proceeds of called bonds. The deposits of lawful money during the same period for the retirement of the circulation of national banks in voluntary liquidation were \$1,860,135.

The following table shows the monthly deposits on each account:

	Deposit	s on reducing	Deposits on	Aggregate deposits on		
Date.	Lawful money.	Proceeds of called bonds.	Total on re- ducing account.	liquidating account.	liquidating and reducing accounts.

RESTORATION OF SALARIES.

In conclusion, the Treasurer earnestly renews the recommendation made in his last annual report for the restoration to their former amounts of the salaries of the officers of his office which were reduced by the appropriation act of 1876. The amount required to make the restoration is only \$3,600 per annum—the salary of three clerks of the lowest grade—while the number of officers who would be benefited by it is twenty. Even with the restored salaries, the pay of these officers will be much less than is paid for like services and responsibilities in private establishments, and less than the salaries of officers of no higher rank in some other branches of the public service. The action recommended would simply restore the salaries to the amounts at which they are fixed by law (18 Statutes, 397, 399).

No loss of the public money has occurred in this office during the last

year.

Very respectfully, your obedient servant,

JAS. GILFILLAN, Treasurer of the United States.

Hon. Charles J. Folger, Secretary of the Treasury.

REPORT

OF

THE REGISTER OF THE TREASURY.

TREASURY DEPARTMENT, REGISTER'S OFFICE,

November 8, 1882.

401

SIR: I have the honor to transmit herewith a report of the work performed in this office during the fiscal year ended on the 30th day of June, 1882.

It affords me pleasure to state that the performance of their official duties by the employés of this bureau has been faithful and satisfactory.

TONNAGE DIVISION.

The total tonnage of the country exhibits an increase of 108,198.77 tons, the enrolled tonnage having increased 150,019.53 tons, and the licensed, under 20 tons, 1,470.92 tons, while the registered tonnage has decreased 43,291.68 tons.

Below are given the totals for the last two years:

		1881.	1882.		
•	Vessels.	Tons.	Vessels.	Tons.	
Registered	2, 326 21, 739	1, 335, 586. 18 2, 722, 148. 29	2, 185 22, 183	1, 292, 294, 50 2, 873, 638, 74	
Total	24; 065	4, 057, 734. 47	24, 368	4, 165, 933. 24	

The comparison of the different classes of vessels is as follows:

	•	1881.	1882.		
	Vessels.	Tons.	Vessels.	Tons.	
Sailing vessels Steam vessels Canal-loats Barges	16, 760 4, 860 1, 327 1, 118	2, 350, 393. 14 1, 264, 998. 25 116, 978. 73 325, 364. 35	16, 819 5, 191 1, 138 1, 220	2, 361, 251, 27 1, 355, 825, 65 107, 394, 00 341, 462, 32	
Total	24, 065	4, 057, 734. 47	24, 368	4, 165, 933. 24	

It may be seen from the foregoing that the sailing tonnage has increased 10,858.13 tons, the steam tonnage 90,827.40 tons, and the barge tonnage 16,097.97 tons, while the canal-boat tonnage has decreased 9,584.73 tons.

The proportion of the sailing tonnage registered is 48 per centum, and the steam tonnage registered 12 per centum.

SHIP-BUILDING.

The following table exhibits the class, number, and tonnage of the vessels built during the last two years:

Class.	1	881.	1882.		
Olada.	Vessels.	Tons.	Vessels.	Tons.	
Sailing vessels. Steam vessels. Canal-boats. Barges	57	81, 209. 57 118, 070. 55 10, 189. 94 70, 988. 58	666 502 68 135	118, 798, 50 121, 842, 66 7, 882, 06 33, 746, 51	
Total	1, 108	280, 458. 64	1, 371	282, 269. 73	

From the foregoing it appears that the amount built during the past year was greater by 1,811.09 tons than that of the preceding year.

The tonnage built during the last two years in the several grand divisions of the country is shown below:

Division.	1:	881.	1882.		
Division.	Vessels.	Tons.	Vessels.	Tons.	
Atlantic and Gulf coasts Pacific coast Northern lakes Western rivers Total	58 215	114, 348, 66 11, 417, 49 73, 503, 61 81, 188, 88 280, 458, 64	890 75 254 152 1,371	172, 306. 89 15, 776. 95 58, 368. 94 35, 816. 95 282, 269. 78	

The following table exhibits the iron tonnage built in the country since 1867:

Class.		1868.	1869.	1870.	1871.	1872.	1873.	1874.
Sailing vessels		2, 801	1, 039 3, 545	679 7, 602	2, 067 13, 412	12, 766	26, 548	33, 097
Total		2,801	4, 584	8, 281	15, 479	12, 766	26, 548	33, 097
Class.	1875.	1876.	1877.	1878.	1879.	1880.	1881.	1882.
Sailing vessels	21, 632	21, 346	5, 927	26, 960	22, 008	44 25, 538	36 28, 320	40, 097
Total	21, 632	21, 346	5, 927	26, 960	22, 008	25, 582	28, 356	40, 097

Table showing the amount of iron tonnage outstanding may be found in the Report on Commerce and Navigation.

THE FISHERIES.

The tonnage engaged in the fisheries during the last two years is as follows:

77/-1	1881.		1:	882.
Fisheries.	Vessels.	Tons.	Vessels.	Tons.
Cod and mackerel. Whale	2, 120 173	76, 137. 16 38, 551. 52	2, 090 146	77, 862. 46 32, 802. 22

Below is shown the amount of tonnage employed in the cod and mackerel fisheries, with the per centum of each state:

States.	Tonnage.	Per cent
Maine.	18, 731. 26	24
New Hampshire	1, 009. 36	1.3
Massachusetts	39, 744. 00	51.1
Rhode Island	2, 090. 82	2.7
Connecticut	3, 991. 91	5.1
New York		9. 2
New Jersey	24.59	. 03
Maryland	893. 13	1.1
Virginia	1, 053, 53	1.4
Florida		.2
Alabama	68, 21	.1
Texas	56.03	. 07
Galifornia	2, 881. 47	3.7
	77, 862. 46	100

This shows an increase of about 2 per cent. during the year. The tonnage employed in the whale fisheries is given below:

Continue Metaletic	1881.		1:	1882.	
Customs districts.	Vessels.	Tons.	Vessels.	Tons.	
Boston, Mass	5 18	794, 87 1, 726, 97	5 11	794, 87 1, 052, 81 891, 28	
Edgartown, Mass New Bedford, Mass New Loudon, Conn	132 11	1, 371. 19 32, 908. 88 1, 749. 61	117 8	28, 876. 66 1, 186. 66	
Total	173	38, 551. 52	146	·32, 802. 25	

Of the above, 88 per cent. belongs to New Bedford. Fuller tables, showing the various classes of tonnage, may be found in the appendix to this report.

DIVISION OF RECEIPTS AND EXPENDITURES.

The following statement exhibits the work of this division for the year ended June 30, 1882:

The number of warrants registered during the year for civil, diplomatic, miscellaneous, internal revenue, and public debt expenditures and repayments	04 961
was. In the preceding year	24, 361 25, 254
Decrease	893
The number of warrants registered for receipts from customs, lands, internal revenue, direct tax, and miscellaneous sources was	
Increase	481
The number of warrants registered for payments and repayments in the War, Navy, and Interior (pension and Indian) Departments was	12,669 15,036
Decrease	
The number of drafts registered was In the preceding year	33, 198
Increase	1,019
The number of journal pages required for the entry of accounts relating to the civil, diplomatic, internal revenue, miscellaneous, and public debt receipts and expenditures was In the preceding year	5,878
Decrease	85
The number of certificates furnished for statements of accounts was	
Increase	968
The number of accounts received from the First and Fifth Auditors and Commissioner of the General Land Office was. In the preceding year	
Increase	448

In the appendix will be found a statement of the receipts and expenditures of the government, as required by the standing order of the House of Representatives of December 30, 1791, and section 237 of the Revised Statutes; also, statements of the money expended and the number of persons employed and the occupation and salary of each person at each custom-house, as required by section 258 of the Revised es. Very respectfully, your obedient servant, B. K. BRUCE, Register. Statutes.

Hon. CHARLES J. FOLGER, Secretary of the Treasury.

LIABILITIES

OF THE

UNITED STATES TO INDIAN TRIBES UNDER TREATY STIPULATIONS.

DEPARTMENT OF THE INTERIOR, OFFICE OF INDIAN AFFAIRS, Washington, August 3, 1882.

SIR: I have the honor to submit herewith, for transmittal to the honorable the Secretary of the Treasury, in order that the same may be embraced in his finance report for the last fiscal year, a statement showing the present liabilities of the United States to Indian tribes under treaty stipulations.

Very respectfully,

H. PRICE, Commissioner.

Hon. SECRETARY OF THE INTERIOR.

DEPARTMENT OF THE INTERIOR, August 4, 1882.

Respectfully submitted to the honorable Secretary of the Treasury, in accordance with the request of the Commissioner of Indian Affairs herein contained.

H. M. TELLER, Secretary.

551

Names of treaties.	Description of annuities, &c.	Number of installments yet unap- propriated, explanations, &c.	Reference to laws, Statutes at Large.	Annual amount necessary to meet stipulations, indefinite as to time, now allowed, but liable to be discontinued.	Aggregate of future appropriations that will be required during a limited number of years, to pay limited annuites incidentally necessary to effect the payment.	Amount of annual liabilities of a permanent character.	Amount held in trust by the United States on which 5 per cent. is annually paid, and amounts which, invested at 5 per cent. produce permanent annuities.
Apaches, Kiowas, and Comanches.	1 1000	Fifteen installments, unappropriated, at \$30,000 each.			' '
